

Crop Revenue Coverage (CRC)
Optional Endorsement
WINTER WHEAT COVERAGE ENDORSEMENT
(This is a Continuous Endorsement)

- (a) In return for payment of the additional premium designated in the actuarial documents, this endorsement is attached to and made a part of your CRC Wheat Crop Provisions subject to the terms and conditions described herein.
- (b) This endorsement is available only in counties for which the Special Provisions designate both a fall final planting date and a spring final planting date.
- (c) This endorsement modifies the provisions of sections 7 and 11 of the CRC Wheat Crop Provisions.
 - (1) You must have a CRC wheat policy in force.
 - (2) You may select either Option A or Option B. Failure to select either Option A or Option B means that you have rejected both Options and this endorsement would be void.
 - (3) Insurance Period. Coverage under this endorsement begins on the later of the date we accept your application for coverage or on the fall final planting date designated in the Special Provisions. Coverage ends on the spring final planting date designated in the Special Provisions.
 - (4) The provisions under section 15 of the CRC Basic Provisions are amended to require that all notices of damage must be provided to us by the spring final planting date designated in the Special Provisions.

OPTION A
(30 PERCENT COVERAGE AND ACREAGE RELEASE)

Whenever any winter wheat is damaged during the insurance period (see section (c)(3) above), and at least 20 acres or 20 percent of the acreage in the unit, whichever is less, does not have an adequate stand to produce at least 90 percent of the Minimum Guarantee for the acreage (to calculate the actual percentage, multiply the appraised production determined in accordance with section 11(d)(1) of the CRC Wheat Crop Provisions times the Base Price and then divide that quantity by the Minimum Guarantee), you may, at your option, take one of the following actions:

- (a) Destroy the remaining crop on such acreage. By doing so, you agree to accept an amount of Calculated Revenue equal to 70 percent of the Final Guarantee for the damaged acreage, or an appraisal determined in accordance with section 11(d)(1) of the CRC Wheat Crop Provisions if such an appraisal results in a greater amount of Calculated Revenue. This amount will be considered Calculated Revenue in determining any final indemnity on the unit and will be used to settle your claim as described in the provisions under section 11 (Settlement of Claim) of the CRC Wheat Crop Provisions. You may use such acreage for any purpose, including planting and separately insuring any other crop. If you elect to utilize such acreage for the production of spring wheat, you must:
 - (1) Plant the spring wheat in a manner that results in a clear and discernible break in the planting pattern at the boundary between it and any remaining winter wheat; and
 - (2) Store or market the production from such acreage in such a manner that permits us to verify the amount of spring wheat production separately from any winter wheat production.In the event you are unable to provide records of production that are acceptable to us, the spring wheat acreage will be considered to be a part of the original winter wheat unit. If you elected to insure the spring wheat acreage as a separate optional unit, any premium amount for such acreage will be considered earned and payable to us.
- (b) Continue to care for the damaged crop. By doing so, coverage will continue under the terms of the CRC Basic Provisions, CRC Wheat Crop Provisions, and this Option.
- (c) Replant the acreage to an appropriate variety of wheat, if it is practical, and receive a replanting payment in accordance with the terms of section 9 (Replanting Payments) of the CRC Wheat Crop Provisions. By doing so, coverage will continue under the terms of the CRC Basic Provisions, the CRC Wheat Crop Provisions, and this Option, and the Final Guarantee for winter wheat will remain in effect.

**OPTION B
(WITH FULL WINTER DAMAGE COVERAGE)**

Whenever any winter wheat is damaged during the insurance period (see section (c)(3) above), and at least 20 acres or 20 percent of the acreage in the unit, whichever is less does not have an adequate stand to produce at least 90 percent of the Minimum Guarantee for the acreage (to calculate the actual percentage, multiply the appraised production determined in accordance with section 11(d)(1) of the CRC Wheat Crop Provisions times the Base Price and then divide that quantity by the Minimum Guarantee), you may, at your option, take one of the following actions:

- (a) Continue to care for the damaged crop. By doing so, coverage will continue under the terms of the CRC Basic Provisions, the CRC Wheat Crop Provisions, and this Option.
- (b) Replant the acreage to an appropriate variety of wheat, if it is practical, and receive a replanting payment in accordance with the terms of section 9 (Replanting Payments) of the CRC Wheat Crop Provisions. By doing so, coverage will continue under the terms of the CRC Basic Provisions, the CRC Wheat Crop Provisions, and this Option, and the Final Guarantee for winter wheat will remain in effect.
- (c) Accept our appraisal of the crop on the damaged acreage as Calculated Revenue to count against the Final Guarantee for the damaged acreage, destroy the remaining crop on such acreage, and be eligible for any indemnity due under the terms of the CRC Basic Provisions and the CRC Wheat Crop Provisions. The appraisal will be considered Calculated Revenue in determining any final indemnity on the unit and will be used to settle your claim as described in the provisions of section 11 (Settlement of Claim) of the CRC Wheat Crop Provisions. You may use such acreage for any purpose, including planting and separately insuring any other crop. If you elect to utilize such acreage for the production of spring wheat, you must:
 - (1) Plant the spring wheat in a manner that results in a clear and discernible break in the planting pattern at the boundary between it and any remaining winter wheat; and
 - (2) Store or market the production from such acreage in a manner which permits us to verify the amount of spring wheat production separately from any winter wheat production.

In the event you are unable to provide records of production that are acceptable to us, the spring wheat acreage will be considered to be a part of the original winter wheat unit. If you elected to insure the spring wheat acreage as a separate optional unit, any premium amount for such acreage will be considered earned and payable to us.
