# PREFACE

This report was produced by the Tourism Research Branch, Research and Economic Analysis Division of the Hawai'i State Department of Business, Economic Development & Tourism (DBEDT). The department is headed by Mr. Theodore E. Liu and the Division Administrator is Dr. Pearl Imada Iboshi. The staff members responsible for this report included Branch Chief Daniel Nahoopii, Ms. Minh-Chau T. Chun, and Ms. Sarah Takemoto. The report was prepared by Hospitality Advisors LLC with assistance from the University of Hawai'i School of Travel Industry Management.

Ms. Marsha Wienert, State Tourism Liaison, reviewed this report and provided valuable comments.

Mr. David Hiromoto designed the cover of this report.

Hawai'i Visitors and Convention Bureau (HVCB) first published the Visitor Plant Inventory in 1964 and every year thereafter, except 1995 and 1998. HVCB did not conduct a survey in 1995 and did not publish hard copies of the report in 1998.

Act 156, Session Laws of Hawai'i 1998, transferred the tourism research program from HVCB to DBEDT. DBEDT has been responsible for collecting and disseminating data on Hawai'i's visitor industry since July 1, 1998.

As part of the tourism research program, in 2007, DBEDT conducted its ninth survey on statewide visitor units. This report provides the results of the visitor accommodation survey. Specifically, data on the number of visitor units, island distribution, type of property and class of rooms are presented. For the purpose of consistency, this report continues to use HVCB's definitions and format of reporting.

As in previous reports, island and district names were written in proper Hawaiian language orthography. However, individual property names were not written in the same manner unless the words were easily identifiable (i.e., island names).

This report is also posted on the DBEDT website: <http://www.hawaii.gov/dbedt/info/visitor-stats/visitor-plant/>

# OVERVIEW

Total statewide visitor plant inventory in 2007 increased by 1.3 percent from the previous year to 73,220 visitor units (Table 1). Nearly all counties reported increases in visitor supply due, in part, to the discovery via Internet research of visitor units which were not included in previous surveys. O'ahu (City and County of Honolulu) reported a slight decrease of .1 percent to 33,588, due largely to Waikiki units undergoing renovation being removed from the visitor supply. The County of Kaua'i had the largest percentage increase of 5.2 percent to 8,692 units, with individual vacation units (IVU) increasing by 820 units. County of Maui visitor supply increased by 1.6 percent to 19,879, driven, in part, by new timeshare units coming on line in Kā'anapali. The County of Hawai'i (Big Island) reported an increase of 2.1 percent to 11,061 visitor units.

Just under half (45.9 percent) of the statewide visitor units in 2007 were located on O'ahu. The island of Maui continued to have the second largest share of visitor units, followed by Big Island and Kaua'i (Figure 1). Hotels continued to comprise the majority (58.2 percent) of visitor units statewide. Condominium hotel properties accounted for the second largest share of visitor units at 20.3 percent. Timeshare units accounted for 10.9 percent of the total visitor units followed by individual vacation unit properties with 7.9 percent. Bed & breakfasts, apartment hotels, and hostels each comprised less than one percent of the total visitor units (Figure 2).

The total inventory of hotel rooms statewide was basically static as renovated properties reentered the market and other properties initiated renovation programs during the survey period. The number of visitor units in condominium hotel (condo hotel) properties decreased by 14.8 percent, partially due to reclassification of units to IVUs for the 2007 survey. Timeshare units increased by 21.3 percent statewide, with all markets experiencing growth (Table 3).

67,597 units were reported by class (Figures 9 through 12 and Tables 6 and 7). Visitor units categorized as "Deluxe" (\$251 to \$500 per night) comprised the largest percentage of the total units statewide in 2007. The second largest group of units were those classified as "Standard" (\$101 to \$250 per night), followed by those in the "Luxury" (over \$500 per night) and "Budget" (\$100 or less per night) categories.

By island, 69.6 percent of O'ahu visitor units were classified as "Standard" or "Deluxe." Similarly, the majority of the visitor units on Kaua'i, Hawai'i and Maui were also in the "Standard" or "Deluxe" price range. In contrast, most of the visitor units on Lāna'i (95.5 percent) were in the higher-priced "Deluxe" and "Luxury" classes.

43.1 percent of the condo hotel properties categorized their units as "Standard." Among hotels, 33.2 percent of the units were classified as "Deluxe" and 26.3 percent were "Standard" units. Hotels and timeshare had the largest percentage share of "Luxury" units with 34 percent and 30.4 percent, respectively.

64 properties that were included in the 2006 report were not in operation for 2007 (Table 13).

Several changes and revisions were instituted this year that makes this report distinctive and more effective. However, to the best of our ability, the data remain comparable to reports from previous years. Details of these changes are available upon request from DBEDT. Changes include:

- Responses from selected hotels, condominium hotels, and timeshare properties were cross verified against Smith Travel Research property database and data from the American Resort Development Association.
- Classification of property type (Tables 2 & 4) for properties with more than one unit type was determined by the majority of units on that property. Historically property type was self-selected by the respondent but research has shown that the response was not always consistent with DBEDT's type definitions (page 5). Property and unit type corrections were made for all properties in 2007, but only for significant properties in 2006.
- 2007 Current Visitor Plant Inventory details the multiple unit types available on each property.

- Correction of unit counts. In researching the 2007 report, additional information was discovered that warranted changes to previous visitor accommodations inventory data. Unit counts were corrected for 2003, 2004, 2005, and 2006 data.
- List of Non-Respondents and a Table of Hotel and Condo/Hotel Conversions were not included this year. Instead a Table of Closed Properties lists the known properties that were removed (permanently or temporarily) from the final 2007 inventory.

## METHODS AND PROCEDURES

The 2007 Visitor Plant Inventory presents the results of DBEDT's enumeration of visitor accommodations in Hawai'i. Existing visitor accommodations as of May 1, 2007 as well as planned developments and additions to existing developments are catalogued.

Visitor Plant Inventory Survey: Information about transient accommodations was gathered mainly from a survey of existing visitor accommodation properties and management companies. Survey forms were sent to general managers, property managers and other individuals who could provide information about the property. The survey provided information about available units, planned additions and other information presented in this report.

Survey forms were distributed to all properties that participated in the prior year's survey and additional properties identified through the association survey (below) and internet research. Over 2,300 properties were identified as part of a detailed web search using pertinent key word phrases, such as "Vacation Units in Hawaii," "Hawaii B&B," "Hawaii Hostels," etc. Information for hotel and condominium hotel properties that participate in Smith Travel Research's monthly survey was also cross-verified against Smith Travel Research's property database. Survey forms were distributed via mail, email, and fax.

If no response was received, follow-up telephone calls, emails, and/or faxes were made to the property to remind them to complete and return the form. Subsequently, if no response was received after the follow-ups, an Internet search was conducted to determine if the property was still in business and telephone calls were made to verify unit counts and types. If no response was received or no data was found on the Internet, but information was available from prior years (2004, 2005, and 2006), that information was included and so noted. If no response was received from a property and information was available from the association survey, such information was included and so noted. If no survey form was returned and no information was available from previous years or other sources, the property was listed as a non-respondent.

Association Survey: This survey's purpose was to gather contact information from associations whose members were transient visitor accommodations in the State of Hawai'i. Letters were sent to these associations to request members' contact information, from which the mailing list was updated and new accommodations were contacted via mailing as described above.

Timeshare Properties: Information on timeshare properties were gathered through the survey questionnaire, which asked for information on the number of units *registered* as timeshare and units *operated* as timeshare. The number of units registered included those that were available for sale as well as those currently in use by visitors. The number of units operated represented the units that have been sold and were in use. The available timeshare units listed in Tables 3 and 5 and their related charts were the total number of operated units. The number of timeshare properties listed in Tables 2 and 4 were the properties with the majority of units classified as timeshare. However, the number of available units listed with the timeshare category included those units that were cross-listed under the other property types. The 2007 Current Visitor Plant Inventory details the unit types available at each property.

Property Changes: A section requesting information on property changes between April 2006 and May 2007 was included on the Visitor Plant Survey form in 2007. This section provided details on increases or decreases in inventory by the specific property and details on property inventory that was converted to timeshare or condo units.

Planned New Developments: Information about planned new developments was gathered with assistance from the four county Planning Offices. The information is reprinted here and includes projects and developments that have achieved some level of jurisdictional approval. That is to say, these developments are a step beyond the preliminary stages of development and have some "official" standing as planned developments.

# SUMMARY BY ISLAND AND TYPE

## Definitions

An individual property may include more than one type of unit. If a property has more than one unit type, the majority unit type was used to determine the property type for the purposes of Table 2 and Table 4. Units were categorized as follows:

Apartment / Hotel (Apt/Hotel)	Inexpensive units (usually in a low-rise building) equipped with kitchens and geared for long-term rentals. Front desk operations and maid service are usually limited and sometimes non-existent.
Bed & Breakfast (B&B)	A lodging facility with a limited number of guest units, which include breakfast in the daily rental rate. Typical bed and breakfast facilities are either small, quaint inns, or family homes.
Condominium Hotel (Condo Hotel)	A multi-unit property legally classified as a condominium with each unit individually deeded. Generally, units are collectively placed into transient hotel rental operations, offering most of the services of a hotel, such as daily maid service and front desk operations. Condominium units are usually larger than hotel units and include studios and one- to three-bedroom units, with kitchen and laundry facilities, geared for transient use of 30 days or less.
Hotel	A multi-unit lodging facility which provides room accommodations on a daily basis and generally, but not always, restaurant operations and other “away from home” services such as daily maid service and front desk operations. Includes condominiums if a single owner owns all units and the property is operated as defined here.
Hostels	An inexpensive, limited service facility, often with dormitory-style accommodations, appealing primarily to younger travelers.
Individual Vacation Unit (IVU)	An individual condominium unit (not in a hotel rental operation), house, cabin, villa, or cottage with very limited service, often with only basic cleaning supplies provided.
Timeshare	<p>A timeshare is a kind of property ownership that allows guests to acquire a percentage of interest in a hotel unit, condominium/hotel, bed and breakfast, individual vacation home etc. for a specific period of time on a recurring basis. This share could be one week per year (i.e. 1/52 share) or more; some resorts offering one week every other year (1/104 share) or four weeks per year (1/13 share).</p> <p>The survey questionnaire asks for information on the number of units registered as timeshare and units operated as timeshare. The number of units registered includes those that are available for sale as well as those currently in use by visitors. The number of units operated represents the units that have been sold and are used.</p>
Other	Includes residential condominium units, timeshare units, motels, lodges, inns, or any other form of property not included in the above definitions.

**FIGURE 1: INVENTORY BY ISLAND**

Statewide, there were 1,777 properties with 73,220 units for visitor use. O'ahu's 223 properties comprised only 12.5 percent of the State's total properties but nearly half (45.9 percent) of the State's total visitor units. The island of Maui with 387 properties accounted for 26.2 percent of the State's total visitor units. The island of Hawai'i had 290 properties, representing 15.1 percent of the State's total units. Kaua'i, with 843 properties, has nearly half of the number of properties in the state (47.4 percent), but only 11.9 percent of total units. Moloka'i had 28 properties with 309 units. Lāna'i had 6 properties with 354 units.

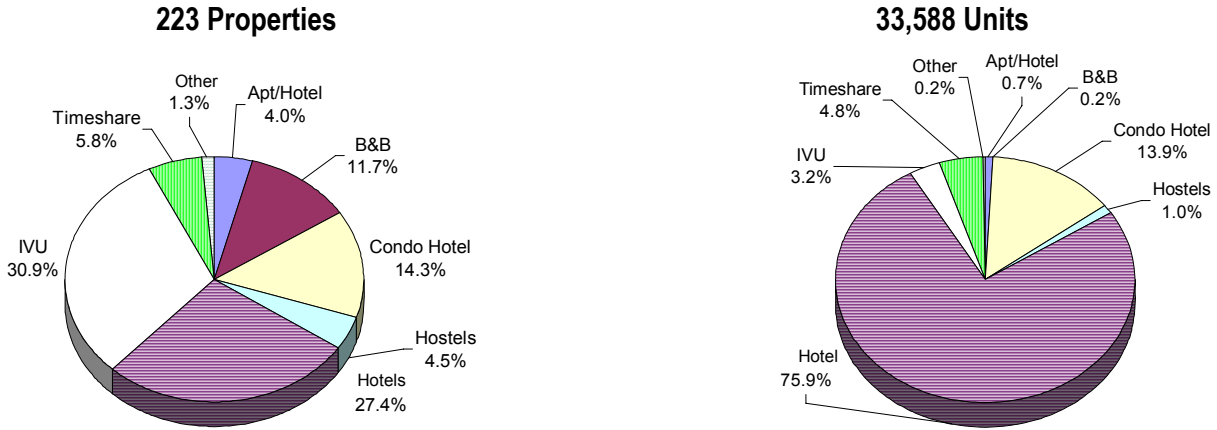

**FIGURE 2: INVENTORY BY TYPE - STATE**

Hotels comprised only 7.4 percent of the State's properties, but accounted for 58.2 percent of the State's total visitor units. Condominium hotels represented the second largest percentage in terms of number of units (20.3 percent). Timeshare units accounted for 10.9 percent of the State's total visitor units. Individual vacation units made up the largest share (64.8 percent) of the State's total properties but only 7.9 percent of its total units since many IVU properties include only one visitor unit. 9.9 percent of the State's total properties, but just .9 percent of the total units were bed & breakfasts.

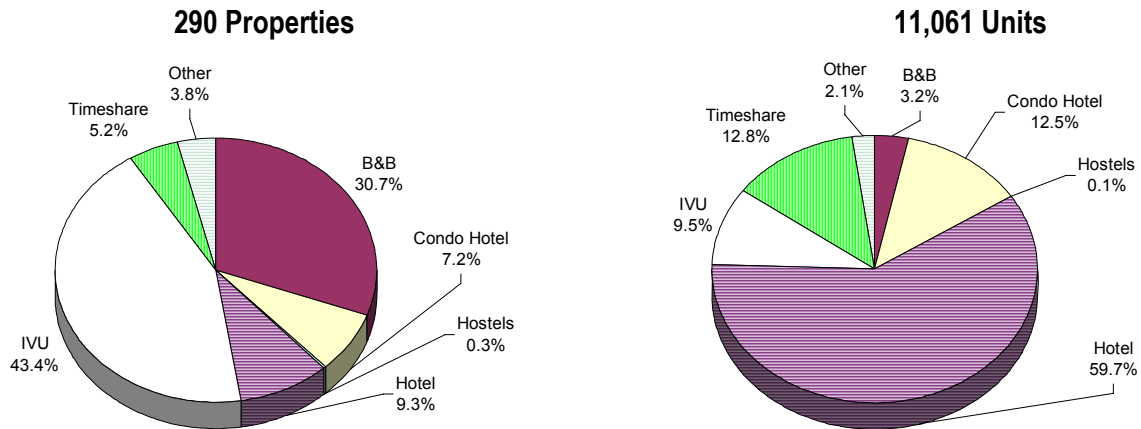

**FIGURE 3: INVENTORY BY TYPE – O‘AHU**

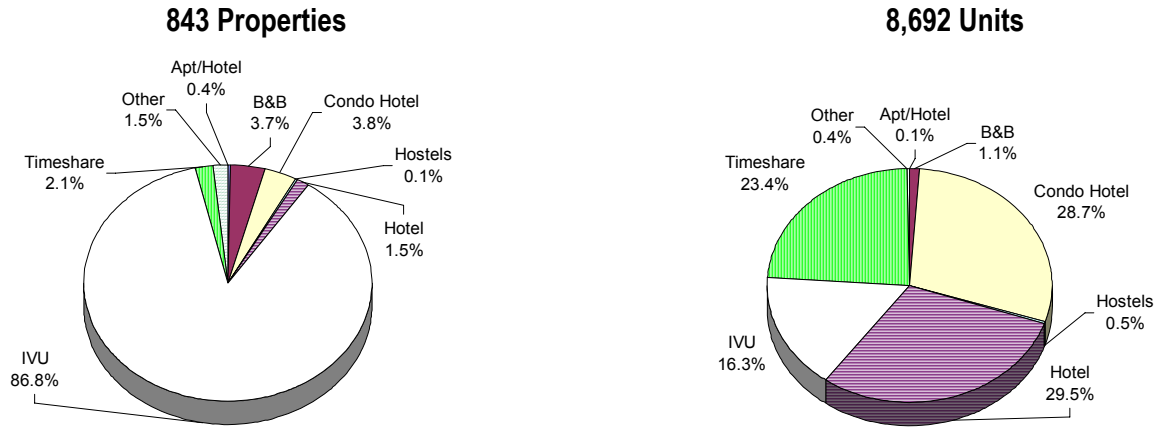

O‘ahu’s 61 hotel properties accounted for 75.9 percent (25,498 units) of the island’s total visitor units. The island’s 32 condominium hotels included 4,683 units. O‘ahu’s 69 IVUs accounted for the largest number of properties, but only 3.2 percent of the island’s total visitor units. Timeshare units represent 4.8 percent (1,627 units) of the island’s total visitor unit inventory. Hostels represented 10 properties and 343 units. There were 26 bed & breakfast properties with a total of 53 units.

**FIGURE 4: INVENTORY BY TYPE – HAWAI‘I (BIG ISLAND)**

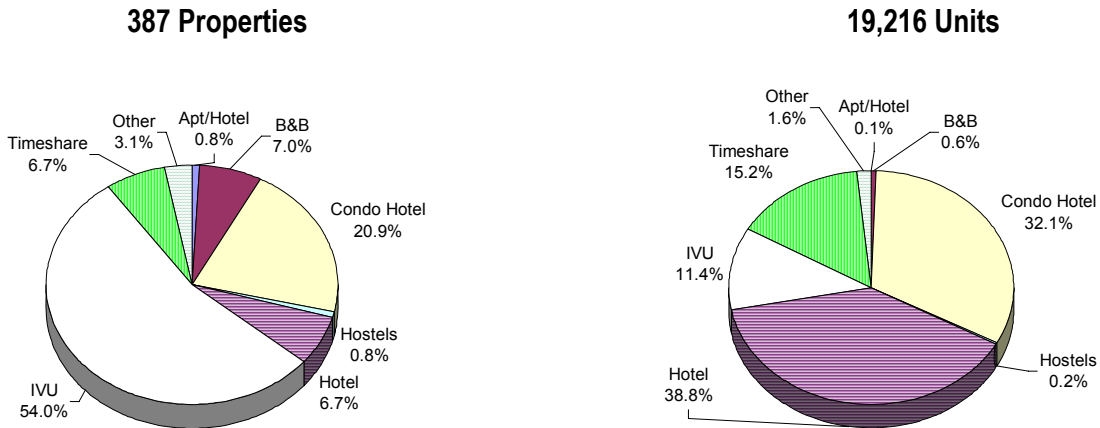

Hotels comprised only 9.3 percent or 27 properties on the Big Island but accounted for the majority (6,601 units) of the island’s visitor unit inventory. Timeshare units represent 12.8 percent (1,412 units) of the island’s total visitor unit inventory. A total of 21 condominium hotels on the Big Island yielded 1,387 units. The island’s 126 individual vacation units represented 43.4 percent of the total properties and ranked fourth in terms of units (1,052 units). There are 89 bed & breakfasts on the Big Island with 356 units. The smallest category was hostels with one property and 16 units.

**FIGURE 5: INVENTORY BY TYPE – KAUA‘I**

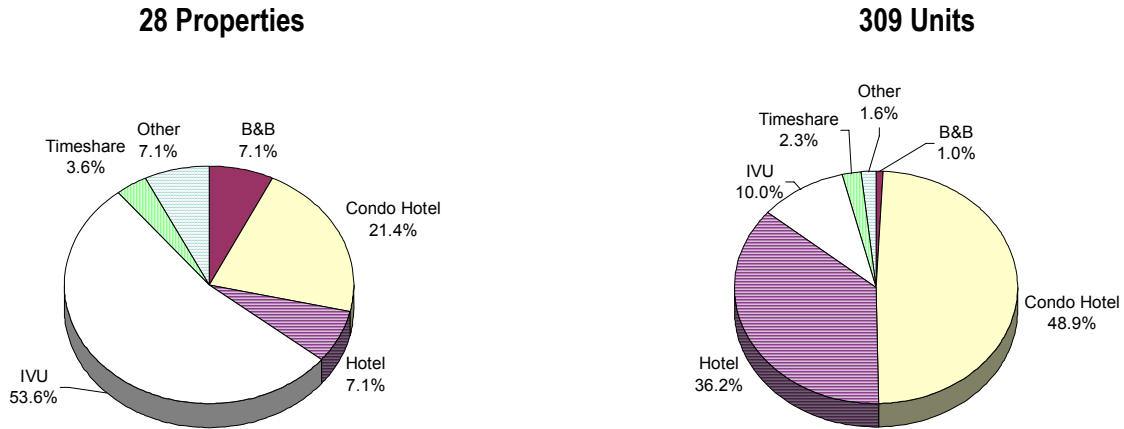

Individual vacation units accounted for the largest share of Kaua'i's total number of properties (86.8 percent) and ranked fourth in terms of inventory (1,417 units). Kaua'i's 13 hotel properties comprised the 2,567 units or 29.5 percent of total units. Timeshare units represent 23.4 percent (2,035 units) of the island's total visitor unit inventory. Condominium hotels with 32 properties comprised 28.7 percent of the island's inventory. There were 31 bed & breakfast properties with 98 units.

**FIGURE 6: INVENTORY BY TYPE – MAUI**

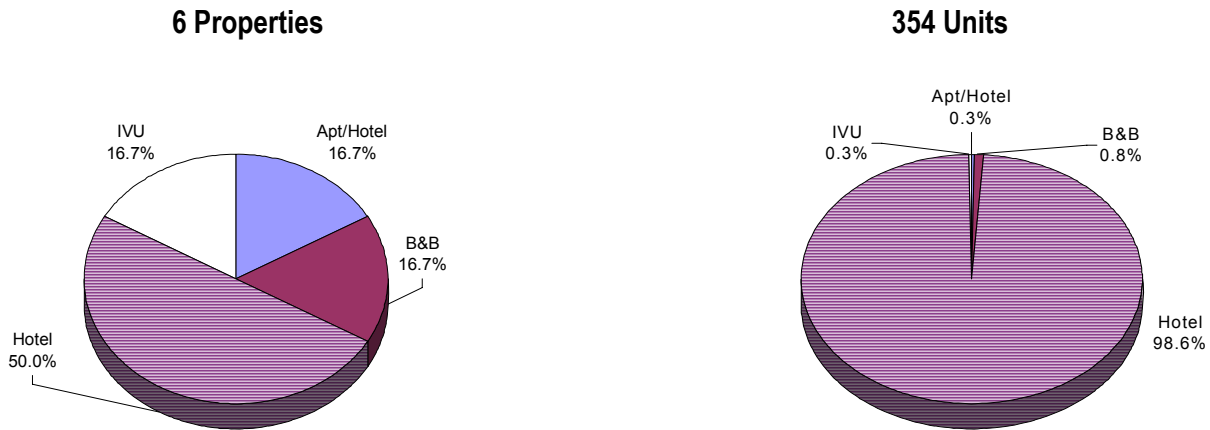

Maui's 209 individual vacation unit properties comprised the largest number of properties and ranked fourth in terms of total units (11.4 percent). The island's 26 hotel properties yielded the most units at 7,458 or 38.8 percent of the total. Condominium hotels (81 properties) accounted for 32.1 percent of Maui's total units with 6,170 units. 26 timeshare properties represented 15.2 percent (2,916 units) of the island's total visitor unit inventory. There were 27 bed & breakfast properties which made up less than one percent of the total units (114 units).

**FIGURE 7: INVENTORY BY TYPE – MOLOKA‘I**

Moloka‘i’s 6 condominium hotels accounted for 48.9 percent of the island’s total units. Hotels accounted for the island’s second largest number of units (112 units) or 36.2 percent. Timeshare units represented 2.3 percent (7 units) of the islands total visitor unit inventory.

**FIGURE 8: INVENTORY BY TYPE – LĀNA‘I**

Three out of the six properties on Lāna‘i were hotels which comprised nearly all (349 units) of the total units on the island. All other property types totaled only 5 units. Lāna‘i is the only island where no timeshare units were reported.

## CLASS OF UNITS

The Visitor Plant Inventory survey also included questions about the class of units at each property. The subsequent tables show the percent of each class of units available by island. Units were classified as follows:

<u>CLASS</u>	<u>PRICE RANGE (RACK RATE)</u>
Budget	Up to \$100 per night
Standard	\$101 to \$250 per night
Deluxe	\$251 to \$500 per night
Luxury	Over \$500 per night

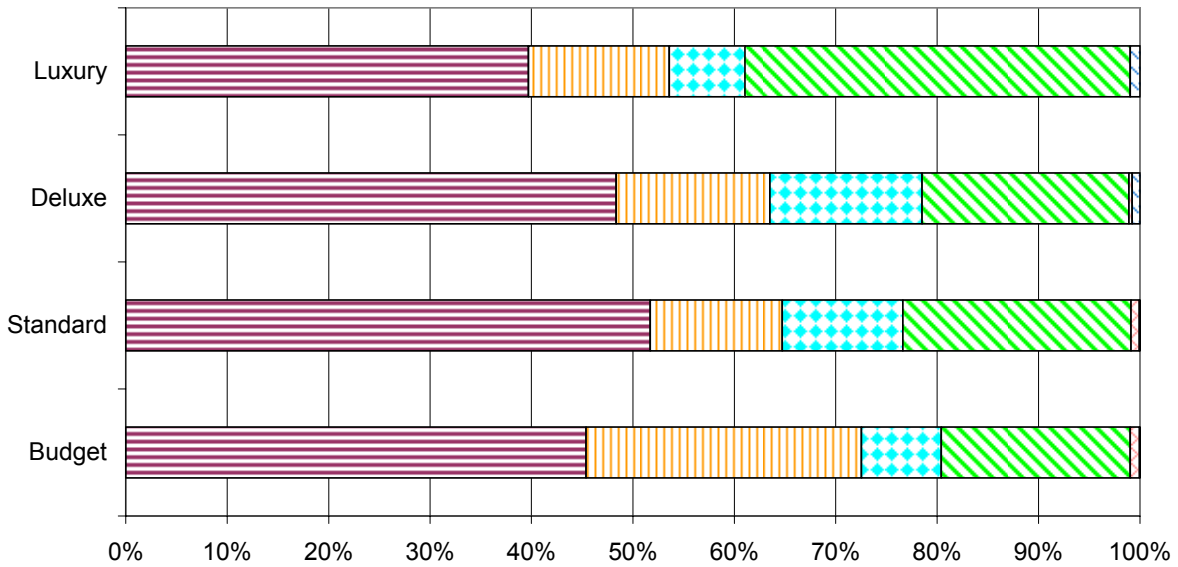

The charts and tables to follow were based on 67,597 units for which information on the class of units were reported.
