### Census 2000 Public Use Microdata Area (PUMA) Maps

---

#### Description:

These page-sized Super-PUMA based maps display the boundaries and codes of the component 5-percent sample Public Use Microdata Areas (PUMAs) within the Super-PUMA. Additionally, the maps show county boundaries and names along with census tract boundaries within the boundary of the subject Super-PUMA. Some gray shaded surrounding fringe area detail is included for orientation purposes. This fringe area includes international, state and county boundaries and names, as well as the neighboring Super-PUMA boundaries and codes. No census tract boundary information is shown in the fringe area of the map. With one Super\_PUMA per page, most states include multiple pages. The first map in each set is the state-based Super-PUMA map which is included as a reference to the universe of PUMAs in each state.

#### Naming convention:

The naming convention for these files is 'XX\_puma5.pdf' where XX represents the respective state postal abbreviation (i.e. Maryland = md\_puma5.pdf).
