**Assumptions:**

- All totals include mass transit budget authority.
- 2002: \$686 billion enacted discretionary funding adjusted for technical re-estimates. In addition, \$44 billion was provided in supplemental acts, \$29 billion for recurring purposes.
- 2003: Presidentially approved spending level: House passed budget resolution, adjusted for mass transit.

<sup>1</sup> Discretionary homeland security only. Including mandatory and fee funded costs, homeland security grows 7.6 percent.

\* \$500 million or less.

<sup>1</sup> A decrease in the Treasury operating cash balance or compensating balances (which are assets) would be a means of financing a deficit and therefore has a positive sign. An increase in checks outstanding (which is a liability) would also be a means of financing a deficit and therefore also has a positive sign.

<sup>2</sup> Compensating balances are non-interest bearing Treasury bank deposits that Treasury mainly uses to compensate banks for collecting taxes and non-tax receipts under financial agency agreements. The Administration is proposing legislation to replace them with an appropriation in 2004.

<sup>3</sup> Besides checks outstanding, includes accrued interest payable on Treasury debt, miscellaneous liability accounts, allocations of special drawing rights; and, as an offset, cash and monetary assets (other than the Treasury operating cash balance and compensating balances), miscellaneous assets accounts, and profit on sale of gold.

<sup>4</sup> Consists primarily of Federal Financing Bank debt in 2002.

<sup>5</sup> Consists of unamortized discount (less premium) on public issues of Treasury notes and bonds (other than zero-coupon bonds) and unrealized discount on Government account series securities.

<sup>6</sup> The statutory debt limit is \$6,400 billion.

<sup>7</sup> Treasury securities held by the public and zero-coupon bonds held by Government accounts are almost all measured at sales price plus amortized discount or less amortized premium. Agency debt securities are almost all measured at face value. Treasury securities in the Government account series are measured at face value less unrealized discount (if any).

<sup>8</sup> At the end of 2002, the Federal Reserve Banks held \$604.2 billion of federal securities and the rest of the public held \$2,936.2 billion. Debt held by the Federal Reserve Banks is not estimated for future years.
