# APPLE LOSS ADJUSTMENT STANDARDS HANDBOOK

FCIC-25030 (12-2005)

**2005 and Succeeding Crop Years**

**UNITED STATES DEPARTMENT OF AGRICULTURE  
WASHINGTON, D.C. 20250**

<b>FEDERAL CROP INSURANCE HANDBOOK</b>	<b>NUMBER: 25030 (12-2004)</b>
<b>SUBJECT:  APPLE LOSS ADJUSTMENT STANDARDS HANDBOOK 2005 AND SUCCEEDING CROP YEARS</b>	<b>OPI: Product Development Division</b>
	<b>APPROVED:                      DATE:</b>  /s/ <b>Tim B. Witt</b> <b>12/7/04</b>
	<b>Deputy Administrator, Research and Development</b>

**THIS HANDBOOK CONTAINS THE OFFICIAL FCIC-APPROVED LOSS ADJUSTMENT STANDARDS FOR THIS CROP FOR THE 2005 AND SUCCEEDING CROP YEARS. IN THE ABSENCE OF INDUSTRY-DEVELOPED, FCIC-APPROVED PROCEDURE FOR THIS CROP FOR 2005 AND SUCCEEDING CROP YEARS, ALL REINSURED COMPANIES WILL UTILIZE THESE STANDARDS FOR BOTH LOSS ADJUSTMENT AND LOSS TRAINING.**

**SUMMARY OF CHANGES/CONTROL CHART**

The following list contains significant changes to this handbook, as determined by us. It may not represent all changes made. All changes made to this handbook are applicable regardless of whether or not listed.

Major Changes: See changes or additions in text which have been highlighted. Three stars (\*\*\*) identify where information has been removed.

**Changes:** For December 2004 Issuance (FCIC-25030):

- A. Page TC 1: Revised/inserted headings in subsections 3 D and 4 E.
- B. Page 1, section 1: Inserted instructions to use the LAM in conjunction with this handbook for loss adjustment purposes.
- C. Page 1, section 2 A: Revised appraisal form distribution instructions to include instructions to verify that the insured signed all applicable claim forms.
- D. Page 1, section 2 B (3): Removed abbreviations for APA and AQA and inserted abbreviation for Catastrophic Risk Protection (CAT).
- E. Pages 1-3, section 2 B (4): Inserted the following terms and definitions - "Apple Production," "Damaged Apple Production," "Fresh Apples," "Lot," and "Processing Apples." Revised the following terms and definitions - "Bin," "Box," "Harvest," "Marketable," "Mature," "Natural Culls." Deleted the following terms and definitions - "Block," "Culls," "Excessive Sun," "Pollinizer," "Russetting," "Sunburn Damage," "Top-worked," and "Scaffold Branches."
- F. Page 3, section 3 A (1): Reformatted text to track with the policy. Added the applicable state names to areas "A," "B," and "C."

**APPLE LOSS ADJUSTMENT STANDARDS HANDBOOK**  
**SUMMARY OF CHANGES/CONTROL CHART (Continued)**

- G. Page 4, section 3 A (3)-(7): Inserted additional insurability requirements that track with the policy.
- H. Page 4, section 3 B: Inserted additional provision not applicable to CAT coverage. Reformatted subsection accordingly.
- I. Pages 4-5, section 3 D: Revised quality adjustment procedures to include grading requirements. Also inserted new grading and quality adjustment requirements for basic coverage and optional coverage.
- J. Page 6, section 3 D: Expanded list of reasons for conducting appraisals. Also, amended notice of damage procedure to track with the new apple policy. Edited procedure for determining when to appraise apple production.
- K. Pages 7-8, section 4 C: Revised text to track with new appraisal worksheet and policy provisions. Moved procedure for appraising apples with multiple causes of damage to subsection 4 E.
- L. Page 8, section 4 D: Deleted procedure for *E. coli* appraisals.
- M. Pages 9-10, section 4 E: Inserted supplemental instructions for Basic Coverage Appraisals and Quality Adjustment Appraisals.
- N. Page 10, section 5 A: Revised text in the appraisal method matrix to track with the new apple policy.
- O. Pages 10-12, section 5 B: Revised appraisal procedure information for unharvested appraisals to track with the new policy.
- P. Page 13, section 5 C: Amended Harvested Acreage Appraisal instructions.
- Q. Pages 13-19, section 7 B: Revised appraisal worksheet instructions to track with the new appraisal worksheet format.
- R. Pages 20-21, section 7 B: Inserted new example appraisal worksheets to illustrate item entry instructions.
- S. Page 23, section 8 B, item 11 - Crop Year: Inserted the phrase “Four-digit.”
- T. Page 25, item A - Field ID: Inserted reference to the LAM for instructions regarding first and second crop codes.
- U. Page 25, items “B - Preliminary Acres” and “C - Final Acres:” Inserted references to the CIH and LAM for instructions on measuring perennial crop acreage.

**APPLE LOSS ADJUSTMENT STANDARDS HANDBOOK**  
**SUMMARY OF CHANGES/CONTROL CHART (Continued)**

- V. Page 27, item “I - Intended or Final Use:” Inserted “Bulldozed” as new final use.
- W. Page 31, item A<sub>2</sub> - Field ID: Inserted reference to the LAM for instructions regarding first and second crop codes.
- X. Pages 31-32, item “I - Bu., Ton, Lbs., Cwt.:

  - Inserted instructions to document production in boxes, as applicable. Also, inserted instructions to count all harvested production that grades at least U.S. Fancy as production to count when insured elects the optional coverage for quality adjustment.

- Y. Page 35, section 9, **TABLE A**: Revised requirements for the minimum required number of representative sample trees.
- Z. Throughout the handbook, made syntax and grammar changes as needed so that this handbook tracks with RMA-approved crop handbook standards formatting.

# 1. INTRODUCTION

---

**THIS HANDBOOK MUST BE USED IN CONJUNCTION WITH THE LOSS ADJUSTMENT MANUAL (LAM).**

This handbook identifies the crop-specific procedural requirements for adjusting Multiple Peril Crop Insurance (MPCI) losses in a uniform and timely manner. These procedures, which include crop appraisal methods and claims completion instructions, supplement the general (not crop-specific) procedures, forms, and manuals for loss adjustment identified in the LAM.

## 2. SPECIAL INSTRUCTIONS

---

This handbook remains in effect until superseded by reissuance of **either** the entire handbook **or** selected portions (through slipsheets or bulletins). If slipsheets have been issued for a handbook, the original handbook as amended by slipsheet pages shall constitute the handbook. A bulletin can supersede either the original handbook or subsequent slipsheets.

### A. DISTRIBUTION

The following is the minimum distribution of forms completed by the adjuster **(and signed by the insured)** for the loss adjustment inspection:

One legible copy to the insured. The original and all remaining copies as instructed by the insurance provider.

It is the insurance provider's responsibility to maintain original insurance documents relative to policyholder servicing as designated in their approved plan of operations.

### B. TERMS, ABBREVIATIONS, AND DEFINITIONS

- (1) Terms, abbreviations, and definitions **general** (not crop-specific) to loss adjustment are identified in the LAM.
- (2) Terms, abbreviations, and definitions **specific** to apple loss adjustment and this handbook, which are not defined in this section, are defined as they appear in the text.
- (3) Abbreviations:

**CAT**                                      **Catastrophic Risk Protection**

\*\*\*

- (4) Definitions:

**Apple Production**                      **All production of fresh apples and processing apples from the insurable acreage.**

<b>(Apple) Type</b>	Fresh, processing, or varietal group apples as specified in the Special Provisions.
<b>Bin</b>	A container that contains a minimum of 875 pounds of apples or <b>another</b> quantity as designated in the Special Provisions.
<b>Box</b>	A container that contains 35 pounds of apples or <b>another</b> quantity as designated in the Special Provisions.
<b>Bushel</b>	In all states except Colorado, 42 pounds of apples. In Colorado, 40 pounds of apples.
<b>Damaged Apple Production (Basic Coverage, Fresh and Processing)</b>	The percentage of fresh or processing apple production that fails to grade U.S. No. 1 Processing or better in accordance with the grade standards, within each lot, bin, bushel, or box, as applicable, due to an insurable cause of loss.
<b>Damaged Apple Production (Optional Coverage, Fresh only)</b>	The percentage of fresh apple production that fails to grade U.S. Fancy or better in accordance with the grade standards, within each lot, bin, bushel, or box, as applicable, due to an insurable cause of loss.
<b>Direct Marketing</b>	Sale of the insured (apple) crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper, buyer, or broker. Examples of direct marketing include selling through an on-farm or roadside stand, or a farmer's market, and permitting the general public to enter the field for the purpose of picking all or a portion of the crop.
<b>Fresh Apples</b>	Apple production: (1) that is sold, or could be sold, for consumption without undergoing any change in its basic form, such as peeling, juicing, crushing, etc.; and (2) from acreage that is reported as fresh apples on the acreage report.
<b>Harvest</b>	The picking of mature apples from the trees or collecting mature apples from the ground. Apples collected from the ground that cannot be sold for human consumption will not be considered harvested.
<b>Lot</b>	A quantity of production that can be separated from other quantities of production by grade characteristics, load, location, or other distinctive features.

<b>Marketable</b>	Apple production that is not damaged apple production.
<b>Mature (Apple)</b>	Apples defined as “mature” in the applicable grade standards.
<b>Natural Culls</b>	Apples that fail to meet the applicable grade standards solely due to uninsured causes (e.g., spray burn, etc.).
<b>Natural Drop Apples</b>	Individual apples that drop from trees as an ordinary occurrence throughout the growing season.
<b>Processing Apples</b>	Apple production: (1) that is sold after it has undergone a change to its basic structure such as peeling, juicing, crushing, etc.; and (2) from acreage designated as processing apples on the acreage report.
<b>Varietal Group</b>	Apple varieties with similar characteristics that are grouped for insurance purposes as specified in the Special Provisions.

### **3. INSURANCE CONTRACT INFORMATION**

---

The insurance provider is to determine that the insured has complied with all policy provisions of the insurance contract. Crop provisions which are to be considered in this determination include (but are not limited to):

#### **A. INSURABILITY**

- (1) The crop insured will be all apples in the county for which a premium rate is provided by the actuarial table:
  - (a) In which the insured has a share;
  - (b) That are grown on tree varieties that are adapted to the area and have, in at least one of the previous four years, produced:
    - 1 10 bins of apples per acre in area A (a geographic area that includes Montana, Wyoming, Utah, New Mexico, and all states west thereof); or
    - 2 150 bushels of apples per acre in area B (a geographic area that includes all states not included in area A, except Colorado); or
    - 3 200 bushels of apples per acre in area C (Colorado).
  - (c) That are grown in an orchard that, if inspected, is considered acceptable by the insurance provider.
- (2) Apples interplanted with another perennial crop are insurable unless the insurance provider inspects the acreage and determines that such acreage does not meet the requirements contained in the insured’s policy.

- (3) Insurance coverage is provided against loss of production from insects and disease (e.g., when there is not an approved treatment or pesticide labeled for the specific pest or disease, etc.) but not damage due to insufficient or improper application of pest and disease control measures.
- (4) Insurance coverage is provided against failure of the irrigation water supply, if caused by an insured peril that occurs during the insurance period (e.g., drought - well, pond, or creek goes dry due to lack of rainfall, etc.).
- (5) Insurance coverage is provided against wildlife damage (insureds are expected to exercise wildlife preventive practices that are generally recognized as effective for the area (e.g., mole or mice bait for mole or mice, or deer control measures if deer are known to be a problem in the orchard, etc.)).
- (6) Insurance coverage is provided against all other natural causes of loss that cannot be prevented, including, but not limited to, failure of fruit to color, hail, wind, excess sun causing sunburn, and frost and freeze causing russetting.
- (7) Insurance coverage is **not** provided against damage or loss of production due to the insured's inability to market the apples for any reason other than actual physical damage from an insurable cause specified in the policy. For example, the insurance provider will not pay the insured an indemnity if the insured is unable to market due to quarantine, boycott, or refusal of any person to accept production.

## **B. PROVISIONS NOT APPLICABLE TO CAT COVERAGE**

- (1) Optional Units.
- (2) Written Agreements.
- (3) Hail and Fire Exclusion provisions (also not applicable if additional coverage is less than 65/100 or comparable coverage).
- (4) **Optional Coverage for Quality Adjustment.**
- (5) Coverage Enhancement Option (normally available only in Pennsylvania and Washington, refer to Bulletin No. MGR-04-013 which terminates this option effective for crop year 2006).
- (6) Refer to the Crop Insurance Handbook (CIH) and LAM for other provisions not applicable to CAT.

## **C. UNIT DIVISION**

Refer to the insurance contract for unit provisions. Unless limited by the Crop or Special Provisions, a basic unit, as defined in the Basic Provisions, may be divided into optional units if each optional unit is located on non-contiguous land or by varietal group.

## **D. GRADING AND QUALITY ADJUSTMENT**

### **(1) General Information.**

- (a) **Basic coverage.** For any apples insured under basic coverage, the policy provides coverage for both fresh and processing apple production damaged by any insured cause that occurs during insurance period that results in a loss of production. The policy also contains the grade requirements for basic coverage (refer to subsection (2) below).

(b) **Optional coverage.** For any apples insured under optional coverage, the policy provides coverage for fresh apple production damaged by any insured cause that occurs during the insurance period that results in a loss of production and/or fruit quality.

(2) **Grading and Quality Requirements.** The apple policy defines damaged production as the percentage of apple production on a unit that fails to meet the applicable grade standards as follows:

(a) **Damaged Apple Production (Basic Coverage, Fresh and Processing):** The percentage of appraised and harvested fresh or processing apple production that fails to grade U.S. No. 1 Processing or better in accordance with the grade standards, within each lot, bin, bushel, or box, as applicable, due to an insured cause of loss.

(b) **Optional Coverage for Quality Adjustment (Fresh only):** If appraised or harvested fresh apple production is damaged by insured causes to the extent that 20 percent or more of the apples do not grade U.S. Fancy or better, (or other applicable grade(s) listed in the Special Provisions) the following adjustments will apply:

1 Fresh apple production to count with 21 percent through 40 percent damaged apple production will be reduced 2 percent for each full percent of damage in excess of 20 percent.

2 Fresh apple production to count with 41 percent through 50 percent damaged apple production will be reduced 40 percent plus an additional 3 percent for each full percent of damage in excess of 40 percent.

3 Fresh apple production to count with 51 percent through 64 percent damaged apple production will be reduced 70 percent plus an additional 2 percent for each full percent of damage in excess of 50 percent.

4 Fresh apple production to count with 65 percent or more damaged apple production will not be considered production to count.

5 If the insured sells any fresh apple production as U.S. Fancy, all such sold production will be included as production to count under this option (refer to subsection 4 E, herein).

(3) Refer to the USDA grade standards for fresh and processing apples located on the internet at: [www.ams.usda.gov/standards/](http://www.ams.usda.gov/standards/)

## **4. APPLE APPRAISALS**

---

### **A. GENERAL INFORMATION**

(1) Potential production will be appraised in accordance with procedure as specified in this handbook and the LAM.

- (2) Specifically for apples, circumstances that require an appraisal of not less than the production guarantee per acre, include:
- (a) Acreage that is abandoned;
  - (b) Production that is sold by direct marketing;
  - (c) Production that is damaged solely by uninsured causes;
  - (d) When the insured fails to provide production records that are acceptable to the insurance provider; and
  - (e) When there is potential marketable production on insured acreage the insured intends to abandon or no longer care for, if the insured and insurance provider agree on the appraised amount of production.
- (3) Make separate appraisals for each apple variety grown in the orchard, as applicable.
- (4) Within the crop provisions is a requirement that insureds file a “notice of damage or loss” with the insurance provider in the following situations:
- (a) At least 3 days prior to the date harvest should have started if the crop/variety will not be harvested.
  - (b) At least 15 days before any apple production from any unit will be sold by direct marketing. In the event of the insured’s failure to give timely notice that production will be sold by direct marketing, apply an appraised amount of production to count of not less than the production guarantee per acre, if such failure results in the inability of the insurance provider to make the required appraisal.
  - (c) If the insured intends to claim an indemnity on any unit, notice must be given at least 15 days prior to the beginning of harvest of the damaged variety, or immediately if damage is discovered during harvest so that the insurance provider may inspect the damaged production. The insured must not sell or dispose of the damaged crop until after the insurance provider has given the insured written consent to do so. If the insured fails to meet the requirements listed above and such failure results in the insurance provider’s inability to inspect the damaged production, all such production will be considered undamaged and included as production to count.
- (5) **Appraisal Dates:**
- (a) Insurance provider representatives will set appraisal dates.
  - (b) Whenever possible, appraise apples after the natural fruit drop period, after hand and/or chemical thinning is completed, and before the fruit is removed from the trees or the ground, as applicable.

## **B. SELECTING REPRESENTATIVE SAMPLES FOR APPRAISALS**

- (1) Take not less than the minimum number (count) of representative samples required in **TABLE A**.
- (2) Select representative sample trees **based on:**
  - (a) Total acreage and number of trees;
  - (b) Extent of variation in the amount of production or damage within the acreage and location of fruit on the tree. When variable damage causes the crop potential to be significantly different within the same orchard, or when the insured wishes to destroy a portion of the orchard, split the orchard into suborchards, and appraise each one separately;
  - (c) Percent of each variety in the acreage;
  - (d) Tree age, density, and vigor;
  - (e) Acreage in the unit from which fruit has been picked and the extent of variation in the amount of unpicked fruit on the trees; and
  - (f) Whether portions of the orchard have been color (partially) picked.

## **C. ORCHARD APPRAISALS**

### **(1) Timing of Appraisals.**

The adjuster should arrange to inspect **(appraise)** the trees when the apples have reached **or are near** harvestable maturity. Select sample trees according to the procedures in subsection 4 B above.

### **(2) Determining the Amount of Production.**

- (a) **When all or part of the unit acreage is left unharvested**, appraise unharvested production for computing losses. If the plot contains several varieties or ages of trees, etc., **select** sample trees **that are** representative of the variety, age, etc., of trees in the unit. **Use the procedure in subsection 5 B to determine the number of fruit per sample tree and the number of boxes/bushels of fruit per tree. If apples on a sample tree are too numerous, visually divide the sample tree into 4 equal parts (quadrants).** Count the number of apples on one representative quadrant and multiply by 4 to calculate the number of fruit on the entire tree, **as applicable.**
- (b) **When unit acreage is at or near maturity, or is to be harvested**, complete a preliminary inspection to verify cause of damage and to select representative sample trees for appraisal purposes. At harvest time, select representative sample fruit from each sample tree for grading and quality adjustment purposes using the procedure below.

(3) **Selecting Representative Sample Fruit for Grading and Quality Adjustment.**

(a) **Select** the total **number of fruit per tree** from the inside, outside, top, and bottom of all four quadrants of the **representative** sample tree.

(b) **Select** representative sample **fruit that** includes apples that could be packed and apples that could be eliminated if graded at the packing house.

(c) **An individual fruit** sample must consist of a minimum of 10 apples from different locations on the tree and reflect the average condition of apples on the **unit acreage being appraised**. Divide the apples into three groups **and record the number of fruit in each group on the appraisal worksheet** as follows:

1 Apples that meet the applicable grade requirements (e.g., U.S. No. 1 Processing, U.S. Fancy, etc.);

2 Natural culls; **that include the following:**

(i) Apples that fail to meet the applicable policy grade standards **due to damage by** uninsured causes. While evaluating samples, visually inspect each apple to determine if damage was caused by something other than an insured cause of damage **(when there is other damage in addition to insured damage, refer to subsection 4 E, herein).**

(ii) Natural drop apples that fall from the tree during the course of the growing season. Insured's are not expected to **harvest** these apples from the ground UNLESS the maturity AND aggregate quantity make it economically feasible to do so.

(iii) DO NOT COUNT as natural culls any apples intentionally left on the tree past the normal maturity date for the variety and allowed to drop due to over-maturity; or, that are sprayed with a chemical ripener to accelerate abscission of the fruit. **Such apples will be considered production to count.**

3 Apples **damaged solely by insured causes.**

\*\*\*

**D. HANDLING APPRAISAL DISCREPANCIES**

If the insured disagrees with the appraisal, make arrangements for leaving representative trees UNHARVESTED and for inspecting those trees when the apples are ready to harvest (refer to the harvested production appraisal procedure). The adjuster and insured should jointly determine the trees to be selected for this representative sample. Make a sketch map of the orchard and sample trees by row number and tree count within the chosen row. The adjuster can also **physically mark or tag trees selected for appraisals to verify exact location of sample trees on the orchard**. An adjuster must be present when the representative trees are harvested.

\*\*\*

## **E. ADDITIONAL APPRAISAL INFORMATION**

### **(1) General Information.**

- (a) Insured causes of loss for basic apple coverage and optional coverage for quality adjustment include: adverse weather conditions, fire, insect, disease, earthquake, volcanic eruption, failure of irrigation water supply, wildlife, and **all other natural causes that cannot be prevented** (e.g., failure of fruit to color, hail, wind, excessive sun, etc.).
- (b) When an insured sells any harvested production to a processor (e.g., canner, juicer, etc.) and the processor does not provide an official grade determination, **all such sold production is considered production to count**. Document such production in the harvested production section of the claim form with an explanation in the “Narrative.”
- (c) When the adjuster completes all appraisals on an insured unit and the adjuster and insured sign all applicable worksheets, the claim is officially closed. The claim does not have to be held open until the final disposition of any sold apple production (i.e., removed from cold storage). If there is any harvested apple production that is placed in cold storage, such production is not covered by the apple crop provisions. Any damage that occurs during cold storage is not covered by apple crop provisions.

### **(2) Basic Production Appraisals.**

- (a) Production to count includes all appraised and harvested fresh and processing apple production from an insured unit that grades at least U.S. No. 1 Processing **that is sold**, unsold production is not considered production to count.
- (b) Insureds who select CAT coverage will have all CAT acreage appraised using the Basic Production Appraisal method.

### **(3) Quality Option Appraisals.**

- (a) The insured must elect to insure apples at the additional coverage level to qualify for this option. Optional coverage for quality adjustment is available for fresh apple production only.
- (b) Production to count under optional coverage for quality adjustment includes **all appraised and harvested fresh apple production** from an insured unit that grades at least U.S. Fancy.
- (c) In addition to appraised and harvested fresh apple production documented on the appraisal worksheet, any fresh apple production that grades at least U. S. Fancy or better (or other applicable grade(s) listed in the Special Provisions) that is sold will be included as production to count. Document such production in section II, column I - “Bu., Ton, Lbs., Cwt” of the claim form. Explain in the “Narrative” how this entry was determined.

- 1 The adjuster should refer to processor or packer records, etc., to make sure all harvested production has been accounted for and was documented on the claim form before the claim is finalized.
- 2 If the insured reports any additional sold harvested production after the claim has been finalized, refer to the LAM for corrected claim procedures.

## 5. APPRAISAL METHODS

---

### A. GENERAL INFORMATION

(1) These instructions provide information on appraisal methods for:

Appraisal Methods...	Use...
Basic Production Appraisals	when the insured selected basic coverage for fresh or processing apple production; for production that will be left unharvested; for production that will be sold by direct marketing; for conflict of interest appraisals (e.g., insured is also a packer, etc.); and for APH purposes.
Quality Option Appraisals	when the insured selected basic coverage with optional coverage for quality adjustment of fresh fruit and there is insured damage that would reduce fresh apple quality and/or production.
Representative Tree Appraisals	the production harvested from representative trees to calculate the appraised potential yield per acre.
Harvested Acreage Appraisals	the average yield per acre from harvested acreage as the appraisal per acre for unharvested acreage.

### B. UNHARVESTED PRODUCTION APPRAISALS

(1) **General Information.**

- (a) The information contained below applies to both Basic Production and Quality Option Appraisals, as applicable.
- (b) When an unharvested appraisal is to be conducted on a unit, the adjuster can use sample fruit from representative sample trees to complete parts II, III, and IV of the appraisal worksheet, as applicable.
- (c) Complete a separate appraisal worksheet for unharvested and harvested production, as applicable.

(d) Complete a separate appraisal worksheet for fresh and processing production, as applicable.

(e) Make all fruit counts after the orchard fruit has been chemically and/or hand thinned.

(2) **Appraisal Method.**

(a) For unharvested appraisals, complete subsections (b) through (l). For harvested appraisals, complete subsections (g) through (l).

(b) Use **TABLE A** herein to determine the minimum number of representative sample trees based on insured acreage. Use the procedure in subsection 4 B, herein, to select representative sample trees.

(c) Count the number of apples on each representative sample tree. Fruit counts should include apples that meet or exceed the applicable grade standards, natural culls, and apples with insured damage. Tally the number of apples from all sample trees and divide this amount by the number of sample trees to calculate the average number of apples per tree.

(d) Calculate the number of apples per box/bushel per sample tree as follows:

1 **For early appraisals:** After all fruit thinning has been completed and before apples have reached their mature size, determine the average number of apples per box/bushel expected at time of normal harvest. The expected average fruit size can be obtained from the grower, packer, processor, extension service, etc. Enter the average number of fruit per box/bushel (e.g., 100, 110, etc.) on the appraisal worksheet and note the source of the information.

2 **For near-harvest appraisals:**

(i) Use apple sizing rings to determine fruit size. Randomly select 10 fruit from each sample tree and determine fruit size. Determine the number of fruit per box/bushel based on fruit size. Record the number of fruit per box/bushel on the appraisal worksheet.

(ii) An alternative method of determining the number of fruit per box/bushel is to randomly select 10 apples from the sample tree, weigh them and round weight to tenths of a pound. Refer to the formula and example below for calculating the number of apples per box/bushel, as applicable:

**FORMULA:**

$$\begin{aligned} \text{Wt. in lbs. of 10 apples} \div 10 &= \text{lbs./apple} \\ \text{lbs./bu. or box} \div \text{lbs./apple} &= \text{apples/bu. or box} \end{aligned}$$

**EXAMPLE:**

Weight of 10 apples is 3.5 lbs., the unit of measure is 42 lbs./bu.

$3.5 \text{ lbs.} \div 10 \text{ apples} = .35 \text{ lbs./apple}$

$42 \text{ lbs./bu.} \div .35 \text{ lbs./apple} = 120 \text{ apples/bu.}$

- (iii) Insurance providers can authorize other methods for determining the number of fruit per box/bushel, provided the method is documented in the Remarks section of the appraisal worksheet or on a Special Report, as applicable.
- (e) Tally the number of apples per box/bushel from all sample trees and divide this amount by the number of sample trees to calculate the average number of apples per box/bushel. Divide the average number of apples per tree by the average number of apples per box/bushel to calculate the average number of boxes/bushels per tree.
- (f) Multiply the average number of boxes/bushels per tree by the number of trees per acre to calculate the number of boxes/bushels per acre. Multiply the number of boxes/bushels per acre by the number of acres to calculate the appraised production to count.
- (g) From representative sample trees, select a minimum of 10 representative sample fruit for grading or quality adjustment (refer to subsection 4 C herein for procedure on grading and quality adjustment).
- (h) Tally the number of fruit from each sample tree that meets or exceeds the applicable grade requirements, natural culls, and fruit with insured damage. Divide the number of fruit with insured damage by the total number of sample fruit from all sample trees to calculate the average percent of damage.
- (i) For basic production appraisals, do not calculate the adjusted percent of damage. For quality adjustment appraisals, calculate the adjusted percent of damage using the criteria in **TABLE C** (refer to subsection 7 B for instructions on converting average percent of damage to adjusted percent of damage).
- (j) Multiply either the average percent of damage (basic coverage) or the adjusted percent of damage (quality option coverage) by the appraised/harvested production to count to calculate the amount of insured damage in boxes/bushels. The appraised production to count is obtained from the appraisal worksheet and the harvested production to count is obtained from processor or packer records, as applicable.
- (k) Subtract the amount of insured damage from the appraised/harvested production to count to calculate the net production in boxes/bushels. Add any applicable production damaged by uninsured causes (for harvested appraisals only) to the net production to calculate the appraised/harvested unit appraisal.
- (l) Calculate the unharvested per acre appraisal by dividing the unharvested appraised production by the number of appraised acres, as applicable.

## C. HARVESTED PRODUCTION APPRAISALS

### (1) **Representative Tree Appraisals.**

Arrange with the insured to harvest representative trees after a crop has reached maturity. Use the production harvested from the representative trees to determine the yield per acre.

### (2) **Harvested Acreage Appraisals.**

Prior to harvest, estimate the potential amount of production on unharvested acreage and compare it to the actual production from harvested acreage. If the unharvested potential production is comparable to the harvested production, use the average yield per acre from harvested acreage as the appraisal per acre for unharvested acreage. Use this method only when the harvested acreage can be verified as being representative of the unharvested acreage.

## 6. APPRAISAL DEVIATIONS AND MODIFICATIONS

---

### A. DEVIATIONS

Deviations in appraisal methods require FCIC written authorization (as described in the LAM) prior to implementation.

### B. MODIFICATIONS

There are no pre-established modifications contained in this handbook. Refer to the LAM for additional information.

## 7. APPRAISAL WORKSHEET ENTRIES AND COMPLETION PROCEDURES

---

### A. GENERAL INFORMATION

- (1) Use this appraisal worksheet to appraise any potential production that will be left unharvested, sold by direct marketing, for conflict of interest appraisals, or for quality adjustment appraisals (refer to the LAM for additional information).
- (2) If there is more than one orchard in a unit, complete a separate appraisal worksheet for each orchard. Use extra worksheet pages if necessary.

\*\*\* (3) Record harvested and unharvested acreage on separate appraisal worksheets.

- (4) Record fresh and processing production on separate appraisal worksheets.

## **B. WORKSHEET ENTRIES AND COMPLETION INFORMATION**

Verify or make the following entries:

### **Item**

### **No.**

### **Information Required**

**Company Name:** Insurance provider, if not preprinted on the worksheet (company name).

**Claim Number:** Claim number as assigned by the insurance provider.

### **PART I - HEADING**

1. **Insured's Name:** Name of insured identifying EXACTLY the person (legal entity) to whom the policy is issued.
2. **Policy Number:** Insured's assigned policy number.
3. **Crop Year:** Four-digit crop year, as defined in the policy, for which the claim is filed.
4. **Unit Number:** Five-digit unit number from the Summary of Coverage after it is verified to be correct (e.g., 00100).
5. **Variety:** Variety name as shown in the actuarial documents. Note how many varieties are damaged by insurable causes in the orchard and make entries as follows:
  - a. When there is only one variety: Enter the variety name.
  - b. When there is more than one variety and:
    1. All varieties are damaged equally - Enter name of the principal variety only.
    2. Damage varies significantly between varieties - Enter variety name and complete a separate appraisal worksheet for each variety with such variability.
6. **Type:** Enter applicable type code as specified in the Special Provisions (e.g., "111," "112," "113," "114," etc.).
7. **Practice:** Three-digit code number entered exactly as specified in the actuarial documents, for the practice carried out by the insured. If "No Practice Specified," enter appropriate three-digit code number from the actuarial documents.
8. **Orchard ID:** The orchard identification symbol from a sketch map, aerial photograph, or orchard inspection form after verification.
9. **Damage:**
  - a. **Cause:** Name of the insured cause(s) of loss as listed in the LAM.

- b. **Date(s):** First three letters of the month during which MOST of the insured unit damage (including progressive damage) occurred for each inspection. Include the SPECIFIC DATE where applicable as in the case of hail damage (e.g., May 10).

10. **Unit Acres:** Unit acres rounded to tenths.

11. **Appraised Acres:** Number of acres to tenths, for the variety listed in item 5.

- a. Inspect harvested and unharvested acres on the SAME orchard separately.
- b. Complete a separate appraisal worksheet when unit acreage contains both unharvested and harvested potential production. Identify appraised acreage as either “UH” - unharvested or “H” - harvested, as applicable (e.g., 5.0 “UH,” 12.0 “H” etc.).

12. **Number of Trees per Acre:** The actual number of producing trees per acre. Refer to TABLE B if there is a 100% stand or determine the number of trees by count if less than 100% stand.

13. **Total Number of Trees:** Column 11 times column 12, results in whole trees.

#### **PART II - AVERAGE NUMBER OF APPLES PER SAMPLE TREE**

14. **Number of Apples per Sample:** Enter the number of apples on each sample tree, include apples that meet or exceed the applicable grade standards, apples damaged by insured causes, and natural culls. Make fruit counts after all chemical and hand thinning has been completed. Use a sketch map to identify the location of all sample tree in the orchard.

15. **Total Apples from All Samples:** Total number of all sample apples from column 14 entries.

16. **Number of Samples:** The total number of samples from column 14.

17. **Average Number of Apples per Tree:** Column 15 divided by column 16, results rounded to tenths.

#### **PART III - NUMBER OF APPLES PER BOX/BUSHEL/OTHER**

Check either BOX/BUSHEL/OTHER in heading, as applicable. Identify the applicable unit of measure (e.g., bin, field box, lot) if “OTHER” is checked. Convert “OTHER” units of measure to boxes or bushels, as applicable. Document conversion information in the “Remarks” section.

18. **Number of Apples per Box/Bushel per Sample Tree:** Enter the applicable number of apples per box/bushel. Refer to subsection 5 B, herein.

19. **Total Number of Apples from All Samples:** Total number of apples in column 18.

20. **Number of Samples:** Total number of samples in column 18.
21. **Average Number of Apples per Box/Bushel:** Column 19 divided by column 20, results rounded to tenths.

#### PART IV - PRODUCTION TO COUNT CALCULATIONS

22. **Average Number of Apples per Tree:** Transfer entry from column 17.
23. **Average Number of Apples per Box/Bushel:** Transfer entry from column 21.
24. **Number of Boxes/Bushels per Tree:** Column 22 divided by column 23, results rounded to three-decimal places.
25. **Number of Trees per Acre:** Transfer entry from column 12.
26. **Number of Boxes/Bushels per Acre:** Column 24 times column 25, results rounded to tenths.
27. **Appraised Acres:** Transfer entry from column 11.
28. **Appraised Production to Count:** Column 26 times column 27, results rounded to tenths.

#### PART V - GRADING AND QUALITY ADJUSTMENT CALCULATIONS

General Instructions for columns 29 through 43 entries.

- a. Use TABLE A to determine the minimum number of representative sample trees.
- b. When there are more than 10 samples per line, consolidate additional samples under the sample number "10" heading for apples that meet the applicable grade, natural culls, and insured damage.
- c. Enter the "Harvested" and "Unharvested" gross potential production on the applicable line to calculate entries for columns 37 through 43. Column entry instructions, below, that are labeled as "Harvested" apply only to harvested appraisals. Column entry instructions that are labeled as "Unharvested" apply only to unharvested appraisals. Column entry instructions with neither "Harvested" or "Unharvested" apply to both harvested and unharvested appraisals.

29. **Sample Number:** MAKE NO ENTRY. Sample numbers are pre-printed on the appraisal worksheet.
30. **Grade:**
- a. Enter the applicable grade standard (e.g., "U.S. No. 1 Processing," "U.S. Fancy" etc.).
  - b. Enter the number of apples in each sample that meet or exceed the applicable grade standards.

31. **Natural Culls:** Enter the number of natural cull apples from each sample.

32. **Insured Damage:**

- a. Enter the number of apples from each sample that fail to meet the applicable grade requirements because of insured damage (refer to the Apple Crop Provisions for insurable causes of loss).
- b. When the adjuster and the insured cannot agree on the percentage of insurable damage, take a representative sample to a licensed federal/state grader, as applicable (at the insured's expense, if necessary) for final determination of the percentage of the apples which are damaged solely by insurable causes according to the grade standards for the applicable type of coverage in effect.

33. **Line Total:** Total the number of "Grade," "Natural Culls," and "Insured Damage" apples by line, in samples 1 through 10.

34. **Column 33 Line Totals:** Total of all column 33 entries.

35. **Average %:** Calculate the Average % as follows:

- a. Determine the number of "Insured Damage" apples in column 33.
- b. Divide column 33 "Insured Damage" apples by column 34, enter result as a whole % (refer to the example calculations below).

**EXAMPLE:**

Column 33 entry = 23 sample apples damaged by insured causes. Column 34 entry = 50 total apples from all samples. $23 \div 50 = .46$ average percent of damage (as a decimal) Enter "46" in column 35.
---

- c. When appraised or harvested fresh apple production insured under optional coverage has 65 percent or more fresh apple production that does not meet the applicable grade standard, that production will NOT be considered as production to count. When this occurs, enter "100" in column 35.

36. **Adjusted %:** For optional coverage only, convert the Average % (from column 35) to the corresponding Adjusted % (refer to TABLE C for applicable percentages), enter result as a whole percent (e.g., 58).

37. **Appraised Production to Count:**

- a. **Unharvested Appraisals:** Transfer amount from column 28.
- b. **Harvested Appraisals:** Transfer gross delivered harvested production from the processor or packing house records, in boxes/bushels rounded to tenths that grades at least U.S. No. 1 Processing or better (refer to subsection 4 E, herein). For pre-harvest inspections, delay completion of columns 37 through 43 until harvest is complete, unless harvest will not be completed.

38. **Insured Damage:** Column 36 times column 37, results in boxes/bushels rounded to tenths.

39. **Net Boxes or Bushels:** Column 37 minus column 38, results in boxes/bushels rounded to tenths.

40. **Uninsured Causes:** Computed total number of boxes/bushels to tenths, of apples lost to **UNINSURED** cause(s):

a. **Unharvested appraisals:** MAKE NO ENTRY (any unharvested apples that meet the applicable grade requirements due ONLY to UNINSURABLE damage will have been included as part of the apples in column 31 - "Natural Culls").

b. **Harvested appraisals:**

(1) Determine the TOTAL amount by comparing the per-acre actual harvested or appraised production with the production from comparable acreage NOT affected by the uninsurable cause(s); and/or

(2) Determine uninsured causes from verifiable processor or packing house records, as applicable.

41. **Appraised Production:** Column 39 plus column 40, results in boxes/bushels to tenths. For harvested appraisals only, transfer this entry to section II, column I on the claim form.

42. **Appraised Acres:** For unharvested appraisals - transfer acreage entry from column 11.

43. **Per Acre Appraisal:** For unharvested appraisals - column 41 divided by column 42, results in boxes/bushels rounded to tenths. Transfer this entry to section I, column J - "Appraised Potential" on the claim form.

44. **Remarks:**

- a. Use a sketch map that identifies the orchard boundaries and locations of representative sample trees.
- b. Enter any additional pertinent information about this appraisal such as any production damaged by uninsured causes, provided there are acceptable records of such production.
- c. Note the bin-to-field box or bushel ratio, weight per bushel, and any calculations used to convert production to boxes/bushels.
- d. Document the date representative samples were taken if harvest is NOT complete (i.e., worksheet and claim are to be completed at a later date).
- e. List and identify any uninsured cause(s) of damage or loss.
- f. Note any differences between unit acres and appraised acres.
- g. Identify the location of any damaged acreage harvested before appraisals were conducted.
- h. Explain and identify any voluntary destruction (e.g., tree removal, etc.) of any orchard acreage.
- i. Attach any reference materials that identify the orchard (i.e., aerial photographs, sketch maps, etc.).

j. Document circumstances of any conflict of interest appraisals.

## PART VI - SIGNATURES

45. **Adjuster's Signature, Code Number, and Date:** Signature of adjuster, code number, and date signed **after** the insured (or insured's authorized representative) has signed. If an appraisal is performed prior to signature date, document the date of appraisal in the Remarks/Narrative section of the Appraisal Worksheet (if available); otherwise, document the appraisal date in the Narrative of the claim form.
46. **Insured's Signature and Date:** Insured's (or authorized representative's) signature and date. BEFORE obtaining insured's signature, REVIEW ALL ENTRIES on the Appraisal Worksheet WITH THE INSURED, particularly explaining codes, etc., that may not be readily understood.
47. **Pg \_\_\_ of \_\_\_:** Page number - (Example: Page 1 of 1, Page 2 of 2, etc.).

## **8. CLAIM FORM ENTRIES AND COMPLETION PROCEDURES**

### **A. GENERAL INFORMATION**

- (1) The claim form, hereafter referred to as a “Production Worksheet” is a progressive form containing all notices of damage for all preliminary and final inspections made on a unit.
- (2) If a Production Worksheet has been prepared on a prior inspection, verify each entry and enter additional information as needed. If a change or correction is necessary, strike out all entries on the line and re-enter correct entries on a new line. The adjuster and the insured are to initial any line deletions.
- (3) Refer to the LAM for instructions regarding the following:
  - (a) Acreage report errors.
  - (b) Delayed notices and delayed claims.
  - (c) Corrected claims or fire losses (double coverage), and cases involving uninsured causes of loss, unusual situations, controversial claims, concealment, or misrepresentation.
  - (d) Claims involving a Certification Form, (when all the acreage on the unit has been appraised to be put to another use or other reasons as described in the LAM).
  - (e) “No Indemnity Due” claims (which must be verified by an APPRAISAL or NOTIFICATION from the insured that the Production exceeded the guarantee).
- (4) The adjuster is responsible for determining if any of the insured’s requirements under the notice and claim provisions of the policy have been met. If any have not, the adjuster should contact the insurance provider.
- (5) Instructions labeled “**PRELIMINARY**” apply to preliminary inspections only. Instructions labeled “**FINAL**” apply to final inspections only. Instructions not labeled apply to ALL inspections.

### **B. FORM ENTRIES AND COMPLETION INFORMATION**

Verify or make the following entries:

<b><u>Item No.</u></b>	<b><u>Information Required</u></b>
1.	<b>Crop/Code #:</b> “Apples” (0054).
2.	<b>Unit #:</b> Five-digit unit number from the Summary of Coverage after it is verified to be correct (e.g., 00100).
3.	<b>Legal Description:</b> Section, township, and range number or other legal description that identifies the location of the unit.

4. **Date of Damage:** First three letters of the month during which MOST of the insured damage (including progressive damage) occurred for each inspection. Include the SPECIFIC DATE where applicable as in the case of hail damage (e.g., May 10).
5. **Cause of Damage:** Name of the insured cause(s) of loss for **this crop** as listed in the LAM. If it is evident that no indemnity is due, enter “NONE.” If an insured cause of loss is coded as “Other,” explain in the Narrative. Refer to the Basic Provisions and crop provisions for this crop for information pertaining to insured and uninsured causes of loss.

6. **Primary Cause %:**

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Percent of damage for the cause of damage listed in item 5 above that is determined to be the primary cause of damage, to the nearest whole percent. The primary cause of damage must exceed 50 percent (e.g., 51%). Enter an “X” for the major secondary cause of damage.

7. **Company/Agency:** Name of the company and agency servicing the contract.

8. **Name of Insured:** Name of the insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.

9. **Claim #:** Claim number as assigned by the insurance provider.

10. **Policy #:** Insured’s assigned policy number.

11. **Crop Year:** **Four-digit** crop year, as defined in the policy, for which the claim is filed.

12. **Additional Units:**

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Unit number(s) for ALL non-loss units for the crop at the time of final inspection. A non-loss unit is any unit for which a Production Worksheet has not been completed. Additional non-loss units may be entered on a single Production Worksheet. If more spaces are needed for non-loss units, enter the unit numbers identified as “Non-loss Units,” in the Narrative or on an attached Special Report.

13. **Est. Prod. Per Acre:**

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Estimated yield per acre in whole boxes/bushels of all non-loss units for the crop at the time of final inspection.

14. **Date(s) Notice of Loss:**

**PRELIMINARY:**

- a. Date the notice of damage was given for the unit in item 2.
- b. A third preliminary inspection (if needed) requires an additional set of Production Worksheets. Enter the date of notice for a third preliminary inspection in the 1st space of item 14 on the second set.
- c. Reserve the “Final” space on the first page of the first set of Production Worksheets for the date of notice for the final inspection.
- d. If the inspection is initiated by the insurance provider, enter “Company Insp.” instead of the date.

**FINAL:** Transfer the last date in the 1st or 2nd space to the FINAL space if a final inspection should be made as a result of the notice. Always enter the complete date of notice (month, day, year) for the “FINAL” inspection in the FINAL space on the first page of the first set of Production Worksheets. For a delayed notice of loss or delayed claim, refer to the LAM.

15. **Companion Policy(s):**

- a. If no other person has a share in the unit (insured has a 100 percent share), MAKE NO ENTRY.
- b. In all cases where the insured has LESS than a 100 percent share of a loss-affected unit, ask the insured if the OTHER person sharing in the unit has a multiple-peril contract (i.e., not crop-hail, fire, etc.). If the other person does not, enter “NONE.” Refer to the LAM for further information regarding companion contracts.
  - (1) If the other person has a multiple-peril contract and it can be determined that the SAME insurance provider services it, enter the contract number. Handle these companion policies according to insurance provider instructions.
  - (2) If the OTHER person has a multiple-peril contract and a DIFFERENT insurance provider or agent services it, enter the name of the insurance provider and/or agent (and contract number) if known.
  - (3) If unavailable to verify the existence of a companion contract, enter “Unknown” and contact the insurance provider for further instructions.

**SECTION I - ACREAGE APPRAISED, PRODUCTION AND ADJUSTMENTS**

Make separate line entries for varying:

- (1) Rate classes, types, or farming practices;
- (2) APH yields;
- (3) Appraisals;
- (4) Stages or intended use(s) of acreage;
- (5) Shares (e.g., 50 percent and 75 percent shares on the same unit); or
- (6) Appraisals for damage due to hail or fire if Hail and Fire Exclusion is in effect.

**Verify or make the following entries:**

**Item**

**No.      Information Required**

A.      **Field ID:** The field identification symbol from a sketch map or an aerial photo. Refer to the Narrative instructions. **Enter the applicable two-digit code for first crop and second crop.** In the margin of the last line entry or in a separate column, enter the date of inspection for the last line entry of each inspection.

**REFER TO THE LAM FOR INSTRUCTIONS REGARDING ENTRIES OF FIRST CROP AND SECOND CROP CODES.**

B.      **Preliminary Acres:**

**PRELIMINARY:** The number of acres, to tenths, (include “E” if estimated), for which consent for other use has been given. Determine actual acreage, to tenths, when the boundaries of the appraised acreage may not be determined later. **Refer to the LAM or CIH for acreage measurement instructions specific to perennial crops.**

**FINAL:** MAKE NO ENTRY.

C.      **Final Acres:** Refer to the LAM **or CIH** for definition of acceptable determined acres **for perennials crops** used herein.

Determined acres to tenths (including “E” if estimated) for which consent is given for other use and/or:

- a. Put to other use without prior consent.
- b. Abandoned.
- c. Damaged by uninsured causes.
- d. For which the insured failed to provide acceptable records of production.
- e. From which production was sold by direct marketing if the insured failed to meet the requirements contained in the crop provisions.

**FINAL:** Determined acres to tenths.

Acreage breakdown WITHIN a unit may be estimated (enter “E” in front of the acres) if a determination is impractical AND if authorization was received from the insurance provider. Document authorization in the Narrative.

ACCOUNT FOR ALL ACREAGE IN THE UNIT. In the event of over-reported acres, handle in accordance with individual insurance provider’s instructions. In the event of under-reported acres, draw a diagonal line in column “C” as shown below.

- C<sub>1</sub> Enter the ACTUAL acres for the orchard or suborchard.
- C<sub>2</sub> Enter the REPORTED acres for the orchard or suborchard.

D.      **Interest or Share:** Insured’s interest in the crop to three-decimal places as determined at the time of inspection. If shares vary on the same UNIT, use separate line entries.

- E. **Risk:** Three-digit code for the correct “Rate Class” specified on the actuarial documents. If a “Rate Class” or “High Risk Area” is not specified on the actuarial documents, make no entry. Verify with the Summary of Coverage and if the “Rate Class” is found to be incorrect, revise according to insurance provider instructions. Refer to the LAM. Unrated land is uninsurable without a written agreement.
- F. **Practice:** Three-digit code number, entered exactly as specified on the actuarial documents, for the practice carried out by the insured. If “No Practice Specified,” enter appropriate three-digit code number from the actuarial documents.
- G. **Type/Class/Variety:** Three-digit code number entered exactly as specified on the actuarial documents, for the type grown by the insured. If “No Type Specified,” enter appropriate three-digit code number from the actuarial documents.

In counties where the actuarial documents have type codes for both fresh (F) and processing (P) apples, VERIFY that the “fresh” and “processing” established prices are “set” as shown on the actuarial documents (also check the application, contract change form, and the Summary of Coverage, if available). Also VERIFY which coverage is in effect for EACH orchard and the actual orchard management (for fresh-market or processing apples) as shown on the Summary of Coverage. ENTER the appropriate type code for EACH orchard after said verification.

- H. **Stage:**

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Stage abbreviations as shown below.

**STAGE    EXPLANATION**

“P”.....Acreage abandoned without consent, put to other use without consent, damaged solely by uninsured causes, for which the insured failed to provide records of production which are acceptable to the insurance provider, or from which production was sold by direct marketing if the insured failed to meet the requirements contained in the crop provisions.

“H”..... Harvested.

“UH”..... Unharvested or other use with consent.

**GLEANED ACREAGE:** Refer to the LAM for information on gleaning.

- I. **Intended or Final Use:** Use of acreage. Use the following “Intended Use” abbreviations.

<u>USE</u>	<u>EXPLANATION</u>
“Bulldozed,” etc...	Use made of acreage
“WOC”	Other use without consent
“SU”	Solely uninsured
“ABA”	Abandoned without consent
“H”	Harvested
“UH”	Unharvested

Verify any “Intended Use” entry. If the final use of the acreage was not as indicated, strike out the original line and initial it. Enter all data on a new line showing the correct “Final Use.”

**GLEANNED ACREAGE: Refer to the LAM for information on gleaning.**

**J. Appraised Potential:**

- a.** Per-acre appraisal in boxes/bushels to tenths of POTENTIAL production for the acreage appraised. Refer to the appraisal methods and applicable appraisal worksheet instructions.
- b.** If there is no potential on “UH” acreage, enter “0.”

K<sub>1</sub>-M. MAKE NO ENTRY.

N. **Adjusted Potential:** Transfer entry from column “J” in boxes/bushels to tenths.

O. **Total to Count:** Column “C” or “C<sub>1</sub>” (**actual acres**) times column “N,” results in boxes/bushels to tenths.

P. **Per Acre:** Per-acre Guarantee - Enter the per-acre production guarantee from the insured’s policy.

Q. **Total:** Column “C<sub>2</sub>” (**reported acres**; “C” if acreage is not under-reported) times column “P,” results in boxes/bushels to tenths.

**16. Total Acres:**

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Total actual acres (column “C” [or “C<sub>1</sub>” if there are under-reported acres]), to tenths.

FOR ITEM 17, WHEN SEPARATE LINE ENTRIES ARE MADE FOR VARYING SHARES, STAGES, APH YIELDS, PRICE ELECTIONS, TYPES, ETC., WITHIN THE UNIT, AND TOTALS NEED TO BE KEPT SEPARATE FOR CALCULATING INDEMNITIES, MAKE NO ENTRY AND FOLLOW THE INSURANCE PROVIDER’S INSTRUCTIONS; OTHERWISE, MAKE THE FOLLOWING ENTRIES.

17. **Totals:**

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Total of column "O" and total of column "Q."

**NARRATIVE:**

If more space is needed, document on a Special Report, and enter "See Special Report." Attach the Special Report to the Production Worksheet.

- a. If no acreage is released on the unit enter "No acreage released," adjuster's initials, and date.
- b. If notice of damage was given and "No Inspection" is necessary, enter the unit number(s), "No Inspection," date, and adjuster's initials. The insured's signature is not required.
- c. Explain any uninsured causes, unusual, or controversial cases.
- d. If there is an appraisal in Section I, column "M" for uninsured causes due to a hail/fire exclusion, show the original hail/fire liability per acre and the hail/fire indemnity per acre.
- e. Document the actual appraisal date if an appraisal was performed prior to the adjuster's signature date on the appraisal worksheet, and the date of the appraisal was not recorded on the appraisal worksheet.
- f. State that there is "No Other Fire Insurance" when fire damages or destroys the insured crop, and it is determined that the insured has no other fire insurance. Also refer to the LAM.
- g. Explain any errors found on the Summary of Coverage.
- h. Explain any commingled production. Refer to the LAM.
- i. Explain any entry for "Production Not to Count" in Section II, column "O," and/or any production not included in Section II, column "T" or columns "B" through "E" entries (e.g., harvested production from uninsured acreage that can be identified separately from the insured acreage in the unit).
- j. Explain a "No" checked in column 19.
- k. Attach a sketch map or aerial photograph to identify the total unit:
  - (1) If consent is or has been given to put part of the unit to another use;
  - (2) If uninsured causes are present; or
  - (3) For unusual or controversial cases.

Indicate on the aerial photograph or sketch map, the disposition of acreage destroyed or put to other use or without consent.

- l. Explain any differences between date of inspection and signature dates. For an ABSENTEE insured, enter the date of the inspection AND the date of mailing the Production Worksheet for signature.
- m. When any other adjuster or supervisor accompanied the adjuster on the inspection, enter the code number of the other adjuster or supervisor and date of inspection.
- n. Explain the reason for a “No Indemnity Due” claim. “No Indemnity Due” claims are to be distributed in accordance with the insurance provider’s instructions.
- o. Explain any delayed notices or delayed claims as instructed in the LAM.
- p. Document any authorized estimated acres shown in Section I, column “C” as follows: “Line 3 ‘E’ acres authorized by the insurance provider MM/DD/YYYY.”
- q. Document the method and calculation used to determine acres for the unit. Refer to the LAM.
- r. Specify the type of insects or disease when the insured cause of loss is listed as insects or disease. Explain why control measures did not work.
- s. Document the name and address of the charitable organization when gleaned acreage is applicable. Refer to the LAM for more information.
- t. Document any other pertinent information, including any data to support any factors used to calculate the production.

## **SECTION II - HARVESTED PRODUCTION**

### GENERAL INFORMATION:

- (1) When all acreage has been harvested, determine total production from warehouse receipts, processor receipts, or farm management records (refer to the LAM for farm record requirements) verified by the adjuster and supported by written records from the first handler. This production will be the basis for computing losses from the insured and uninsured causes of damage on the Production Worksheet.
- (2) Account for ALL HARVESTED PRODUCTION (for **ALL ENTITIES** sharing in the crop) except production appraised BEFORE harvest and shown in Section I because the quantity cannot be determined later.
- (3) For production commercially stored, stored on the farm, sold, etc., enter the name and address of storage facility, buyer, packing house, or processor as applicable in columns “B” through “E.”
- (4) If additional lines are necessary, the data may be entered on a continuation sheet. If production has been commingled, refer to the LAM. **USE SEPARATE LINES FOR:**

- (a) Separate storage facilities.
  - (b) Different buyers or processors - the insured must have maintained satisfactory records of ALL production.
  - (c) Varying shares; e.g., 50 percent and 75 percent shares on same unit.
  - (d) Harvested production from more than one insured practice (or type) and a separate approved APH yield has been established for each, the harvested production also must be entered on separate lines in columns "A" through "S" by type.
- (5) If the insured's production records are based ONLY ON WEIGHT, calculate the production by dividing the total weight by the applicable weight-per-loose-field-box/bushel as defined in the crop provisions, or designated in the actuarial documents.
- (6) Bushel/Box-Bin Equivalents - If the insured's production records are based on a "Bin Count" the following applies:
- (a) In localities where a "Loose Field Box" is the standard container, use 25 loose field boxes per bin as the standard equivalent for determining the gross amount of production unless the number of loose field boxes is determined to be different than 25. In such cases, use the determined boxes per bin.
  - (b) In localities where a "Bushel" is the standard container, the number of bushels per bin is the number established by the first handler (packing house or processor).
- (7)** In all localities, if the handler was NOT a packer or processor, the production will be determined by the adjuster on the basis of available records.

**Verify or make the following entries:**

**Item  
No.**

**Information Required**

18. **Date Harvest Completed: (Used to determine if there is a delayed notice or a delayed claim. Refer to the LAM.)**

**PRELIMINARY: MAKE NO ENTRY.**

**FINAL:**

- a. The earlier of the date the ENTIRE acreage on the unit was (1) harvested, (2) totally destroyed, (3) put to other use, (4) a combination of harvested, destroyed, or put to other use, or (5) the calendar date for the end of the insurance period.
- b. If at the time of final inspection (if prior to the end of the insurance period), there is any unharvested insured acreage remaining on the unit that the insured does not intend to harvest, enter "**Incomplete.**"

- c. If at the time of final inspection (if prior to the end of the insurance period), **none** of the insured acreage on the unit has been harvested, and the insured does not intend to harvest such acreage, enter “**No Harvest.**”
- d. If the claim involves a Certification Form, enter the date from the Certification Form when the entire unit is put to another use. Refer to the LAM.

19. **Similar Damage:**

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Check “Yes” or “No.” Check “Yes” if amount and cause of damage due to insurable causes is similar to the experience of other orchards in the area. If “No” is checked, explain in the Narrative.

20. **Assignment of Indemnity:** Check “Yes” **only** if an assignment of an indemnity is in effect for the crop year; otherwise check “No.” Refer to the LAM.

21. **Transfer of Right to Indemnity:** Check “Yes” **only** if a transfer of right to an indemnity is in effect for the unit for the crop year; otherwise check “No.” Refer to the LAM.

A<sub>1</sub>. **Share:** RECORD ONLY VARYING SHARES on SAME unit, to three decimal places.

A<sub>2</sub>. **Field ID:**

- a. If only one practice and/or type of harvested production is listed in Section I, MAKE NO ENTRY.
- b. If more than one practice and/or type of harvested production is listed in Section I, and a separate approved APH yield exists, indicate for each practice/type the corresponding Field ID (from Section I, column “A”).

**c. Enter the applicable two-digit code for first crop and second crop.**

**REFER TO THE LAM FOR INSTRUCTIONS REGARDING ENTRIES OF FIRST CROP AND SECOND CROP CODES.**

B. - E. **Buyer, Packing House, or Processor:** For production sold, enter the name and address of the Buyer, Packing House, or Processor, as applicable. For apples otherwise disposed of, indicate method of disposition.

F. - H. MAKE NO ENTRY.

I. **Bu., Ton, Lbs., Cwt.:** **As applicable**, circle “Bu.” or **line through Bu., Ton, Lbs., Cwt. and enter “Boxes”** and circle **“Boxes”** in column heading. Production in boxes/bushels to tenths as determined by delivery records, production recaps, sales receipts from processors (must be NET WEIGHT), etc.

- a. Enter amount of HARVESTED production from the appraisal worksheet. Account for all harvested production that is sold or stored, do NOT list processing apples that have already been accounted for by a FIRST handler.
- b. Under ANY coverage, include any production **that is sold** from the unit, that is not accounted for on a worksheet (harvested separately).
- c. Under optional coverage, all harvested fresh apple production that is sold as U.S. Fancy or better (or other applicable grade(s) listed in the Special Provisions) is production to count. Document such production on a separate line and explain in the "Narrative" (refer to subsection 4 E, herein).

J. - M<sub>2</sub>. MAKE NO ENTRY.

N. **Adjusted Production:** Transfer entry from column "T" in boxes/bushels to tenths.

O. **Production not to Count:** Net production NOT to count in boxes/bushels to tenths WHEN ACCEPTABLE RECORDS IDENTIFYING SUCH PRODUCTION ARE AVAILABLE, from harvested acreage which has been assessed an appraisal of not less than the guarantee per acre or from other sources (e.g., other units or uninsured acreage).

THIS ENTRY MUST NEVER EXCEED PRODUCTION SHOWN ON THE SAME LINE. EXPLAIN ANY "PRODUCTION NOT TO COUNT" IN THE "NARRATIVE."

P. **Production:** Result of subtracting the entry in column "O" from column "N" in boxes/bushels to tenths.

Q<sub>1</sub>-R. MAKE NO ENTRY.

S. **Production to Count:** Transfer entry from column "P."

FOR ITEMS 22- 24. WHEN SEPARATE LINE ENTRIES ARE MADE FOR VARYING SHARES, STAGES, APH YIELDS, PRICE ELECTIONS, TYPES, ETC., WITHIN THE UNIT AND TOTALS NEED TO BE KEPT SEPARATE FOR CALCULATING INDEMNITIES, MAKE NO ENTRY AND FOLLOW THE INSURANCE PROVIDER'S INSTRUCTIONS; OTHERWISE, MAKE THE FOLLOWING ENTRIES.

22. **Section II Total:**

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Total of column "S," in boxes/bushels to tenths.

23. **Section I Total:**

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Enter figure from Section I, column "O" total, in boxes/bushels to tenths.

24. **Unit Total:**

**PRELIMINARY:** MAKE NO ENTRY.

**FINAL:** Total of column 22 and 23 in boxes/bushels to tenths.

25. **Adjuster's Signature, Code #, and Date:** Signature of adjuster, code number, and date signed **after** the insured (or insured's authorized representative) has signed. For an absentee insured, enter adjuster's code number **ONLY**. The signature and date will be entered **AFTER** the absentee has signed and returned the Production Worksheet. Final indemnity inspections should be signed on the bottom line.

26. **Insured's Signature and Date:** Insured's (or insured's authorized representative's) signature and date. **BEFORE** obtaining insured's signature, **REVIEW ALL ENTRIES** on the Production Worksheet **WITH THE INSURED**, particularly explaining codes, etc., which may not be readily understood. Final indemnity inspections should be signed on the bottom line.

27. **Page Numbers:**

**PRELIMINARY:** Page numbers - "1," "2," etc., at the time of inspection.

**FINAL:** Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.).

35																															36				

For tree spacings not shown on the chart, multiply the distance between trees (nearest tenth foot) times the distance between rows (nearest tenth foot) and divide this result to tenths into 43,560 sq. ft. per acre (round to the nearest whole number). **EXAMPLE:** 6.5 ft. x 10.0 ft. = 65.0 sq. ft., then 43,560 ÷ 65.0 = 670 trees per acre.

65-100	100

Use this table when the insured has elected the optional coverage for quality adjustment option. Use the factors in the "Average Percent" column to determine the entry for column 36 - Adjusted % on the appraisal worksheet.

**EXAMPLE:** If the Avg. % is 46, use the above table to find 46 in the Average Percent column and the corresponding Adjusted Percent which is 58. Enter "46" as the Avg. % and "58" as the Adj. % on the appraisal worksheet.
