### SUPPLEMENTARY INFORMATION:

#### Regulatory History

The Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990, as reauthorized and amended by the National Invasive Species Act of 1996, authorizes the Coast Guard to develop guidelines and regulations to prevent the introduction of nonindigenous species (NIS) via ballast water discharges. The Coast Guard promulgated regulations in the **Federal Register** on June 14, 2004, entitled, "Penalties for Non-submission of Ballast Water Management Reports" (68 FR 32864) and on July 28, 2004, entitled "Mandatory Ballast Water Management for U.S. Waters" (69 FR 44952). In doing so, the Great Lakes Ballast Water Management Program that became effective on May 10, 1993 (58 FR 18330), has remained unchanged, with the exception that all vessels equipped with ballast water tanks that enter and operate between ports in the Great Lakes must now submit their ballast water reporting forms to the National Ballast Information Clearinghouse as of August 13, 2004 (69 FR 32864).

On July 14, 2004, the Coast Guard received a petition for rulemaking requesting that we take specific regulatory action to prevent NIS introductions via NOBOB vessels. In response, on January 7, 2005, the Coast Guard published a notice of public meeting; request for comments, entitled, "Ballast Water Management for Vessels Entering the Great Lakes that Declare No Ballast Onboard" (70 FR 1448) asking the public to assist us in developing ballast water management practices for NOBOBs that are effective and practicable. Additionally on May 9, 2005, we held a public meeting where we further engaged the public on this issue. There were 35 people in attendance including representatives from: Congressional staff, federal
