PLUM LOSS ADJUSTMENT STANDARDS HANDBOOK

2005 And Succeeding Crop Years

**UNITED STATES DEPARTMENT OF AGRICULTURE
WASHINGTON, D.C. 20250**

FEDERAL CROP INSURANCE HANDBOOK	NUMBER: 25200 (12-2005)
SUBJECT: PLUM LOSS ADJUSTMENT STANDARDS HANDBOOK 2005 AND SUCCEEDING CROP YEARS	OPI: Product Development Division
	APPROVED: DATE: /s/ Tim B. Witt 11/23/04 Deputy Administrator, Research and Evaluation

THIS HANDBOOK CONTAINS THE OFFICIAL FCIC-APPROVED LOSS ADJUSTMENT STANDARDS FOR THIS CROP FOR THE 2005 AND SUCCEEDING CROP YEARS. IN THE ABSENCE OF INDUSTRY-DEVELOPED, FCIC-APPROVED PROCEDURE FOR THIS CROP FOR THE 2005 AND SUCCEEDING CROP YEARS, ALL REINSURED COMPANIES WILL UTILIZE THESE STANDARDS FOR BOTH LOSS ADJUSTMENT AND LOSS TRAINING.

SUMMARY OF CHANGES/CONTROL CHART

The following list contains significant changes to this handbook, as determined by us. It may not represent all changes made. All changes made to this handbook are applicable regardless of whether or not listed.

Major Changes: See changes or additions in text which have been **highlighted**. Three stars (***) identify where information has been removed.

Changes for December 2004 Issuance (FCIC-25200):

- A. TC 1, sections 3 and 7: Revised subsection headings.
- B. Page 1, section 1: Inserted instructions for the handbook user to use the LAM in conjunction with this handbook for loss adjustment purposes.
- C. Page 1, section 2 A: Inserted the phrase “and signed by the insured.”
- D. Page 1, section 2 B (3): Inserted abbreviation for Crop Insurance Handbook (CIH).
- E. Page 2, section 3 A (1): Revised text so that procedure tracks with RMA-approved crop handbook standards and the Plum Crop Provisions.
- F. Page 3, section 3 B (4): Inserted information that refers the handbook user to the CIH and LAM for additional information not applicable to CAT coverage.

PLUM LOSS ADJUSTMENT STANDARDS HANDBOOK

SUMMARY OF CHANGES/CONTROL CHART (Continued)

- G. Page 3, section 3 D (1): Revised grading and quality adjustment procedures to track with the Plum Crop Provisions.
- H. Page 5, section 4 C (1): Inserted the phrase: “when conducting appraisals.”
- I. Page 5, section 4 C (2) (e): Revised text to reduce the number of sample fruit in representative samples from 100 to 50 fruit per sample.
- J. Pages 6 -8, section 5 B: Revised procedures for the immature appraisal method. Also, revised procedures for the mature appraisal method that included new instructions for calculating appraisals using 50-fruit per representative sample tree and reduced the number of representative sample trees.
- K. Page 9, section 5 D (2): Revised harvested acreage appraisal information.
- L. Page 9, section 6 B: Revised appraisal modification text to track with RMA-approved crop handbook standards.
- M. Pages 10-13, section 7 B: Revised appraisal worksheet item entry instructions to track with the new 50-fruit per sample tree, reduced number of representative sample tree appraisal methodology, and new appraisal worksheet.
- N. Pages 14-15, Example Appraisal Worksheets: Inserted a new appraisal worksheet. Also, revised example appraisal worksheet calculations to track with new 50-fruit per sample tree and reduced number of representative sample tree appraisal methodology.
- O. Page 19, item A - Field ID: Revised item entry instructions. Also, added instructions referring the handbook user to the LAM for first and second crop codes.
- P. Page 19, items B - Preliminary Acres and C - Final Acres: Inserted references to the CIH and LAM for instructions on determining perennial crop acreage.
- Q. Page 20, item E - Risk: Revised item entry instructions to track with RMA-approved crop handbook standards.
- R. Page 25 item A₂-Field ID: Added instructions referring the handbook user to the LAM for first and second crop codes.
- S. Page 29, **TABLE A**: Revised the number of representative sample trees selected for appraisal purposes.
- T. Pages 31-32, **TABLE D**: Revised list of plum variety names to track with the variety names listed in the Special Provisions.

PLUM LOSS ADJUSTMENT STANDARDS HANDBOOK

SUMMARY OF CHANGES/CONTROL CHART (Continued)

- U. Throughout the handbook, made syntax and format changes as needed so that this handbook tracks with RMA-approved crop handbook standards.

1. INTRODUCTION

THIS HANDBOOK MUST BE USED IN CONJUNCTION WITH THE LOSS ADJUSTMENT MANUAL (LAM)

This handbook identifies the crop-specific procedural requirements for adjusting Multiple Peril Crop Insurance (MPCI) losses in a uniform and timely manner. These procedures, which include crop appraisal methods and claims completion instructions, supplement the general (not crop-specific) procedures, forms, and manuals for loss adjustment identified in the LAM.

2. SPECIAL INSTRUCTIONS

This handbook remains in effect until superseded by reissuance of **either** the entire handbook **or** selected portions (through slipsheets or bulletins). If slipsheets have been issued for a handbook, the original handbook as amended by slipsheet pages shall constitute the handbook. A bulletin can supersede either the original handbook or subsequent slipsheets.

A. DISTRIBUTION

The following is the minimum distribution of forms completed by the adjuster **(and signed by the insured)** for the loss adjustment inspection:

One legible copy to insured. The original and all remaining copies as instructed by the insurance provider.

It is the insurance provider's responsibility to maintain original insurance documents relative to policyholder servicing as designated in the approved plan of operations.

B. TERMS, ABBREVIATIONS, AND DEFINITIONS

- (1) Terms, abbreviations, and definitions **general** (not crop specific) to loss adjustment are identified in the LAM.
- (2) Terms, abbreviations, and definitions **specific** to plum loss adjustment and this handbook, which are not defined in this section, are defined as they appear in the text.
- (3) Abbreviation(s):

CIH	Crop Insurance Handbook
RPAM	Random Path Appraisal Method

- (4) Definition(s):

Grade Fruit	Fruit that is marketable which includes fruit that is marketable for any use other than fresh pack and fruit damaged by uninsured causes. Also includes fruit which would be rejected by the packing house due to being undersized, immature, overripe, or mechanically damaged, as applicable.
--------------------	---

Graded Fruit

Fruit that has been graded marketable as fresh-packed fruit, which includes fruit that is marketable for use other than fresh pack, and fruit damaged by uninsured causes. Also includes fruit which would be rejected by the packing house due to being undersized, immature, overripe, or mechanically damaged, as applicable.

3. INSURANCE CONTRACT INFORMATION

The insurance provider is to determine that the insured has complied with all policy provisions of the insurance contract. Crop provisions which are to be considered in this determination include (but are not limited to):

A. INSURABILITY

*** (1) The insured crop will be all plums in the county for which a premium rate is provided by the actuarial documents:

(a) In which the insured has a share;

(b) That are grown on tree varieties that:

1 Were commercially available when the trees were set out;

2 Are adapted to the area;

3 Are grown on rootstock that is adapted to the area; and

4 Are regulated by the California Tree Fruit Agreement, California Advisory Board Standards, a related crop advisory board, or the State;

(c) That are irrigated;

*** (d) That have produced an average of at least 200 lugs per acre in at least one of the three most recent actual production history crop years, unless the insurance provider inspects such acreage and gives approval to insure such acreage in writing;

(e) That are grown in an orchard that, if inspected, is considered acceptable by the insurance provider; and

(f) That have reached the fifth (5th) growing season after setout. Plums produced on scions that have not reached the fifth growing season may be insured if the requirements in subsections (a), (b) (c), and (e) are met. Such trees must have produced at least 200 lugs per acre in at least one crop year after being grafted.

(2) Plums interplanted with another perennial crop are insurable unless the insurance provider inspects the acreage and determines it does not meet the requirements contained in the Plum Crop Provisions.

- (3) In addition to causes of loss excluded in the Basic Provisions, insurance coverage is not provided against damage or loss of production due to the following:
- (a) Disease or insect infestation, unless adverse weather:
 - 1 Prevents the proper application of control measures or causes properly applied control measures to be ineffective; or
 - 2 Causes disease or insect infestation for which no effective control mechanism is available;
 - (b) Rejection of the crop by the packing house due to being undersized, immature, overripe, or mechanically damaged; or
 - (c) Inability to market the plums for any reason other than actual physical damage from an insurable cause specified in the crop provisions. For example, the insurance provider will not pay an indemnity if the insured is unable to market due to quarantine, boycott, or refusal of any person to accept production.

B. PROVISIONS NOT APPLICABLE TO CAT COVERAGE

- (1) Optional units.
- (2) Written Agreements.
- (3) Hail and Fire Exclusion provisions (also not applicable if additional coverage is less than 65/100 or comparable coverage).
- (4) Refer to the CIH and LAM for other provisions not applicable to CAT.

C. UNIT DIVISION

Refer to the insurance contract for unit provisions. Unless otherwise provided by the Crop or Special Provisions, optional units may be established if each optional unit is located on non-contiguous land. In addition to, or instead of, establishing units for non-contiguous land, optional units may be established by varietal group when provided for in the Special Provisions.

D. GRADING AND QUALITY ADJUSTMENT

The following procedure applies to all harvested production from the insurable acreage:

- (1) That is packed and sold as fresh fruit but does not meet the U. S. No. 1 standards as modified by the California Tree Fruit Agreement publication for plums for the applicable crop year. Such production will be adjusted by:
 - (a) Dividing the actual value per lug by the highest price election per lug available for the applicable varietal group; and
 - (b) Multiplying the resulting factor, if less than 1.00, by the number of lugs of such plum production.

- (2) That is damaged and is, or could be, marketed for any use other than fresh packed fruit. Such production will be adjusted by:
 - (a) Multiplying the number of tons of such production by the value per ton of the damaged plums or \$50.00 per ton, whichever is greater; and
 - (b) Dividing the result of (2) (a), above, by the highest price election available for the applicable varietal group.

4. PLUM APPRAISALS

A. GENERAL INFORMATION

- (1) Potential production will be appraised in accordance with procedures specified in this handbook and in the LAM.
- (2) Specifically for plums, circumstances that require an appraisal include (but are not limited to):
 - (a) When the insured has plum acreage that he/she does not intend to harvest or which is unharvested at the end of the insurance period; or
 - (b) When any production will be sold by direct marketing.
- (3) Additional circumstances when the insurance provider may require an appraisal or inspection include:
 - (a) When the insured has reported insured damage that may cause the fruit to fail to meet the specified quality requirements;
 - (b) When plums are harvested for sale as salvage (other than fresh packed plums). An appraisal is necessary to determine what percent (quantity), if any, meets the respective quality requirements for fresh-packed plums;
 - (c) When all production is sold for processing - an appraisal is necessary to determine what percent (quantity), if any, meets the fresh-pack quality requirements and the price-adjusted quantity to count as “marketed other than fresh-packed plums;” or
 - (d) When verifiable production records may not be available (roadside markets, etc.).
- (4) The insurance provider will set appraisal dates. Whenever possible, appraise plums before the fruit is removed from the trees. Refer to the LAM for additional reasons for appraisals.

B. SELECTING REPRESENTATIVE SAMPLES FOR APPRAISALS

- (1) Determine the number and general location of trees to be used in the representative samples based on:
 - (a) Total acreage and number of trees;

- (b) Extent of variation in the amount of production or damage within the acreage and location of the fruit on the tree. When variable damage causes the crop potential to be significantly different within the same orchard, or an insured wishes to destroy a portion of the orchard, split the orchard into suborchards and appraise each one separately;
 - (c) Percent of each variety in the acreage;
 - (d) Tree age, size, density, and vigor;
 - (e) The acreage in the unit from which fruit has been picked, and the extent of variation in the amount of unpicked fruit on the trees; and
 - (f) Whether any portions of the orchard have been color (partially) picked.
- (2) Take not less than the minimum number (count) of representative samples required in **TABLE A**.

C. SELECTING RANDOM FRUIT SAMPLES

- (1) Appraise both mature and immature fruit **when conducting appraisals**. Count all fruit (damaged and undamaged) in order to determine the total amount of fruit in each sample.
- (2) Select a representative sample of plums from each sample tree to determine the number of damaged fruit due to insured causes as follows:
 - (a) Examine a sufficient number of individual plums from different locations on the trees that represent the general condition of all insurable plums in the unit or plot.
 - (b) Each sample must be random and include both plums which could be packed/processed and plums which could be eliminated if graded.
 - (c) Obtain the entire fruit sample from the inside, outside, top, and bottom of all four quadrants of the tree.
 - (d) Select sample fruit from each tree in a representative number of rows in the orchard.
 - (e) Never use less than **50** fruit per sample as a basis for establishing the percent of loss for any unit or plot.

5. APPRAISAL METHODS

A. GENERAL INFORMATION

These instructions provide information on appraisal methods for:

Appraisal Method...	Use...
Immature (Green Fruit) Appraisals	this method up to general maturity of the crop.
Mature Plum Appraisals	this method only after general maturity of the crop.
Harvested Plum Appraisals	this method only when the harvested acreage can be verified as being representative of the unharvested acreage.

B. IMMATURE (GREEN FRUIT) APPRAISAL METHOD

(1) General Information.

- (a) Use **TABLE A**, herein, to determine the minimum number of representative sample trees based on insured acreage. Use the procedure in section 4, herein, to select representative sample trees.
- (b) Complete section A, Part I "Fruit Count" of the appraisal worksheet to calculate the average number of fruit on each representative sample tree.
- (c) Complete section A, Part II "Production to Count" of the appraisal worksheet to calculate fresh or processing production to count in lugs/tons per acre, as applicable.
- (d) Do not appraise fruit until after the normal thinning period for the applicable variety.

(2) Appraisal Method.

- (a) Count the number of immature fruit from representative sample trees, include fruit damaged due to uninsured causes. Do not include any fruit damaged by insurable causes to the extent that it obviously would not remain on the tree until maturity.
- (b) Total the number of fruit in subsection 2 (a) above, and divide by the number of samples taken to calculate the "Average Fruit per Tree."
- (c) Multiply the average fruit per tree times the 0.90 survival factor to calculate the average fruit to count.
- (d) Refer to **TABLE D** to locate the applicable number of fruit per pound for the variety being appraised. Divide the average fruit to count by the fruit per pound (for the variety) to calculate the pounds per tree.

- (e) Multiply the pounds per tree times the number of trees per acre to calculate the pounds per acre.
- (f) Divide the pounds per acre by the pounds per lug to calculate the lugs per acre.
- (g) Refer to the appraisal worksheet **instructions** for applicable rounding rules. One lug of plums weighs 28.0 pounds.

EXAMPLE:

Fresh Plums

269.0 average fruit per sample

90% survival factor

269.0 average fruit per sample x 0.90 survival factor = 242.1 average fruit to count

242.1 average fruit to count ÷ 12 fruit/lb. = 20.2 lbs./tree

20.2 lbs./tree x 110 trees/acre = 2,222 lbs./acre

2,222 lbs./acre ÷ 28 lbs./lug = **79.4 lugs/acre**

EXAMPLE:

Processing Plums

2,222 lbs./acre ÷ 2,000 lbs./ton = **1.1 tons/acre**

C. MATURE PLUM APPRAISAL METHOD

(1) General Information.

- (a) Use **TABLE A**, herein, to determine the minimum number of representative sample trees based on insured acreage. Use the procedure in section 4, herein, to select representative sample trees.
- (b) Complete section B, Part I, "Fruit Count," of the appraisal worksheet to calculate the average number of fruit per tree.
- (c) Complete section B, Part II, "Random Pick," of the appraisal worksheet to calculate the average percent of graded fruit and the average weight per fruit.
- (d) Complete section B, Part III, "Production to Count," of the appraisal worksheet to calculate the appraisal in lugs/tons per acre, as applicable.
- (e) The total production to count for a unit includes all harvested and appraised mature production that meets the **applicable** fruit quality standards **contained in the Special Provisions**.
- (f) Appraise any unharvested acreage to determine what portion of the fruit could be/could have been picked for packing or processing.

- (g) If there is unharvested production due to market conditions or if fruit damage is from an uninsured cause of loss, appraise such acreage to determine the amount of unharvested fruit or fruit lost to an uninsured cause.
- (h) Other seasonal instructions for appraising unharvested fruit will be issued by the **RMA Regional Office**, as applicable.

(2) **Appraisal Method.**

- (a) Count the number of damaged fruit and undamaged fruit on each representative sample tree. Total the number of fruit from all sample trees and divide by the number of sample trees to calculate the average number of fruit per tree.
- (b) From each sample tree, randomly select a 50-fruit sample. From this sample, count the number of fruit that meets or exceeds the applicable grade standards and record the fruit count on the appraisal worksheet. Weigh all of the sample fruit from each sample tree that meets or exceeds the applicable grade requirements and record fruit weights, in, pounds, on the appraisal worksheet.
- (c) Separately total the number and weight of all fruit in the samples that meets or exceeds the applicable grade standards.
- (d) Divide the total number of fruit that meets or exceeds the applicable grade standards by the total number of fruit from all sample trees to calculate the average percent of fruit meeting the applicable grade requirements.
- (e) Divide the weight of all sample fruit that meets or exceeds the applicable grade standards by the number of fruit from all sample trees that meets or exceeds the applicable grade standards to calculate the average weight per sample fruit, in pounds.
- (f) Multiply the average number of fruit per sample tree times the average percent of graded fruit to calculate the number of graded fruit per tree. Multiply the number of graded fruit per tree by the average weight per fruit to calculate the number of pounds of fruit per tree.
- (g) Multiply the number of pounds of fruit per tree times the number of trees per acre to calculate the total pounds of fruit per acre. Divide this poundage by 28 pounds/lug or 2,000 pounds to calculate the potential number of lugs/tons, as applicable.

D. HARVESTED PLUM APPRAISALS

(1) **Representative Tree Appraisals.**

Arrange with the insured to harvest representative sample trees after the crop has reached maturity. Use the production harvested from the representative trees to determine the yield per acre.

(2) **Harvested Acreage Appraisals.**

Prior to harvest, estimate the potential amount of production on unharvested acreage. After harvest, compare the estimated potential production for unharvested acreage to the actual production from harvested acreage. If the unharvested potential production is comparable to the harvested production, use the average yield per acre from harvested acreage as the appraisal per acre for unharvested acreage. Use this method only when the harvested acreage can be verified as being representative of the unharvested acreage.

6. APPRAISAL DEVIATIONS AND MODIFICATIONS

A. DEVIATIONS

Deviations in appraisal methods require FCIC written authorization (as described in the LAM) prior to implementation.

B. MODIFICATIONS

There are no pre-established modifications contained in this handbook. Refer to the LAM for additional information.

7. APPRAISAL WORKSHEET ENTRIES AND COMPLETION PROCEDURE

A. GENERAL INFORMATION

- (1) Include the insurance provider's name in the appraisal worksheet title if not preprinted on the insurance provider's worksheet.
- (2) Include the claim number on the appraisal worksheet (when required by the insurance provider) when a worksheet entry is not provided.
- (3) Separate appraisal worksheets are required for each variety/type (e.g., types include early season, mid-season, and late season varieties) by unit or plot inspected. Refer to section 4 for sampling instructions.
- (4) For every inspection, complete items 1 through 9 and items 49 through 51 of the appraisal worksheet. For immature appraisals complete section A and for mature appraisals complete section B on the appraisal worksheet.
- (5) Standard appraisal worksheet items are numbered consecutively in subsection B. An example appraisal worksheet is also provided to illustrate how to complete entries.

B. WORKSHEET ENTRIES AND COMPLETION INFORMATION

Verify or make the following entries:

Item

No.

Information Required

Company: Name of the Insurance Provider if not preprinted on the worksheet (Company Name).

Claim Number: Claim number as assigned by the insurance provider.

1. **Insured's Name:** Name of the insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.
2. **Policy Number:** Insured's assigned policy number.
3. **Crop Year:** Four-digit crop year, as defined in the policy, for which the claim has been filed.
4. **Unit Number:** Five-digit unit number from the Summary of Coverage after it is verified to be correct (e.g., 00100).
5. **Acres:** Unit acreage, to tenths.
6. **Number of Trees per Acre:** The actual number of producing trees per acre. Refer to TABLE B if there is a 100% stand or, determine the number of trees by count if less than 100% stand.
7. **Cause of Damage:** Insured cause of loss. Refer to the LAM for causes of loss and applicable codes. If an insured cause of loss is coded as "Other," explain in the Remarks.
8. **Date of Damage:** First three letters of the month during which MOST of the insured damage (including progressive damage) occurred. Include SPECIFIC DATE where applicable, as in the case of hail damage (e.g., Apr 11).
9. **Crop Type:** Enter "Plums" followed by the applicable variety name (e.g., Plums-Black Flame, Plums-Red Sun, etc.).

A - IMMATURE (GREEN) STONEFRUIT APPRAISALS

Part I: FRUIT COUNT

10. **Field ID:** Field or sub-field identification symbol.
11. **Acres in Plot:** Number of determined acres in field or sub-field being appraised, to tenths.

12. **Fruit Count - Number of Fruit from Each Sample Tree:** Total number of fruit on each sample tree. Do not include any fruit damaged by **insurable causes** to the extent that it would not remain on the tree until maturity.
13. **Total Fruit:** **Total** number of **fruit** from all trees in item 12.
14. **Number of Samples:** **Total** number of **samples** taken from item 12.
15. **Average Fruit per Tree:** Item 13 divided by item 14, **results rounded** to tenths.

Part II: PRODUCTION TO COUNT

16. **Average Fruit per Tree:** Transfer entry from item 15.
17. **Survival Factor:** MAKE NO ENTRY, “**0.90**” is preprinted on the appraisal worksheet.
18. **Average Fruit to Count:** Item 16 **multiplied by** item 17, **results rounded** to tenths.
19. **Fruit per Pound:** Enter number of fruit per pound (**refer to TABLE D**).
20. **Pounds per Tree:** Item 18 divided by item 19, **results in pounds rounded** to tenths.
21. **Number of Trees per Acre:** Transfer entry from item 6.
22. **Pounds per Acre:** Item 20 **multiplied by** item 21, **results rounded** to whole pounds.
23. **Pounds per ___:** Insert “Lugs” or “Tons” in heading, as applicable. **Enter “28.0” pounds/lug or “2,000” pounds per ton, as applicable.**
24. **___ per Acre:** Insert “Lugs” or “Tons” in heading, as applicable. Item 22 divided by item 23, **results rounded** to tenths.

B - MATURE STONEFRUIT APPRAISALS

Part I: FRUIT COUNT

25. **Field ID:** Field **or sub-field** identification symbol.
26. **Acres in Plot:** **Number of determined** acres in field or **sub-field being appraised**, to tenths.
27. **Fruit Count - Number of Fruit from Each Sample Tree:** Total number of fruit on each sample tree.
28. **Total Fruit:** **Total** number of **fruit** from all trees in item 27.
29. **Number of Samples:** **Total** number of **samples** taken from item 27.
30. **Average Fruit per Tree:** Item 28 divided by item 29, **results rounded** to tenths.

Part II: RANDOM PICK

31. **Random Pick or Number of Fruit that Meet Grade (_____per Sample):** Enter “50” fruit per sample. Randomly select 50 fruit from each representative sample tree. Count and document the number of fruit in the 50-fruit sample that meets or exceeds the applicable grade standards.
32. **Weight of Graded Fruit (_____per Sample):** Enter “50” fruit per sample. Weigh fruit from each sample tree that meets or exceeds the applicable grade standard. Enter weight in pounds rounded to tenths.
33. **Total Number of Fruit that Meet Grade:** Total number of fruit from all sample trees in column 31 that meet or exceed the applicable grade standards.
34. **Total Weight:** Total weight of fruit that meet or exceed the applicable grade standards from all sample trees in column 32. Enter weight in pounds rounded to tenths.
35. **Total Number of Fruit From All Sample Trees:** 50 fruit per tree multiplied by the number of sample trees listed in column 31 (e.g., 50 fruit per tree x 5 sample trees = 250 fruit from all sample trees).
36. **Total Number of Fruit that Meet Grade:** Transfer entry from column 33.
37. **Average Percent of Graded Fruit:** Column 33 divided by column 35, results rounded to two-decimal places.
38. **Average Weight per Fruit:** Column 34 divided by column 36, results rounded to two-decimal places.

Part III: Production to Count

39. **Average Fruit per Tree:** Transfer entry from column 30.
40. **Average Percent of Graded Fruit:** Transfer entry from column 37.
41. **Graded Fruit per Tree:** Column 39 multiplied by column 40, results rounded to tenths.
42. **Average Weight per Fruit:** Transfer entry from column 38.
43. **Pounds per Tree:** Column 41 multiplied by column 42, results in pounds rounded to tenths.
44. **Number of Trees per Acre:** Transfer entry from column 6.
45. **Pounds per Acre:** Column 43 multiplied by column 44, results rounded to whole pounds.
46. **Pounds per _____:** Insert “Lugs” or “Tons” in heading as applicable. Enter “28.0” pounds/lug or “2,000” pounds/ton, as applicable.

47. **___ per Acre:** Insert “Lugs” or “Tons,” in heading as applicable. Item 45 divided by item 46, **results rounded** to tenths.
48. **Remarks:** Any pertinent information that pertains to the inspection/appraisal.
49. **Adjuster’s Signature, Code #, and Date:** Signature of adjuster, code number, and date signed **after** the insured (or insured’s authorized representative) has signed. If the appraisal is performed prior to signature date, document the date of appraisal in the Remarks/Narrative section of the Appraisal Worksheet (if available); otherwise, document the appraisal date in the Narrative of the Production Worksheet.
50. **Insured’s Signature and Date:** Insured’s (or insured’s authorized representative’s) signature. **BEFORE** obtaining insured’s signature, **REVIEW ALL ENTRIES** on the Appraisal Worksheet **WITH THE INSURED**, particularly explaining codes, etc., which may not be readily understood.
51. **Page Number:** Page numbers - (Example: Page 1 of 1, Page 1 of 2, etc.).

8. CLAIM FORM ENTRIES AND COMPLETION PROCEDURES

A. GENERAL INFORMATION

- (1) The claim form (hereafter referred to as the “Production Worksheet”) is a progressive form containing all notices of damage for all preliminary and final inspections on a unit.
- (2) If a Production Worksheet has been prepared on a prior inspection, verify each entry and enter additional information as needed. If a change or correction is necessary, strike out all entries on the line and re-enter correct entries on a new line. The adjuster and the insured should initial any line deletions.
- (3) Refer to the LAM for instructions regarding the following:
 - (a) Acreage report errors.
 - (b) Delayed notices and delayed claims.
 - (c) Corrected claims or fire losses (double coverage) and cases involving uninsured causes of loss, unusual situations, controversial claims, concealment, or misrepresentation.
 - (d) Claims involving a Certification Form, (when all the acreage on the unit has been appraised to be put to another use or other reason described in the LAM).
 - (e) “No Indemnity Due” claims (which must be verified by an APPRAISAL or NOTIFICATION from the insured that the production exceeded the guarantee.)
- (4) The adjuster is responsible for determining if **any of the insured’s** requirements under the notice and claim provisions of the policy **have not been met**. If any have not, the adjuster should contact the insurance provider.
- (5) Instructions labeled “**PRELIMINARY**” apply to preliminary inspections only. Instructions labeled “**FINAL**” apply to final inspections only. Instructions not labeled apply to ALL inspections.

B. FORM ENTRIES AND COMPLETION INFORMATION

Verify or make the following entries:

Item

No.

Information Required

1. **Crop/Code #:** “Plums” (0092).
2. **Unit #:** Five-digit unit number from the Summary of Coverage after it is verified to be correct (e.g., 00100).
3. **Legal Description:** Section, township, and range number or other legal description that identifies the location of the unit.

4. **Date of Damage:** First three letters of the month during which MOST of the insured damage (including progressive damage) occurred for each inspection. Include the SPECIFIC DATE where applicable as in the case of hail damage (e.g., AUG 11).
5. **Cause of Damage:** Name of insured cause of loss for **this crop** as listed in the LAM. If it is evident that no indemnity is due, enter “NONE.” If an insured cause of loss is coded as “Other,” explain in the Narrative. Refer to the Basic Provisions and the crop provisions for this crop for information pertaining to insured and uninsured causes of loss.

6. **Primary Cause %:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Percent of damage for the cause of damage listed in item 5 above that is determined to be the primary cause of damage, to the nearest whole percent. The primary cause of damage must exceed 50 percent (e.g., 51%). Enter an “X” in the major secondary cause of damage.

7. **Company/Agency:** Name of company and agency servicing the contract.

8. **Name of Insured:** Name of the insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.

9. **Claim #:** Claim number as assigned by the insurance provider.

10. **Policy #:** Insured’s assigned policy number.

11. **Crop Year:** Four-digit crop year, as defined in the policy, for which the claim is filed.

12. **Additional Units:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Unit number(s) for ALL non-loss units for the crop at the time of final inspection. A non-loss unit is any unit for which a Production Worksheet has not been completed. Additional non-loss units may be entered on a single Production Worksheet.

If more spaces are needed for non-loss units, enter the unit numbers identified as “Non-loss Units,” in the Narrative or on an attached Special Report.

13. **Est. Prod. Per Acre:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Estimated yield per acre, in whole lugs/tons, of all non-loss units for the crop at the time of final inspection.

14. **Date(s) Notice of Loss:**

PRELIMINARY:

- a. Date the notice of damage was given for the unit in item 2.
- b. A third preliminary inspection (if needed) requires an additional set of Production Worksheets. Enter the date of notice for a third preliminary inspection in the 1st space of item 14 on the second set.
- c. Reserve the “Final” space on the first page of the first set of Production Worksheets for the date of notice for the final inspection.
- d. If the inspection is initiated by the insurance provider, enter “Company Insp.” instead of the date.

FINAL: Transfer the last date in the 1st or 2nd space to the FINAL space if a final inspection should be made as a result of the notice. Always enter the complete date of notice (month, day, year) for the “FINAL” inspection in the FINAL space on the first page of the first set of Production Worksheets. For a delayed notice of loss or delayed claim, refer to the LAM.

15. **Companion Policy(s):**

- a. If no other person has a share in the unit (insured has 100 percent share), MAKE NO ENTRY.
- b. In all cases where the insured has LESS than a 100 percent share of a loss-affected unit, ask the insured if the OTHER person sharing in the unit has a multiple-peril crop insurance contract (i.e., not crop-hail, fire, etc.). If the other person does not, enter “NONE.”
 - (1) If the other person has a multiple-peril crop insurance contract and it can be determined that the SAME insurance provider services it, enter the contract number. Handle these companion policies according to insurance provider instructions.
 - (2) If the OTHER person has a multiple-peril crop insurance contract and a DIFFERENT insurance provider or agent services it, enter the name of the insurance provider and/or agent (and contract number) if known.
 - (3) If unable to verify the existence of a companion contract, enter “Unknown” and contact the insurance provider for further instructions.
- c. Refer to the LAM for further information regarding companion contracts.

SECTION I - ACREAGE APPRAISED, PRODUCTION AND ADJUSTMENTS

Make separate line entries for varying:

- (1) Rate classes, types, or farming practices;
- (2) APH yields;
- (3) Appraisals;
- (4) Stages or intended use(s) of acreage;
- (5) Shares (e.g., 50 percent and 75 percent shares on the same unit); or
- (6) Appraisals for damage due to hail or fire if Hail and Fire Exclusion is in effect.

Verify or make the following entries:

**Item
No.**

Information Required

- A. **Field ID:** The field identification symbol from a sketch map or an aerial photo. Refer to the Narrative instructions. Enter the applicable two-digit code for first crop and second crop. In the margin of the last line entry or in a separate column, enter the date of inspection for the last line entry of each inspection.

REFER TO THE LAM FOR INSTRUCTIONS REGARDING ENTRIES OF FIRST CROP AND SECOND CROP CODES.

- B. **Preliminary Acres:**

PRELIMINARY: The number of acres, to tenths, (include "E" if estimated), for which consent for other use has been given. Determine actual acreage, to tenths, when the boundaries of the appraised acreage may not be determined later. Refer to the LAM or CIH for acreage measurement instructions specific to perennial crops.

FINAL: MAKE NO ENTRY.

- C. **Final Acres:** Refer to the LAM or CIH for definition of acceptable determined acres for perennial crops used herein.

Determined acres to tenths (include "E" if estimated) for which consent is given for other use and/or:

- a. Put to other use without consent.
- b. Abandoned.
- c. Damaged by uninsured causes.
- d. For which the insured failed to provide acceptable records of production.
- e. From which production was sold by direct marketing if the insured failed to meet the requirements contained in the crop provisions.

FINAL: Determined acres to tenths.

Acres breakdowns WITHIN a unit may be estimated (enter “E” in front of the acres) if a determination is impractical AND if authorization was received from the insurance provider. Document authorization in the Narrative.

ACCOUNT FOR ALL ACREAGE IN THE UNIT. In the event of over-reported acres, handle in accordance with individual insurance provider’s instructions. In the event of under-reported acres, draw a diagonal line in Column “C” as shown.

- C₁ Enter the ACTUAL acres for the orchard or suborchard.
- C₂ Enter the REPORTED acres for the orchard or suborchard.

- D. **Interest or Share:** Insured’s interest in crop to three decimal places as determined at the time of inspection. If shares vary on the same UNIT, use separate line entries.
- E. **Risk:** Three-digit code for the correct “Rate Class” specified on the actuarial documents. If a “Rate Class” or “High Risk Area” is not specified on the actuarial documents, make no entry. Verify with the Summary of Coverage, and if the “Rate Class” is found to be incorrect, revise according to the insurance provider’s instructions. Refer to the LAM.

Unrated land is uninsurable without a written agreement.

- F. **Practice:** Three-digit code number, entered exactly as specified on the actuarial documents, for the practice carried out by the insured. If “No Practice Specified,” enter appropriate three-digit code number from the actuarial documents.
- G. **Type/Class/Variety:** Three-digit code number, entered exactly as specified on the actuarial documents, for the type grown by the insured. If “No Type Specified,” enter appropriate three-digit code number from the actuarial documents.
- H. **Stage:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Stage abbreviation as shown below.

<u>STAGE</u>	<u>EXPLANATION</u>
“P”	Acres abandoned without consent, put to other use without consent, damaged solely by uninsured causes, for which the insured failed to provide records of production which are acceptable to the insurance provider, or from which production was sold by direct marketing if the insured failed to meet the requirements contained in the crop provisions.
“H”	Harvested.
“U”	Unharvested or put to other use with consent.

GLEANED ACREAGE: Refer to the LAM for information on gleaning.

I. **Intended or Final Use:** Use of acreage. Use the following “Intended Use” abbreviations:

<u>USE</u>	<u>EXPLANATION</u>
“Bulldozed, etc.”.....	Use made of acreage
“WOC”.....	Other use without consent
“SU”.....	Solely uninsured
“ABA”.....	Abandoned without consent
“H”.....	Harvested
“UH”.....	Unharvested

Verify any “Intended Use” entry. If the final use of the acreage was not as indicated, strike out the original line and initial it. Enter all data on a new line showing the correct “Final Use.”

GLEANED ACREAGE: Refer to the LAM for information on gleaning.

J. **Appraised Potential:** Per-acre appraisal in lugs, to tenths, of POTENTIAL production for the acreage appraised. Refer to the appraisal methods and applicable appraisal worksheets for additional instructions.

If there is no potential on UH acreage, enter “0.”

K₁-L. MAKE NO ENTRY.

M. + **Uninsured Causes:** EXPLAIN IN THE NARRATIVE.

a. Hail and Fire exclusion NOT in effect.

(1) Enter NOT LESS than the insured’s production guarantee per acre in lugs, to tenths, for the line, (calculated by multiplying the elected coverage level percentage times the approved APH yield per acre shown on the APH form) for any “P” stage acreage. On preliminary inspections, advise the insured to keep the harvested production from any acreage damaged SOLELY by uninsured causes separate from other production.

(2) For acreage that is damaged PARTLY by uninsured causes, enter the APPRAISED UNINSURED loss of production per acre in lugs, to tenths, for any such acreage.

b. Refer to the LAM when a Hail and Fire Exclusion is in effect and damage is from hail or fire.

c. Enter the result of adding uninsured cause appraisals to hail and fire exclusion appraisals.

d. For fire losses, if the insured also has other fire insurance (double coverage), refer to the LAM.

N. **Adjusted Potential:** Column “J” plus Column “M,” results in lugs, rounded to tenths.

- O. **Total to Count:** Column “C” or “C₁” (**actual** acres) times Column “N,” results in lugs, rounded to tenths.
- P. **Per Acre:** Per-acre Guarantee - Enter the per acre guarantee from the insured’s policy.
- Q. **Total:** Column “C₂” (**reported** acres; “C” if acreage is not under-reported) times Column “P,” **results in** whole lugs.

16. **Total Acres:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Total actual acres (Column “C” [or “C₁” if under reported]), **rounded** to tenths.

FOR ITEM 17. WHEN SEPARATE LINE ENTRIES ARE MADE FOR VARYING SHARES, STAGES, APH YIELDS, PRICE ELECTIONS, TYPES, ETC., WITHIN THE UNIT, AND TOTALS NEED TO BE KEPT SEPARATE FOR CALCULATING INDEMNITIES, MAKE NO ENTRY AND FOLLOW THE INSURANCE PROVIDER’S INSTRUCTIONS; OTHERWISE, MAKE THE FOLLOWING ENTRIES.

17. **Totals:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Total of Column “O” and total of Column “Q.”

NARRATIVE:

If more space is needed, document on a Special Report, and enter “See Special Report.” Attach the Special Report to the Production Worksheet.

- a. If no acreage is released on the unit, enter “No Acreage Released,” adjuster’s initials, and date.
- b. If notice of damage was given and “No Inspection” is necessary, enter the unit number(s), “No Inspection,” date, and adjuster’s initials. The insured’s signature is not required.
- c. Explain any uninsured causes, unusual, or controversial cases.
- d. If there is an appraisal in Section I, **column** “M” for uninsured causes due to a hail/fire exclusion, show the original hail/fire liability per acre and the hail/fire indemnity per acre.
- e. Document the actual appraisal date if an appraisal was performed prior to the adjuster’s signature date on the appraisal worksheet, and the date of the appraisal is not recorded on the appraisal worksheet.
- f. State that there is “No other fire insurance” when fire damages or destroys the insured crop, and it is determined that the insured has no other fire insurance. Also refer to the LAM.
- g. Explain any errors found on the Summary of Coverage.

- h. Explain any commingled production. Refer to the LAM.
- i. Explain any entry for “Production Not to Count” in Section II, column “O,” and/or any production not included in Section II, column I or columns “B” through “E” entries (e.g., harvested production from uninsured acreage that can be identified separately from the insured acreage in the unit).
- j. Explain a “NO” checked in item 19.
- k. Attach a sketch map or aerial photograph to identify the total unit:
 - (1) If consent is or has been given to put part of the unit to another use;
 - (2) If uninsured causes are present; or
 - (3) For unusual or controversial cases.

Indicate on the sketch map or aerial photograph, the disposition of acreage destroyed or put to other use with or without consent.

- l. Explain any difference between date of inspection and signature dates. For an ABSENTEE insured, enter the date of the inspection AND the date of mailing the Production Worksheet for signature.
- m. When any other adjuster or supervisor accompanied the adjuster on the inspection, enter the code number of the other adjuster or supervisor and date of inspection.
- n. Explain the reason for a “No Indemnity Due” claim. No Indemnity Due claims are to be distributed in accordance with insurance provider’s instructions.
- o. Explain any delayed notices or delayed claims as instructed in the LAM.
- p. Document any authorized estimated acres shown in Section I, column “C” as follows: “Line 3 ‘E’ acres authorized by insurance provider MM/DD/YYYY.”
- q. Document the method and calculation used to determine acres for the unit. Refer to the LAM.
- r. If “comparable acreage” was used to establish the production figures (i.e., Harvested Appraisal Method) for insured acreage, enter the location (identification) and yield of the comparable acreage.
- s. Specify the type of insects or disease when the insured cause of damage or loss is listed as insects or disease. Explain why control measures did not work.
- t. Document the value per ton for any damaged harvested production that is, or could be, marketed for any use other than fresh packed plums.
- u. Record any trees removed without inspection.
- v. Document the name and address of the charitable organization when gleaned acreage is applicable. Refer to the LAM for more information on gleaning.

- w. Document any other pertinent information, including any data to support any factors used to calculate the production.

SECTION II - HARVESTED PRODUCTION

GENERAL INFORMATION:

- (1) Account for ALL HARVESTED PRODUCTION (for ALL ENTITIES sharing in the crop) except production appraised BEFORE harvest and shown in Section I because the quantity cannot be determined later.
- (2) For production commercially stored, sold, etc., enter the name and address of storage facility, buyer, packing house, or processor as applicable in columns "B" through "E." For fruit otherwise disposed of, indicate the method of disposition (sold at roadside stand, etc.).
- (3) If additional lines are necessary, the data may be entered on a continuation sheet. USE SEPARATE LINES FOR:
 - (a) Separate storage facilities.
 - (b) Different FIRST handlers (buyers, packing houses, or processors). The insured must have maintained satisfactory records of ALL production sold or stored. Verify any packing house or processor records. (In all localities) if the first handler was not a packer or processor, the production will be determined by the adjuster on the basis of available records.
 - (c) Harvested fruit of any type that failed to meet the applicable grade (quality) requirements because of INSURED damage.
 - (d) Varying shares; e.g., 50 percent and 75 percent shares on same unit.
 - (e) If there is harvested production from more than one insured practice (or type) and a separate approved APH yield has been established for each, the harvested production also must be entered on separate lines in columns "A" through "S" by type. If production has been commingled, refer to the LAM.
- (4) There will generally be no harvested production entries in columns "A" through "S" for preliminary inspections.

Verify or make the following entries:

Item

No.

Information Required

18. **Date Harvest Completed: (Used to determine if there is a delayed notice or a delayed claim. Refer to the LAM.)**

PRELIMINARY: MAKE NO ENTRY.

FINAL:

- a. The earlier of the date the ENTIRE acreage was either (1) harvested (2) totally destroyed, (3) put to other use, (4) a combination of harvested destroyed, or put to other use, or (5) the calendar date for the end of the insurance period.
- b. If at the time of final inspection (if prior to the end of the insurance period), there is any unharvested insured acreage remaining on the unit that the insured does not intend to harvest, enter **“Incomplete.”**
- c. If at the time of final inspection (if prior to the end of the insurance period), **none** of the insured acreage on the unit has been harvested, and the insured does not intend to harvest such acreage, enter **“No Harvest.”**
- d. If the case involves a Certification Form, enter the date from the Certification Form when the entire unit is put to another use, etc. Refer to the LAM.

19. **Similar Damage:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Check “Yes” or “No.” Check “Yes” if amount and cause of damage due to insurable causes is similar to the experience of other orchards in the area. If “No” is checked, explain in the Narrative.

20. **Assignment of Indemnity:** Check “Yes” **only** if an assignment of indemnity is in effect for the crop year; otherwise, check “No.” Refer to the LAM.

21. **Transfer of Right to Indemnity:** Check “Yes” **only** if a transfer of right to indemnity is in effect for the unit for the crop year; otherwise, check “No.” Refer to the LAM.

A₁. **Share:** RECORD ONLY VARYING SHARES on SAME unit to three decimal places.

A₂. **Field ID:**

- a. If only one practice and/or type of harvested production is listed in Section I, MAKE NO ENTRY.
- b. If more than one practice and/or type of harvested production is listed in Section I, and a separate approved APH yield exists, indicate for each practice/type, the corresponding Field ID (from Section I, column “A”).
- c. Enter the applicable two-digit code for first crop and second crop. **REFER TO THE LAM FOR INSTRUCTIONS REGARDING ENTRIES OF FIRST CROP AND SECOND CROP CODES.**

- B. - E. **Buyers, Packing House, or Processor:** For plums stored or sold, enter the name and address of the buyer, packing house, or processor as applicable. If farm-stored production (lugs or bulk) has been weighed prior to storage and acceptable weight tickets are available showing net weights, enter “Weighed and Stored on Farm” in this space. For fruit otherwise disposed of, indicate the **method of** disposition (sold by direct marketing, etc.).
- F. - H. MAKE NO ENTRY.
- I. **Bu., Ton, Lbs., Cwt.:**
- a. For plum production that is packed and sold as fresh fruit: Line through Bu., Ton, Lbs., Cwt. and enter “Lugs” in the heading. Enter production in lugs, rounded to tenths.
 - b. For plum production that is damaged and is, or could be, marketed for any use other than fresh packed plums, enter tonnage, rounded to tenths followed by a “T” (e.g., 10.5T, etc.).
- J. - M. MAKE NO ENTRY.
- N. **Adjusted Production:** **Lugs/tons** to tenths for plums in Column “I,” as applicable.
- O. **Prod. Not to Count:** Net production NOT to count in **lugs/tons** to tenths, as applicable, WHEN ACCEPTABLE RECORDS IDENTIFYING SUCH PRODUCTION ARE AVAILABLE, from harvested acreage which has been assessed an appraisal of not less than the guarantee per acre, or from other sources (e.g., other units or uninsured acreage).
- THIS ENTRY MUST NEVER EXCEED PRODUCTION SHOWN ON THE SAME LINE. EXPLAIN ANY “PRODUCTION NOT TO COUNT” IN THE NARRATIVE.
- P. **Production:** Result of subtracting the entry in Column “O” from Column “N,” in **lugs/tons** to tenths, as applicable.
- Q₁. **Value:**
- a. For plum production that is packed and sold as fresh fruit but does not meet the grade requirements of the crop provisions due to insurable causes, enter the value per lug in dollars and cents of this production.
 - b. For plum production that is damaged and is, or could be, marketed for any use other than fresh packed plums, enter the greater of the value **per ton** in dollars and cents of the damaged plums or \$50.00.
- Q₂. **Mkt. Price:** Enter the highest price election available in dollars and cents for the applicable varietal group.
- R. **Quality Factor:** Q₁ divided by Q₂, results to three-decimal places.
- S. **Production to Count:** Production from Column “P,” times Column “R,” in lugs to tenths.

FOR ITEMS 22 - 24. WHEN SEPARATE ENTRIES ARE MADE FOR VARYING SHARES, STAGES, APH YIELDS, PRICE ELECTIONS, TYPES, ETC., WITHIN THE UNIT, AND TOTALS NEED TO BE KEPT SEPARATE FOR CALCULATING INDEMNITIES, MAKE NO ENTRY AND FOLLOW THE INSURANCE PROVIDER'S INSTRUCTIONS; OTHERWISE, MAKE THE FOLLOWING ENTRIES.

22. **Section II Total:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Total of Column "S," to tenths.

23. **Section I Total:**

PRELIMINARY: MAKE NO ENTRY.

FINAL: Enter figure from Section I, Column "O" total, to tenths.

24. **Unit Total:**

PRELIMINARY: MAKE NOT ENTRY.

FINAL: Total of 22 and 23, to tenths.

25. **Adjuster's Signature, Code #, and Date:** Signature of adjuster, code number and date signed **after** the insured (or insured's authorized representative) has signed. For an absentee insured, enter adjuster's code number **ONLY**. The signature and date will be entered **AFTER** the absentee has signed and returned the Production Worksheet. Final indemnity inspections should be signed on bottom line.

26. **Insured's Signature and Date:** Insured's (or insured's authorized representative's) signature and date. **BEFORE** obtaining insured's signature, **REVIEW ALL ENTRIES** on the Production Worksheet **WITH THE INSURED**, particularly explaining codes, etc., that may not be readily understood. Final indemnity inspections should be signed on bottom line.

27. **Page Numbers:**

PRELIMINARY: Page numbers - "1," "2," etc., at the time of inspection.

FINAL: Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.).

9. REFERENCE MATERIAL

TABLE A - MINIMUM REPRESENTATIVE SAMPLE REQUIREMENTS

Number of Trees in Acreage:	Select:
10 acres or less	The lesser of 5 trees or 5% of the number of trees in the orchard (rounded to the nearest whole tree).
10.1 to 100.0	5 trees plus 1 tree per additional 10.0 trees.
100.1 or more	14 trees plus 1 tree per additional 100.0 trees.

TABLE B - TREE PLANTING PATTERNS USED IN PLUM ORCHARDS

Square	Hedgerow	Quincunx*	Hexagonal**
X X X X X	X X X X X X X X X	X X X X X	X X X X
X X X X X	X X X X X X X X X	X X X X X	X X X X
X X X X X	X X X X X X X X X	X X X X X	X X X X
X X X X X	X X X X X X X X X	X X X X X	X X X X
X X X X X	X X X X X X X X X	X X X X X	X X X X
		X X X X	X X X X

*Quincunx: A tree planting pattern that is a rectangle with a tree in the middle.

**Hexagonal: A tree planting pattern with six adjoining trees that are equidistant from any other one tree.

TABLE C -NUMBER OF PLUM TREES PER ACRE

		ROW SPACING (feet)																				
		10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30

	16							170	160	151	143	136	130	124	118	113	109	105	101	97	94	91
	17								151	142	135	128	122	117	111	107	103	99	95	92	88	85
	18									134	127	121	115	110	105	101	97	93	90	86	83	81
	19										121	115	109	104	100	96	92	88	85	82	79	76
	20											109	104	99	95	91	87	84	81	78	75	73
	21												99	94	90	86	83	80	77	74	72	69
	22													90	86	83	79	76	73	71	68	66
	23														82	80	76	73	70	68	65	63
	24															76	73	70	67	65	63	61
	25																70	67	65	62	60	58
	26																	64	62	60	58	56
	27																		60	58	56	54
	28																			56	54	52
	29																				52	50
	30																					48

The above figures are for square and hedgerow plantings.

- (1) For hexagonal plantings add 14%. (Example: 176 trees per acre from the above chart plus 25 (14% of 176) = 201 trees per acre.)
- (2) For quincunx plantings double the number of trees. (Example: 124 trees per acre from the chart + 124 = 248 trees per acre.)
- (3) For row spacing patterns in fractions of whole feet, multiply the distance between the rows by the spacing between the trees and divide into 43,560 (square feet per acre). (Example: Row spacing is 18.5 feet, distance between trees is 18.5 feet. $18.5 \times 18.5 = 342.3$ square feet. $43,560 \div 342.3 = 127$ trees per acre.)
