

Nonattainment Areas Listed by State, County and Pollutant (July 20, 2000)

This is a simplified listing of nonattainment areas derived from Title 40, Code of Federal Regulations, part 81 (40 CFR 81), as published in the Federal Register. Areas are listed in alphabetical order by state. Pollutants are: CO = carbon monoxide; lead; NO₂ = nitrogen dioxide; ozone (1-hr); SO₂ = sulfur dioxide; and PM-10 = particulate matter smaller than 10 micrometers in effective diameter. For more information on these areas as well as detailed information on all areas see the EPA Green Book site (<http://www.epa.gov/oar/oaqps/greenbk/>).

NOTE: Ozone nonattainment information presented here reflects the May 27, 1998 and June 15, 1998 revocation of the 1-hour standard for most counties. The 1-hour standard will continue to apply in areas that had violated the 1-hour standard (existing nonattainment areas). EPA will not designate areas as nonattainment for the new 8-hour ozone standard until the year 2000. In doing so, EPA will use the 3 years of data most recently available at that time (e.g., 1997-1999). Similarly, new fine particulate matter (PM-2.5) nonattainment areas may be designated once monitoring results are evaluated.

*Partial counties are indicated with an asterisk **
