National Consumer Education Campaign to Promote Food Thermometer Use

"Thermy™" :30

YXAB3346

MOM: Hey, hon, dinner's almost ready.
THERMY: Hey, let me out of here!

What about using me, Thermy?

You need a food thermometer to be safe.

BOY: Yeah, what about Thermy?
MOM: Oh, honey, I know by the color when it's done.

THERMY: Colors can be wrong. People could get sick.

Hamburgers that look done sometimes aren't cooked enough.

BOY: We learned it at school.

MOM: All right.

THERMY: Remember, it's safe to bite when the temperature is right.
