RE: CGMP's for herbal supplements

Dear Agents,

I am writing to urge you to create a small business exemption from lab testing, under the CGMP's for herbal supplements. The small company I depend on for these keeps rigorous records, lot samples of both raw and finished herbs, and botanical specimens of the herbs they grow, and I feel this is completely adequate to guarantee the integrity of their products.

Thank you very much for your consideration.

Becky Reardon
