

Development mission values:

The International Linear Collider development process is committed to develop facilities that:

Are responsive to the stakeholders concerns and desires

Fulfill their respective technical functions while having minimal impact on existing communities, quality of life and the environment

Develop architectural designs that complement and enhance their respective environments and communities

Comply with all local zoning and aesthetic requirements

A process with the community....

Addressing the questions, possibilities and stakeholders in the development of the surface buildings, structures and equipment required for the proposed International Linear Collider.
