UNITED STATES DEPARTMENT OF AGRICULTURE WASHINGTON, D.C. 20250

FEDERAL CROP INSURANCE HANDBOOK	NUMBER: 25320 (06-2002)
SUBJECT:	DATE: October 21, 2002
PEANUT	OPI: Product Development Division
LOSS ADJUSTMENT STANDARDS HANDBOOK 2002 AND SUCCEEDING CROP YEARS	APPROVED: /S:/ Tim B. Witt
	Deputy Administrator, Research and Development

THIS HANDBOOK CONTAINS THE OFFICIAL FCIC-APPROVED LOSS ADJUSTMENT STANDARDS FOR THIS CROP FOR THE 2002 AND SUCCEEDING CROP YEARS. IN THE ABSENCE OF INDUSTRY-DEVELOPED, FCIC-APPROVED PROCEDURE FOR THIS CROP FOR 2002 AND SUCCEEDING CROP YEARS, ALL REINSURED COMPANIES WILL UTILIZE THESE STANDARDS FOR BOTH LOSS ADJUSTMENT AND LOSS TRAINING.

SUMMARY OF CHANGES/CONTROL CHART

Major Changes: See changes or additions in text, which have been highlighted. Three stars (***) identify information that has been removed. Typographical errors and minor corrections are not listed.

Changes for October 2002 Issuance (FCIC-25320)

- (1) Updated the handbook consistent with the Farm Security and Rural Investment Act of 2002.
- (2) Added Exhibits 1 (Peanut Quality Adjustment Worksheet) and Exhibit 2 (Premium and Discounts for Peanuts) to permit value per pound determinations used to determine quality adjustment.

1. INTRODUCTION

This handbook identifies the crop-specific procedural requirements for adjusting Multiple Peril Crop Insurance (MPCI) losses in a uniform and timely manner. These procedures, which include crop appraisal methods and claims completion instructions, supplement the general (not crop-specific) procedures, forms, and manuals for loss adjustment identified in the Loss Adjustment Manual (LAM).

2. SPECIAL INSTRUCTIONS

This handbook remains in effect until superseded by reissuance of **either** the entire handbook **or** selected portions (through slipsheets or bulletins). If slipsheets have been issued for a handbook, the original handbook as amended by slipsheet pages shall constitute the handbook. A bulletin can supersede either the original handbook or subsequent slipsheets.

A. DISTRIBUTION

The following is the minimum distribution of forms completed by the adjuster for the loss adjustment inspection:

One legible copy to insured. The original and all remaining copies as instructed by the insurance provider.

NOTE: It is the insurance providers' responsibility to maintain original insurance documents relative to policyholder servicing as designated in their approved plan of operations.

B. TERMS, ABBREVIATIONS, AND DEFINITIONS

- (1) Terms, abbreviations, and definitions **general** (not crop specific) to loss adjustment are identified in the LAM.
- (2) Terms, abbreviations, and definitions **specific** to peanut loss adjustment and this handbook, which are not defined in this section, are defined as they appear in the text.
- (3) Abbreviations:

AMS Agricultural Marketing Service FSIS Federal-State Inspection Service

LSK Loose Shell Kernels

SE Southeast SW Southwest

(4) Definitions:

Average price per

The price issued by Risk Management Agency.

<mark>pound</mark>

Average support price

The price issued by Risk Management Agency.

<mark>per pound</mark>

Non-quota peanuts In accordance with the Peanut Crop Provisions (99-075) (Rev.

7/99), all insured peanuts will be considered non-quota peanuts

for all aspects of the policy, including the calculation of

premium, liability, and indemnity.

Planted acreage In addition to the requirement in the definition in the Basic

Provisions, peanuts must initially be planted in rows wide enough apart to permit mechanical cultivation. Acreage planted in any other manner will not be insurable unless otherwise provided by the Special Provisions or by written agreement.

Production guarantee (per acre)

In addition to the definition of "production guarantee (per acre)" in the Basic Provisions, the production guarantee (per acre) is the number of pounds determined by multiplying the yield per acre

obtained in the actuarial documents or the approved yield multiplied by the coverage level percentage elected.

3. INSURANCE CONTRACT INFORMATION

The insurance provider is to determine that the insured has complied with all policy provisions of the insurance contract. Crop provisions, which are to be considered in this determination, include (but are not limited to):

A. <u>INSURABILITY</u>

(1) Insured Crop

The crop insured will be all the peanuts in the county for which the insured has a share and which a premium rate is provided by the actuarial documents:

- (a) That are planted for the purpose of marketing as farmer's stock peanuts;
- (b) That are the type of peanut designated in the Special Provisions as being insurable; and

- (c) That are not (unless allowed by the Special Provisions or by written agreement):
 - 1 Planted for the purpose of harvesting as green peanuts;
 - 2 Interplanted with another crop; or
 - 3 Planted into an established grass or legume.

(2) Insurable Acreage

In addition to the provisions of section 9 (Insurable Acreage) of the Basic Provisions:

- (a) Any acreage of the insured crop damaged before the final planting date, to the extent that the majority of producers in the area would not normally further care for the crop, must be replanted unless the insurance provider agrees that replanting is not practical. Refer to the LAM for replanting provisions issues. Refer to section 4 of this handbook for replanting payment procedures.
- (b) Acreage not insured includes any acreage:
 - On which peanuts are grown using no-till or minimum tillage farming methods unless allowed by the Special Provisions or written agreement; or
 - Which does not meet the rotation requirements, if any, contained in the Special Provisions.

B. PROVISIONS NOT APPLICABLE TO CAT COVERAGE

- (1) Optional Units.
- (2) Written Agreements.
- (3) Hail and Fire Exclusion provisions (also not applicable if additional coverage is less than 65/100 or comparable coverage).
- (4) High Risk Land Exclusion.
- (5) Replanting Payments.

NOTE: Refer to CIH and LAM for other provisions not applicable to CAT.

C. UNIT DIVISION

Refer to the insurance contract for unit provisions. **NOTE**: Unless limited by the Crop or Special Provisions, a basic unit, as defined in the Basic Provisions, may be divided into optional units if, for each optional unit, all conditions stated in the applicable provisions are met.

4. REPLANTING PAYMENT PROCEDURES

A. GENERAL INFORMATION

- (1) Replanting payments made on acreage replanted by a practice that was uninsurable as an original planting will require the deduction of the replanting payment for such acreage from the original unit liability. If the unit dollar loss (final claim) is less than the original unit liability minus such replant payment, the actual indemnity dollar amount will not be affected by the replanting payment. The premium will not be reduced.
- (2) No replanting payment will be made on acreage on which a prior replanting payment has been made during the current crop year.

NOTE: Refer to section 9B, column "G," Type/Class/Variety for procedure regarding replanting acreage to a different type than the type initially planted and reported.

B. QUALIFICATIONS FOR REPLANTING PAYMENT

To qualify for replanting payment, the:

- (1) insured crop must have been damaged by an insurable cause;
- (2) insurance provider determines that it is practical to replant;
- (3) acres must not have been planted prior to the "Initial Planting" date established by the Special Provisions;
- (4) appraisal (or appraisal plus any appraisals for uninsured causes of loss) must be less than 90 percent of the production guarantee for the acreage;
- (5) acreage replanted must be AT LEAST the lesser of 20 acres or 20 percent of the insured **planted** acreage for the unit (as determined on the final planting date or within the late planting period if a late planting period is applicable); and
 - **NOTE**: Any acreage planted after the end of the late planting period will not be included when determining if the 20 acres or 20 percent qualification is met. Refer to the LAM.
- (6) insurance provider must have given consent to replant.

NOTE: In the Narrative of the claim form or on an attachment, show the appraisal and calculations to document that qualifications for a replanting payment have been met.

4

C. MAXIMUM REPLANTING PAYMENT

The maximum amount of the replanting payment per acre will be the LESSER OF:

- (1) the actual cost of replanting per acre multiplied by the number of acres replanted and multiplied by the insured's share; or
- (2) eighty dollars (\$80.00) per acre multiplied by the number of acres replanted, multiplied by the insured's share.

EXAMPLE 1

Owner/operator (100 percent share) 30 acres replanted. Insured's actual cost to replant = \$79.00 \$80.00 (maximum \$ amt. allowed in policy)

*** The lesser of \$79.00 and \$80.00 is \$79.00

Enter \$79.00 in Section I, "Adjusted Potential" column of the claim form.

EXAMPLE 2

Landlord/tenant on 50/50 share
30 acres replanted
Insured's actual cost to replant \$85.00
\$80.00 (maximum \$ amt. allowed in policy) X .500 share = \$40.00

*** The lesser of \$85.00 and \$40.00 is \$40.00

NOTE: Enter \$40.00 in Section I, "Adjusted Potential" column of the claim form if share has been applied or \$80.00 if share has yet to be applied. (Follow individual insurance provider guidelines). Indicate in the Narrative if adjusted potential has/has not been reduced for share on claim form according to individual company guidelines.

D. <u>REPLANTING PAYMENT INSPECTIONS</u>

Replanting payment inspections are to be prepared as final inspections on the claim form only when qualifying for a replanting payment. Non-qualifying replanting payment inspections (unless the claim is withdrawn by the insured) are to be handled as preliminary inspections. If qualified for a replanting payment, a Certification Form may be prepared on the initial farm visit. Refer to the LAM.

5. PEANUT APPRAISALS

A. GENERAL INSTRUCTIONS

Potential production will be appraised in accordance with procedure specified in this handbook and the LAM.

B. SELECTING REPRESENTATIVE SAMPLES FOR APPRAISALS

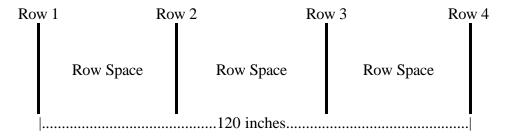

- (1) Determine the number of required samples for a field or subfield by the field size, the average stage of growth, general capability of the plants to recover, variability of potential production, and plant damage within the field or subfield.
- (2) Split the field into subfields when:
 - (a) variable damage causes the crop potential to appear to be significantly different within the same field; or
 - (b) the insured wishes to destroy a portion of a field.
- (3) Appraise each subfield separately.
- (4) Take not less than the minimum number (count) of representative samples required in **TABLE A**.

C. MEASURING ROW WIDTH FOR SAMPLE SELECTION

Use these instructions when the selection of the representative sample is based on row width.

- (1) Use a measuring tape marked in inches, or convert a tape marked in tenths, to inches, to measure row width (refer to the LAM for conversion table).
- (2) Measure across THREE OR MORE row spaces, from the center of the first row to the center of the fourth row (or as many rows as needed). Divide the result by the number of row spaces measured across, to determine an average row width in whole inches.

EXAMPLE:

120 inches \div 3 row spaces = 40 inch average row width

D. STAGES OF GROWTH

(1) Peanut stages of growth for appraisal purposes are identified as "BEFORE PODDING," and "AFTER PODDING."

(2) Time Intervals:

Time From	Approximate Time Interval
Planting to emergence	7 to 10 days.
Emergence to bloom	60 days.
Emergence to nut formation	100 to 120 days.
Nut formation to maturity	40 days.
Planting to maturity	150 to 160 days.

NOTE: Time intervals may vary by variety.

6. APPRAISAL METHODS

A. GENERAL INFORMATION

These instructions provide information for three appraisal methods.

Appraisal Method	Use
Stand Reduction Method*	for planted acreage with no emerged seed and from emergence until kernel development begins within the pods.
Pod Count Method	after kernel development begins within the pods until peanuts are threshed.
Threshed Sample Method	after peanuts have been dug.

^{*}NOTE: Refer to section 7B for appraisal modification to the Stand Reduction Method.

B. STAND REDUCTION METHOD - ABEFORE PODDING@

Use this method from emergence until kernel development begins within the pods.

NOTE: If the reduction in stand is solely due to non-emerged seed due to insufficient soil moisture, do not complete appraisals prior to the time specified in the LAM. Refer to the paragraph in the LAM regarding deferred appraisals and non-emerged seed.

(1) Sampling

- (a) Using a measuring tape marked in tenths, measure a representative row or combinations of rows comprising 100 feet for each representative sample.
- (b) Select the number of representative samples using the instructions in section 5B.

NOTE: Two narrow rows of peanuts planted in a single bed of normal row width will be considered as one row.

(2) Defining a Skip

A skip is the space between "live" plants within the row, which exceeds the standard plant spacing of 6 inches for all peanut types.

NOTE: "Live" plants are plants that are capable of recovery and can timely contribute farmer stock peanuts to the ultimate yield at the time of harvest.

(3) Measuring a Skip

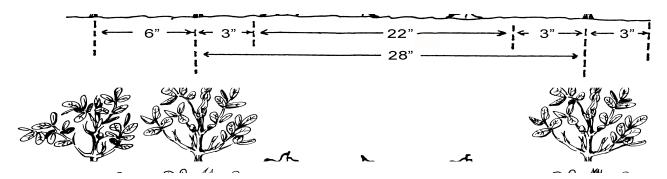

- (a) Using a measuring tape marked in inches, measure the total distance between "live" plants within the sample row.
- (b) Subtract the standard plant spacing for the type (from 6B(2) above) from the total distance measured between the existing "live" plants. The result is the "net length" of the skip.

EXAMPLE: Distance between existing plants
Less: One standard plant spacing
"Net Length of the skip"

28"

6"

22"

- (d) Compute the combined length of skips by adding the "**net length**" of **all** skips within the 100-foot sample.
- (e) Convert the result to feet and tenths by dividing by 12 and rounding to the nearest tenth of a foot.

EXAMPLE: Total combined length of all skips $229" \div 12 = 19.1$ ft.

- (f) Record results for each sample in Part I Sample Determinations Stand Reduction Method section, Combined Length of Skips (column 12) of the appraisal worksheet.
- (g) Compute the pounds per acre appraisal using the instruction for Part I Stand Reduction Method and Part II Stand Reduction Method Computations of section 8B.

C. PLANT AND POD COUNT METHOD – "AFTER PODDING"

Use this method after kernel development begins within the pods until peanuts are threshed.

- (1) Sampling
 - (a) Measure the row width using the instruction in section 5.
 - (b) Select, from Reference Material (section 10 **TABLE C**), the applicable 1/1000 acre representative sample row length based on the measured row width.
 - (c) Using a measuring tape marked in tenths, measure a representative row or combinations of rows comprising 1/1000 of an acre.
 - (d) Select the minimum number of representative samples using the instructions in section 5B.

NOTE: If peanuts are dug and in the windrow, determine number of rows that the digger combined into one windrow and adjust sample size accordingly.

- (2) Plant and Pod Count Computations
 - (a) Plant Count
 - 1 Count the number of peanut plants in each representative sample.

NOTE: If the peanuts have not been dug and the number of plants cannot be determined, dig up the plants and count the taproots.

- 2 Record the results in Part I Sample Determinations Plant Count Number of Plants Per Sample (column 14) of the appraisal worksheet.
- (b) Pod Count

From the **ENTIRE ACREAGE** in the unit:

- 1 Dig or select from the windrows, **AT LEAST 30** representative plants from the entire acreage in the unit. Exercise caution in:
 - <u>a</u> digging or selecting plants from the windrow so that all pods remain attached; and

<u>b</u> selecting plants, if plants are dug and in the windrow. Healthy plants with high pod count are larger and will be selected out of proportion unless a conscious effort is made to select representative plants.

NOTE: If less than 30 plants are available for selection, explain in the "Remarks" section of the appraisal worksheet.

- 2 Count the pods from the representative plants that would normally be picked by the threshing machine.
- <u>3</u> Record the results in Part III Plant and Pod Count Computations, Total Pods in Random Sample (column 26) of the appraisal worksheet.
- 4 Compute the pounds per acre appraisal using the instructions in section 8B, Part III Plant and Pod Count Computations.

D. THRESHED SAMPLE METHOD - AAFTER PODDING@

Use this method after the peanuts have been dug. The thresher is to be used on sample areas of the field if the insured does not wish to harvest the entire field. The adjuster and the insured are to select the representative samples for the threshing and grading as follows:

(1) Sampling

- (a) Measure the row width using the instruction in section 5C.
- (b) Select, from Reference Material (section 10 **TABLE C**), the applicable 1/100 acre representative sample length based on the measured row width.
- (c) Using a measuring tape marked in tenths, measure a representative row or combinations of rows comprising 1/100 of an acre.
- (d) Select the number of representative samples using the instructions in section 5B.
- (2) Threshing and Grading Samples
 - (a) Instruct the insured to operate the thresher in a normal manner over each representative sample. The adjuster is to witness the threshing of **ALL** samples.
 - (b) Weigh the threshed peanuts from **ALL** samples.

c) Select a four to five pound sample of peanuts from **ALL** of the threshed representative samples. The insured and the adjuster should make delivery of the sample to the USDA AMS Federal-State Inspection Service for grading. Using the grade results from the Federal-State Inspection Service Peanut Inspection Notesheet (Form FV-95), determine a value per pound in accordance with **EXHIBIT 1**. However, if the insured elects to harvest the peanuts for delivery to a buying station, use the grade results from the FSA-1007 or FSA-1007 VC. Apply the grade value to the entire field.

NOTE: If the insured waives the right to obtain a grade and value, document in the Narrative of the T-P-C Production Worksheet "Insured waived the right to obtain a grade and value."

- (3) Threshed Sample Method Computations
 - (a) Convert the net production from the graded sample to net production per acre using the following formula:
 - Net Pounds of Production from **ALL** Samples
 - ∴ Number of Samples
 - = Net Production Per Sample
 - X Constant Factor 100 (for 1/100 acre)
 - = Net Production Per Acre

EXAMPLE: 6.0 Lbs. ÷ 4 Samples = 1.5 Lbs. X 100 Factor = 150 Lbs./Per Acre

(b) Record computations in the "Remarks" section of the Peanut Appraisal Worksheet.

7. APPRAISAL DEVIATIONS AND MODIFICATIONS

A. <u>DEVIATIONS</u>

Deviations in appraisal methods require FCIC written authorization (as described in the LAM) prior to implementation.

B. MODIFICATIONS

The insurance provider's authorizing official must authorize the use of a pre-established appraisal modification prior to its use by the adjuster. Refer to the LAM for additional information.

- (1) Stress Damage Modification. Use this modification **ONLY** when conditions warrant.
 - (a) Determine if the peanut plants have been under stress from an insured cause of damage (e.g., drought) and the percent of reduction in potential production that the stress has caused.

(b) Reduce the Pounds Per Acre appraisal (item 22 of the Appraisal Worksheet) after completing the Stand Reduction Method. If no stand reduction has occurred, use the production guarantee (as defined in section 2) as the pounds potential appraisal.

Lbs. Potential (appraisal or production guarantee) X (1.00 - % Stress Damage) = Lbs. Potential, rounded to whole pounds.

EXAMPLE: Production Guarantee of 700 lbs. and Stress Damage of 60%.

- (2) Document the following in the Remarks section of the appraisal worksheet:
 - (a) insured cause of damage;
 - (b) how the percent of stress damage was determined; and
 - (c) name of the person that authorized the modification and date authorized.

8. APPRAISAL WORKSHEET ENTRIES AND COMPLETION PROCEDURES

A. GENERAL INFORMATION

- (1) Include the insurance provider's name in the appraisal worksheet title if not preprinted on the insurance provider's worksheet, when a worksheet entry is not provided.
- (2) Include the claim number on the appraisal worksheet (when required by the insurance provider), when a worksheet entry is not provided.
- (2) Separate appraisal worksheets are required for each unit appraised and for each field or subfield that has a different production guarantee by type and farming practice within the unit. Refer to section 5 for sampling requirements.
- (4) Complete items 1 9 and items 37 and 38 for ALL appraisal methods.

NOTE: Standard appraisal worksheet items are numbered consecutively in section B. An example appraisal worksheet is also provided to illustrate how to complete entries.

B. WORKSHEET ENTRIES AND COMPLETION INFORMATION

Verify or make the following entries:

Item

No. <u>Information Required</u>

Company: Name of company and agency servicing the contract.

Claim No.: Claim number as assigned by the insurance provider.

- 1. **Insured's Name**: Name of the insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.
- 2. **Policy Number:** Insured's assigned policy number.
- 3. **Unit No.**: Five-digit unit number from the Summary of Coverage after it is verified to be correct (e.g., 00100).
- 4. **Crop Year**: Crop year, as defined in the policy, for which the claim has been filed.
- 5. **Field ID**: Field identification symbol.
- 6. **Farm Serial No.**: FSA Farm Serial Number. If more than one Farm Serial Number comprises the unit, enter "See Remarks," and record the numbers in the Remarks section.
- 7. **Stage of Growth**: Enter "Before Podding" or "After Podding" to identify the stage of growth for the appraisal method.
- 8. **Acres**: Number of determined acres, to tenths, in the field or sub-field being appraised.
- 9. **Type**: Type of peanuts appraised, entered as a 3-digit code number exactly as specified on the actuarial documents.

STAND REDUCTION METHOD – "BEFORE PODDING"

PART I - SAMPLE DETERMINATIONS - STAND REDUCTION METHOD

- 10. **Number of Rows**: Number of rows selected for the representative sample.
- 11. **Length of Each Row**: Length (in feet, to tenths) of each representative sample row recorded in **Number of Rows** (column 10).
- 12. **Combined Length of Skips**: Record the **Combined Length of Skips** (in 100 feet of row) in feet, to tenths of **all** skips for each representative sample.
- 13. **Number of Skips**: Total number of skips to count in each representative sample.

- 14. MAKE NO ENTRY.
- 15. **Total**: Add the **Combined Length of Skips** (in feet, to tenths) for **all** representative samples. Transfer results to **Total Combined Length of Skips** (column 16) of Part II Stand Reduction Method Computations.

PART II - STAND REDUCTION METHOD COMPUTATIONS

- 16. **Total Combined Length of Skips**: Result of transferring **Total** for **Combined Length of Skips** (column 15) of Part I Sample Determinations Stand Reduction Method.
- 17. **Number of Samples**: Total number of representative samples taken.
- 18. **Average Skip Length**: Divide **Total Combined Length of Skips** (column 16) by **Number of Samples** (column 17), rounded to the nearest tenth.
- 19. **% Stand Remaining**: Result of subtracting **Average Skip Length** (column 18) from **100** (representative sample length).
- 20. **% Potential Production Remaining**: Round **% Stand Remaining** (column 19) to the nearest 5%. Locate the resulting **% Stand Remaining** in the top row of the Stand Reduction Chart of Part II of the appraisal worksheet. Select the **% Potential Production Remaining** (figure immediately below rounded **% Stand Remaining** figure). Record the result as a two-place decimal fraction.

EXAMPLE: 12% Stand Remaining rounded to nearest 5% = 10%. Figure immediately below 10% is 15% Potential Production Remaining (record as .15).

EXCEPTION: If the **% Stand Remaining** (column 19) is 2.4% or less, enter the actual **% Standing Remaining** in **% Potential Production Remaining** (column 20).

- 21. **Yield Per Acre**: Record the insured's per acre Production Guarantee (refer to Definitions in section 2B(4).
- 22. **Pounds Per Acre**: Multiply the **Yield Per Acre** (column 21) by **% Potential Production Remaining** (column 20), rounded to the nearest whole pounds.

PART III - PLANT AND POD COUNT COMPUTATIONS

- 23.-35. MAKE NO ENTRY.
- 36. **Remarks**: For the STAND REDUCTION METHOD record:
 - a. The computations and documentation required for the Stress Damage Modification (Refer to section 7B).
 - b. Any additional documentation required by the insurance provider.

c. Remarks pertinent to the appraisal, sampling, or conditions in general.

PLANT AND POD COUNT METHOD - "AFTER PODDING"

PART I - SAMPLE DETERMINATIONS - PLANT COUNT

- 10.-13. MAKE NO ENTRY.
- 14. **Number of Plants**: Number of peanut plants counted in each representative sample.
- 15. **Total**: Add the **Number of Plants** for **all** representative samples. Transfer results to Part III Plant and Pod Count Computations, **Total Plants** (column 23).

PART II - STAND REDUCTION METHOD COMPUTATIONS

16.-22. MAKE NO ENTRY.

PART III - PLANT AND POD COUNT COMPUTATIONS

- 23. **Total Plants**: Result of transferring **Total Number of Plants** (column 15) of Part I Sample Determinations Plant Count.
- 24. **No. of Samples**: Total number of representative samples shown in **Number of Plants** (column 14).
- 25. **Average No. Plants Per Sample**: Divide **Total Plants** (column 23) by **No. of Samples** (column 24), rounded to the nearest tenth. Transfer results to column 29.
- 26. **Total Pods in Random Sample**: Total number of pods counted from a random sample of at least 30 representative plants. Refer to section 6C(2)(b).
- No. Plants in Random Sample: Total number of plants in random sample selected for pod count. Refer to **NOTE** in section $6C(2)(b)\underline{1}$.
- 28. **Average No. of Pods Per Plant**: Divide **Total Pods in Random Sample** (column 26) by **No. Plants in Random Sample** (column 27), rounded to the nearest tenth.
- 29. **Average No. Plants Per Sample**: Result of transferring **Average No. Plants Per Sample** from column 25.
- 30. **Average No. Pods Per Sample**: Multiply **Average No. of Pods Per Plant** (column 28) by **Average No. Plants Per Sample** (column 29), rounded to the nearest tenth. Transfer result to column 31.
- 31. **Average No. Pods Per Sample**: Result of transferring **Average No. Pods Per Sample** from column 30.
- 32. **Factor**: Constant **Factor** of **1000** (representative sample of 1/1000 acre).

- 33. **No. Pods Per Acre**: Multiply **Average No. Pods Per Sample** (column 31) by **Factor** (column 32).
- 34. **No. Pods Per Pound**: Record the number of pods per pound using the instructions in section 10 **TABLE B**.
- 35. **Pounds Per Acre**: Divide **No. Pods Per Acre** (column 33) by **No. Pods Per Pound** (column 34), rounding to the nearest whole pound.
- 36. **Remarks**: For the PLANT AND POD COUNT METHOD record: any additional documentation required by the insurance provider, or remarks pertinent to the appraisal sampling, or conditions in general.

THRESHED SAMPLE METHOD

PART I - SAMPLE DETERMINATIONS

10.-15. MAKE NO ENTRY.

PART II - STAND REDUCTION METHOD COMPUTATIONS

16.-22. MAKE NO ENTRY.

PART III - PLANT AND POD COUNT COMPUTATIONS

- 23.-35. MAKE NO ENTRY.
- 36. **Remarks**: For the THRESHED SAMPLE METHOD record:
 - a. The calculation used to convert net production from the threshed graded sample to net production per acre (refer to section 6D).
 - b. Any additional documentation required by the insurance provider.
 - c. Remarks pertinent to the appraisal, sampling, or conditions in general.
- 37. **Insured's Signature and Date**: Insured's (or insured's authorized representative's) signature and date. BEFORE obtaining insured's signature, REVIEW ALL ENTRIES on the appraisal worksheet WITH THE INSURED, particularly explaining codes, etc., which may not be readily understood.
- 38. **Code No., Adjuster's Signature, and Date**: Code number, adjuster's signature and date signed **after** the insured (or insured's authorized representative) has signed. If the appraisal is performed prior to signature date, document the date of appraisal in the Remarks section of the Appraisal Worksheet (if available); otherwise, document the appraisal date in the Narrative of the TPC Production Worksheet.

Page Number: Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.).

STAND REDUCTION METHOD

9. CLAIM FORM ENTRIES AND COMPLETION PROCEDURE

A. GENERAL INFORMATION

- (1) The claim form, (hereafter referred to as "T-P-C Production Worksheet") is a progressive form containing all notices of damage for all preliminary, replant, and final inspections on a unit.
- (2) If a T-P-C Production Worksheet has been prepared on a prior inspection, verify each entry and enter additional information as needed. If a change or correction is necessary, strike out all entries on the line and re-enter correct entries on a new line. The adjuster and insured should initial any line deletions.
- (3) Refer to the LAM for instructions regarding the following:
 - (a) Acreage report errors.
 - (b) Delayed notices and delayed claims.
 - (c) Corrected claims or fire losses (double coverage) and cases involving uninsured causes of loss, unusual situations, controversial claims, concealment or misrepresentation.
 - (d) Claims involving a Certification Form (when all the acreage on the unit has been appraised to be put to another use, when acreage is being appraised for a replanting payment and all acreage on the unit has been initially planted, or other reasons described in the LAM).
 - (e) "No Indemnity Due" claims (which must be verified by an APPRAISAL or NOTIFICATION from the insured that the production exceeded the guarantee).
 - (f) Late planting.
- (4) Refer to the Prevented Planting Handbook for information on prevented planting.
- (5) The adjuster is responsible for determining if any of the insured's requirements under the notice and claim provisions of the policy have not been met. If any have not, the adjuster should contact the insurance provider.
- (6) Instructions labeled "PRELIMINARY" apply to preliminary inspections only. Instruction labeled "REPLANT" apply to replant inspections only. Instructions labeled "FINAL" apply to final inspections only. Instructions not labeled apply to ALL inspections.

B. FORM ENTRIES AND COMPLETION INFORMATION

Verify or make the following entries:

Item

No. <u>Information Required</u>

- 1. **Crop/Code** #: "Peanuts" (0075).
- 2. **Unit**: Five-digit unit number from the Summary of Coverage after it is verified to be correct (e.g. 00100).
- 3. **Legal Description**: Section, township, and range number or other legal description that identifies the location of the unit or the Farm Serial Number, if appropriate.
- 4. **Date of Damage**: First three letters of the month during which MOST of the insured damage (including progressive damage) occurred for each inspection. Include the SPECIFIC DATE where applicable as in the case of hail damage (e.g., AUG 11).
- 5. **Cause of Damage**: Name of insured cause(s) of loss for **this crop** as listed in the LAM. If it is evident that no indemnity is due, enter "NONE." If an insured cause of loss is coded as "Other," explain in the "Narrative."

NOTE: Refer to the Basic Provisions and the crop provisions for this crop for information pertaining to insured and uninsured causes of loss.

6. **Primary Cause %**:

PRELIMINARY: MAKE NO ENTRY.

REPLANT AND FINAL: Percent of damage for the cause of damage listed in column 5 above that is determined to be the primary cause of damage, to the nearest whole percent. The primary cause of damage must exceed 50 percent (e.g., 51%). Enter an "X" for the major secondary cause of damage.

- 7. **Company/Agency**: Name of company and agency servicing the contract.
- 8. **Name of Insured**: Name of the insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.
- 9. **Claim** #: Claim number as assigned by the insurance provider.
- 10. **Policy** #: Insured's assigned policy number.
- 11. **Crop Year**: Crop year, as defined in the policy, for which the claim is filed.

12. **Additional Units**:

PRELIMINARY AND REPLANT: MAKE NO ENTRY.

FINAL: Unit number(s) for ALL non-loss units for the crop at the time of final inspection. A non-loss unit is any unit for which a T-P-C Production Worksheet has not been completed. Additional non-loss units may be entered on a single T-P-C Production Worksheet.

NOTE: If more spaces are needed for non-loss units, enter the unit numbers, identified as "Non-Loss Units," in the narrative or on an attached Special Report.

13. **Est. Prod. Per Acre**:

PRELIMINARY AND REPLANT: MAKE NO ENTRY.

FINAL: Estimated yield per acre, in whole pounds, of all non-loss units for the crop at the time of final inspection.

14. **Date(s) Notice of Loss:**

PRELIMINARY:

- a. Date the notice of damage was given for the unit in column 2.
- b. A third preliminary inspection (if needed) requires an additional set of T-P-C Production Worksheets. Enter the date of notice for a third preliminary inspection in the 1st space of column 14 on the second set.
- c. Reserve the "Final" space on the first page of the first set of T-P-C Production Worksheets for the date of notice for the final inspection.
- d. If the inspection is initiated by the insurance provider, enter "Company Insp." instead of the date.

REPLANT AND FINAL: Transfer the last date in the 1st or 2nd space to the FINAL space if a final inspection should be made as a result of the notice. Always enter the complete date of notice (month, day, year) for the FINAL inspection in the FINAL space on the first page of the first set of T-P-C Production Worksheets. For a delayed notice of loss or delayed claim, refer to the LAM.

15. **Companion Policy(ies)**:

a. If no other person has a share in the unit (insured has 100 percent share), MAKE NO ENTRY.

- b. In all cases where the insured has LESS than a 100 percent share of a loss-affected unit, ask the insured if the OTHER person sharing in the unit has a multiple-peril crop insurance contract (i.e., not crop-hail, fire, etc.). If the other person does not, enter "NONE."
 - (1) If the other person has a multiple-peril crop insurance contract and it can be determined that the SAME insurance provider services it, enter the contract number. Handle these companion policies according to insurance provider instructions.
 - (2) If the other person has a multiple-peril crop insurance contract and a DIFFERENT insurance provider or agent services it, enter the name of the insurance provider and/or agent (and contract number) if known.
 - (3) If unable to verify the existence of a companion contract, enter "Unknown" and contact the insurance provider for further instructions.

NOTE: Refer to the LAM for further information regarding companion contracts.

SECTION I - ACREAGE APPRAISED, PRODUCTION AND ADJUSTMENTS

Make separate line entries for varying:

- (1) Rate classes, types, or farming practices;
- (2) APH yields;
- (3) Appraisals;
- (4) Adjustments to appraised mature production (quality adjustment factors);
- (5) Stages or intended use(s) of acreage;
- (6) Shares (e.g., 50 percent and 75 percent share on the same unit); or
- (7) Appraisal for damage due to hail or fire if a Hail and Fire Exclusion is in effect.

Verify or make the following entries:

Item

No. Information Required

A. **Field ID**: The field identification symbol from a sketch map or an aerial photo. Refer to the Narrative. In the margin, (or in a separate column), enter the date of inspection for the last line entry of each inspection.

NOTE: Where acreage is PARTLY replanted, omit the Field ID symbol for the fields that have not been replanted and that have been consolidated into a single line entry.

B. **Prelim. Acres**:

PRELIMINARY: The number of acres, to tenths (include "E" if estimated), for which consent for other use has been given. Determine actual acreage, to tenths, when the boundaries of the appraised acreage may not be determined later.

REPLANT AND FINAL: MAKE NO ENTRY.

C. **Final Acres**: Refer to the LAM for the definition of acceptable determined acres used herein.

Determined acres, to tenths (include "E" is estimated), for which consent is given for other use and/or:

- a. Abandoned;
- b. Put to other use without consent:
- c. Damaged by uninsured causes; or
- d. For which the insured failed to provide acceptable production records.

REPLANT: Determine the total acres, to tenths, of replanted acreage (DO NOT ESTIMATE). Make a separate line entry for any PART of a field NOT replanted.

- a. Determine the planted acreage of any fields NOT replanted. Consolidate it into a single line entry UNLESS the usual reasons for separate line entries apply. Record the field identities (from a map or aerial photo) in the Narrative.
- b. ACCOUNT FOR ALL PLANTED ACREAGE IN THE UNIT.

FINAL: Determined acres to tenths.

NOTE: Acreage breakdowns WITHIN a unit may be estimated (enter "E" in front of the acres) if a determination is impractical AND if authorization was received from the insurance provider. Document authorization in the Narrative.

ACCOUNT FOR ALL ACREAGE IN THE UNIT. In the event of over-reported acres, handle in accordance with individual insurance provider's instructions. In the event of under-reported acres, draw a diagonal line in column "C" as shown.

- C₁ Enter the ACTUAL acres for the field or subfield.
- C₂ Enter the REPORTED acres for the field or subfield.

D. **Interest or Share**: Insured's interest in the crop to three decimal places as determined at the time of inspection. If shares vary on the same UNIT, use separate line entries.

E. **Risk**: Three-digit code for the correct "Rate Class" specified on the actuarial documents. If a "Rate Class" or "High Risk Area" is not specified on the actuarial documents, make no entry. Verify with the Summary of Coverage and if the Rate Class is found to be incorrect, revise according to the insurance provider's instructions. Refer to the LAM.

NOTE: Unrated land is uninsurable without a written agreement.

- F. **Practice**: Three-digit code number entered exactly as specified on the actuarial documents for the practice carried out by the insured. If "No Practice Specified," enter appropriate 3-digit code number from the actuarial documents.
- G. **Type/Class/Variety**: Three-digit code number entered exactly as specified on the actuarial documents, for the type grown by the insured. If "No Type Specified," enter appropriate 3-digit code number from the actuarial documents.

NOTE: If, after the final planting date for the type, the insured replants acreage to a different type, the peanuts will continue to be insured under the type initially planted and reported. If the insured files a claim for indemnity, enter the new type on the claim and explain in the Narrative that the acreage was replanted to a new type. The new type is required for quality adjustment determination.

H. Stage:

PRELIMINARY: MAKE NO ENTRY.

REPLANT: Replant stage abbreviation as shown below.

"NR" if the combined potential production appraisal and uninsured cause appraisal totals 90 percent or more of the guarantee for replant claims.

FINAL: Stage abbreviation as shown below.

STAGE	EXPLANATION
"P"	Acreage abandoned without consent, put to other use without consent, damaged solely by uninsured causes, for which the insured failed to provide records of production which are acceptable to the insurance provider.
"H"	Harvested.
"UH"	Unharvested or put to other use with consent.

PREVENTED PLANTING: Refer to the Prevented Planting Handbook for proper codes for any eligible prevented planting acreage.

GLEANED ACREAGE: Refer to the LAM for information on gleaning.

I. **Intended or Final Use**: Use of acreage. Use the following "Intended Use" abbreviations.

USE EXPLANATION

"Replant"	Acreage rep	lanted and	l qualifying f	for replanting	g payment.
(/3 7 . 75 . 1 . 100			4.0	c · c	4 .

"Not Replanted"...... Acreage not replanted or not qualifying for a replanting payment.

"To soybeans," etc..... Use made of the acreage.
"WOC"...... Other use without consent.

"SU"...... Solely uninsured.

"ABA"..... Abandoned without consent.

"H"..... Harvested.

"UH"...... Unharvested, lost in windrow, or other use with consent.

Verify any "Intended Use" entry. If the final use of the acreage was not as indicated, strike out the original line and initial it. Enter all data on a new line showing the correct "Final Use."

PREVENTED PLANTING: Refer to the Prevented Planting Handbook LAM for proper codes for any eligible prevented planting acreage.

GLEANED ACREAGE: Refer to the LAM for information on gleaning.

J. **Appraised Potential**:

REPLANT: MAKE NO ENTRY. Enter the replant appraisal in the Narrative. Refer to section 4.

PRELIMINARY AND FINAL: Per-acre appraisal, in WHOLE pounds, of POTENTIAL production for the acreage appraised. Refer to section 5 "Peanut Appraisals" for additional instructions.

NOTE: If there is no potential on UH acreage enter "0."

K. Quality Factor:

REPLANT: MAKE NO ENTRY.

*** PRELIMINARY AND FINAL: Appraised mature peanut production (e.g., a threshed sample from the Threshed Sample Method appraisal) that is damaged by insurable causes and for which the value per pound is less than the average support price per pound, by type (for the 2002 crop year only, .1775 cents per pound, as stated in MGR-02-016), will be adjusted by the factor determined by dividing the value per pound for the insured peanuts by the average price per pound. Refer to Definitions in section 2B(4).

NOTE: Make an entry **only** for peanuts that qualify for quality adjustment. Otherwise, make no entry. Peanuts not graded by an FSIS grader do not qualify for quality adjustment. Do not allow any reduction in value due to uninsurable causes. Enter ".0000" factor if appraised mature peanuts have no value.

L. Adjusted Potential:

REPLANT: Enter the dollars (to the nearest cent) per acre allowed for a replanting payment. (Refer to section 4 for qualifications and computations.)

PRELIMINARY AND FINAL: Column "J" times column "K," rounded to the nearest whole pounds.

M. (+) Uninsured Causes:

REPLANT: MAKE NO ENTRY.

PRELIMINARY AND FINAL: EXPLAIN IN THE NARRATIVE.

- a. Hail and Fire Exclusion NOT in effect.
 - (1) Enter NOT LESS than the insured's production guarantee per acre, in whole pounds, for the line, (calculated by the multiplying the insured's yield per acre contained in the actuarial documents or the approved APH yield per acre shown on the APH form multiplied by the coverage level elected) for any "P" stage acreage.

NOTE: On preliminary inspections, advise the insured to keep the harvested production from any acreage damaged SOLELY by uninsured causes separate from other production.

- (2) For acreage that is damaged PARTLY by uninsured causes, enter the APPRAISED UNINSURED loss of production per acre in WHOLE pounds for any such acreage.
- b. When there is late-planted acreage, the applicable per-acre guarantee for such acreage is the production guarantee that has been reduced for late-planted acreage.
- c. Refer to the LAM when a Hail and Fire Exclusion is in effect and damage is from hail or fire.
- d. Enter the result of adding uninsured cause appraisals to hail and fire exclusion appraisals.

NOTE: For fire losses, if the insured also has other fire insurance (double coverage), refer to the LAM.

N. **Potential Counted:**

REPLANT: Transfer the result from column "L."

PRELIMINARY AND FINAL: Column "L" plus column "M."

O. **Value Per Pound**: MAKE NO ENTRY.

P. Total Potential to Count:

REPLANT: Column "C or C₁" (actual acres) times column "N" (rounded to the nearest whole dollar).

PRELIMINARY AND FINAL: Column "C or C₁" times column "N", rounded to the nearest whole pounds.

- Q. **Per Acre**: Per Acre Guarantee (refer to Definitions in section 2B(4). Enter the per-acre production guarantee from the insured's policy. **NOTE**: Refer to the LAM for late planting procedures.
- R. **Total**: Column "C₂" (**reported** acres; "C" if acreage is not under-reported), times column "Q," rounded to whole pounds.

16. **Total Acres**:

PRELIMINARY: MAKE NO ENTRY.

REPLANT AND FINAL: Total Actual Acres [column "C" (or "C₁" if there are underreported acres)], to tenths.

NOTE: FOR COLUMN 17. WHEN SEPARATE LINE ENTRIES ARE MADE FOR VARYING SHARES, STAGES, PRODUCTION GUARANTEES OR APH YIELDS, PRICE ELECTIONS, TYPES, ETC., WITHIN THE UNIT, AND TOTALS NEED TO BE KEPT SEPARATE FOR CALCULATING INDEMNITIES, MAKE NO ENTRY AND FOLLOW THE INSURANCE PROVIDER'S INSTRUCTIONS; OTHERWISE, MAKE THE FOLLOWING ENTRIES.

17. **Totals**:

PRELIMINARY: MAKE NO ENTRY.

REPLANT AND FINAL: Total of Column "P" and total of column "R."

NARRATIVE:

If more space is needed, document on a Special Report, and enter "See Special Report." Attach the Special Report to the T-P-C Production Worksheet.

- a. If no acreage is released on the unit, enter "No acreage released," adjuster's initials, and date.
- b. If notice of damage was given and "No Inspection" is necessary, enter the unit number(s), "No Inspection," date, and adjuster's initials. The insured's signature is not required.
- c. Explain any uninsured causes, unusual, or controversial cases.
- d. If there is an appraisal in Section I, column "M" for uninsured causes due to a hail/fire exclusion, show the original hail/fire liability per acre and the hail/fire indemnity per acre.
- e. Document the actual appraisal date if an appraisal date was performed prior to the adjuster's signature date on the appraisal worksheet, and the date of the appraisal is not recorded on the appraisal worksheet.
- f. State that there is "No other fire insurance" when fire damages or destroys the insured crop and it is determined that the insured has no other fire insurance. Also refer to the LAM.
- g. Explain any errors found on the Summary of Coverage.
- h. Explain any commingled production. Refer to the LAM.
- i. Explain any entry for "Production Not to Count" in Section II, column "J," and/or any production not included in Section II, column "G" (e.g., harvested production from uninsured acreage that can be identified separately from the insured acreage in the unit).
- j. Explain a "NO" checked in column 19.
- k. Attach a sketch map or aerial photograph to identify the total unit:
 - (1) If consent is or has been given to put part of the unit to another use or to replant;
 - (2) If acreage has been replanted to a practice uninsurable as an original practice;
 - (3) If uninsured causes are present; or
 - (4) For unusual or controversial cases.

NOTE: Indicate on aerial photo or sketch map the dispositions of acreage destroyed or put to other use with or without consent.

l. Explain any difference between date of inspection and signature dates. For an ABSENTEE insured, enter the date of the inspection AND the date of mailing the T-P-C Production Worksheet for signature.

- m. When any other adjuster or supervisor accompanied the adjuster on the inspection, enter the code number of the other adjuster or supervisor and date of inspection.
- n. Explain the reason for a "No Indemnity Due" claim. "No Indemnity Due" claims are to be distributed in accordance with the insurance provider's instructions.
- o. Explain any delayed notices or delayed claims as instructed in the LAM.
- p. Document any authorized estimated acres shown in Section I, column "C" as follows: "Line 3 >E= acres authorized by insurance provider MM/DD/YYYY."
- q. Document the method and calculation used to determine acres for the unit. Refer to the LAM.
- r. Specify the type of insects or disease when the insured cause of damage or loss is listed as insects or disease. Explain why control measures did not work.
- s. Document the appraisal (plus appraisal for uninsured causes of loss, if applicable) for replanted acreage, and the calculations to show that the qualification for a replanting payment have been met. Refer to section 4.
- t. If any acreage to be replanted in the unit does not qualify for a replanting payment, enter Field No., "NOT QUAL FOR RP PAYMENT," date of inspection, adjuster's initials, and reason not qualified.
- u. Explain any zero (.0000) QA factor entered in Section I column "K" or Section II column "I."
- v. Document field ID's and date and method of destruction of mycotoxin-infested peanuts if it has no market value. For further documentation instructions, refer to the LAM.
- w. Document the name and address of the charitable organization when gleaned acreage is applicable. Refer to the LAM for more information on gleaning.
- x. Document any other pertinent information, including any data to support any factors used to calculate the production.

SECTION II - HARVESTED PRODUCTION

GENERAL INFORMATION:

- (1) Include **ALL HARVESTED PRODUCTION** for **ALL ENTITIES** sharing in the crop.
- (2) There will be no "harvested production" entries for replant payments.

- (3) There generally will be **no** "harvested production" entries in Columns "A₁" through "N" for preliminary inspections.
- (4) If additional lines are necessary, the data may be entered on a continuation sheet. USE SEPARATE LINES FOR:
 - (a) different buyers of sold production.
 - (b) varying shares, e.g., 50 percent and 75 percent shares on same unit; or
 - (c) varying values for quality adjusted production.
- (5) If there is harvested production from more than one insured practice (or type, if applicable) and a separate production guarantee has been established for each, the harvested production also must be entered on separate lines in "A₁" through "N" by practice. If production has been commingled, refer to the LAM.

Verify or make the following entries:

Item

No. <u>Information Required</u>

18. Date Harvest/Sale Complete: (Used to determine if there is a delayed notice or delayed claim. Refer to the LAM.)

PRELIMINARY: MAKE NO ENTRY.

REPLANT AND FINAL:

- a. Enter the earlier of the date that one of the following events occurred on the ENTIRE acreage for the unit:
 - (1) removal of the peanuts from the field(s);
 - (2) total destruction of the insured crop;
 - (3) put to other use with consent;
 - (4) a combination of destroyed, put to other use, or the removal of the peanuts from the field(s); or
 - (5) the calendar date for the end of the insurance period.
- b. If at the time of final inspection (if prior to the end of the insurance period), there is any unharvested insured acreage remaining on the unit that the insured does not intend to harvest; enter "Incomplete."
- c. If at the time of final inspection (if prior to the end of the insurance period), **none** if the insured acreage on the unit has been harvested, and the insured does not intend to harvest such acreage, enter "**No Harvest.**"

d. If the claim involves a Certification Form, enter the date from the Certification Form when the entire unit is put to another use, replanting is complete for the unit, etc. Refer to the LAM.

19. **Similar Damage**:

PRELIMINARY: MAKE NO ENTRY.

REPLANT AND FINAL: Check "Yes" or "No." Check "Yes" if amount and cause of damage due to insurable causes is similar to the experience of other farms in the area. If "No" is checked, explain in the Narrative.

- 20. **Assignment of Indemnity**: Check "Yes" **only** if an assignment of indemnity is in effect for the crop year; otherwise, check "No." Refer to the LAM.
- 21. **Transfer of Right to Indemnity**: Check "Yes" **only** if a transfer of right to indemnity is in effect for the crop year; otherwise, check "No." Refer to the LAM.
- A₁ Share: RECORD ONLY VARYING SHARES on the SAME unit to three decimal places.
- A_2 . Field ID:
 - a. If only one practice and/or type of harvested production is listed in Section I, MAKE NO ENTRY.
 - b. If more than one practice and/or type of harvested production is listed in Section I, and a separate production guarantee per acre exists, indicate for each practice/type the corresponding Field ID (from Section I column "A").
- B.-D. PRODUCTION SOLD, DELIVERED UNDER CONTRACT OR UNDER LOAN, enter the identification number of the FSA-1007, FSA-1007 VC, (if neither FSA form is available, use the FV-95) or other acceptable sales record (if any) and name of buyer, or other receiver.

FARM STORED OR CONSUMED ON THE FARM, enter "Farm Stored," "Farm Stored Seed," or "Consumed" and identification of the FSA-1007, FSA-1007 VC (or FV-95 if neither FSA form is available) or other record, (if any). **NOTE**: If peanuts are farm stored and will not be graded, the peanuts are **NOT** eligible for quality adjustment.

E. Leaf Quality:

Record in sub-column "G" the Type, entered as a 3-digit code number, exactly as specified on the actuarial documents, that identifies the type of peanuts entered in **Production** (column "G").

MAKE NO ENTRY in sub-columns "F" and "P."

F. Quota (Q), Non-Quota (NQ), or Bale No: MAKE NO ENTRY.

- G. **Production**: The unadjusted net weight, in whole pounds, for the line from the FSA-1007, FSA-1007 VC, (FV-95, as applicable) or other sales record which the adjuster determines to be accurate.
- H₁. **Value Per Pound**: Recorded the value per pound for graded production (to four decimal places):
 - a. from item P of the FSA 1007 or FSA 1007 VC (If the value per pound is expressed as dollars per ton, divide by 2000.). **NOTE**: Peanuts, that will not be delivered to a buying point for sale, or for storage under the Peanut Marketing Assistance Loan program, must be graded by an FSIS grader and the results recorded on a FV-95, FSA 1007 or FSA 1007 VC. Using the grade results, determine the value per pound in accordance with **EXHIBIT 1** (unless a value is recorded in item P of the FSA 1007 or FSA 1007 VC). Peanuts, which are not graded, will not be eligible for quality adjustment.
 - b. for Segregation II or III peanuts, the value per pound will be 35 percent of the value recorded in item P of the FSA 1007 or FSA 1007 VC or determined in accordance with **EXHIBIT 1**.

EXCEPTION: The value per pound for Segregation II and III peanuts stored on the farm and that will be used for seed will not be reduced to 35 percent but will be valued at the full grade value.

NOTE: If item P of the FSA 1007 or FSA 1007 VC has been incorrectly calculated, calculate the Value Per Pound in accordance with Exhibits 1 and 2.

- H₂. **Local Market Price**: Record the Average Price Per Pound to four decimal places (.1775 cents per pound as stated in MGR-02-016 for the 2002 crop year only). See Definitions, section 2B(4).
- I. **Quality Factor**: Divide "H₁" by "H₂"(if applicable) and enter the result to four decimal places.
- J. **Production Not to Count (lbs.)**: Net production NOT to count, to whole pounds, WHEN ACCEPTABLE RECORDS IDENTIFYING SUCH PRODUCTION ARE AVAILABLE, from harvested acreage which has been assessed an appraisal of not less than the guarantee per acre, or other sources (e.g., other units or uninsured acreage) in the same storage structure.

THIS ENTRY MUST NEVER EXCEED PRODUCTION SHOWN ON THE SAME LINE.

K. **Production to Count (lbs.)**:

- a. If quality adjustment **does not apply**, subtract column "J" from column "G."
- b. If quality adjustment **does apply**, subtract column "J" from column "G" times column "I," rounding to the nearest whole pound.
- L. MAKE NO ENTRY.
- M. **Value Not to Count \$:** Record the Segregation as Seg. I, Seg. II, or Seg. III from the FSA-1007, FSA-1007 VC, (FV-95, as applicable) or other acceptable sales record to identify the **Production** entered in column "G")
- N. **Production/Value to Count**: Transfer result of column "K."

NOTE: FOR COLUMNS 22 - 24. WHEN SEPARATE LINE ENTRIES ARE MADE FOR VARYING SHARES, STAGES, PRODUCTION GUARANTEES OR APH YIELDS, PRICE ELECTIONS, TYPES, ETC., WITHIN THE UNIT, AND TOTALS NEED TO BE KEPT SEPARATE FOR CALCULATING INDEMNITIES, MAKE NO ENTRY AND FOLLOW THE INSURANCE PROVIDER'S INSTRUCTIONS; OTHERWISE, MAKE THE FOLLOWING ENTRIES.

22. **Section II Total**:

PRELIMINARY AND REPLANT: MAKE NO ENTRY.

FINAL: Total of column "N."

23. **Section I Total**:

PRELIMINARY AND REPLANT: MAKE NO ENTRY.

FINAL: Transfer, from Section I, result of column "P."

24. Unit Total:

PRELIMINARY AND REPLANT: MAKE NO ENTRY.

FINAL: Result of adding 22 and 23.

25. **Adjuster's Signature, Code #, and Date**: Signature of adjuster, code number, and date signed **after** the insured (or insured's authorized representative) has signed. For an absentee insured, enter adjuster's code number ONLY. The signature and date will be entered AFTER the absentee has signed and returned the T-P-C Production Worksheet.

NOTE: Final indemnity inspections and final replant payment inspections should be signed on bottom line.

26. **Insured's Signature and Date**: Insured's (or insured's authorized representative's) signature and date. BEFORE obtaining insured's signature, REVIEW ALL ENTRIES on the T-P-C Production Worksheet WITH THE INSURED, particularly explaining codes, etc., that may not be readily understood.

NOTE: Final indemnity inspection and final replant payment inspections should be signed on bottom line.

27. **Page Numbers**:

PRELIMINARY: Page numbers – "1," "2," etc., at the time of inspection.

REPLANT AND FINAL: Page numbers - (Example: Page 1 of 1, Page 1 of 2, Page 2 of 2, etc.).

NARRATIVE (If more space is needed, attach a Special Report)

Insured's actual cost to replant \$85 per acre. Appraised potential less than 90% of production guarantee (1688 X 90% =1519) Appraised potential = 290 lbs. Share has yet to be applied. Field 1A measured by FSA.

TABLE A MINIMUM REPRESENTATIVE SAMPLE REQUIREMENTS

Acres in Field	Minimum No. of
or Subfield	Samples
.1 10.0	3
10.1 40.0	4

One additional sample is required for each additional 40.0 acres (or fraction thereof) in the field or subfield.

TABLE B PODS (UNSHELLED PEANUTS) PER POUND TABLE

1 For the states of North Carolina and Virginia:

Type:	No. Pods Per Pound
Runner	250 to 500
Virginia	212 to 254

The number of pods per pound may vary according to seasonal conditions, but should fall somewhere within table limits. If it is evident that the actual pod count would not fall within the range listed above, use the Alternative Method for Determining Pods Per Pound in item 4.

2 For the states of Texas, New Mexico, and Oklahoma:

Type:	No. Pods Per Pound
Runner	250 to 500
SW Spanish	
SW Spanish Irrigated	375 to 700
Nonirrigated	300 to 550
Valencia	175 to 300
Virginia	175 to 300

The number of pods per pound may vary according to seasonal conditions, but should fall somewhere within table limits. If it is evident that the actual pod count would not fall within the range listed above, use the Alternative Method for Determining Pods Per Pound in item 4.

3 For all other states:

No. Pods Per Pound
250 to 500 450 to 650 275 to 325
175 to 300

The number of pods per pound may vary according to seasonal conditions, but should fall somewhere within table limits. If it is evident that the actual pod count would not fall within the range listed above, use the Alternative Method for Determining Pods Per Pound in item 4.

4 Alternative Method for Determining Pods Per Pound

If it is evident that the actual pod count, for the Plant and Pod Count Appraisal, would not fall within the number of pods per pound range, use the following procedure:

- a. Take a representative field sample of peanuts from all samples.
- b. Allow the peanuts to dry before weighing the peanuts if the moisture level is in excess of 10.5 percent moisture level.
- c. Accurately weigh a one-pound sample of the dry unshelled peanuts from each representative sample. Total the number of unshelled peanut pods counted from each sample and divide by the number of representative samples. The result is the number of pods per pound for the appraisal.
- d. Document, in the Remarks section of the appraisal worksheet, all calculations and the conditions that required the use of the alternative method in lieu of **TABLE B, 1, 2, or 3** above.

TABLE C SINGLE ROW LENGTH FOR EACH SAMPLE

<u>1/100 Acre</u>	<u>1/1000 Acre</u>
174.2 feet	17.4 feet
163.8 feet	16.4 feet
153.9 feet	15.4 feet
145.2 feet	14.5 feet
137.8 feet	13.8 feet
130.7 feet	13.1 feet
124.5 feet	12.5 feet
	174.2 feet 163.8 feet 153.9 feet 145.2 feet 137.8 feet 130.7 feet

PEANUT QUALITY ADJUSTMENT WORKSHEET INSTRUCTIONS

All entries are determined from the following forms: FSA-1007, FSA 1007 VC or FV-95 and the premium and discount charts in **EXHIBIT 2**. Enter a zero when there are no deductions or additions.

NOTE: If the value per pound has not been calculated (or incorrectly calculated) on FSA-1007 or 1007 VC, use the following procedure.)

- 1. **Insured's Name**: Name of the insured that identifies EXACTLY the person (legal entity) to whom the policy is issued.
- 2. **Policy Number.** Insured's assigned policy number.
- 3. **Unit Number**: Five-digit number from the Summary of Coverage after it is verified to be correct (e.g., 00100).
- 4. **Crop Year**: Crop Year, as defined in the policy, for which the claim has been filed.
- 5. **Serial Number**. Serial Number from the applicable form for the load.
- 6. **Type**: Type code from the actuarial documents for the peanuts identified on the form as Runner, Spanish, Valencia, or Virginia.
- 7. **Premium or Discount**: Record the grade for SMK + SS in column identified as such (e.g., 68 from the applicable form). In the column identified as +or -, record the premium or discount for the type and grade (e.g., 68 SMK + SS for Runners equals –23.81). Use the following table to compute the premiums and discounts for SMK + SS grades not shown in **EXHIBIT 2.** Add or subtract (as applicable) the following values for the type:

TYPE	+/- VALUE/PERCENTAGE POINTS
Virginia	\$4.979
Runner	\$4.881
Spanish	\$4.857
Valencia	\$5.140

- 8. **Damage**: Record the percent damage and the deduction in dollars and cents or enter NONE if no deductions for such damage (e.g., 1% damage equals no deduction)
- 9. **Foreign Material**: Record the percent of Foreign Material and the deduction in dollars and cents for such foreign material (e.g., 8% damage equals a \$4.00 deduction).
- 10. **Sound Splits**: Record the percent of Sound Splits and the deduction for excess splits (e.g., 4% sound splits equals no deductions). For percentages greater than 4, multiply percentage by \$0.80.
- 11. **% Other Kernels**: Record the % Other Kernels and the premium in dollars added for the % Other Kernels (e.g., 4% = \$5.60). For percentages greater than 12, multiply percentage by \$1.40.
- 12. **Virginia Peanuts Only**: Record the % ELK Per Ton and the premium amount in dollars added for Virginia peanuts ONLY (e.g., 50% = \$17.50). For percentages greater than 50 and less than 16, multiply percent by \$0.35.
- 13. **Loan Rate**: Record the per ton Loan Rate for the type announced by the U.S. Department of Agriculture. For the 2002 crop year, use \$355.72 for Runner; \$337.20, Spanish; \$353.66 for Valencia; and \$353.66 for Virginia.

- 14. **Net Premiums and Discounts**: Record the results, as a + or figure, of calculating columns 8 thru12 for each type of peanuts.
- 15. **Net Loan Value**: Calculate the Net Loan Value (Loan Rate (column 13) + or result contained in (column 14).
- 16. **Value Per Lb. Exc. LSK**: Divide the Net Loan Value (column 15) by 2000, and enter the result to four decimal places.
- 17. **Net Weight Exc. LSK**: Enter the Net Weight Excluding LSK from item I of FSA 1007/1007 VC or net weight excluding LSK from FV- 95.
- 18. **LSK Pounds**: Enter LSK pounds from item H of the FSA 1007/1007 VC or pounds of LSK from FV 95.
- 19. **Net Weight**: Enter the Net Weight from item G of the FSA 1007/1007 VC or net weight from the FV 95.
- 20. **LSK Value Per Lb.**: Enter \$.07 as the value per pound of LSK.
- 21. **Value Per Lb. Inc. LSK**: Compute value as follows: Multiply **Value Per Lb. Exc. LSK** (item 16) X **Net Weight Exc. LSK** (item 17) plus **LSK pounds** (item 18) X **LSK Value Per Lb.** (item 20). Divide by the **Net Weight** (item 19). Enter the results in item 21 and in Value Per Pound (H₁) Section II of the TPC Production Worksheet.

For Segregation II and III peanuts, the value per pound will be 35 percent of item 21. Strike through the entry, enter Seg. II or III and the adjusted value per pound.
