## U.S. Census Bureau

## American FactFinder

Hawaii

Selected Social Characteristics: 2004
Data Set: 2004 American Community Survey

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey Methodology.

An \* indicates that the estimate is significantly different (at a 90% confidence level) than the estimate from the most current year. A 'c' indicates the estimates for that year and the current year are both controlled; a statistical test is not appropriate.

Source: U.S. Census Bureau, 2004 American Community Survey

Estimates from two years are "significantly different" if their difference is large enough to infer that there was a less than 10 percent chance that the difference came entirely from random variation.

## Notes:

- · Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic
- · The Census Bureau introduced a new skip pattern for the disability questions in the 2003 ACS questionnaire. This change mainly affected two individual items -- go-outside-home disability and employment disability -- and the recode for disability status, which includes the two items. Accordingly, comparisons of data from 2003 or later with data from prior years are not recommended for the relevant questions. For more information, see the ACS Subject Definitions for Disability.
- Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

## Explanation of Symbols:

- 1. An '-' entry in an Estimate column indicates that no sample observations were available to compute an estimate.

  2. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
- 3. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
- 4. An 'N' entry in an Estimate column indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
