**Implementation Date:** Work began on during the winter of 06/07. Remaining units will be completed in 2008.

**Legal:** T. 36 S. R. 18 E., Sec. 32  
T. 37 S. R. 18 E., Sec. 3-7, 10, 12  
T. 37 S. R. 27 E., Sec. 14-15

**Project Acres:** approximately 873

**Acres to be treated in 2008:** 205

### Project Description:

Four separate units have been identified for treatment adjacent to the Natural Bridges National Monument. Treatments planned and completed include; thinning, piling, pile burning and bullhog. Treatments in these old growth pinyon/juniper and sage brush flats are designed to reduce invasive pinyon and juniper trees and the restoration of degraded ecosystems. Goals for this project include: improved public and fire fighter safety, a reduction in invasive species and hazardous fuels and improved structure protection for the Natural Bridges National Monument.
