 - [Additional information](#)
-

Presents data collected from a representative sample of felony cases filed in the nation's 75 largest counties during May 2004. Murder cases were tracked for up to 2 years and all other cases for 1 year to provide a complete overview of the processing of felony defendants from case filing to disposition and sentencing. These electronic tables provide data on felony defendants, including demographic characteristics, types of arrest charges, criminal record (criminal justice status at the time of arrest and number and type of prior arrests and convictions), conditions of pretrial release (bail amounts, type of release bonds, and pretrial misconduct), adjudication outcomes (dismissal, diversion, guilty plea, trial conviction rates), and sentencing data for convicted felony defendants. This is an electronic only document. NCJ 221374

Findings based on these tables are included in [Felony Defendants in Large Urban Counties, 2004](#), a periodic report that has been published biennially since 1990. The data represented are from a single year of a data series. More recent editions may be available. To view a list of recent reports in the series and get additional information about the data series, go to the [publications](#) page.

Methodology

The SCPS sample was designed and selected by U.S. Census Bureau staff. It is a 2-stage stratified sample, with 40 of the 75 most populous counties selected at stage one and a systematic sample of state court felony filings (defendants) within each county selected at stage two. The 40 counties were divided into 4 first-stage strata based on court filing information. Ten counties were included in the sample with certainty because of their large number of court filings. The remaining counties were allocated to the three noncertainty strata based on the variance of felony court dispositions.

SCPS first-stage design

Number of counties

Stratum	Sample	Universe	Weight
One	10	10	1.0

Two	10	18	1.8
Three	10	22	2.2
Four	10	25	2.5

The second-stage sampling (filings) was designed to represent all defendants who had felony cases filed with the court during the month of May 2004. The participating jurisdictions provided data for every felony case filed on selected days during that month. Depending on the first-stage stratum in which it had been placed, each jurisdiction provided filings data for 5, 10, or 20 selected business days in May 2004. Data from jurisdictions that were not required to provide a full month of filings were weighted to represent the full month (see Appendix A).

SCPS second-stage design

Stratum	Number of days of filings provided	Weight
One	5	4
Two	10	2
Three	10	2
Four	20	1

The 2004 SCPS collected data for 15,761 felony cases filed during May 2004 in 40 large counties. These cases were part of a sample that was representative of the estimated 57,497 felony cases filed in the nation's 75 most populous counties during that month. Murder cases were tracked for up to 2 years and all other cases for up to 1 year.

This report is based on data collected from the following counties: Alabama (Jefferson); Arizona (Maricopa, Pima); California (Alameda, Contra Costa, Los Angeles, Orange, Riverside, San Bernardino, San Diego, San Mateo, Santa Clara); Florida (Broward, Miami-Dade, Palm Beach, Pinellas); Georgia (Fulton); Hawaii (Honolulu); Illinois (Cook); Indiana (Marion); Maryland (Baltimore, Montgomery); Michigan (Wayne); New Jersey (Essex); New York (Bronx, Kings, Nassau, Queens, Westchester); Ohio (Franklin); Pennsylvania (Montgomery, Philadelphia); Tennessee (Shelby); Texas (Dallas, El Paso, Harris, Tarrant, Travis); Utah (Salt Lake City); Virginia (Fairfax).

Because the data came from a sample, a sampling error is associated with each reported number. In general, if the difference between two numbers is greater than twice the standard error for that difference, we can say that we are 95% confident of a real difference and that the apparent difference is not simply

the result of using a sample rather than the entire population.

Offense categories

Felony offenses were classified into 16 categories for this report. These were further classified into the four major crime categories of violent, property, drug, and public-order. The following listings are a representative summary of the crimes in each category; however, these lists are not meant to be exhaustive. All offenses, except for murder, include attempts and conspiracies to commit.

Violent offenses

Murder -- Includes homicide, nonnegligent manslaughter, and voluntary homicide. Excludes attempted murder (classified as felony assault), negligent homicide, involuntary homicide, or vehicular manslaughter, which are classified as other violent offenses.

Rape -- Includes forcible intercourse, sodomy, or penetration with a foreign object. Does not include statutory rape or nonforcible acts with a minor or someone unable to give legal consent, nonviolent sexual offenses, or commercialized sex offenses.

Robbery -- Includes unlawful taking of anything of value by force or threat of force. Includes armed, unarmed, and aggravated robbery, car-jacking, armed burglary, and armed mugging.

Assault -- Includes aggravated assault, aggravated battery, attempted murder, assault with a deadly weapon, felony assault or battery on a law enforcement officer, and other felony assaults. Does not include extortion, coercion, or intimidation.

Other violent offenses -- Includes vehicular manslaughter, involuntary manslaughter, negligent or reckless homicide, nonviolent or non-forcible sexual assault, kidnapping, unlawful imprisonment, child or spouse abuse, cruelty to a child, reckless endangerment, hit-and-run with bodily injury, intimidation, and extortion.

Property offenses

Burglary -- Includes any type of entry into a residence, industry, or business with or without the use of force with the intent to commit a felony or theft. Does not include possession of burglary tools, trespassing, or unlawful entry for which the intent is not known.

Larceny/theft -- Includes grand theft, grand larceny, and any other felony theft, including burglary from an automobile, theft of rental property, and mail theft. Does not include motor vehicle theft, receiving or buying stolen property, fraud, forgery, or deceit.

Motor vehicle theft -- Includes auto theft, conversion of an automobile, receiving and transferring

an automobile, unauthorized use of a vehicle, possession of a stolen vehicle, and larceny or taking of an automobile.

Forgery -- Includes forging of a driver's license, official seals, notes, money orders, credit or access cards or names of such cards or any other documents with fraudulent intent, uttering a forged instrument, counterfeiting, and forgery.

Fraud -- Includes possession and passing of worthless checks or money orders, possession of false documents or identification, embezzlement, obtaining money by false pretenses, credit card fraud, welfare fraud, Medicare fraud, insurance claim fraud, fraud, swindling, stealing a thing of value by deceit, and larceny by check.

Other property offenses -- Includes receiving or buying stolen property, arson, reckless burning, damage to property, criminal mischief, vandalism, criminal trespassing, possession of burglary tools, and unlawful entry for which the interest is unknown.

Drug offenses

Drug trafficking -- Includes trafficking, sales, distribution, possession with intent to distribute or sell, manufacturing, and smuggling of controlled substances. Does not include possession of controlled substances.

Other drug offenses -- Includes possession of controlled substances, prescription violations, possession of drug paraphernalia, and other drug law violations.

Public-order offenses

Weapons -- Includes the unlawful sale, distribution, manufacture, alteration, transportation, possession, or use of a deadly weapon or accessory.

Driving-related -- Includes driving under the influence of drugs or alcohol, driving with a suspended or revoked license, and any other felony in the motor vehicle code.

Other public-order offenses -- Includes flight/escape, parole or probation violations, prison contraband, habitual offender, obstruction of justice, rioting, libel, slander, treason, perjury, prostitution, pandering, bribery, and tax law violations.

Terms related to pretrial release

Released defendant -- Includes any defendant who was released from custody prior to the disposition of his or her case by the court. Includes defendants who were detained for some period of time before being released and defendants who were returned to custody after being released because of a violation of the conditions of pretrial release. The terms "on pretrial release" and "released pending disposition"

are both used in this report to refer to all released defendants.

Detained defendant -- Includes any defendant who remained in custody from the time of arrest until the disposition of his or her case by the court. This report also refers to detained defendants as "not released."

Failure to appear -- Occurs when a court issues a bench warrant for a defendant's arrest because he or she missed a scheduled court appearance.

Types of financial release

Surety bond -- A bail bond company signs a promissory note to the court for the full bail amount and charges the defendant a fee for the service (usually 10% of the full bail amount). If the defendant fails to appear, the bond company is liable to the court for the full bail amount. Frequently the bond company requires collateral from the defendant in addition to the fee.

Deposit bond -- The defendant deposits a percentage (usually 10%) of the full bail amount with the court. The percentage of the bail is returned after the disposition of the case, but the court often retains a small portion for administrative costs. If the defendant fails to appear in court, he or she is liable to the court for the full bail amount.

Full cash bond -- The defendant posts the full bail amount in cash with the court. If the defendant makes all court appearances, the cash is returned. If the defendant fails to appear in court, the bond is forfeited.

Property bond -- Involves an agreement made by a defendant as a condition of pretrial release requiring that property valued at the full bail amount be posted as an assurance of his or her appearance in court. If the defendant fails to appear in court, the property is forfeited. Also known as "collateral bond."

Types of nonfinancial release

Release on recognizance (ROR) -- The court releases the defendant on a signed agreement that he or she will appear in court as required. In this report, the ROR category includes citation releases in which arrestees are released pending their first court appearance on a written order issued by law enforcement or jail personnel.

Unsecured bond -- The defendant pays no money to the court but is liable for the full amount of bail should he or she fail to appear in court.

Conditional release -- Defendants are released under specified conditions. Monitoring or supervision, if required, is usually done by a pretrial services agency. In some cases, such as those involving a third-party custodian or drug monitoring and treatment, another agency may be involved in the supervision of the defendant. Conditional release sometimes includes an unsecured bond.

Other type of release

Emergency release -- Defendants are released in response to a court order placing limits on a jail's population.

Note: In some of the 40 counties included in the 2004 SCPS study, prosecutors did not screen out any felony arrests before filing charges. In these counties, the SCPS sample cases are representative of all felony cases received by prosecutors and any cases subsequently screened out by the prosecutor are included in the SCPS dismissal category. In other counties, all felony arrests were reviewed by prosecutors before the decision to file felony charges was made. In these jurisdictions, the SCPS sample cases do not include those in which a person was arrested for a felony but felony charges were not filed. Weights are rounded to second decimal place. Populations are U.S. Census Bureau figures for July 1, 2004.

Note: All defendants who failed to appear in court and were not returned to the court during the 1-year study period are counted as fugitives. Some of these defendants may have been returned to the court at a later date. Rearrest data were collected for 1 year. Rearrests occurring after the end of this 1-year study period are not included in the table. Information on rearrests occurring in jurisdictions other than the one granting the pretrial release was not always available. Detail may not add to total because of rounding.

-- Less than 0.5%.

...Data were not available for this jurisdiction.
