PROCESSING CHILE PEPPER PILOT LOSS ADJUSTMENT STANDARDS HANDBOOK

2003 and Succeeding Crop Years

**UNITED STATES DEPARTMENT OF AGRICULTURE
WASHINGTON, D.C. 20250**

FEDERAL CROP INSURANCE HANDBOOK		NUMBER: 25680
SUBJECT: PROCESSING CHILE PEPPER PILOT LOSS ADJUSTMENT STANDARDS HANDBOOK 2003 AND SUCCEEDING CROP YEARS	DATE: December 5, 2002	
	OPI: Product Development Division	
	APPROVED: /S:/ Tim B. Witt Deputy Administrator, Research and Development	

THIS HANDBOOK CONTAINS THE OFFICIAL FCIC-APPROVED LOSS ADJUSTMENT STANDARDS FOR THIS CROP FOR THE 2003 AND SUCCEEDING CROP YEARS. IN THE ABSENCE OF INDUSTRY-DEVELOPED, FCIC-APPROVED PROCEDURE FOR THIS CROP FOR 2003 AND SUCCEEDING CROP YEARS, ALL REINSURED COMPANIES WILL UTILIZE THESE STANDARDS FOR BOTH LOSS ADJUSTMENT AND LOSS TRAINING.

SUMMARY OF CHANGES/CONTROL CHART

Major Changes: See changes or additions in text which have been **highlighted**. Three stars (***) identify information that has been removed.

Changes for Crop Year 2003 (FCIC 25680) issued November 2002:

- A. Page 3, section 3 A (1) (d) 2: Added the phrase “in the processor contract.”
- B. Page 4, section 3 A (3) (a): Added phrase “unless otherwise provided by the Special Provisions.”
- C. Page 4, section 3 A (4): Revised the language in this section and moved to Page 5, subsection 3 C (4). Moved the language in subsection 3 A (5) to subsection 3 A (4).
- D. Page 4, section 3 B, Insurable Acreage: Incorporated language from Manager’s Bulletin 98-008.
- E. Page 5, section 3 C: Revised subsection 3 C to clarify Bypassed Acreage guidelines.
- F. Page 7, section 3 D (2): Provisions Not Applicable to CAT Coverage: Revised (2) to indicate that Hail and Fire Exclusion provisions are also not applicable if additional coverage is less than 65/100 or comparable coverage. Removed reference to “Limited Coverage.”
- G. Page 7, section 3 D: Added note to refer to the Crop Insurance Handbook and Loss Adjustment Manual for other provisions not applicable to CAT.
- H. Page 7, section 3 E, Unit Division: Added language to track with Crop Provisions.

PROCESSING CHILE PEPPER PILOT LOSS ADJUSTMENT STANDARDS HANDBOOK

SUMMARY OF CHANGES/CONTROL CHART (Continued)

- I. Page 9, section 5 C (2): Revised procedure for determining row width measurement from the center of the first row space to the center of the “fifth” row space.
- J. Page 9, section 5 D (2) Example: Changed result of dividing 34,848 by 1000 from 34.9 to 34.8.
- K. Page 10, section 5 E (2) Table: Changed Amount of Insurance percentage from 50% to 40% to comply with new statement on the Special Provisions for 2003 crop year. Deleted the word “period” in the Description of Stage for Stage 3 in order to track with the Crop Provisions.
- L. Page 10, section 5 F Example: Changed the 50% to 40% and also changed the \$900 to \$922 to track with a coverage level amount that is shown on the actuarial. The resulting product is \$369.
- M. Page 12, section 5 G (2) R4: Deleted MATURE STAGE. The phrase MATURE STAGE is not fully descriptive of the R4 stage.
- N. Page 14, section 6 A: Added the statement “for planted acreage with no emerged seed, and on plants...” to the chart showing when the stand reduction appraisal method is used.
- O. Page 14, section 6 A: Added a “Note” instructing the adjuster to refer to the LAM if the stand reduction is solely due to non-emerged seed due to insufficient soil moisture.
- P. Page 14, section 6 A Table - Plant Damage Method - Hail (Vegetative Stages) “Use” column: Added the words “on plants.” Chile Pepper Count Method: Revised “Use” column language to read: “from the R 4 stage of growth until the peppers are mature and sufficient in size to weigh.
- Q. Page 16, section 6 C (1) (i); Page 16, section 6 D (k); and Page 17, section 6 E (2) (i): Revised language to read: “...dollar amount of insurance per acre to obtain the appraisal in dollars and cents per acre”..., in order to comply with the new statement on the Special Provisions to determine the value of immature appraised chile pepper production, for vegetative stages VC through V5 and reproductive stages R1 through R3 for 2003 crop year.
- R. Page 16, section 6 C (2) and 6 C (2) (a) Example: Added the words “after thinning” in parenthesis for clarification.
- S. Page 16, section 6 C (2) (b): Added the name of the appraisal worksheet. Added graphic illustration to show entries to be made on appraisal worksheet.
- T. Page 18, section 6 F (3) (a) 1: Inserted the words “to determine the total number of plants” to clarify the reason for making the count.
- U. Page 18, section 6 F (3) (a) 3: Added the words “dead or” and the words “dead and /or” on Page 22, subsection 8B, item 16. Both additions are to ensure that all of the plants that should be counted are included.

PROCESSING CHILE PEPPER PILOT LOSS ADJUSTMENT STANDARDS HANDBOOK

SUMMARY OF CHANGES/CONTROL CHART (Continued)

- V. Page 18, section 6 F 3 (a) 4: Deleted calculation instructions since they are not used in the appraisal.
- W. Page 19, section 6 F (3) (a) 5: Added the words “Part II, item 37” since the result of dividing the factored plants by the number of plants in the sample is also entered here on the appraisal worksheet.
- X. Page 19, section 6 F (3) (b): LIMBS AND PODS DESTROYED 2: Added the words “Part II, item 42,” since the result of multiplying the number of crown limbs destroyed by the factor for the applicable stage from **TABLE F** is also entered here on the appraisal worksheet.
- Y. Page 19, section 6 F (c) FOR PODS DESTROYED 4: Added the words “Part II, item 48” since the result of multiplying the percent of pods destroyed by the factor for the applicable stage from **TABLE F** to obtain the gross pod loss percent is also entered here on the appraisal worksheet.
- Z. Page 20, section 6 G and Page 35, section 8 B Chile Pepper Count Method instructions, Part I, Item 12,: Revised the language in parenthesis to read “the calendar date for the end of the insurance period specified in the crop provisions for the specific type” to be consistent with the wording in parenthesis in subsection 6 G (3).
- AA Page 20, section 6 G (7) and Page 21, section 6 H (6): Added the statement: “Multiply the pounds per acre in subsection ... by the base contract price to obtain the value of the appraised production per acre.” The value of the appraised production needs to be shown on the appraisal worksheet in dollars and cents; then transferred to Column “J” of the Production Worksheet.
- BB. Page 22, section 8 B Chile Pepper Stand Reduction and Vegetative Stage Plant Damage Appraisal Worksheet instructions, item 1: Added an apostrophe, an “s” and the word “Name” to “Insured” in the heading in order to be consistent with other worksheets in the handbook. Revised the heading on the appraisal worksheets accordingly.
- CC. Page 22, section 8 B, Chile Pepper Stand Reduction and Vegetative Stage Plant Damage Appraisal Worksheet instructions Item 7; Page 27, Chile Pepper Reproductive Stage Stand Reduction and Plant Damage Appraisal Worksheet subsection 8 B , Item 7; Page 34, Part I, Item 9, Page 37, Part II, Item 23, and Page 44, subsection 9 B, Item G instructions (Section I of the Production Worksheet), Revised entry instructions for type.
- DD. Page 23, section 8 B, Chile Pepper Stand Reduction and Vegetative Stage Plant Damage Appraisal Worksheet instructions, item 25 and Page 29, Chile Pepper Reproductive Stage Stand Reduction and Plant Damage Appraisal worksheet instructions, Part I item 28: Added the word “Remaining” to the heading. Revised the headings on the appraisal worksheets accordingly.

PROCESSING CHILE PEPPER PILOT LOSS ADJUSTMENT STANDARDS HANDBOOK

SUMMARY OF CHANGES/CONTROL CHART (Continued)

- EE. Page 23, section 8 B, Chile Pepper Stand Reduction and Vegetative Stage Plant Damage Appraisal worksheet instructions, item 26; and Page 29, Chile Pepper Reproductive Stage Stand Reduction and Plant Damage Appraisal worksheet instructions, item 29: Changed headings to “Dollar Amount of Insurance Per Acre” to comply with the new Special Provision statements and revised the instructions to enter the dollar amount of insurance per acre from the insured’s Summary of Coverage. Revised item headings and entries on the appraisal worksheets accordingly.
- FF. Page 23, section 8 B, Chile Pepper Stand Reduction and Vegetative Stage Plant Damage Appraisal worksheet instructions, item 27; and Page 29, Chile Pepper Reproductive Stage Stand Reduction and Plant Damage Appraisal worksheet instructions, item 30: Changed (LBS/A) in the headings to (Dollars/Acre), changed “normal yield” in the instructions to: “Dollar Amount of Insurance Per Acre,” and changed “pounds” in the instructions to “dollars and cents” to comply with the new statement on the Special Provisions for 2003 crop year. Revised item headings and entries on the appraisal worksheets accordingly.
- GG. Page 25 - Example 1; Page 26 - Example 2 - Chile Pepper Appraisal Worksheet (Stand Reduction and Vegetative Stage Plant Damage Method); Page 32 - Example 3; and Page 33 - Example 4 - Item 7, Type: Added “name” - Long Green New Mexican (per instructions for Item 7).
- HH. Page 35, Part II, Chile Pepper Count Method; and Page 38, Part II, Chile Pepper Weight Method Appraisal Worksheet, Item 31 - Remarks: Added instructions to enter the calculation for converting the appraised bushels per acre to dollar and cents per acre, then to transfer this dollar amount to Column “J” of the Production Worksheet.
- II. Page 38, Chile Pepper Weight Method Appraisal Worksheet - Item 25: Added the words “in pounds” and in item 26 added the words “in pounds to tenths” to clarify the specific unit of measurement.
- JJ. Page 44, section 9 B, item E: Revised instructions to clarify not to make an entry if there is no rate class listed in the actuarial documents.
- KK. Page 45, section 9 B, Column “J” instructions (Section I of the Production Worksheet): Changed “pounds” to “dollars and cents” in accordance with determining appraised potential in dollars. Revised entries in Column “J” on the Production Worksheet accordingly.
- LL. Page 46, section 9 B, Column “L” instructions (Section I of the Production Worksheet): Deleted “Line out the heading and enter “Value.” Deleted the instructions to enter the greater of the actual price per pound or the base contract price and replaced with the words “MAKE NO ENTRY.” Also, deleted the entries in Section I, Column “L,” on the Production Worksheet since the appraisals are calculated in dollars and cents on the appraisal worksheets, and transferred to Column “J” on the Production Worksheet.

PROCESSING CHILE PEPPER PILOT LOSS ADJUSTMENT STANDARDS HANDBOOK

SUMMARY OF CHANGES/CONTROL CHART (Continued)

- MM. Page 46, section 9 B, Column “N” instructions (Section I of the Production Worksheet):
Removed the words “times “L” since the appraisals are calculated in dollars and cents on the appraisal worksheets and then transferred to Column “J” on the Production Worksheet.
- NN. Page 47, section 9 B, Column “P” instructions (Section I of the Production Worksheet):
Inserted the word “dollar” and the words “from the Summary of Coverage” to clarify the amount of insurance per acre to use.
- OO. Page 51, section 9 B, “Column I, b instructions (Section II of the Production Worksheet):
Deleted the words in parenthesis (from item 18 of Summary of Harvested Production) since there is no Summary of Harvested Production Worksheet in the handbook.
- PP. Page 54, section 9 B, Section I of the Production Worksheet, Column H (Stage): Changed Line 1 from Stage 1 to Stage 2.
- QQ. Page 54, section 9 B, Section I of the Production Worksheet, Column I, Line 4: Inserted U to make UH.
- RR. Page 54, section 9 B, Section I of the Production Worksheet: Revised entries in Columns “J,” “N,” “O,” “P,” “Q,” and Items 17, 23, and 24 in Section II of the Production Worksheet.
- SS. Page 54, section 9 B, Remarks Section of the Production Worksheet: Deleted calculation of Stage 1 guarantee since there are no Stage 1 entries on the Production Worksheet (after changing Line 1 to Stage 2).
- TT. Page 56, **TABLE C**, **TABLE E**, and Page 57, **TABLE F**: Deleted the word “Table” in the headings and added the letter “S” to the word FACTOR in each heading to make the heading more descriptive of the contents of the table. Also, added the letter “S” to the word “FACTOR” in the heading of **TABLE G**, Page 57.
- UU. Page 57: Deleted **TABLE H**, “Normal Yield,” since the normal yield is no longer used to determine the immature appraisal in pounds per acre.
- VV. Made various editorial changes throughout the handbook for clarification and accuracy and to comply with current approved format.

1. INTRODUCTION

This handbook identifies the crop-specific procedural requirements for adjusting Multiple Peril Crop Insurance (MPCI) losses in a uniform and timely manner. These procedures, which include crop appraisal methods and claims completion instructions, supplement the general (not crop-specific) procedures, forms, and manuals for loss adjustment identified in the Loss Adjustment Manual (LAM).

2. SPECIAL INSTRUCTIONS

This handbook remains in effect until superseded by reissuance of **either** the entire handbook **or** selected portions (through slipsheets or bulletins). If slipsheets have been issued for a handbook, the original handbook as amended by slipsheet pages shall constitute the handbook. A bulletin can supersede either the original handbook or subsequent slipsheets.

A. DISTRIBUTION

The following is the minimum distribution of forms completed by the adjuster for the loss adjustment inspection:

One legible copy to insured. The original and all remaining copies as instructed by the insurance provider.

NOTE: It is the insurance providers' responsibility to maintain original insurance documents relative to policyholder servicing as designated in their approved plan of operations.

B. TERMS, ABBREVIATIONS, AND DEFINITIONS

- (1) Terms, abbreviations, and definitions **general** (not crop specific) to loss adjustment are identified in the LAM.
- (2) Terms, abbreviations, and definitions **specific** to processing chile pepper loss adjustment and this handbook, which are not defined in this section, are defined as they appear in the text.
- (3) Definition(s):

Allowable Cost The dollar amount per pound for harvesting and hauling that is shown in the Special Provisions.

Base Contract Price The price stipulated on the processor contract without regard to discounts or incentives that may apply.

Fruit Set	The reproductive stage of the plant at which 30 percent of the plants have produced at least one pod that has reached a minimum of one half inch in length.
Harvest	The removal of pods from the plant either by hand or machine.
Mature Chile Pepper	A chile pepper is considered to be mature when it is ready for harvesting and/or processing.
Processor	Any business enterprise regularly engaged in processing chile peppers into products for human consumption/use, that possesses all licenses and permits for processing chile peppers required by the state in which it operates, and that possesses facilities, or has contractual access to such facilities, with enough equipment to accept and process the contracted chile peppers within a reasonable amount of time after harvest.
Processor Contract	A written contract between the producer and the processor, containing at a minimum: <ul style="list-style-type: none"> (a) The producer's commitment to plant and grow chile peppers, and to deliver the chile pepper production to the processor; (b) The processor's commitment to purchase all the production from a specified number of acres or the specified quantity of production stated in the processor contract; and (c) A base contract price or formula for a price that will be paid to the producer for the production stated in the contract.
Thinning	A process to reduce emerged seedlings to groups of 1 to 3 seedlings every 10-12 inches.

3. INSURANCE CONTRACT INFORMATION

The insurance provider is to determine that the insured has complied with all policy provisions of the insurance contract. Crop provisions which are to be considered in this determination include (but are not limited to):

A. INSURABILITY

- (1) The crop insured will be all chile peppers in the county, in which the insured has a share, for which premium rates **are** provided by the actuarial documents; **and**

- (a) That are planted to be harvested and processed for human consumption/use.
- (b) That are grown under an irrigated practice.

NOTE: Refer to the LAM and the Basic Provisions for the definition of an irrigated practice.

- (c) That are grown by a person who in at least one of the three previous crop years:

- 1 Grew chile peppers for commercial sale to a processor; or
- 2 Managed a chile pepper farming operation that contracted with a processor.

- (d) That are grown under and in accordance with the requirements of a processor contract, executed before the acreage reporting date and is not excluded from the processor contract at any time during the crop year;

- 1 Insured acreage is limited to the amount specified in the processor contract; or
- 2 If a specific number of acres are not specified **in the processor contract**, all planted acres will be insured and the liability will be limited to the value of the contracted production minus allowable cost.

- (e) That are not:

- 1 Interplanted with another crop;
- 2 Planted into an established grass or legume; or
- 3 Grown for direct marketing.

- (2) A chile pepper producer who is also a processor may establish an insurable interest if the following requirements are met:

- (a) The processor must comply with the Processing Chile Pepper **Pilot** Crop Provisions;
- (b) Prior to the sales closing date, the Board of Directors or officers of the processor must execute and adopt a resolution that contains the same terms as an acceptable processor contract. Such resolution will be considered a processor contract under this policy; and
- (c) An inspection performed by the insurance provider reveals that the processing facilities comply with the definition of a processor contained in the Processing Chile Pepper **Pilot** Crop Provisions.

- (3) Insurance coverage is not provided on any acreage on which:
 - (a) Chile peppers, tomatoes, beets, cucurbits, eggplant, spinach, or beans have been grown in either of the two previous crop years, or on which cotton was grown the previous crop year, unless otherwise provided by the Special Provisions; or
 - (b) Chile peppers are not placed in rows far enough apart to permit mechanical cultivation, unless otherwise provided by the Special Provisions.
- (4) Any acreage of chile peppers damaged before the final planting date, whenever less than 50% of the plant stand remains and it is practical to replant, must be replanted. In addition to the definition contained in the Basic Provisions, it will not be considered practical to replant unless such production from the replanted acreage can be delivered under the terms of the chile pepper processor contract, or the processor agrees in writing that it will accept the production from the replanted acreage.

B. INSURABLE ACREAGE

- (1) If the processor contract states that the processor will accept the production from a specific number of acres and the insured plants more than this amount, the specific number of acres stated in the contract is insurable and the remaining acreage is uninsurable.
- (2) **Minimum or Maximum Acres**
 - (a) If a MINIMUM number of acres is specified in the processor contract and the insured does not plant at least this amount, and the contract contains no provision that makes the processor liable to accept the production, there is no contract and no insurable acres.
 - (b) If a MAXIMUM number of acres is specified, the acreage to be reported as insurable is the planted acres, not to exceed the maximum. Planted acres that exceed the maximum are uninsurable.
 - (c) If both a minimum and maximum are specified, the same rules as stated in (a) and (b) above apply.
- (3) If the contract states that the processor will accept production from more planted acreage than the number contained in the contract, the number of acres that may be reported as insurable is the planted acres, not to exceed the maximum acreage stated in the contract that the processor agrees to accept. The processor contract terms applicable to the extra production must comply with the definition of a processor contract in order to be insurable.
- (4) If the insured plants more acres than are stated in the processor contract and the processor is willing to accept the production from the additional acreage, the contract may be amended prior to or on the acreage reporting date unless otherwise specified in the crop provisions. If the contract is amended after this date, the additional acreage is uninsurable.

- (5) If the insured plants more acres than what is insurable under the crop provisions, the total production (harvested and appraised) from all planted acreage (whether reported as insurable or uninsurable) within each unit will be divided by the number of planted acres to establish the average yield per acre. This yield per acre will then be multiplied by the insured acreage to determine the production to count for the claim. This approach eliminates the need to determine which acreage is the insurable acreage (e.g., 40 acres specified in the processor contract and 45 acres planted).
- (6) A producer may contract with more than one processor. The producer must designate on the acreage report what acreage is under which contract (i.e., the 10 acres in the south part of the field is covered under processor A (unit 00100), the 15 acres in the middle of the field is covered under processor B (unit 00200), and the 15 acres in the north part of the field is covered under processor C (unit 00300)). The insurance provider should provide this information to the adjuster.
- (7) Generally, the processor contract contains the names of each individual whose production will be accepted under the processing contract. If all names are not listed, the insurance provider must verify that the production will be accepted under the processor contract. Verification should be documented and maintained in the insurance file.

C. GUIDELINES RELATIVE TO “BYPASSED” CHILE PEPPER ACREAGE

- (1) Bypassed acreage is “Land on which production is ready for harvest but the processor elects not to accept such production so it is not harvested.”
 - (a) Inspections must be made by the insurance provider on all unharvested acreage of chile peppers to verify the cause of loss and the reason the acreage was bypassed by the processor.
 - (b) Appraisals are not required on acreage bypassed due only to an insurable cause of loss. Appraisals will be made on all unharvested acreage when any uninsurable cause of loss prevented timely harvest of the crop.
- (2) The insured must provide acceptable documentation of the reason the acreage was bypassed. Failure to provide such documentation will result in the insurance provider's determination that the acreage was bypassed due to an uninsured cause of loss.
- (3) Production losses of chile peppers unharvested, not timely harvested, or bypassed are insurable if the losses are due to an insurable cause of loss (as stated in the crop provisions), such as adverse weather conditions. Adverse weather includes, but is not limited to:
 - (a) Excessive moisture that prevents harvesting equipment from entering the field or that prevents the timely operation of harvesting equipment; and
 - (b) Abnormally hot or cold temperatures that cause an unexpected number of acres over a large producing area to be ready for harvest at the same time, affecting the timely harvest of a large number of such acres or the processing of such production is beyond the capacity of the processor, either of which causes the acreage to be bypassed.

NOTE: Refer to the Processing Chile Pepper Crop Provisions for notice of damage requirements. The insured should contact the insurance provider immediately upon being notified that acreage will be bypassed so an inspection by the insurance provider can be made, but not later than the time specified in the crop provisions.

- (4) Insurance coverage is not provided on any loss of production if acreage is not timely harvested (unless such delay in harvesting is solely and directly due to an insured cause of loss) or is bypassed due to:
 - (a) breakdown or non-operation of equipment or facilities;
 - (b) the insured is the processor and did not harvest the insured acreage first;
 - (c) the availability of a crop insurance payment; or
 - (d) failure to follow the requirements contained in the processor contract.
- (5) The stage column on the claim form will show “UB” for unharvested acreage that is bypassed or not timely harvested by the processor because the chile peppers are damaged due to INSURED causes of loss. The potential production per acre shown on the claim form in the column for appraised potential will be **zero (“0”)**.
- (6) When there is damaged and undamaged chile pepper acreage in the same field (and can be identified as such) and the processor chooses to bypass the entire field instead of harvesting the undamaged acreage, the damaged and undamaged acreage will be divided into separate subfields.
 - (a) An appraisal is not required on the damaged acres, provided the insurance provider can verify the damage was due to an insurable cause of loss.
 - (b) The undamaged acreage will be appraised and the production will be counted as production to count for claim purposes.
- (7) The stage column on the claim form will show “PB” for unharvested (bypassed) acreage **when insured cause(s) of loss did not prevent the processor from timely harvesting** (e.g., the processor over-contracted, equipment breakdown, etc.). The potential production per acre (as of the date the crop should have been harvested) shown on the claim form in the column for appraised potential will be the appraised amount and will be counted as production against the guarantee for claim purposes.
 - (a) A separate appraisal is required to assess production lost on acreage damaged by uninsured causes of loss (i.e., livestock damage, failure to follow good farming practices, etc.) The appraised per acre production from such acreage will be shown on the claim form in the item for uninsured causes.
 - (b) Although acreage may have been bypassed and an insured cause of loss did not prevent harvest (e.g., the processor over-contracted, equipment breakdown, etc.), an appraisal which shows production below the unit guarantee due to insurable causes (e.g., drought reduced the potential PRIOR to bypass) may result in an indemnity.

(8) When an insured cause of loss did not prevent timely harvest of the chile peppers, the production to count for chile pepper acreage that is bypassed or not timely harvested will include:

- (a) The appraised production on unharvested acreage;
- (b) Any production or value lost due to uninsured cause(s), whether harvested or unharvested acreage; or
- (c) The harvested/delivered production from any acreage not timely harvested. The amount of harvested production to count will be determined by dividing the dollar amount paid, payable, or which should have been paid under the terms of the processor contract for the quality and quantity of the chile peppers delivered to the processor, by the base contract price per pound.

NOTE: If the price paid for the harvested production has been reduced because of quality deficiencies resulting from not timely harvesting (when an insured cause of loss did not prevent timely harvest of chile peppers), an appraisal for uninsured cause will be required. Subtract the amount paid from the amount that would have been paid before the price reduction. Divide this amount by the contract price and enter the result in the column on the claim form for uninsured cause appraisals.

(9) **PROCESSOR PAYMENTS FOR “BYPASSED” ACREAGE** - Do NOT include such payments in any appraisal OR as production to count.

D. PROVISIONS NOT APPLICABLE TO CAT COVERAGE

- ***
- (1) Optional units.
 - (2) Hail and Fire Exclusion provisions (also not applicable if additional coverage is less than 65/100 or comparable coverage).
 - (3) High Risk Land Exclusion.

NOTE: Refer to the Crop Insurance Handbook (CIH) and Loss Adjustment Manual (LAM) for other provisions not applicable to CAT.

E. UNIT DIVISION

Refer to the insurance contract for unit provisions. **NOTE:** Unless limited by the Crop or Special Provisions, a basic unit, as defined in the Basic Provisions, may be divided into optional units if, for each optional unit, all the conditions stated in the applicable provisions are met.

- (1) For processor contracts that stipulate the amount of acreage, refer to the Basic Provisions. In addition to, or instead of, establishing optional units by section, section equivalent or FSA farm serial number, optional units may be established based on the type designated on the Special Provisions.
- (2) For processor contracts that stipulate the amount of production to be delivered, refer to the Crop Provisions.

- (a) There will be no more than one basic unit for all production contracted under each processor contract; and
- (b) Provisions that allow optional units by section, section equivalent, or FSA farm serial number and by irrigated and non-irrigated practices are not applicable.
- (c) Optional units may only be established based on the types designated on the Special Provisions.

F. QUALITY ADJUSTMENT

There is no quality adjustment for processing chile peppers.

4. REPLANTING PROCEDURE

There is currently no replanting payment available for processing chile peppers. Refer to the Basic Provisions and the Crop Provisions for this crop for replanting requirements prior to the final planting date.

5. PROCESSING CHILE PEPPER APPRAISALS

A. GENERAL INFORMATION

Potential production will be appraised in accordance with procedures specified in this handbook and the LAM.

B. SELECTING REPRESENTATIVE SAMPLES FOR APPRAISALS

- (1) Determine the minimum number of required samples for a field or subfield by the field size, the average stage of growth, age (size) and general capabilities of the plants, and variability of potential production and plant damage within the field or subfield.
- (2) Split the field into subfields when:
 - (a) variable damage causes the crop potential to appear to be significantly different within the same field; or
 - (b) the insured wishes to destroy a portion of a field.
- (3) Each subfield must be appraised separately.
- (4) Take not less than the minimum number (count) of representative samples required in **TABLE A.**

C. MEASURING ROW WIDTH FOR SAMPLE SELECTION

Use these instructions for all appraisal methods except stand reduction.

- (1) Use a measuring tape marked in inches or convert a tape marked in tenths, to measure row width (refer to the LAM for conversion table).
- (2) Measure across FOUR OR MORE rows, from the center of the first row space to the center of the **fifth** row space (or as many rows as needed) and divide the result by the number of rows measured across, to determine an average row width in whole inches.

EXAMPLE:

$$160 \text{ inches} \div 4 \text{ rows} = 40 \text{ in. average row width}$$

D. DETERMINING SAMPLE ROW LENGTH FOR 1/1000 ACRE

- (1) Apply the average row width (**refer to TABLE C**) to determine the length of sample row required for a 1/1000 of an acre sample.
- (2) For row widths other than those in **TABLE C**, determine the sample row length as follows:
 - (a) Divide row width in inches (nearest one-half inch) by 12 and round to the nearest hundredth.
 - (b) Divide 43,560 by the determined row width in item (a) above. Divide the result by 1000 for 1/1000 acre sample.

EXAMPLE: Measured row width in the field is 15 inches. $15 \text{ inches} \div 12 \text{ inches/foot} = 1.25 \text{ feet rows}$. $43,560 \text{ sq. ft.} \div 1.25 \text{ ft.} = 34,848$. $34,848 \div 1000 = 34.8$ ft. for length of row.

E. CHILE PEPPER STAGES OF INSURANCE

- (1) These instructions provide stage information for use when appraising potential production during various stages.
- (2) The stage determination is based on the length of time between specified stages, depending on whether plants are direct-seeded or transplanted. Fields should be split into subfields to reflect distinctly different stages from different parts of the field.

Stage	Amount of Insurance	Description of Stage
1	40%	For seeded acreage until thinning.
2	75%	From thinning or transplanting to fruit set.
3	100%	From fruit set until harvest or end of insurance. ***

F. DETERMINING THE STAGE AMOUNT OF INSURANCE PER ACRE

Any acreage of chile peppers damaged in the first, second, or third stage to the extent that the majority of producers in the area would not normally further care for the crop must be **destroyed** prior to a final claim being finalized. The amount of insurance payable for such acreage will be based on the stage the plants had achieved when the damage occurred.

EXAMPLE: The insured selected \$922 per acre amount of insurance and the crop was determined to be in stage 1 when the damage occurred. The table in subsection 5 E above shows stage 1 percentage to be 40%.

Multiply \$922 by 40% = \$369 (rounded to nearest whole dollar) to obtain the stage 1 per acre amount of insurance.

G. CHILE PEPPER GROWTH STAGES

(1) VEGETATIVE STAGES

- (a) Plants are classified as being in the “V” (vegetative) stages until a bud appears in the crown; thereafter, the plant will be classified as “R” (reproductive) stage.
- (b) Stages of growth should be determined by node identification, not by leaf identification. Many leaflets will be sloughed and correct staging may become impossible.
- (c) Stage identification begins by identifying the cotyledonary nodes. They are the first two nodes on the plant located opposite each other on the main stem.
- (d) For each stage of growth, with the exception of VC stage, there will always be three nodes per stage. All stages are based on 50% of the plants at or beyond a given phase of development.

“V” STAGE DESCRIPTION

- VC Plants 1 inch to 1 3/4 inch in height; plant remains in this stage for approximately 5 days from emergence.
- V1 Internodes above cotyledonary nodes have elongated 1/2 inch or more; first true leaf approaching full size, second and third leaves developing rapidly and approaching full size near the end of period. Time interval 15 days.
- V2 Fourth, fifth and sixth internodes have elongated 1/2 inch or more. Time interval 15 days.
- V3 Seventh, eighth and ninth internodes have elongated 1/2 inch or more. Time intervals 15 days.
- V4 Tenth, eleventh and twelfth internodes have elongated 1/2 inch or more. Time interval 15 days.
- V5 From thirteenth internode to the crown has elongated 1/2 inch or more. Time interval 15 days.

(2) REPRODUCTIVE STAGES

Plants are classified as being in the “R” (reproductive) stages when the first bud is visible. The first bud normally appears when the crown limbs are beginning to form. The crown limbs normally begin to form above the 14th or 15th node.

“R” STAGE DESCRIPTION

R1 The plant is approximately 76 days from emergence to this stage. The first bud (bloom) will appear on the plant when the crown limbs are beginning to develop. This may be as low as the 14th node or as high as the 17th node. The first bud may have aborted but the scar will remain visible. The crown limbs have elongated approximately 1 1/2 inches. Time interval 9-10 days.

R2 The first set of blooms are developing and the crown limbs are beginning to branch. The crown limbs have elongated to the third node from the crown. Time interval 30 days.

R3 The plant is blooming and podding freely. Mature pods will appear at the first and second nodes of the crown limbs. This stage begins above the third node from the crown. Time interval 21 days.

R4 The plant has now set all pods that will contribute to the ultimate yield. Any pods less than 1 inch will not contribute to the ultimate yield and should not be considered.

(3) For hail damage the stage of growth at the time of damage can be determined by inspecting the plant to determine the portions (nodes, pods, etc.) exposed at the time of the storm. In the absence of hail, and as verification, the stage can be determined by counting back from the date of adjustment by the time-intervals between stages.

NOTE: Do not attempt to go from reproductive to vegetative stages using time intervals.

6. APPRAISAL METHODS

A. GENERAL INFORMATION

These instructions provide information on appraisal methods for:

Appraisal Method...	Use...
Stand Reduction Method (Vegetative Stages)	for planted acreage with no emerged seed and on plants from thinning through the V5 stage of growth.
Plant Damage Method - Hail (Vegetative Stages)	on plants from thinning through the V5 stage of growth for hail damage.
Stand Reduction Method (Reproductive Stages)	from the R1 through the R3 stage of growth.
Plant Damage Method - Hail (Reproductive Stages)	from the R1 stage of growth through the R3 stage of growth for hail damage.
Chile Pepper Count Method	from the R4 stage of growth until the peppers are mature and sufficient in size to weigh.
Chile Pepper Weight Method	for mature unharvested chile peppers that are sufficient in size to weigh.

NOTE: If the reduction in stand is solely due to non-emerged seed due to insufficient soil moisture, do not complete appraisals prior to the time specified in the LAM. Refer to the subsection in the LAM regarding deferred appraisals and non-emerged seed.

B. DEFERMENT OF CHILE PEPPER APPRAISALS BEFORE PODDING

Accurate determination of chile pepper production is very difficult until pods have developed. Field inspections that show both totally destroyed, partially destroyed plants, heavy stalk bruising or extensive leaf defoliation in the sample would justify a deferment. The recovery capabilities of the chile pepper plant are determined for the most part on the basis of weather conditions for the remainder of the growing season.

- (1) If practical, and the insured will agree, defer the appraisal for chile peppers until pods have developed and then use chile pepper count or weight method, whichever is applicable.

NOTE: If there is no production potential, enter "0" appraised potential in the applicable item on the claim form and complete the claim.

- (2) Complete the preliminary inspection with special attention to the type of damage and its severity.

- (3) If acreage will be released to go to another use:
 - (a) Look at all fields or subfields thoroughly within the unit. It is important to note the acreage that is not damaged.
 - (b) Explain to the insured that a more accurate determination of the amount of loss can be made **closer to** harvest time.
 - (c) Mark the areas as instructed in the LAM for deferred appraisals.
 - (d) Advise the insured that if the crop is destroyed, the samples that you specified must be preserved and cared for.
- (4) Refer to the LAM for additional instructions regarding deferred appraisals.
- (5) If not practical and/or the insured will not agree to defer the appraisal until pods have developed, use the stand reduction method as outlined below.

C. STAND REDUCTION METHOD - VEGETATIVE STAGES (from thinning through V5 stage)

- (1) **VEGETATIVE STAGE - TOTALLY DESTROYED:** The following procedure is applicable for original stands of up to 240 plants per 100 feet of row after thinning.

NOTE: If original stand EXCEEDS 240 plants per 100 feet of row, use (2) below.

 - (a) Determine the minimum number of required representative samples. Refer to **TABLE A**.
 - (b) Determine the stage of growth at the date of damage. (Refer to subsection 5 G.)
 - (c) Determine the stage of growth at the date of adjustment. (Refer to subsection 5 G.)
 - (d) Determine the original number of plants per 100 feet of row by counting the number of live, missing, and dead plants. Round the number of plants to the nearest ten plants (i.e., 225 plants equals 230 plants).
 - (e) Count the number of plants totally destroyed in each 100-foot row sample. Round the number of destroyed plants to the nearest ten plants (i.e., 82 plants equal 80 plants).
 - (f) Using the numbers in (d) and (e) above, refer to **TABLE B** to obtain the V-Stage Stand Reduction percent loss.
 - (g) If the loss is from plants that are totally destroyed only, total the V-Stage Stand Reduction percent losses and divide by the number of samples to obtain the sample average damage

- (h) Subtract the sample average damage from 100 percent to obtain the percent potential.
- (i) Multiply the percent potential times the dollar amount of insurance per acre to obtain the appraisal in dollars and cents per acre.
- (j) Refer to **EXAMPLE 1**, Stand Reduction-Vegetative Stages-Totally Destroyed Chile Pepper Appraisal Worksheet for additional information.

NOTE: If there is plant damage due to hail, follow the instructions for the Plant Damage Method, and complete computations as described.

- (2) The following procedure is applicable for loss from plants totally destroyed in V-stages of growth when original stand EXCEEDS 240 plants (after thinning) in 100 feet of row.
 - (a) Reduce the totally destroyed plants by the number of plants in original stand in excess of 240 and apply to the chart FOR ORIGINAL STAND OF 240.

EXAMPLE:

310 plants in original stand (after thinning)
 130 plants totally destroyed
 (310 exceeds 240 by 70 plants)
 130 minus 70 = 60 (modified plants destroyed)
 Apply chart at 240 original plants
 Apply chart at 60 plants totally destroyed
 Stand Reduction Loss = 3%

- (b) On the Stand Reduction and Vegetative Stage Plant Damage appraisal worksheet under item 15, draw a diagonal line. Enter the number of original plants above the diagonal line and 240 below the diagonal line. Draw a diagonal line under item 16, and enter the number of plants totally destroyed above the diagonal line and the modified number below the diagonal line.

- (c) Complete the remainder of the appraisal as outlined in subsection 6 C (1) (a) 5 through 9 above.

D. PLANT DAMAGE METHOD - HAIL - VEGETATIVE STAGES

- (1) **VEGETATIVE STAGE - PARTIALLY DESTROYED:** The Plant Damage Method is used in conjunction with the Stand Reduction Method to determine loss of production from damage due to hail, **only**.
 - (a) Individually evaluate each plant in 10 feet of row within the 100 foot sample used to determine stand reduction.
 - (b) Determine the node at which each plant has been cut off.

- (c) Using the Chile Pepper Field notes for cut-off plants (bottom half of the appraisal worksheet - Vegetative Stage), enter the number of cut-off plants at the appropriate node, and multiply by the appropriate factor.
 - (d) Total the results from all samples.
 - (e) Count the total number of live plants (including plants with and without damage) in the 10 foot sample.
 - (f) Divide the total cut-offs by the total number of live plants in the sample to obtain the percent loss. Round the results to tenths of a percent.
 - (g) Multiply the percent loss by the percent crop remaining to obtain the net damage.
 - (h) Add the percent loss from any stand reduction to the net damage to obtain the total percent damage.
 - (i) Add the total percent damage from all samples and divide by the number of samples to obtain the sample average damage.
 - (j) Subtract the sample average damage from 100 percent to obtain the percent potential.
 - (k) Multiply the percent potential times the dollar amount of insurance per acre to obtain the appraisal in dollars and cents per acre.
- (2) Refer to **EXAMPLE 2**, Stand Reduction and Hail Damage-Vegetative Stages Chile Pepper Appraisal Worksheet.

E. STAND REDUCTION METHOD - REPRODUCTIVE STAGES (from R1 through R3 stage)

- (1) Stand Reduction adjustment in the reproductive stage consists of plants totally destroyed (cut-off below the cotyledonary nodes), dead and/or plants damaged to the extent that they cannot recover and contribute to the ultimate yield.
- (2) Information for plants totally destroyed, etc., should be entered in the Part II of the Appraisal Worksheet/Reproductive Stage Stand Reduction and Plant Damage Method and transferred to the appropriate items in Part I.

REPRODUCTIVE STAGES - TOTALLY DESTROYED

- (a) Determine the minimum number of required representative samples. Refer to **TABLE A**.
- (b) Determine the stage of growth at the date of damage (Refer to subsection 5 G), and enter in Part I.
- (c) Determine the stage of growth at the date of adjustment (Refer to subsection 5 G), and enter in Part I.
- (d) Determine the original number of plants per 10 feet of row by counting the number of live, missing, and dead plants.

- (e) Count the number of plants totally destroyed in each 10-foot sample.
- (f) Complete Part II, items 31 through 34 of the Reproductive Stage Stand Reduction and Plant Damage Method Appraisal Worksheet, and transfer the result in item 34 to Part I, item 15 of the worksheet.

NOTE: Do not refer to **TABLE B** to obtain the percent plants destroyed. Stand reduction in the reproductive stage is on a 1-for-1 basis.

- (g) If the loss is from totally destroyed plants only, total the percent plants from all samples in Part I, item 24, and divide by the number of samples to obtain the average damage.
- (h) Subtract the average damage from 100 percent to obtain the percent potential.
- (i) Multiply the percent potential times the dollar amount of insurance per acre to obtain the appraisal in dollars and cents per acre.
- (j) Refer to **EXAMPLE 3**, Stand Reduction-Reproductive Stages-Totally Destroyed Plants Chile Pepper Appraisal Worksheet for additional information.

NOTE: If there is plant damage, follow the instructions for the Plant Damage Method, and complete computations as described.

F. PLANT DAMAGE METHOD - HAIL - REPRODUCTIVE STAGES

- (1) Plant Damage adjustment in the reproductive stage consists of plants totally destroyed (cut-off below the cotyledonary nodes), plants damaged to the extent that they cannot recover and contribute to the ultimate yield, partially destroyed plants, crown limbs destroyed and small/large pods destroyed for damage due to hail, **only**.
- (2) Loss for plants totally destroyed, partially destroyed, crown limbs destroyed, or pod damage **are** entered in the Part II of the Appraisal Worksheet/Reproductive Stage Stand Reduction and Plant Damage Method.
- (3) For plants totally or partially destroyed, use 10 feet of row within the 100 foot sample used for stand reduction.

(a) REPRODUCTIVE STAGES - TOTALLY AND PARTIALLY DESTROYED

- 1** Count the number of live, totally destroyed, and partially destroyed plants **to determine the total number of plants** in the representative 10-foot sample.
- 2** Count the number of dead or totally destroyed plants in the representative 10-foot sample.
- 3** Divide the number of **dead or** totally destroyed plants by the **total** number of plants in the sample to obtain the percent plants destroyed.

- 4** Multiply the number of plants partially destroyed times the applicable factor from **TABLE D**.

EXAMPLE:

Stage of Growth on DOD: R3
2 plants partially destroyed, (1 at C9-C11, 1 at C12-C15)

Refer to TABLE D: (1 plant @ C9-C11) X 90 factor = 90
(1 plant @ C12- C15 X 80 factor = 80
Total 170_

5 Divide the factored plants destroyed by the number of plants in the sample. Enter the result in Part II, item 37 and Part I, item 16, rounded to tenths.

(b) LIMBS AND PODS DESTROYED:

For limbs and pods destroyed, use every 4th plant in the 10 feet of row for a total of 5 plants. If 5 plants cannot be selected within the 10 feet of row, continue in the same row by pulling every 4th plant until 5 plants are selected.

1 Count the total number of crown limbs destroyed in the 5-plant sample.

NOTE: For partially destroyed crown limbs, total the percentage of each crown limb destroyed in the 5-plant sample and divide by 100 to obtain the equivalent number of whole limbs destroyed.

EXAMPLE:

R3 Stage

PLANT #1 - 20% + 100% + 60% = 180%
#2 - 40% + 40% + 50% = 130%
#3 70% + 20% = 90%
#4 - 100% + 50% + 50% = 200%
#5 - 100% + 70% + 30% = 200%
800% divided by 100 = 8 limbs destroyed.

2 Multiply the number of crown limbs destroyed by the factor for the applicable stage from TABLE E. Enter the result in Part II, item 42 and Part I, item 19, rounded to tenths.

(c) For Pods Destroyed:

1 Count the number of pods for the 5-plant sample selected.

2 Count the number of pods destroyed for the 5-plant sample selected

3 Divide the number of pods destroyed by the total number of pods in the sample to obtain the percent of pods destroyed. Round the result to the nearest tenth of a percent (i.e., .098 = 9.8%).

4 Multiply the percent of pods destroyed by the factor for the applicable stage from TABLE F to obtain the gross pod loss percent. Enter the result in Part II, item 48 and Part I, item 22, rounded to tenths.

After completing Part II and transferring the appropriate entries to Part I, complete Part I as outlined for items 12 through 30 in subsection 8 B (Appraisal Worksheet instructions for the Reproductive Stage Stand Reduction and Plant Damage Method). Refer to **EXAMPLE 4**, Stand Reduction and Hail Damage-Reproductive Stages Chile Pepper Appraisal Worksheet.

G. CHILE PEPPER COUNT METHOD

This appraisal method is used to determine the average number of mature (or would be mature by the calendar date for the end of the insurance period specified in the crop provisions for the specific type) chile peppers within a sample row (1/1000 acre); thereby, allowing a pound per-acre appraisal of potential production. Refer to subsection 5 C and D for determination of sample row length. Conduct the appraisal as follows:

- (1) Determine the minimum number of required representative samples. Refer to **TABLE A**.
- (2) Determine the required row width and length of sample row for 1/1000 of an acre. Refer to **TABLE C**.
- (3) Count the number of mature (or would be mature by the calendar date for the end of the insurance period specified in the crop provisions for the specific type) chile peppers in the sample row.
- (4) Divide the total number of chile peppers determined in (3) above by the number of sample plots to determine the average chile peppers per sample.
- (5) Multiply the average chile peppers per sample by the type factor (**TABLE G**) to obtain the potential pounds per sample for the type. Round the result to tenths.
- (6) Multiply the result in subsection 6 G (5) by the acre factor (1000) to obtain the pounds per acre.
- (7) Multiply the pounds per acre in subsection 6 G (6) by the base contract price to obtain the value of the appraised production per acre.

H. CHILE PEPPER WEIGHT METHOD

This appraisal method is used to determine the quantity of chile peppers (by weight) in a sample row to determine the potential production in pounds per acre. Refer to subsection 5 C and D for determination of sample row length. Conduct the appraisal as follows:

- (1) Determine the minimum number of required representative samples. Refer to **TABLE A**.
- (2) Determine the required row width and length of sample row for 1/1000 of an acre. Refer to **TABLE C**.
- (3) Harvest and weigh the chile peppers in each sample plot.
- (4) Add all sample plot weights together, and divide by the total number of sample plots to determine an average sample weight.
- (5) Multiply the result in 6 H (4) by the acre factor (1000) to obtain the pounds per acre.

- (6) Multiply the pounds per acre in 6 H (5) by the base contract price to obtain the value of the appraised production per acre.

7. APPRAISAL DEVIATIONS AND MODIFICATIONS

A. DEVIATIONS

Deviations in appraisal methods require FCIC written authorization (as described in the LAM) prior to implementation.

B. MODIFICATIONS

There are no pre-established modifications contained in this handbook. Refer to the LAM for additional information.

8. APPRAISAL WORKSHEET ENTRIES AND COMPLETION PROCEDURES

A. GENERAL INFORMATION

- (1) Include the insurance provider's name in the appraisal worksheet title if not preprinted on the insurance provider's worksheet or when a worksheet entry is not provided.
- (2) Include the claim number on the appraisal worksheet (when required by the insurance provider), when a worksheet entry is not provided.
- (3) Separate appraisal worksheets are required for each unit appraised, and for each field or subfield. Refer to section 5 for sampling requirements.

NOTE: Standard appraisal worksheet items are numbered consecutively in subsection B. An example appraisal worksheet is also provided to illustrate how to complete entries.

B. WORKSHEET ENTRIES AND COMPLETION INFORMATION

CHILE PEPPER STAND REDUCTION AND VEGETATIVE STAGE PLANT DAMAGE APPRAISAL WORKSHEET INSTRUCTIONS

Verify or make the following entries:

**Item
No.**

Information Required

Company: Name of insurance provider, if not preprinted on the worksheet (Company Name).

Claim Number: Claim number as assigned by the insurance provider.

1. **Insured's Name:** Name of the insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.
2. **Policy No.:** Insured's assigned policy number.
3. **Crop Year:** Crop year, as defined in the policy, for which the claim has been filed.
4. **Unit No.:** Five-digit unit number from the Summary of Coverage after it is verified to be correct (e.g., 00100).
5. **Field ID:** Field identification symbol.
6. **Practice:** Three-digit code number entered exactly as specified on the actuarial documents, for the practice carried out by the insured. If "No Practice Specified," enter appropriate 3-digit code number from the actuarial documents.
7. **Type:** Three-digit code number, entered exactly as specified on the actuarial documents for the type of chile pepper grown by the insured (e.g., Long Green New Mexican (201). If "No Type Specified," enter appropriate 3-digit code number from the actuarial documents.
8. **Acres:** Number of determined acres, to tenths, in field or sub-field being appraised.
9. **Row Width:** Row width to nearest inch.
10. **Date of Damage:** First three letters of the month during which MOST of the insured damage (including progressive damage) occurred. Include SPECIFIC DATE where applicable, as in the case of hail damage (e.g., Aug. 11).
11. **Cause of Damage:** Name of insured cause of loss for **this crop** as listed in the LAM. If an insured cause of loss is coded as "Other," explain in the Remarks.
DIRECT DAMAGE
12. **Sample No.:** If more than five samples are needed, (refer to **TABLE A** for minimum **representative** sample requirements) use additional pages, and number the samples 6, 7, 8, etc.
13. **DOD:** Stage of growth on date of damage. (Refer to subsection 5 G.)
14. **DOA:** Stage of growth on date of adjustment. (Refer to subsection 5 G.)
15. **Original (100 Feet):** Original stand (living, missing, and dead).
16. **Destroyed (100 Feet):** Number of plants **dead and/or** totally destroyed in 100 foot of row.
17. **V-Stage Stand Reduction % Loss:** V-stage stand reduction percent loss from the V-stage Stand Reduction Percent Loss Chart (**TABLE B**).
18. **% Crop (Remaining):** Enter the result of subtracting the V-stage stand reduction percent loss (item 17) from 100%. If there is no direct damage, enter 100. If there is no plant damage due to hail (item 34) leave blank.

PLANT DAMAGE (HAIL)

19. **Gross:** If there is plant damage in the sample due to hail, complete the field notes, and enter the item 34 entry for the same sample.
20. **Net:** Multiply the % crop remaining (item 18) times the gross (item 19) (nearest tenth percent) if there is an entry in item 19. Round to tenths.

TOTAL DAMAGE

21. **Total % Damage:** Enter the total direct and plant damage (V-stage stand reduction % loss (item 17) plus net (item 20), to nearest tenth percent).
22. **Total:** Total the total % damage entries (item 21) to nearest tenth percent. If more than five samples, enter accumulated total on last page.
23. **No. of Samples:** Enter the total number of samples taken for the appraisal.

COMPUTATIONS

24. **Average Damage:** Divide the total (item 22) by the number of samples (item 23) from all pages, to nearest tenth percent.
25. **% Potential Remaining:** Subtract the sample average damage (item 24) from 100% to nearest tenth percent.
26. **Dollar Amount of Insurance Per Acre:** Enter the dollar amount of insurance per acre from the insured's Summary of Coverage.
27. **Appraisal (Dollars/Acre):** Convert the entry in % Potential Remaining (item 25) to a 3-place decimal (e.g., 13.3 % = .133) and multiply times the Dollar Amount of Insurance Per Acre (item 26). Enter the appraisal in dollars and cents per acre on the appraisal worksheet and in Column "J" of the Production Worksheet.

CHILE PEPPER FIELD NOTES (PLANT DAMAGE DUE TO HAIL)

Complete the field notes on a representative 10-foot sample from within the sample area used for stand reduction if stand reduction has occurred. If not, select a representative 10-foot sample.

Verify or make the following entries:

- | <u>Item No.</u> | <u>Information Required</u> |
|------------------------|---|
| 28. | Cut-Off Symbol: MAKE NO ENTRY. Symbol pre-printed on appraisal worksheet. |
| 29. | Number Cut-Off: Enter the number of cut-off plants in the appropriate node span (i.e. - Cut-offs: 1 plant at C3 node, 2 plants at C5 node = 3 Cut-off plants in C3 - C5 node span). |
| 30. | Factor: MAKE NO ENTRY. Factor pre-printed on appraisal worksheet. |
| 31. | Result: Enter the result of multiplying the number cut-off (item 29) times the factor (item 30), to whole numbers. |
| 32. | Total (Column 31): Total of all the results (item 31 entries). |
| 33. | Total Live Plants in Sample: Total number of live plants in the representative 10 foot sample (including plants with and without plant damage). |
| 34. | % of Loss: Divide the total (column 31), (item 32), by the total live plants in sample (item 33). Round the results to tenths. |
| 35. | Remarks: Remarks pertinent to the appraisal, sampling, conditions in general (e.g. - very hot and dry), etc. |
| 36. | Adjuster's Signature, Code No., and Date: Signature of adjuster, code number, and date signed after the insured (or insured's authorized representative) has signed. If the appraisal is performed prior to signature date, document the date of appraisal in the Remarks section of the Appraisal Worksheet (if available); otherwise, document the appraisal date in the Narrative of the Production Worksheet. |
| 37. | Insured's Signature and Date: Insured's (or insured's authorized representative's) signature and date. BEFORE obtaining insured's signature, REVIEW ALL ENTRIES on the Appraisal Worksheet WITH THE INSURED , particularly explaining codes, etc., which may not be readily understood. |
| 38. | Page Number: Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.). |

EXAMPLE 1: STAND REDUCTION - VEGETATIVE STAGES - TOTALLY DESTROYED PLANTS

CHILE PEPPER REPRODUCTIVE STAGE STAND REDUCTION AND PLANT DAMAGE APPRAISAL WORKSHEET INSTRUCTIONS

Complete the appraisal worksheet in the following order:

- (1) Heading information
- (2) Part II
- (3) Part I

Verify or make the following entries:

**Item
No.**

Information Required

Company: Name of insurance provider, if not preprinted on the worksheet (Company Name).

Claim Number: Claim number as assigned by the insurance provider.

1. **Insured's Name:** Name of the insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.
2. **Policy Number:** Insured's assigned policy number.
3. **Crop Year:** Crop year, as defined in the policy, for which the claim has been filed.
4. **Unit No.:** Five-digit unit number from the Summary of Coverage after it is verified to be correct (e.g., 00100).
5. **Field ID:** Field identification symbol.
6. **Practice:** Three-digit code number entered exactly as specified on the actuarial documents, for the practice carried out by the insured. If "No Practice Specified," enter appropriate 3-digit code number from the actuarial documents.
7. **Type:** Three-digit code number, entered exactly as specified on the actuarial documents for the type of chile pepper grown by the insured (e.g., Long Green New Mexican (201). If "No Type Specified," enter appropriate 3-digit code number from the actuarial documents.
8. **Acres:** Number of determined acres, to tenths, in field or sub field being appraised.
9. **Row Width:** Row width to nearest inch.
10. **Date of Damage:** First three letters of the month during which MOST of the insured damage (including progressive damage) occurred. Include SPECIFIC DATE where applicable, as in the case of hail damage (e.g., Aug. 11).

11. **Cause of Damage:** Name of insured cause of loss for **this crop** as listed in the LAM. If an insured cause of loss is coded as “Other,” explain in the Remarks.

PART I

12. **Sample No.:** If more than five samples are needed, (refer to TABLE A for minimum representative sample requirements) use additional pages, and number the samples 6, 7, 8, etc.
13. **DOD:** Stage of growth on date of damage. (Refer to subsection 5 G.)
14. **DOA:** Stage of growth on date of adjustment. (Refer to subsection 5 G.)

PLANTS DESTROYED

15. **% Plants Destroyed:** Percent of plants completely destroyed in 10 foot sample, applicable sample entry from item 34.
16. **% Partially Destroyed:** Percent of plants partially destroyed in 10 foot sample, applicable sample entry from item 37.
17. **Totally Destroyed:** Enter the result of % plants destroyed (item 15) plus the % partially destroyed (item 16), to tenths.
18. **% Crop Remaining:** Enter the result of subtracting the totally destroyed (item 17) from 100%. If there are no plants destroyed, enter 100. If there are no limbs and pods destroyed (items 19 and 22) leave blank.

LIMBS DESTROYED

19. **Gross Limb Loss %:** Percent of gross limbs lost, applicable sample entry from item 42.
20. **Net Limb Loss %:** Multiply % crop remaining (item 18) times the gross limb loss % (item 19), if there is an entry in item 19. Percent rounded to nearest tenth (i.e. - .098 = 9.8).
21. **% Crop Remaining:** Enter the result of subtracting the net limb loss % (item 20) from % crop remaining (item 18).

PODS DESTROYED

22. **Gross Pod Loss %:** Percent of gross pods lost, applicable sample entry from item 48.
23. **Net Pod Loss %:** Multiply the % crop remaining (item 21) times the gross pod loss % (item 22), if there is an entry in item 22. Percent rounded to nearest tenth (i.e. - .098 = 9.8).

COMPUTATIONS

24. **Total Damage (Item 17 + Item 20 + Item 23):** Enter the result of adding totally destroyed (item 17) plus the net limb loss (item 20) plus the net pod loss % (item 23), to tenths.
25. **Total:** Total of the total damage (item 24 entries). If more than five samples, enter accumulated total on last page.
26. **No. of Samples:** Enter the total number of samples taken for the appraisal.
27. **Average Damage:** Divide the total (item 25) by the number of samples (item 26). Round to the nearest tenth percent.
28. **% Potential Remaining:** Subtract the average damage (item 27) from 100%. Round to nearest tenth percent.
29. **Dollar Amount of Insurance Per Acre:** Enter the dollar amount of insurance per acre from the insured's Summary of Coverage.
30. **Appraisal (Dollars/Acre):** Convert the entry in % Potential Remaining (item 28) to a 3-place decimal (e.g., 13.3 % = .133) and multiply times the Dollar Amount of Insurance per acre (item 29). Enter the appraisal in dollars and cents per acre on the appraisal worksheet and in Column "J" of the Production Worksheet.

PART II

Verify or make the following entries:

**Item
No.**

Information Required

31. **Sample No.:** Match the sample with the same numbered sample used in item 12. If more than five samples are needed, use additional pages, and number the samples 6, 7, 8, etc.
32. **No. of Plants in Sample:** Enter the number of live, totally destroyed and partially destroyed plants counted in the 10 foot representative sample.
33. **Destroyed Plants:** Total number of plants dead or totally destroyed in the representative 10 foot sample.
34. **% Plants Destroyed:** Divide the destroyed plants (item 33) by the number of plants in the sample (item 32). Percent rounded to nearest tenths (i.e., .098 = 9.8).
35. **Sample No:** Match the sample with the same numbered sample used in item 12. If more than five samples are needed, use additional pages, and number the samples 6, 7, 8, etc.

36. **Factored Plants Destroyed:** Enter the sum of all results of multiplying the number of plants partially destroyed times the applicable factor from **TABLE D**.

EXAMPLE:

Stage of Growth on DOD: R3
2 plants partially destroyed, (1 at C9-C11, 1 at C12-C15)

$$\begin{array}{rcl} \text{Refer to TABLE D: } & (1 \text{ plant @ C9-C11}) \times 90 \text{ factor} & = 90 \\ & (1 \text{ plant @ C12-C15}) \times 80 \text{ factor} & = \underline{80} \\ & \text{Total} & = 170 \end{array}$$

37. **% Partially Destroyed:** Divide the factored plants destroyed (item 36) by the **number** of plants in sample (item 32). Round to the nearest tenth of percent.

38. **Plants Destroyed/Partially Destroyed Notes:** Enter the calculations for determining the number of factored plants destroyed and any remarks pertinent to the appraisal. If additional space is needed, enter on a Special Report.

39. **Sample No.:** Match the sample with the same numbered sample used in item 12. If more than five samples are needed, use additional pages, and number the samples 6, 7, 8, etc.

40. **No. of Crown Limbs Destroyed:** Total number of whole crown limbs destroyed. For partially destroyed crown limbs, total the percentage of each crown limb destroyed in the 5 plant sample, and divide by 100 to arrive at the equivalent number of whole limbs destroyed.

EXAMPLE:

$$\begin{array}{l} \text{Plant 1: } 20\% + 100\% + 60\% = 180\% \\ \text{Plant 2: } 40\% + 40\% + 50\% = 130\% \\ \text{Plant 3: } 70\% + 20\% = 90\% \\ \text{Plant 4: } 100\% + 50\% + 50\% = 200\% \\ \text{Plant 5: } 100\% + 70\% + 30\% = \underline{200\%} \\ \text{800\% divided by 100} = 8 \text{ limbs destroyed} \end{array}$$

41. **Limb Factor:** Enter factor from **TABLE E** for the applicable stage.

42. **Gross Limb Loss %:** Multiply the number of crown limbs destroyed (item 40) by the limb factor (item 41). Round to nearest tenth percent (i.e. - .098 = 9.8).

43. **Sample No.:** Match the sample with the same numbered sample used in item 12. If more than five samples are needed, use additional pages, and number the samples 6, 7, 8, etc.

44. **Total Pods:** Total number of pods counted for the 5 plants selected.

45. **Pods Destroyed:** Total number of pods destroyed for the 5 plants selected.

46. **% Pods Destroyed:** Divide the pods destroyed (item 45) by the total pods (item 44). Round to the nearest tenth percent (i.e. - .098 = 9.8).
47. **Pod Factor:** Enter factor from **TABLE F** for the applicable stage.
48. **Gross Pod Loss %:** Multiply the % pods destroyed (item 46) by the pod factor (item 47). Round to the nearest tenth percent (i.e. - .098 = 9.8).
49. **Limbs/Pods Destroyed Notes:** Enter the calculations for determining the number of crown limbs destroyed and any remarks pertinent to the appraisal. If additional space is needed, enter on a Special Report.
50. **Adjuster's Signature, Code No., and Date:** Signature of adjuster, code number, and date signed **after** the insured (or insured's authorized representative) has signed. If the appraisal is performed prior to signature date, document the date of appraisal in the Remarks section of the Appraisal Worksheet (if available); otherwise, document the appraisal date in the Narrative of the Production Worksheet.
51. **Insured's Signature and Date:** Insured's (or insured's authorized representative's) signature and date. **BEFORE** obtaining insured's signature, **REVIEW ALL ENTRIES** on the Appraisal Worksheet **WITH THE INSURED**, particularly explaining codes, etc., which may not be readily understood.
52. **Page Number:** Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.).

CHILE PEPPER APPRAISAL WORKSHEET INSTRUCTIONS

CHILE PEPPER COUNT METHOD

Complete heading items 1 through 6, Part I items 7 through 19 and Part II items 31 through 34.

Verify or make the following entries:

**Item
No.**

Information Required

Company: Name of insurance provider, if not preprinted on the worksheet. (Company Name).

Claim No.: Claim number as assigned by the insurance provider.

1. **Insured's Name:** Name of insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.
2. **Policy Number:** Insured's assigned policy number.
3. **Unit Number:** Five-digit unit number from the Summary of Coverage after it is verified to be correct (e.g., 00100).
4. **Crop Year:** Crop year, as defined in the policy, for which the claim has been filed.
5. **Cause of Damage:** Name of insured cause of loss for **this crop** as listed in the LAM. If an insured cause of loss is coded as "Other," explain in the "Narrative."
6. **Date of Damage:** First three letters of the month during which MOST of the insured damage (including progressive damage) occurred. Include the SPECIFIC DATE where applicable as in the case of hail damage (e.g., AUG 11).

PART I

7. **Field ID:** Field identification symbol.
8. **Acres to Tenths:** Number of determined acres, to tenths, in the field or subfield being appraised.
9. **Type:** Three-digit code number, entered exactly as specified on the actuarial documents for the type of chile pepper grown by the insured (e.g., Long Green New Mexican (201). If "No Type Specified," enter appropriate 3-digit code number from the actuarial documents.
10. **Stage:** The stage determination (1, 2, or 3) based on the length of time between specified stages. Refer to subsection 5 E.

11. **Fraction of Acre:** Enter “1/1000”
12. **Number of Chile Peppers Per Sample Plot:** The number of mature (or would be mature by the calendar dates for the end of the insurance period specified in the crop provisions for the specific type) chile peppers for each sample plot.
13. **Total No. of Chile Peppers:** Total number of chile peppers in all samples.
14. **No. of Sample Plots:** Total number of sample plots included in item 12.
15. **Average Chile Peppers Per Sample:** Divide the total number of chile peppers (item 13) by no. of sample plots (item 14). Round the result to tenths.
16. **Type Factor:** Factor for the type of chile peppers from **TABLE G**.
17. **Pounds Per Sample:** Multiply the average chile peppers per sample (item 15) by the type factor (item 16). Round the result to tenths.
18. **Acre Factor:** Enter “1000.”
19. **Pounds Per Acre:** Multiply the pounds per sample (item 17) by the acre factor (item 18). Round the results to whole pounds.

PART II

31. **Remarks:** Enter the calculation for converting the appraised pounds per acre to dollars and cents per acre (i.e., Pounds Per Acre (item 19) times the base contract price equals appraisal in dollars and cents.). **EXAMPLE :** 3,400 lbs. X \$ 0.14 = \$476.00. Transfer this dollar amount to Column “J” of the Production Worksheet.
32. **Adjuster’s Signature, Code Number, and Date:** Signature of adjuster, code number, and date signed **after** the insured (or insured’s authorized representative) has signed. If the appraisal is performed prior to signature date, document the date of appraisal in the Remarks section of the Appraisal Worksheet (if available); otherwise, document the appraisal date in the Narrative of the Production Worksheet.
33. **Insured’s Signature and Date:** Insured’s (or insured’s authorized representative’s) signature and date. Before obtaining insured’s signature, **REVIEW ALL ENTRIES** on the Appraisal Worksheet **WITH THE INSURED**, particularly explaining codes, etc., which may not be readily understood.
34. **Page Number:** Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.)

CHILE PEPPER WEIGHT METHOD

Complete heading items 1 through 6 and Part II, items 20 through 34.

Verify or make the following entries:

Item

No. Information Required

Company: Name of insurance provider, if not preprinted on the worksheet. (Company Name).

Claim No.: Claim number as assigned by the insurance provider.

1. **Insured's Name:** Name of insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.
2. **Policy Number:** Insured's assigned policy number.
3. **Unit Number:** Five-digit unit number from the Summary of Coverage after it is verified to be correct (e.g., 00100).
4. **Crop Year:** Crop year, as defined in the policy, for which the claim has been filed.
5. **Cause of Damage:** Name of insured cause of loss for **this crop** as listed in the LAM. If an insured cause of loss is coded as "Other," explain in the "Narrative."
6. **Date of Damage:** First three letters of the month during which MOST of the insured damage (including progressive damage) occurred. Include the SPECIFIC DATE where applicable as in the case of hail damage (e.g., AUG 11).

PART II

20. **Field ID:** Field identification symbol.
21. **Acres to Tenths:** Number of determined acres, to tenths, in the field or subfield being appraised.
22. **Type:** Three-digit code number, entered exactly as specified on the actuarial documents for the type of chile pepper grown by the insured (e.g., Long Green New Mexican (201). If "No Type Specified," enter appropriate 3-digit code number from the actuarial documents.
23. **Stage:** The stage determination (1, 2, or 3) based on the length of time between specified stages. Refer to subsection 5 E.

24. **Fraction of Acre:** Enter “1/1000.”
25. **Pounds Per Sample Plot:** Weight of chile peppers for each sample plot, recorded **in pounds** to tenths.
26. **Total Weight All Sample Plots:** Total weight of chile peppers from all sample plots (item 25) **in pounds to tenths.**
27. **No. of Sample Plots:** Number of sample plots in item 25.
28. **Average Sample Weight:** Divide the total weight all sample plots (item 26) by the **number** of sample plots (item 27). Round the result to tenths.
29. **Acre Factor:** Enter “1000.”
30. **Pounds Per Acre:** Multiply the average sample weight (item 28) by the acre factor (item 29). Round the result to whole pounds.
31. **Remarks:** Enter the calculation for converting the appraised pounds per acre to dollars and cents per acre (i.e., Pounds Per Acre (item 30 times the base contract price equals appraisal in dollars and cents.). **EXAMPLE :** 2,200 lbs. X \$ 0.14 = \$308.00. Transfer this dollar amount to Column “J” of the Production Worksheet.
32. **Adjuster’s Signature, Code Number, and Date:** Signature of adjuster, code number, and date signed **after** the insured (or insured’s authorized representative) has signed. If the appraisal is performed prior to signature date, document the date of appraisal in the Remarks section of the Appraisal Worksheet (if available); otherwise, document the appraisal date in the Narrative of the Production Worksheet.
33. **Insured’s Signature and Date:** Insured’s (or insured’s authorized representative=s) signature and date. Before obtaining insured’s signature, **REVIEW ALL ENTRIES** on the Appraisal Worksheet **WITH THE INSURED**, particularly explaining codes, etc., which may not be readily understood.
34. **Page Number:** Page numbers - (Example: Page 1 of 1, Page 1of 2, Page 2 of 2, etc.)

9. CLAIM FORM ENTRIES AND COMPLETION PROCEDURES

A. GENERAL INFORMATION

- (1) The claim form (hereafter referred to as “Production Worksheet”) is a progressive form containing all notices of damage for all preliminary and final inspections on a unit.
- (2) If a Production Worksheet has been prepared on a prior inspection, verify each entry and enter additional information as needed. If a change or correction is necessary, strike out all entries on the line and re-enter correct entries on a new line. The adjuster and insured should initial any line deletions.
- (3) Refer to the LAM for instructions regarding the following:
 - (a) Acreage report errors.
 - (b) Delayed notices and delayed claims.
 - (c) Corrected claims or fire losses (double coverage) and cases involving uninsured causes of loss, unusual situations, controversial claims, concealment, or misrepresentation.
 - (d) Claims involving a Certification Form (when all the acreage on the unit has been appraised to be put to another use or other reasons described in the LAM).
 - (e) "No Indemnity Due" claims (which must be verified by an APPRAISAL or NOTIFICATION from the insured that the production exceeded the guarantee).
- (4) The adjuster is responsible for determining if any of the insured's requirements under the notice and claim provisions of the policy have not been met. If any have not, the adjuster should contact the insurance provider.
- (5) Instructions labeled “**PRELIMINARY**” apply to preliminary inspections only. Instructions labeled “**FINAL**” apply to final inspections only. Instructions not labeled apply to ALL inspections.

B. FORM ENTRIES AND COMPLETION INFORMATION

Verify or make the following entries:

Item

No. Information Required

1. **Crop/Code #:** “Chile Peppers” (0045).
2. **Unit #:** Five-digit unit number from the Summary of Coverage after it is verified to be correct. (e.g., 00100).
3. **Legal Description:** Section, township, and range number or other legal description that identifies the location of the unit.
4. **Date of Damage:** First three letters of the month during which MOST of the insured damage (including progressive damage) occurred for each inspection. Include the SPECIFIC DATE where applicable as in the case of hail damage (e.g., AUG 11).
5. **Cause of Damage:** Name of insured cause(s) of loss for **this crop** as listed in the LAM. If it is evident that no indemnity is due, enter “NONE.” If an insured cause of loss is coded as “Other,” explain in the “Narrative.”

NOTE: Refer to the Basic Provisions and the crop provisions for this crop for information pertaining to insured and uninsured causes of loss.
6. **Primary Cause %:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Percent of damage for the cause of damage listed in item 5 above that is determined to be the primary cause of damage, to the nearest whole percent. The primary cause of damage must exceed 50 percent (e.g., 51%). Enter an “X” for the major secondary cause of damage.
7. **Company/Agency:** Name of company and agency servicing the contract.
8. **Name of Insured:** Name of the insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.
9. **Claim #:** Claim number as assigned by the insurance provider.
10. **Policy #:** Insured’s assigned policy number.
11. **Crop Year:** Crop year, as defined in the policy, for which the claim is filed.

12. **Additional Units:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Unit number(s) for ALL non-loss units for the crop at the time of final inspection. A non-loss unit is any unit for which a Production Worksheet has not been completed. Additional non-loss units may be entered on a single Production Worksheet.

NOTE: If more spaces are needed for non-loss units, enter the unit numbers, identified as "Non-Loss Units," in the Narrative or on an attached Special Report.

13. **Est. Prod. Per Acre:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Estimated yield per acre, in whole pounds, of all non-loss units for the crop at the time of final inspection.

14. **Date(s) Notice of Loss:**

PRELIMINARY:

- a. Date the notice of damage was given for the unit in item 2.
- b. A third preliminary inspection (if needed) requires an additional set of Production Worksheets. Enter the date of notice for a third preliminary inspection in the 1st space of item 14 on the second set.
- c. Reserve the "Final" space on the first page of the first set of Production Worksheets for the date of notice for the final inspection.
- d. If the inspection is initiated by the insurance provider, enter "Company Insp." instead of the date.

FINAL: Transfer the last date in the 1st or 2nd space to the FINAL space if a final inspection should be made as a result of the notice. Always enter the complete date of notice (month, day, year) for the FINAL inspection in the FINAL space on the first page of the first set of Production Worksheets. For a delayed notice of loss or delayed claim, refer to the LAM.

15. **Companion Policy(s):**

- a. If no other person has a share in the unit (insured has 100 percent share), MAKE NO ENTRY.

- b. In all cases where the insured has LESS than a 100 percent share of a loss-affected unit, ask the insured if the OTHER person sharing in the unit has a multiple-peril crop insurance contract (i.e., not crop-hail, fire, etc.). If the other person does not, enter "NONE."
- (1) If the other person has a multiple-peril crop insurance contract and it can be determined that the SAME insurance provider services it, enter the contract number. Handle these companion policies according to insurance provider instructions.
 - (2) If the OTHER person has a multiple-peril crop insurance contract and a DIFFERENT insurance provider or agent services it, enter the name of the insurance provider and/or agent (and contract number) if known.
 - (3) If unable to verify the existence of a companion contract, enter "Unknown" and contact the insurance provider for further instructions.

NOTE: Refer to the LAM for further information regarding companion contracts.

SECTION I - ACREAGE APPRAISED, PRODUCTION AND ADJUSTMENTS

Make separate line entries for varying:

- (1) Rate classes, types, or farming practices;
- (2) Appraisals;
- (3) Stages or intended use(s) of acreage;
- (4) Shares (e.g., 50 percent and 75 percent shares on the same unit); or
- (5) Appraisals for damage due to hail or fire if Hail and Fire Exclusion is in effect.

Verify or make the following entries:

**Item
No.**

Information Required

A. **Field ID:** The field identification symbol from a sketch map or an aerial photo. Refer to the Narrative. In the margin (or in a separate column), enter the date of inspection for the last line entry of each inspection.

B. **Preliminary Acres:**

PRELIMINARY: The number of acres, to tenths, (include "E" if estimated), for which consent for other use has been given. Determine actual acreage, to tenths, when the boundaries of the appraised acreage may not be determined later.

FINAL: MAKE NO ENTRY.

C. **Final Acres:** Refer to the LAM for definition of acceptable determined acres used herein.

Determined acres to tenths (include “E” if estimated) for which consent is given for other use and/or:

- a. Put to other use without consent.
- b. Abandoned.
- c. Damaged by uninsured causes.
- d. For which the insured failed to provide acceptable records of production.

FINAL: Determined acres to tenths.

NOTE: Acreage breakdowns WITHIN a unit may be estimated (enter “E” in front of the acres) if a determination is impractical AND if authorization was received from the insurance provider. Document authorization in the Narrative.

ACCOUNT FOR ALL ACREAGE IN THE UNIT. In the event of over-reported acres, handle in accordance with individual insurance provider’s instructions. In the event of under-reported acres, draw a diagonal line in Column “C” as shown.

- C₁ Enter the ACTUAL acres for the field or subfield.
- C₂ Enter the REPORTED acres for the field or subfield.

D. **Interest or Share:** Insured’s interest in the crop to three decimal places as determined at the time of inspection. If shares vary on the same UNIT, use separate line entries.

E. **Risk:** Three-digit code for the correct “Rate Class” specified on the actuarial documents. If a “Rate Class” or “High Risk Area” is not specified on the actuarial documents, make no entry. Verify with the Summary of Coverage and if the Rate Class is found to be incorrect, revise according to the insurance provider’s instructions. Refer to the LAM

NOTE: Unrated land is uninsurable without a written agreement.

F. **Practice:** Three-digit code number, entered exactly as specified on the actuarial documents, for the practice carried out by the insured. If “No Practice Specified,” enter appropriate 3-digit code number from the actuarial documents.

G. **Type/ Class/Variety:** Three-digit code number, entered exactly as specified on the actuarial documents for the type of chile pepper grown by the insured (e.g., Long Green New Mexican (201)). If “No Type Specified,” enter appropriate 3-digit code number from the actuarial documents

H. **Stage:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Stage abbreviation as shown below.

<u>STAGE</u>	<u>EXPLANATION</u>
“P” Acreage abandoned without consent, put to other use without consent, damaged solely by uninsured causes, for which the insured failed to provide records of production which are acceptable to the insurance provider, or from which production was sold by direct marketing.
“1”, “2”, or “3” Stage as defined in the Crop Provisions. (Refer to subsection 5 E and F).
“UB” Bypassed (insured causes)
“PB” Bypassed (uninsured causes)

GLEANED ACREAGE: Refer to the LAM for information on gleaning.

I. **Intended or Final Use:** Use of acreage. Use the following “Intended Use” abbreviations.

<u>USE</u>	<u>EXPLANATION</u>
“To Cucumbers,” etc	. Use made of the acreage
“WOC” Other use without consent
“SU” Solely uninsured
“ABA” Abandoned without consent
“H” Harvested
“UH” Unharvested
“Bypassed” Bypassed by processor

Verify any “Intended Use” entry. If the final use of the acreage was not as indicated, strike out the original line and initial it. Enter all data on a new line showing the correct “Final Use.”

GLEANED ACREAGE: Refer to the LAM for information on gleaning.

J. **Appraised Potential:** Per-acre appraisal in dollars and cents of POTENTIAL production for the acreage appraised from the appraisal worksheet. Refer to the appraisal methods for additional instructions.

NOTE: If there is no potential on UH acreage, enter “0.00.”

- (a) For unharvested acreage that is bypassed by the processor due to INSURED causes of loss; the potential production per acre shown on the Production Worksheet in Column J will be **zero (0.00)**.
- (b) For unharvested acreage, and/or acreage that is bypassed when NO insured cause of loss prevented the processor from harvesting, the value of potential production must be appraised and counted as production against the amount of insurance.

K₁- K₂. MAKE NO ENTRY.

L. **Shell and/or Quality Factor: MAKE NO ENTRY.**

M. + **Uninsured Causes: EXPLAIN IN THE NARRATIVE.**

a. Hail and Fire exclusion NOT in effect.

- (1) Enter NOT LESS than the insured's amount of insurance per acre in whole dollars for any "P" stage acreage.

NOTE: On preliminary inspections, advise the insured to keep the harvested production from any acreage damaged SOLELY by uninsured causes separate from other production.

- (2) For acreage that is damaged PARTLY by uninsured causes, enter the APPRAISED UNINSURED loss of production per acre, in dollars and cents, for any such acreage.

b. Refer to the LAM when a Hail and Fire Exclusion is in effect and damage is from hail or fire.

c. Enter the result of adding uninsured cause appraisals to hail and fire exclusion appraisals.

NOTE: For fire losses, if the insured also has other fire insurance (double coverage), refer to the LAM.

N. **Adjusted Potential:** Column "J" plus Column "M" in dollars and cents.

O. **Total to Count:** Column "C or C₁" (**actual** acres) times Column "N," rounded to whole dollars.

NOTE: For CAT policies multiply the result times .55 unless otherwise instructed by the insurance provider because adjustment will be made by other manual or automated computation process.

P. **Per Acre:** Enter the **dollar** amount of insurance per acre **from the Summary of Coverage** adjusted by the applicable stage percentage from the crop provisions, rounded to whole dollars. **Refer to subsection 5 E** for the percent of coverage for each stage, and **subsection 5 F** for an example of stage guarantee per acre calculation.

Q. **Total:** Column "C₂" (**reported** acres; "C" if acreage is not under-reported) times Column "P," rounded to whole dollars.

16. **Total Acres:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Total Actual Acres (Column "C" or ["C₁" if there are under-reported acres]), to tenths.

NOTE: FOR ITEM 17. WHEN SEPARATE LINE ENTRIES ARE MADE FOR VARYING SHARES, STAGES, PRICE ELECTIONS, TYPES, ETC., WITHIN THE UNIT, AND TOTALS NEED TO BE KEPT SEPARATE FOR CALCULATING INDEMNITIES, MAKE NO ENTRY AND FOLLOW THE INSURANCE PROVIDER'S INSTRUCTIONS; OTHERWISE, MAKE THE FOLLOWING ENTRIES.

17. **Totals:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Total of Column "O" and total of Column "Q."

NARRATIVE:

If more space is needed, document on a Special Report, and enter "See Special Report." Attach the Special Report to the Production Worksheet.

- a. If no acreage is released on the unit, enter "No acreage released," adjuster's initials, and date.
- b. If notice of damage was given and "No Inspection" is necessary, enter the unit number(s), "No Inspection," date, and adjuster's initials. The insured's signature is not required.
- c. Explain any uninsured causes, unusual, or controversial cases.
- d. If there is an appraisal in Section I, item M for uninsured causes due to a hail/fire exclusion, show the original hail/fire liability per acre and the hail/fire indemnity per acre.
- e. Document the actual appraisal date if an appraisal was performed prior to the adjuster's signature date on the appraisal worksheet, and the date of the appraisal is not recorded on the appraisal worksheet.

- f. State that there is “No other fire insurance” when fire damages or destroys the insured crop and it is determined that the insured has no other fire insurance. Also, refer to the LAM.
- g. Explain any errors found on the Summary of Coverage.
- h. Explain any commingled production. Refer to the LAM.
- i. Explain any entry for “Production Not to Count” in Section II, item “O,” and/or any production not included in Section II, item I or item B - E entries (e.g., harvested production from uninsured acreage that can be identified separately from the insured acreage in the unit).
- j. Explain a "NO" checked in item 19.
- k. Attach a sketch map or aerial photograph to identify the total unit:
 - (1) If consent is or has been given to put part of the unit to another use;
 - (2) If uninsured causes are present; or
 - (3) For unusual or controversial cases.

NOTE: Indicate on the sketch map or aerial photo, the disposition of acreage destroyed or put to other use with or without consent.
- l. Explain any difference between date of inspection and signature dates. For an ABSENTEE insured, enter the date of the inspection AND the date of mailing the Production Worksheet for signature.
- m. When any other adjuster or supervisor accompanied the adjuster on the inspection, enter the code number of the other adjuster or supervisor and date of inspection.
- n. Explain the reason for a “No Indemnity Due” claim. “No Indemnity Due” claims are to be distributed in accordance with the insurance provider’s instructions.
- o. Explain any delayed notices or delayed claims as instructed in the LAM.
- p. Document any authorized estimated acres shown in Section I, item C as follows: "Line 3 'E' acres authorized by insurance provider MM/DD/YYYY."
- q. Document the method and calculation used to determine acres for the unit. Refer to the LAM.
- r. Document in the “Narrative” or on a Special Report, the calculation used to determine the stage guarantee per acre.
- s. Specify the type of insects or disease when the insured cause of damage or loss is listed as insects or disease. Explain why control measures did not work.

- t. Document the name and address of the charitable organization when gleaned acreage is applicable. Refer to the LAM for more information on gleaning.
- u. Explain any “0” potential (chile pepper plants with no production).
- v. Document any other pertinent information, including any data to support any factors used to calculate the production.

SECTION II - HARVESTED PRODUCTION

GENERAL INFORMATION:

- (1) Account for ALL HARVESTED PRODUCTION (for ALL ENTITIES sharing in the crop) except production appraised BEFORE harvest and shown in Section I because the quantity cannot be determined later.
- (2) For production commercially stored, sold, etc., enter the name and address of storage facility or buyer or processor as applicable in items B through E.
- (3) If additional lines are necessary, the data may be entered on a continuation sheet.
USE SEPARATE LINES FOR:
 - (a) Different FIRST handlers (buyers or processors). The insured must have maintained satisfactory records of ALL production sold or stored. Verify any buyer or processor records.
 - (b) Separate storage facilities.

NOTE: (In all localities) if the first handler was not a processor, the production will be determined by the adjuster on the basis of available records.

 - (c) Varying shares; e.g., 50 percent and 75 percent shares on the same unit.
- (4) There will generally be no harvested production entries in items A through S for preliminary inspections.

Verify or make the following entries:

Item

No. Information Required

18. **Date Harvest Completed: (Used to determine if there is a delayed notice or a delayed claim. Refer to the LAM.)**

PRELIMINARY: MAKE NO ENTRY.

FINAL:

- a. The earlier of the date the ENTIRE acreage on the unit was (1) harvested (sufficient production to fulfill the processor contract, if contract stipulates a specific amount to be delivered), (2) totally destroyed, (3) put to other use, (4) a combination of harvested, destroyed, put to other use, or (5) the calendar date for the end of the insurance period.
- b. If at the time of final inspection (if prior to the end of the insurance period), there is any unharvested insured acreage remaining on the unit that the insured does not intend to harvest, enter “**Incomplete.**”
- c. If at the time of final inspection (if prior to the end of the insurance period), **none** of the insured acreage on the unit has been harvested, and the insured does not intend to harvest such acreage, enter “**No Harvest.**”
- d. If the case involves a Certification Form, enter the date from the Certification Form when the entire unit is put to another use, etc. Refer to the LAM.

19. **Similar Damage:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Check “Yes” or “No.” Check “Yes” if amount and cause of damage due to insurable causes is similar to the experience of other fields in the area. If “No” is checked, explain in the Narrative.

20. **Assignment of Indemnity:** Check “Yes” **only** if an assignment of a indemnity is in effect for the crop year; otherwise, check “No.” Refer to the LAM.

21. **Transfer of Right to Indemnity:** Check “Yes” **only** if a transfer of right to a indemnity is in effect for the unit for the crop year; otherwise, check “No.” Refer to the LAM.

A₁. **Share:** RECORD ONLY VARYING SHARES on SAME unit to three decimal places.

A₂. **Field ID:**

- a. If only one practice and/or type of harvested production is listed in Section I, MAKE NO ENTRY.
- b. If more than one practice and/or type of harvested production is listed in Section I, enter for each practice/type the corresponding Field ID (from Section I, item “A”).

B. - E. **Length or Diameter, Width, Depth and Deduction:**

- a. In the column heading, line out “length or diameter,” “width,” “depth,” and “deduction.”

- b. For production sold, enter the name and address of the buyer or processor etc., as applicable. For production otherwise disposed of, indicate the disposition.
- c. For unsold production, enter “UNSOLD.”

F. - H. MAKE NO ENTRY.

I. **Bu., Ton, Lbs., Cwt.:**

Make separate line entries for sold and unsold production.

- a. Circle “Lbs.” in column heading.
- b. Total harvested production in whole pounds. Account for and include production harvested but not delivered to a processor.

J. - M. MAKE NO ENTRY.

N. **Adjusted Production:** Enter pounds from column “I.”

O. **Prod. Not to Count:**

- a. Net production NOT to count, in whole pounds, WHEN ACCEPTABLE RECORDS IDENTIFYING SUCH PRODUCTION ARE AVAILABLE, from harvested acreage which has been assessed an appraisal of not less than the amount of insurance, or from other sources (e.g., other units or uninsured acreage).
- b. If production records are NOT available from acreage damaged solely by uninsured causes, MAKE NO ENTRY.

THIS ENTRY MUST NEVER EXCEED PRODUCTION SHOWN ON THE SAME LINE. EXPLAIN ANY “PRODUCTION NOT TO COUNT” IN THE NARRATIVE.

P. **Production:** Result of subtracting the entry in Column “O” from Column “N,” to whole pounds.

Q₁. **Value:**

- a. For SOLD production, enter the price per pound obtained by subtracting the allowable costs shown in the **Special Provisions** from the base contract price received.
- b. For UNSOLD production damaged by insurable causes, which the processor rejects and such production is destroyed, enter “0.00.” **Refer to** the LAM.

- c. For UNSOLD production which the insured is waiting to sell, the claim will remain open until such time as the final disposition of production is known. Refer to the LAM.

Q₂. - R. MAKE NO ENTRY.

S. **Production to Count:** Enter result from multiplying Column "P" times Column "Q₁", rounded to whole dollars.

NOTE: For CAT policies multiply result times .55 unless otherwise instructed by insurance provider because adjustment will be made by other manual or automated computation process.

NOTE: FOR ITEMS 22 - 24. WHEN SEPARATE LINE ENTRIES ARE MADE FOR VARYING SHARES, STAGES, PRICE ELECTIONS, TYPES, ETC., WITHIN THE UNIT, AND TOTALS NEED TO BE KEPT SEPARATE FOR CALCULATING INDEMNITIES, MAKE NO ENTRY AND FOLLOW THE INSURANCE PROVIDER'S INSTRUCTIONS; OTHERWISE, MAKE THE FOLLOWING ENTRIES.

22. **Section II Total:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Total of Column "S" in whole dollars.

23. **Section I Total:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Enter figure from Section I, Column "O" total.

24. **Unit Total:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Total of 22 and 23 in whole dollars.

25. **Adjuster's Signature, Code #, and Date:** Signature of adjuster, code number, and date signed **after** the insured (or insured's authorized representative) has signed. For an absentee insured, enter adjuster's code number **ONLY**. The signature and date will be entered **AFTER** the absentee has signed and returned the Production Worksheet.

NOTE: Final indemnity inspections should be signed on bottom line.

26. **Insured's Signature and Date:** Insured's (or insured's authorized representative's) signature and date. BEFORE obtaining insured's signature, REVIEW ALL ENTRIES on the Production Worksheet WITH THE INSURED, particularly explaining codes, etc., that may not be readily understood.

NOTE: Final indemnity inspections should be signed on bottom line.

27. **Page Numbers:**

PRELIMINARY: Page numbers - "1," "2," etc., at the time of inspection.

FINAL: Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.).

1. Crop/Code # CHILE PEPPERS 0045	2. Unit # 00100	3. Legal Description S1/2 - 5 - 50 -20

I certify the information provided above, to the best of my knowledge, to be true and complete and that it will be used to determine my loss, if any, to my insured crops. I understand that this Production Worksheet and supporting papers are subject to audit and approval by the company. I understand that this crop insurance is subsidized and reinsured by the Federal Crop Insurance Corporation, an agency of the United States. I understand that any false or inaccurate information may result in the sanctions outlined in my policy and administrative, civil, and criminal sanctions under 18 U.S.C. §§ 1006 and 1014, 7 U.S.C. § 1506, 31 U.S.C. §§ 3729 and 3730 and other federal statutes.

22. Section II 21,539
23. Section I Total 19,866
24. Unit Total 41,405

10. REFERENCE MATERIAL

TABLE A - MINIMUM REPRESENTATIVE SAMPLE REQUIREMENTS

ACRES IN FIELD OR SUBFIELD	MINIMUM NO. OF SAMPLES
0.1-10.0	3
10.1-20.0	4
Add one additional sample for each additional 10.0 acres (or fraction thereof) in the field or subfield.	

TABLE B - V-STAGE STAND REDUCTION PERCENT LOSS CHART

	NUMBER OF PLANTS TOTALLY DESTROYED IN 100 FEET OF ROW																							
	10	20	30	40	50	60	70	80	90	100	110	120	130	140	150	160	170	180	190	200	210	220	230	240
