CHAPTER	PAGE
<b>1. Background</b>	
Disease Description . . . . .	1-2
Infants aged <1 year . . . . .	1-3
Adolescents and Adults . . . . .	1-3
Transmission . . . . .	1-3
Pathogenesis . . . . .	1-4
Immunity . . . . .	1-4
Culture Confirmation . . . . .	1-5
Carriage . . . . .	1-5
References . . . . .	1-6
<b>2. Diagnosis and Laboratory Methods</b>	
Obtaining a Specimen for Diagnosis of <i>Bordetella pertussis</i> . . . . .	2-1
Culture for Isolation of <i>B. pertussis</i> . . . . .	2-1
Susceptibility Testing of <i>B. pertussis</i> Strains . . . . .	2-2
Use of Polymerase Chain Reaction (PCR) to Detect <i>B. pertussis</i> And <i>B. parapertussis</i> in Clinical Specimens . . . . .	2-3
Testing Nasopharyngeal Secretions by Direct Fluorescein-Conjugated- Antibody (DFA) Staining . . . . .	2-3
Serology . . . . .	2-4
Pulsed-Field Gel Electrophoresis (PFGE) of <i>B. pertussis</i> Strains . . . . .	2-5
References . . . . .	2-5
Appendices	
2-1: Nasopharyngeal Specimen Collection . . . . .	2-7
2-2: Culture and Isolation of <i>B. Pertussis</i> . . . . .	2-8
2-3: Disk-Diffusion for <i>Bordetella pertussis</i> Sensitivity to Erythromycin . . . . .	2-8
2-4: Conditions for Including Polymerase Chain Reaction Assays for  <i>B. pertussis</i> and <i>B. parapertussis</i> as a Diagnostic in a Non-Kit Format . . . . .	2-9
2-5: Subtyping <i>Bordetella pertussis</i> Isolates by Pulsed-Field Gel Electrophoresis . . . . .	2-10
2-6: Storage and Shipping <i>Bordetella pertussis</i> isolate to the CDC Pertussis Laboratory . . . . .	2-14

<b>3. Treatment and Chemoprophylaxis</b>	
Erythromycin	3-1
Effectiveness of Erythromycin	3-1
Dosage, Duration of Therapy and Recommended Preparation	3-2
Adverse Events and Compliance	3-3
Treatment and Chemoprophylaxis	3-3
Erythromycin Resistance	3-4
Trimethoprim Sulfamethoxazole (TMP-SMZ)	3-5
Azithromycin and Clarithromycin	3-5
Other Antimicrobials	3-6
Tables	3-7
References	3-11
<b>4. Use of Pertussis Vaccines in Outbreaks</b>	
Routine Recommendations for Vaccination	4-1
Available Vaccine Preparations	4-1
Recommendations for Vaccination During Outbreaks	
General	4-2
Infants – Accelerated Schedule	4-2
Children 1-6 Years of Age	4-4
Older Children, Adolescents and Adults	4-4
Table	4-6
References	4-6
<b>5. Special Conditions</b>	
HIV/AIDS	5-1
Case Reports	5-1
Prospective Studies	5-1
Vaccine Safety and Immunogenicity	5-1
Recommendations	5-2
Pregnancy	5-2
Maternal Illness	5-2
Mother-to-Infant Transmission	5-2
Summary	5-2
Treatment and Chemoprophylaxis	5-3
Cases	5-3
Contacts	5-3
Other Recommendations	5-3
Other Special Conditions	5-3
Asthma	5-3
Cystic Fibrosis	5-3
Other Immunocompromising Conditions	5-3

---

References . . . . .	5-4
<b>6. General Guidelines for Pertussis Case Investigation and Surveillance</b>	
Case Investigation . . . . .	6-1
Information to Collect . . . . .	6-2
Contact Investigation . . . . .	6-3
Reporting of Cases . . . . .	6-4
References . . . . .	6-4
Appendix . . . . .	6-4
<b>7. Household Settings</b>	
Background . . . . .	7-1
Definition of Outbreak in a Household . . . . .	7-1
Identifying and Investigating Cases and Contacts . . . . .	7-2
Control Measures . . . . .	7-2
Treatment and Prophylaxis . . . . .	7-2
Vaccination . . . . .	7-2
Isolation . . . . .	7-2
Table . . . . .	7-3
References . . . . .	7-5
<b>8. School and Day Care Settings</b>	
Background . . . . .	8-1
Child Care Settings . . . . .	8-1
School Settings . . . . .	8-1
Definition of an Outbreak in a Day Care Center or School . . . . .	8-2
Contact Definitions . . . . .	8-2
Close Contacts of Child Care/School Children . . . . .	8-2
Identifying and Investigating Cases and Contacts . . . . .	8-3
Evaluate Suspected Cases . . . . .	8-3
Identify High Risk Contacts and Close Contacts . . . . .	8-3
Initiate Active Surveillance . . . . .	8-3
Maintain Pertussis Surveillance Log . . . . .	8-4
Increase Awareness of Outbreak, Notify Parents/Guardians, and Alert Providers . . . . .	8-4
Control Measures . . . . .	8-5
Treatment and Chemoprophylaxis . . . . .	8-5
Vaccination . . . . .	8-7
Exclusion . . . . .	8-7
Tables . . . . .	8-8
Figures . . . . .	8-13
References . . . . .	8-14

---

<b>9. Hospitals, Institutions, and Clinics</b>	
Background	9-1
Hospitals	9-1
Institutions	9-1
Clinic and Outpatient Settings	9-1
Implementation of Control Measures	9-1
Identifying and Investigating Cases and Contacts	9-2
Identifying Close Contacts and High-Risk Groups	9-2
Identifying Cases	9-3
Control Measures	9-3
Treatment and Chemoprophylaxis	9-3
Vaccination	9-4
Exclusion	9-4
References	9-5
<b>10. Community Settings</b>	
Background	10-1
Religious or Philosophical Exemptions to Vaccinations	10-1
Definition of Outbreak in a Community	10-2
Identifying and Investigating Cases and Controls	10-2
Surveillance	10-2
Pertussis Alerts	10-2
Public Education	10-3
Control Measures	10-3
Treatment and Chemoprophylaxis	10-3
Vaccination	10-3
Isolation	10-4
Tables	10-5
Appendices	
10-1: Sample letter to the medical community in alerting them to a pertussis Outbreak in the community	10-8
10-2: Sample letter to a health care provider	10-9
10-3: Sample letter to parent/guardian for pertussis in a school	10-10
10-4: Sample News Release	10-11
10-5: Sample Fact Sheet	10-12
References	10-14
<b>11. Definitions</b>	
CDC/CSTE Case Definition	11-1
Clinical Case Definition	11-1
Laboratory Criteria for Diagnosis	11-1

---

---

Case Classification .....	11-1
Other Definitions .....	11-2
Index Case .....	11-2
Primary Case in a setting (closed group) .....	11-2
Co-primary Case .....	11-2
Secondary Case .....	11-2
Suspected Case .....	11-2
Close Contact .....	11-3
High-Risk Cases or Contacts .....	11-3
Incubation Period .....	11-4
Infectious Period .....	11-4
Outbreak Case Definition .....	11-4
Outbreak in Households .....	11-4
Outbreak in Institutions .....	11-4
Outbreak in Communities .....	11-4
Droplet Precautions .....	11-5
Pertussis Symptoms and Complications .....	11-5
References .....	11-6
