Docket No. 30-36974-ML

CLI-06-25

MEMORANDUM AND ORDER

This adjudicatory proceeding stems from Pa'ina Hawaii, LLC's ("Pa'ina") application for a materials license to construct and operate an industrial irradiator adjacent to the Honolulu International Airport. On January 24 and March 24, 2006, the Commission's Atomic Safety and Licensing Board issued two orders which admitted for litigation, respectively, two intertwined environmental contentions and one closely-related safety contention.¹ On July 3, 2006, Pa'ina filed the instant appeal of the Board's two orders, asserting that the Board erred in admitting the three contentions and should instead have denied the petition to intervene in its entirety.

Pa'ina filed its instant appeal pursuant to 10 C.F.R. § 2.311(c). Appeals under that section must be filed within ten days of service of the appealed order(s). 10 C.F.R. § 2.311(a). Pa'ina filed its instant appeal on July 3rd, several months after the expiration of the ten-day filing periods for challenging the Board's January 24th and March 24th orders. We therefore dismiss

Pa'ina's appeal as untimely. Section 2.311 contemplates just one opportunity for license applicants like Pa'ina to appeal contention admissibility rulings - - at the outset of a proceeding, within ten days after a Board grants a petition to intervene, and only if the license applicant argues the petition should have been "wholly denied." That was not the case when Pa'ina filed an appeal earlier in this proceeding,² and our rules give no right to appeal now. Pa'ina's grievance must abide the Board's merits decision.

IT IS SO ORDERED.
