“(B) The Chief Information Officer of the Navy certifies to the Secretary of the Navy and the Chief Information Officer of the Department of Defense that the results of the performance evaluation referred to in subparagraph (B) are acceptable.

“(4) For the purposes of this section, when the information infrastructure and systems of a user of a work station are transferred into Navy-Marine Corps Intranet infrastructure and systems under the Navy-Marine Corps Intranet contract consistent with the applicable service-level agreements specified in the Navy-Marine Corps Intranet contract, the work station shall be considered as having been provided for the Navy-Marine Corps Intranet.

If the total number of members of a reserve component serving on full-time reserve component duty is more or less than the highest or lowest number, respectively, set forth in the first column of the appropriate table in paragraph (1) or (2) of subsection (a), the Secretary concerned shall fix the corresponding strengths for the

grades shown in that table at the same proportion as is reflected in the nearest limit shown in the table.

“(c) **REALLOCATIONS TO LOWER GRADES.**—Whenever the number of officers serving in any grade for duty described in subsection (a) is less than the number authorized for that grade under this section, the difference between the two numbers may be applied to increase the number authorized under this section for any lower grade.

“(d) **SECRETARIAL WAIVER.**—(1) Upon determining that it is in the national interest to do so, the Secretary of Defense may increase for a particular fiscal year the number of reserve officers that may be on full-time reserve component duty for a reserve component in a grade referred to in a table in subsection (a) by a number that does not exceed the number equal to 5 percent of the maximum number specified for the grade in that table.

SEC. 598. SENSE OF CONGRESS REGARDING THE SELECTION OF OFFICERS FOR RECOMMENDATION FOR APPOINTMENT AS COMMANDER, UNITED STATES TRANSPORTATION COMMAND.

(a) *FINDINGS.—Congress makes the following findings:*

(1) *The Goldwater-Nichols Department of Defense Reorganization Act of 1986 (Public Law 99-433) envisioned that officers would be selected for recommendation to the President for appointment as the commander of a combatant command under chapter 6 of title 10, United States Code (as added by that Act), on the basis of being the best qualified officer for that position, rather than the best qualified officer of the armed force that had historically supplied officers to serve in that position.*

(2) *In order to provide for greater competition among the Armed Forces for selection of officers for assignment as the commanders of the combatant commands and assignment to certain other joint positions in the grade of general or admiral, Congress provided temporary relief from the limitation on the number of officers serving on active duty in the grade of general or admiral in section 405 of the National Defense Authorization Act for Fiscal Year 1995 and thereafter extended that relief until September 30, 2003, but has also required that the Secretary of Defense be furnished the name of at least one officer from each of the Armed Forces for consideration for appointment to each such position.*

(3) *Most of the positions of commanders of the combatant commands have been filled successively by officers of more than one of the Armed Forces since the enactment of the Goldwater-Nichols Department of Defense Reorganization Act of 1986.*

(4) *However, general officers of the Air Force with only limited experience in the transportation services have usually filled the position of commander of the United States Transportation Command.*

(5) *The United States Transportation Command could benefit from the appointment of future commanders selected from the Army, Navy and Marine Corps, in addition to the Air Force.*

(b) *SENSE OF CONGRESS.—It is the sense of Congress that the Secretary of Defense, when considering officers for recommendation to the President for appointment as commander of the United States Transportation Command, should not rely upon officers of one service which has traditionally provided officers to fill that position but should select for such recommendation the best qualified officer of the Army, Navy, Air Force, or Marine Corps.*

“(a) ACCESSION BONUS AUTHORIZED.—Under regulations prescribed by the Secretary concerned, a person who executes a written agreement to accept a commission as an officer of the armed forces and serve on active duty in a designated critical officer skill for the period specified in the agreement may, upon acceptance of the agreement by the Secretary concerned, be paid an accession bonus in an amount determined by the Secretary concerned.

“(b) DESIGNATION OF CRITICAL OFFICER SKILLS.—(1) The Secretary concerned shall designate the critical officer skills for the purposes of this section. A skill may be designated as a critical officer skill for an armed force under this subsection if—

“(1) in order to meet requirements of the armed force, it is critical for the armed force to have a sufficient number of officers who are qualified in that skill; and

However, the amount required to be repaid by the individual may not exceed the amount of the accession bonus that was paid to the individual.

Subtitle F—Rocky Flats National Wildlife Refuge

SEC. 3171. SHORT TITLE.

This subtitle may be cited as the “Rocky Flats National Wildlife Refuge Act of 2001”.

SEC. 3172. FINDINGS AND PURPOSES.

(a) *FINDINGS.*—Congress finds the following:

(1) The Federal Government, through the Atomic Energy Commission, acquired the Rocky Flats site in 1951 and began operations there in 1952. The site remains a Department of Energy facility. Since 1992, the mission of the Rocky Flats site has changed from the production of nuclear weapons components to cleanup and closure in a manner that is safe, environmentally and socially responsible, physically secure, and cost-effective.

(2) The majority of the Rocky Flats site has generally remained undisturbed since its acquisition by the Federal Government.

(3) *The State of Colorado is experiencing increasing growth and development, especially in the metropolitan Denver Front Range area in the vicinity of the Rocky Flats site. That growth and development reduces the amount of open space and thereby diminishes for many metropolitan Denver communities the vistas of the striking Front Range mountain backdrop.*

(4) *Some areas of the Rocky Flats site contain contamination and will require further response action. The national interest requires that the ongoing cleanup and closure of the entire site be completed safely, effectively, and without unnecessary delay and that the site thereafter be retained by the United States and managed so as to preserve the value of the site for open space and wildlife habitat.*

(5) *The Rocky Flats site provides habitat for many wildlife species, including a number of threatened and endangered species, and is marked by the presence of rare xeric tallgrass prairie plant communities. Establishing the site as a unit of the National Wildlife Refuge System will promote the preservation and enhancement of those resources for present and future generations.*

(b) *PURPOSES.—The purposes of this subtitle are—*

(1) *to provide for the establishment of the Rocky Flats site as a national wildlife refuge following cleanup and closure of the site;*

(2) *to create a process for public input on the management of the refuge referred to in paragraph (1) before transfer of administrative jurisdiction to the Secretary of the Interior; and*

(3) *to ensure that the Rocky Flats site is thoroughly and completely cleaned up.*

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1438), to authorize appropriations for fiscal year 2002 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment struck all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment that is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clerical changes.

SUMMARY STATEMENT OF CONFERENCE ACTION

The conferees recommend authorization of appropriations for fiscal year 2002 for the Department of Defense for procurement; research and development; test and evaluation; operation and maintenance; working capital funds; military construction and family housing; and for weapons and environmental restoration programs of the Department of Energy, that have a budget authority implication of \$343.3 billion for the national defense function.

SUMMARY TABLE OF AUTHORIZATIONS

The defense authorization act provides authorizations for appropriations but does not generally provide budget authority. Budget authority is provided in appropriations acts.

In order to relate the conference recommendations to the Budget Resolution, matters in addition to the dollar authorizations contained in this bill must be taken into account. A number of programs in the national defense function are authorized permanently or, in certain instances, authorized in other annual legislation.

The following table summarizes authorizations included in the bill for fiscal year 2002 and, in addition, summarizes the implications of the conference action for the budget authority totals for national defense (budget function 050).

CONGRESSIONAL DEFENSE COMMITTEES

The term “congressional defense committees” is often used in this statement of managers. It means the Defense Authorization and Appropriations Committees of the Senate and the House of Representatives.

COMMITTEE REPORTS

The Senate bill contained a provision (sec. 4) regarding the applicability of the report of the Committee on Armed Services of the Senate to accompany S. 1416 to this bill.

The House amendment contained no similar provision.

The Senate recedes. The conferees agree that the report of the Committee on Armed Services of the Senate to accompany S. 1416 (Senate Report 107–62) shall apply to this Act to the same extent, and in the same manner, as the report of the Committee on Armed Services of the House of Representatives to accompany H.R. 2586 (House Report 107–194).

DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

High altitude endurance unmanned aerial vehicle

The budget request included \$33.5 million for advanced procurement of additional Global Hawk high altitude endurance unmanned aerial vehicles (HAE-UAVs).

The Senate bill and the House amendment would authorize the budget request.

The House Intelligence Authorization for fiscal year 2002 (H.R. 2883) would not authorize any of the requested funds.

The conferees agree to authorize the budget request.

The conferees are aware that much has been evolving in the Global Hawk HAE-UAV program in recent months. At the time of the budget request, the plan for these funds was to procure HAE-UAVs in the less capable Block 5 configuration, which contributed to the House recommendation. The accelerated program that is now underway would make these funds available for advanced procurement of the Block 10 configuration, which will provide the electrical power, cooling, and interfaces for sensor packages, which should meet the evolving Global Hawk requirement. These changes have addressed some of the concerns expressed in the House report (H. Rept. 107-219).

Another concern shared by the conferees is the fact that the requirements for this system are evolving at the very time that the program is being accelerated. The conferees would expect requirements documentation with completed mission area annexes to be the basis for future program decisions. The conferees want to ensure that existing intelligence, surveillance, and reconnaissance (ISR) assets, such as the U-2, continue to be operated and upgraded as necessary until such time that any new systems, like the Global Hawk HAE-UAV and its sensors, are fully tested and integrated with the required ground architecture and satisfy the operational mission requirements.

Finally, the conferees expect, before these advanced procurement funds are released, that the milestone decision authority approve this production in an acquisition decision memorandum that approves a coordinated and integrated acquisition strategy, taking into account the requirement, platform and sensor integration, ground architecture plan, and test plan for this spiral of the program.

Missile Procurement, Air Force—Overview

The budget request for fiscal year 2002 included an authorization of \$3,233.5 million for Missile Procurement, Air Force in the Department of Defense.

The Senate bill would authorize \$3,286.1 million.

The House amendment would authorize \$3,226.3 million.

The conferees recommended an authorization of \$3,222.6 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Chemical Agents and Munitions Destruction, Defense—Overview

The budget request for fiscal year 2002 included an authorization of \$1,153.6 million for Chemical Agents & Munitions Destruction, Army in the Department of Defense.

The Senate bill would authorize \$1,153.6 million.

The House amendment would authorize \$1,078.6 million.

The conferees recommended an authorization of \$1,153.6 million for Chemical Agents & Munitions Destruction, Defense. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

ITEMS OF SPECIAL INTEREST

Acquisition programs at the National Reconnaissance Office

The Senate report (S. Rept. 107-62) raised several concerns about acquisition programs at the National Imagery and Mapping Agency (NIMA). The report expressed concern that the requirements trade-off process for the future imagery architecture (FIA) may not have provided sufficient attention to all aspects of an end-to-end capability, focusing too narrowly on the collection aspects of the problem.

The Senate report insisted that the requirements trade-off process consider the complete picture, not just the more narrow question of the collection instrument. The report further directed the Secretary of Defense and the Director of Central Intelligence to ensure that the acquisition policies of the Office of the Secretary of Defense, the Community Management Staff, and the National Reconnaissance Office (NRO) be changed to prevent recurrences of these problems at the NIMA. The report stated that these policies should prevent NRO satellite programs from entering acquisition until the Joint Requirements Oversight Council (JROC) and Mission Requirements Board (MRB) have approved a set of requirements for end-to-end system performance (i.e., ground and space segments together), and cost and schedule estimates to meet those requirements have been prepared by the NRO and its mission partners or other appropriate organizations.

The report accompanying the House amendment (H. Rept. 107-194) expressed no similar sentiment.

The conferees agree that the requirements trade-off process should consider the entire end-to-end system, not just the collection instruments. NRO satellite programs should include an assessment of the costs and impacts to the mission partners before being approved to enter acquisition. The JROC and MRB should also have an approved set of requirements for end-to-end system performance, i.e., ground, communications and space segments together. Complete cost and schedule estimates to meet these requirements should be presented by the NRO and its mission partners or other appropriate organizations and presented to the Director of Central Intelligence, the Secretary of Defense, and Congress.

However, the conferees do not believe that this should be an absolute prohibition placed on all NRO systems. For example, there are technology demonstration activities and other non-major systems procurement where spending resources on fielding an end-to-end capability is neither required nor appropriate.

The conferees believe that there has been progress in this area, but that the Secretary of Defense and the DCI should further ensure major new acquisition programs that support national-level requirements and the Department of Defense customers have completed the appropriate level of documentation in a formal requirements process, and the cost and schedule estimates to meet these end-to-end requirements have been prepared, before such programs enter into acquisition.

Acquisition programs at the National Security Agency

The Senate report (S. Rept. 107-62) raised several concerns about acquisition programs at the National Security Agency (NSA). The report noted that the Director of the NSA has made progress in transforming the NSA. The report, however, expressed concern that more progress needs to be made in the NSA processes if the NSA is to achieve the capabilities that the nation will require.

The report identified a number of specific actions that the NSA would have to complete before December 1, 2001. Otherwise, the report would direct that the NSA modernization effort be designated a major defense acquisition program and milestone decision authority reside with the Under Secretary of Defense (Acquisition, Technology & Logistics).

In light of the problems identified in the Senate report, the report would direct that the Office of the Secretary of Defense (OSD) and the Community Management Staff (CMS) conduct a "baseline" of the NSA that parallels the successful and productive effort performed at the National Imagery and Mapping Agency in fiscal year 2001. There were a number of specific actions identified in the Senate report to help improve the situation at the NSA, including the following:

- (1) The NSA must create a rational requirements process and produce a prioritized requirements baseline that is structured to support a spiral-development approach to major elements of the modernization program;
- (2) The NSA must produce a rationalized, integrated schedule and requirements allocation for all the major elements of its modernization effort;
- (3) The NSA must develop plans for turning over most or all of the systems integration job to a single industry team;
- (4) The NSA must create a detailed plan to subordinate the interim Trailblazer program under the Objective Trailblazer program upon contract award;
- (5) The NSA must produce a detailed audit of all the hundreds of ongoing development activities and programs within the Agency;
- (6) The NSA must produce a detailed plan and schedule to establish a rigorous "make-versus-buy" decision process for all the NSA acquisition activities; and
- (7) The NSA must produce a plan acceptable to the Department of Defense and the Director of Central Intelligence for enterprise-wide systems engineering.

The House report (H. Rept. 107-194) expressed no similar sentiments.

The conferees believe that the senior acquisition executive (SAE) and the NSA have made significant improvements in the acquisition process. For example, the SAE has initiated an orderly review process and has increased the percentage of competitive acquisitions.

However, much needed progress still remains to be achieved. The SAE is operating within a requirements and architecture vacuum, is not responsible for technology selection, has no control over correcting deficiencies in systems or software engineering disciplines, and appears to lack the authority to cancel or redirect

troubled programs. The chief financial manager (CFM) is understaffed and has struggled to gain internal support to implement a cost accounting system that would enable the NSA to conduct an accurate financial baselining of all programs.

To its credit, the NSA has acknowledged that its major modernization programs were proceeding in isolation, and over the past several months, there has been an attempt to address the integration problem within the Signals Intelligence Directorate. However, such revelations must be accompanied by concrete plans for improvement.

The conferees agree with the need for the OSD and the CMS to enforce the baselining activities identified in the Senate report. In addition to the specific tasks identified above, the baselining effort should oversee and verify effective implementation of the CFM's plans for cost centers that will comprise the fiscal year 2003 budget request. The conferees further encourage the NSA to seek the advice of independent, outside experts to assist in guiding its selection of technologies under this baselining effort.

The conferees agree that, unless the OSD, the CMS and the NSA complete the baselining by December 1, 2002, the Congress will direct that the NSA's modernization effort be designated a major defense acquisition program, with milestone decision authority likely residing with the Under Secretary of Defense (Acquisition, Technology, and Logistics) until initial operational capability is achieved.

Airborne signals intelligence recapitalization and modernization

The conferees remain interested in sustaining and improving airborne reconnaissance platforms, sensors and payloads, and the architecture under which they operate. These systems provide theater and operational commanders with the bulk of real-time tactical imagery and signals intelligence (SIGINT).

The current fleet of reconnaissance platforms, consisting of the RC-135, the EP-3, and the U-2, is aging. In addition to the platforms under development, including the Aerial Common Sensor and the Global Hawk High Altitude Endurance Unmanned Aerial Vehicle (HAE-UAV), the conferees are aware of Army, Navy and Air Force initiatives to consider the replacement of their older reconnaissance platforms.

The conferees are also aware of the current status of collection systems used by the reconnaissance platforms, and are particularly concerned with SIGINT systems. The recent cancellation of the low-band subsystem (LBSS) portion of the Joint SIGINT Avionics Family (JSAF) program has necessitated a complete review of the way ahead for this vital capability. Although the development of the JSAF high-band subsystem has been more successful, without LBSS the SIGINT requirement will not have been fully met. Prior to establishment of the JSAF program, the individual services had disparate upgrade programs. Although technology sharing occurred, it was sporadic and uncoordinated.

The Department of Defense's approach must be coordinated and based on architectural standards. The conferees are pleased with the National Security Agency efforts to develop the Joint Airborne SIGINT Architecture and the associated maritime SIGINT

architecture. The conferees believe the Assistant Secretary of Defense for Command, Control, Communications, and Intelligence should develop an architectural plan to provide standards-based policy direction to the services, whose platform program offices can develop systems and, to the maximum extent possible, share developments. The conferees expect the plan to include: (1) a robust spiral development approach; and (2) adequate emphasis on fielding and modernizing the appropriate ground support infrastructure.

The conferees believe the time is right to begin the formal discussion of the recapitalization and modernization of the airborne signals intelligence platforms, systems, and architecture. The conferees are specifically not endorsing any option for recapitalization. In fact, with several options under consideration, the conferees believe the Department of Defense should conduct an analysis of alternatives to determine the most cost-effective approach to this recapitalization and modernization. The conferees believe, in weighing the various options, consideration should be given to: (1) collaborative, network-centric operations that allow the various platforms to coordinate their various collection and analytical functions; (2) the ability to control unmanned aerial vehicles and their payloads; (3) a reach-back capability allowing analysts not on the platform to operate systems; (4) software re-programmable systems to allow for rapid threat updates; and (5) the ability to share in system upgrades.

Arleigh Burke-class destroyer procurement

The conferees agree with the Navy assessment that the destroyer industrial base is at risk unless three destroyers are built each year or unless the destroyer shipbuilders attain significant other work beyond their historic level of the past 10 years. Therefore, the conferees agree that the Secretary of the Navy should include procurement of three *Arleigh Burke*-class destroyers in the fiscal year 2003 budget request to attain an economic rate of production and consider options for maintaining and transitioning the industrial base, including second tier suppliers, to future destroyer production.

Attack submarine force structure study

Section 123 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 required the Secretary of Defense to provide a report on the Navy's fleet of attack submarines. That provision required that the Secretary submit this report with the fiscal year 2002 budget request.

Although the amended budget request was submitted to Congress on June 27, 2001, the Secretary has not yet submitted the required report. The conferees urge the Secretary of Defense to submit the required report, which is intended to provide the Congress with the information required to review the plans for recapitalizing the attack submarine force structure.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Authorization of Appropriations

Authorization of appropriations (secs. 101–107)

The Senate bill contained provisions (secs. 101–107) that would authorize the recommended fiscal year 2002 funding levels for procurement for the Army, Navy, Marine Corps, Air Force, Defense-Wide activities, Defense Inspector General, Chemical Demilitarization Program, and Defense Health Program.

The House amendment contained similar provisions.

The conference agreement includes these provisions.

Chemical agents and munitions destruction, Defense (sec. 106)

The Senate bill contained a provision (sec. 106) that would authorize the requested amount of \$1.2 billion for the Office of the Secretary of Defense for destruction of chemical agents, weapons and materiel.

The House amendment contained a similar provision (sec. 106) that would authorize \$1.1 billion for chemical demilitarization.

The House recedes with an amendment that would authorize the requested \$1.2 billion for the Department of Defense for Chemical Agents and Munitions Destruction, Defense.

The conferees are disappointed that the Department of Defense requested funds for chemical demilitarization for fiscal year 2002 in an Army account, contrary to the requirements of law. Section 1521(f) of title 50, United States Code, requires that funds for this program shall not be included in the budget accounts for any military department. The conferees expect the Department of Defense to comply with the law in future budget requests for the chemical demilitarization program.

The conferees note that the Department of Defense has initiated a high-level review of the entire chemical demilitarization program and all its component elements. The conferees direct the Department to provide the congressional defense committees with the results and recommendations of this review, including an updated assessment required by section 141(a) of the National Defense Authorization Act for Fiscal Year 2000, as directed in the House report accompanying H.R. 2586 (H. Rept. 107–194), by March 1, 2002.

Subtitle B—Army Programs

Repeal of limitations on bunker defeat munitions program (sec. 111)

The House amendment contained a provision (sec. 112) to repeal section 115 of the National Defense Authorization Act for Fiscal Year 1995, which limits the acquisition of bunker defeat munitions.

The Senate bill contained no similar provision.

The Senate recedes.

Extension of pilot program on sales of manufactured articles and services of certain Army industrial facilities without regard to availability from domestic sources (sec. 112)

The Senate bill contained a provision (sec. 141) that would extend the pilot program for sales of manufactured articles and services from up to three Army industrial facilities enacted by section 141 of the National Defense Authorization Act for Fiscal Year 1998 through fiscal year 2002.

The House amendment contained no similar provision.

The House recedes with an amendment that would extend the authority for the pilot program through fiscal year 2002 but would limit the program to one facility. The conferees direct that the facility that has demonstrated the most success with the pilot program to date be selected as the facility to continue the pilot program.

Limitations on acquisition of interim armored vehicles and deployment of interim brigade combat teams (sec. 113)

The conferees agree to a provision that would amend section 113 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001, which required the Secretary of the Army to submit a report on the process for developing the Objective Force in the transformation of the Army. The provision also required the Secretary of the Army to conduct a comparative cost and operational effectiveness evaluation of the interim armored vehicles (IAV) selected for the Interim Brigade Combat Team (IBCT) with the infantry troop-carrying medium armored vehicles currently in the Army inventory.

The provision further prohibited the obligation of funds for a third IBCT until: the comparative evaluation is carried out; the Secretary of Defense submits the results of the evaluation to the congressional defense committees; and the Secretary certifies that (1) he approves of the obligation of funds for that purpose and (2) the force structure resulting from the acquisition and subsequent operational capability of Interim Brigade Combat Teams will not diminish the combat power of the Army.

The Secretary of the Army has requested relief from the requirement for the comparative evaluation directed in this provision. The Secretary stated that the comparative evaluation would replicate the comparison accomplished during source selection, and duplicate more comprehensive testing already required by law.

Last year, the conferees concluded that the costs associated with the comparative evaluation were worth incurring for a better understanding of whether the differences in operational effectiveness, if any, justify the increased cost of new IAV procurement compared to using current inventory equipment.

While the conferees continue to believe that there is merit to the comparative evaluation, the conferees recommend a modification to section 113 that would grant the Secretary of Defense the authority to waive those portions of section 113 pertaining to the comparative evaluation, subject to certain certifications.

The conferees direct the Secretary of the Army to conduct an operational evaluation of the initial IBCT, to include deployment to the evaluation site and the execution of combat missions across the full spectrum of potential threats and operational scenarios. The

plan for the operational evaluation must be approved by the Director of Operational Test and Evaluation, Department of Defense, prior to execution.

The Army is prohibited from acquiring interim armored vehicles for other than the first three brigades, and from deploying any IBCT, until 30 days after a report on the operational evaluation is forwarded to the Congress and the Secretary of Defense certifies to the Congress that the results of the evaluation indicate that the IBCT design is operationally effective and suitable.

The Secretary of Defense can waive the deployment prohibition if he determines it to be in the national security interests of the United States, and reports to Congress the reasons for the waiver.

The conferees expect the Army to develop and resource an experimentation program that will inform the design of the Objective Force, including a formal linkage of the Interim Brigade Combat Teams to that experimentation.

Subtitle C—Navy Programs

Virginia class submarine program (sec. 121)

The Senate bill contained a provision (sec. 121) that would modify section 123(b)(1) of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 by authorizing the Secretary of the Navy to enter into contracts for the procurement of material in economic order quantities, when cost savings are achievable, for up to seven Virginia-class submarines. This authority would apply to boats to be procured during the period from fiscal years 2003 through 2007.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

Multiyear procurement authority for F/A-18E/F aircraft engines (sec. 122)

The Senate bill contained a provision (sec. 122) that would authorize the Secretary of the Navy to enter a multiyear contract for procurement of F/A-18E/F aircraft engines in accordance with section 2306b of title 10, United States Code.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Secretary to certify that each of the conditions listed in subsection (a) of section 2306b of title 10, United States Code, has been satisfied. The provision would also require that this multiyear procurement contract could not be entered into until 30 days after the aforementioned certification has been transmitted.

The Navy procures engines for F/A-18E/F aircraft directly from the engine contractor and provides the engines to the prime airframe contractor as government-furnished equipment. The Navy is currently procuring the F/A-18E/F airframe under a multiyear contract that covers the fiscal years from 2000 to 2004. The conferees understand that this provision would authorize a multiyear procurement contract that may not cover exactly the same time period as that for the airframe itself. The conferees believe that the Secretary of the Navy should, if he chooses to enter into a

multiyear contract for these engines, consider synchronizing the time periods of the contracts for these two items.

V-22 Osprey aircraft program (sec. 123)

The Senate bill contained a provision (sec. 123) that would keep the production rate of V-22 aircraft at the minimum sustaining rate, defined as the number for which funds are authorized to be appropriated in this Act, until the Secretary of Defense certifies to Congress that operational testing has successfully demonstrated certain effectiveness and suitability aspects not yet demonstrated.

The House amendment contained no similar provision.

The House recedes.

The conferees note that this provision is consistent with the recommendations of the report of the Panel to Review the V-22 Program, which was released in May 2001.

Report on status of V-22 Osprey aircraft before resumption of flight testing (sec. 124)

The Senate bill contained two provisions relating to reports that would be required before the V-22 could return to flight status.

One provision (sec. 124) would require the Secretary of Defense to notify Congress of the waiver, if any, of any item capability or other requirement specified in the V-22 Joint Operational Requirements Document, along with justification for any such waiver. The provision would require that any such notice be given at least 30 days before the V-22 resumes flight operations.

The second provision (sec. 215) would require the Under Secretary of Defense (Acquisition, Technology, and Logistics) to submit a report, 30 days before V-22 resumption of flight, that would include: (1) a description of any hydraulics and flight control software deficiencies and corrective actions; (2) actions to implement the recommendations of the Panel to Review the V-22 Program; and (3) an assessment of the recommendations of the National Aeronautics and Space Administration in its report on tiltrotor aeromechanics.

The House amendment contained no similar provisions.

The House recedes with an amendment that would combine the reporting requirements into one provision, and would require the Secretary of Defense to submit the report no later than 30 days prior to V-22 resumption of flight.

Subtitle D—Air Force Programs

Multiyear procurement authority for C-17 aircraft (sec. 131)

The Senate bill contained a provision (sec. 131) that would authorize a multiyear procurement of up to 60 additional C-17 aircraft in accordance with section 2306b of title 10, United States Code.

The House amendment contained a similar provision (sec. 121) that would authorize a multiyear procurement of up to 60 additional C-17 aircraft after the Secretary of Defense certifies that such a procurement is in the interest of the Department of Defense.

The conferees agree to a provision that would authorize the Secretary of the Air Force to enter into a multiyear contract for procurement of up to 60 additional C-17 aircraft in accordance with section 2306b of title 10, United States Code, except that the contract could cover a period of up to six program years.

The provision would require that the Secretary certify that each of the conditions listed in subsection (a) of section 2306b of title 10, United States Code, has been satisfied. The provision would also require that this multiyear procurement contract could not be entered into until 30 days after the aforementioned certification has been transmitted.

LEGISLATIVE PROVISIONS NOT ADOPTED

Additional amount for Shipbuilding and Conversion, Navy

The House amendment contained a provision (sec. 108) that would authorize an increase of \$57.1 million for a ship overhaul.

The Senate bill contained no similar provision.

The House recedes.

Destruction of existing stockpile of lethal chemical agents and munitions

The House amendment contained a provision (sec. 141) that would amend section 152 of the National Defense Authorization Act for Fiscal Year 1996 (Public Law 104-106; 50 U.S.C. 1521 note) to add to the requirements that must be satisfied before the Secretary of Defense may initiate destruction of the chemical munition stockpile stored at a chemical stockpile destruction site. The provision would require the Under Secretary of Defense (Acquisition, Technology, and Logistics) to convene independent oversight boards that would make a recommendation to the Under Secretary on whether the destruction of the chemical munitions stockpile should be initiated at a particular chemical stockpile destruction site. Finally, the provision would require that the Under Secretary, after considering a negative recommendation of a board, may not recommend commencing destruction of the chemical munitions stockpile at the site until 90 days after the Under Secretary notifies the Congress of his intent to recommend initiation of chemical munitions destruction operations.

The Senate bill contained no similar provision.

The House recedes.

Extension of multiyear contract for Family of Medium Tactical Vehicles

The House amendment contained a provision (sec. 111) that would give the Secretary of the Army discretionary authority to extend the existing multiyear procurement contract for the Family of Medium Tactical Vehicles for one additional year.

The Senate bill contained no similar provision.

The House recedes.

Procurement of additional M291 skin decontamination kits

The Senate bill contained a provision (sec. 142) that would authorize an increase of \$2.4 million in the Defense-Wide procure-

ment account for procurement of additional M291 skin decontamination kits.

The House amendment contained no similar provision.

The Senate recesses.

The Senate bill would separately authorize an additional increase of \$1.0 million for procurement of M291 skin decontamination kits.

The conferees agree to authorize an increase of \$3.4 million for procurement of M291 skin decontamination kits, as noted elsewhere in this report.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Research, Development, Test, and Evaluation overview

The budget request for fiscal year 2002 included an authorization of \$47,429.4 million for Research and Development for the Department of Defense.

The Senate bill would authorize \$46,602.5 million.

The House amendment would authorize \$47,424.9 million.

The conferees recommended an authorization of \$46,460.8 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Army missile defense technology

To support critical missile defense technology activities, the conferees agree that of the funding authorized in the Army research and development account, certain amounts may be used for advanced technology activities as specified below:

- (1) up to \$1.9 million for the Short-range missile defense With Optimal Radar Distribution (SWORD) program in PE 62303A;
- (2) up to \$7.6 million for Patriot ground equipment upgrades and life extension efforts in PE 23801A;
- (3) up to \$3.8 million for the Aerostat Design and Manufacture (ADAM) program in PE 12419A; and
- (4) up to \$11.0 million for the Army Space and Missile Defense Battle Lab in PE 63308A.

Comanche

The budget request contained \$787.9 million in PE 64223A for continued engineering and manufacturing development (EMD) of the RAH-66 Comanche reconnaissance attack helicopter.

The Senate bill would authorize an increase of \$28.3 million for the development of a communications suite that is compatible with air and ground components in a joint environment.

The House amendment would authorize an increase of \$28.5 million for a similar purpose.

The conferees agree to authorize an increase of \$28.3 million in PE 64223A for this requirement.

The conferees believe the Comanche is a necessary and integral weapon system to the Army's transformation and have been supportive of this program in past fiscal years. The Army has stated that the Comanche is its top modernization program. However, the conferees note that there has been a \$3.0 billion increase in research, development, test and evaluation (RDT&E) costs since fiscal year 1991. Despite these substantial cost increases, the program continues to be plagued by delays, which the conferees now understand could result in a full two-year delay of the currently scheduled initial operating capability (IOC) of December 2006 to December 2008. The conferees are disappointed to learn once again of the need to restructure and delay this program for at least a sixth time since fiscal year 1988, and the need to add approximately \$1.5 billion to the program to complete EMD.

The conferees question the reliability of any new cost estimates and EMD program milestones, especially since the EMD contract was awarded only slightly over a year ago, in June 2000, and numerous changes in requirements have been made since then.

The conferees believe that as the aircraft continues in the EMD phase, an adequately funded and disciplined development program is absolutely essential to fielding this aircraft as part of the Army's Objective Force. Therefore, the conferees expect the Secretary of the Army, in coordination with the Under Secretary of Defense for Acquisition, Technology, and Logistics, and its industry team, to present to Congress in the fiscal year 2003 budget request an accurate estimate of funds required to complete EMD and the new time line and plan for bringing the Comanche to IOC.

Rapid acquisition program for transformation

The budget request included \$23.6 million in PE 23761A for the Rapid Acquisition Program for Transformation (RAPT).

The Senate bill would authorize \$23.6 million for RAPT, but would transfer the funding from the RAPT program element to the program elements supporting the systems chosen by the Army for entry into the program for fiscal year 2002.

The House amendment would authorize \$23.6 million for RAPT, but would transfer the funding from the RAPT program element to PE 63001A, Warfighter Advanced Technology.

The conferees agree to authorize \$23.6 million in PE 23761A for RAPT or counter-terrorism initiatives and direct the Secretary of the Army to provide a detailed list of how these funds are executed.

Tactical high energy laser

The budget request included no funds for the Tactical High Energy Laser (THEL) program, a joint U.S.-Israeli development program to demonstrate the feasibility of defeating short-range rockets using directed energy.

The Senate bill would authorize \$9.0 million of the funds available in PE 63882C to evaluate the development of a Mobile THEL (MTHEL) system.

The House amendment would authorize an increase of \$10.0 million to PE 65605A for continuing work on THEL and exploring the option of a mobile version of THEL.

The conferees agree to authorize, from within the funds available in the Army research and development account, an increase of \$10.0 million to PE 65605A for evaluating development of THEL as a mobile system.

Thermionics technology

The budget request included \$19.5 million in PE 63308A for Army missile defense systems integration, but did not include funds for thermionics technology development.

The Senate bill would authorize, of the funds authorized in PE 63882C for the Midcourse Ground Defense System, \$8.0 million for thermionics technology development.

The House amendment would authorize an increase of \$3.0 million in PE 63308A for thermionics technology development.

The conferees agree to authorize an increase of \$1.0 million in PE 63308A for thermionics technology development. Of the amounts authorized for Army research and development, an additional \$7.0 million may be used for thermionics technology development.

Research, Development, Test and Evaluation, Navy—Overview

The budget request for fiscal year 2002 included an authorization of \$11,123.4 million for Research, Development, Test and Evaluation, Navy in the Department of Defense.

The Senate bill would authorize \$11,134.8 million.

The House amendment would authorize \$10,863.3 million.

The conferees recommended an authorization of \$10,784.3 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Follow-on support jamming aircraft

The budget request included \$112.5 million in PE 64270N for electronic warfare development, but included no funds for pre-engineering and manufacturing development (EMD) risk reduction activities for a follow-on support jamming aircraft program to replace the EA-6B.

The House amendment would authorize an increase of \$10.0 million for pre-EMD risk reduction activities for a follow-on support jamming aircraft program.

The Senate bill included no similar authorization.

The conferees agree to authorize no additional funds for a follow-on support jamming aircraft program.

The conferees recognize that the Department of Defense is scheduled to complete the Analysis of Alternatives (AoA) in December 2001 and believe that the Department will identify a need to replace the capability currently provided by the EA-6B fleet of electronic warfare aircraft. The conferees believe that the Department should move expeditiously to translate the results of that AoA into a plan that will avoid having the Nation presented with any gap in this important mission area.

Future destroyer program

The budget request included \$288.4 million in PE 63513N and \$355.1 million in PE 64300N for the DD-21 program.

The Senate bill would authorize the budget request.

The House amendment would authorize a decrease of \$25.0 million in PE 63513N.

Subsequent to passage of both the Senate bill and the House amendment, the Navy announced intentions to restructure the DD-21 program to a family of surface combatants including a destroyer version, DD(X). However, the specifics of the proposed programs for development of the family of surface combatants were not available for the conferees to review.

Therefore, the conferees agree to authorize a decrease of \$50.0 million in PE 63513N resulting from the delay in the down-select to a future destroyer detail design. The conferees will review the Navy's decision to restructure DD-21 when the Navy makes available details of the cancellation of the current request for proposals and the proposed replacement program.

Littoral support craft—experimental

The budget request included \$85.3 million in PE 63123N for force protection advanced technology, including \$20.0 million for development and demonstration of experimental craft for littoral support operations. The Office of Naval Research has proposed to conduct a phased program to develop and demonstrate an experimental littoral support craft demonstrator (LSC-X) that would build upon development and evaluation of operational concepts at the component and subsystem level and provide the basis for operational experiments on the contribution that such craft could make to naval operations in the littoral.

The House amendment would authorize a total of \$39.0 million in PE 63123N for development and demonstration of an LSC-X, in-

cluding an increase of \$19.0 million for demonstration and development of an experimental craft for littoral support operations.

The Senate bill included no similar authorization. However, the Senate report accompanying S. 1438 (S. Rept. 107-62) identified at least six efforts that the Navy has underway to test key technologies for future ship programs. The Senate report also would encourage the Navy to focus ship design efforts on programs that will collect the type of information that will be needed to make decisions on future combatant ships, the future amphibious ship (LH(X)), the future joint command and control ship (JCC(X)), and the maritime prepositioning force ship of the future (MPF(F)), rather than duplicating efforts already underway.

The conferees agree to authorize a total of \$31.0 million in PE 63123N, an increase of \$11.0 million, to continue the ONR program for development and demonstration of the LSC-X.

The conferees direct that the Secretary of the Navy identify the set of experimental objectives that the LSC-X program is intended to explore, and the objective measures of effectiveness that will be used to determine whether those objectives have been achieved. The conferees also direct the Secretary to define the program plan, the schedule, and the funding requirements for development of LSC-X. The Secretary should provide all of this information to the congressional defense committees by March 31, 2002.

Research, Development, Test and Evaluation, Air Force—Overview

The budget request for fiscal year 2002 included an authorization of \$14,344.0 million for Research, Development, Test and Evaluation, Air Force in the Department of Defense.

The Senate bill would authorize \$14,459.5 million.

The House amendment would authorize \$14,485.7 million.

The conferees recommended an authorization of \$14,407.2 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Joint Strike Fighter

The budget request included no funding for PE 63800N or PE 63800F for continuing demonstration and validation (DEMVAl) of the joint strike fighter (JSF). The budget request included \$767.3 million for PE 64800N and \$769.5 million for PE 64800F for initiating the engineering and manufacturing development (EMD) of the JSF.

The Senate bill would authorize an increase of \$30.0 million for PE 63800N and an increase of \$30.0 million for PE 63800F to continue JSF DEMVAL. The Senate bill would also authorize a decrease of \$153.6 million for PE 64800N and a decrease of \$153.6 million for PE 64800F. The Senate bill based these actions on a possible delay in the award of the EMD contract.

The House amendment would authorize the budget request for PE 64800N, and an increase of \$10.0 million for PE 64800F for the JSF alternate engine program.

The conferees agree to authorize the budget request.

The conferees remain concerned about the technical risks associated with the JSF aircraft engine and expect the Department to develop and integrate the JSF alternate engine within the EMD program. The conferees believe that the Department should execute the alternate engine program with a goal of having that engine integrated into the JSF prior to full rate production.

The conferees are aware of the potential long-term impact to the military aircraft industrial base as a result of the recently completed source selection. Source selection talking points, released by the Department of Defense (DOD) at the announcement of the selection, stated: "The JSF downselect may lead companies to reassess their strategic position and teaming arrangements. The expertise resident in the teams not selected today can still make a contribution to the JSF effort through revised industrial teaming arrangements. DoD will encourage teaming arrangements that make the most efficient use of the expertise in the industrial base to deliver the 'best value' product."

The conferees direct the Under Secretary of Defense for Acquisition, Technology, and Logistics to submit a report, with the submission of the fiscal year 2003 budget request, which details: (1) projections for the military aircraft industrial base, to include foreign military sales, between now and fiscal year 2015; and (2) actions taken by the DOD to encourage teaming arrangements in the JSF program that make the most efficient use of the expertise in the industrial base.

Low cost launch technologies

The budget request included \$54.5 million in PE 63401F for advanced spacecraft technology, but included no funds for low cost launch technology.

The Senate bill would authorize, of the funds authorized in PE 63882C for the Midcourse Ground Defense System, \$15.0 million for the Excalibur and Scorpius low cost launch concepts.

The House amendment would authorize \$15.0 million in PE 63401F for low cost launch technologies, including Scorpius.

The conferees note that the Air Force has terminated the Excalibur project. The conferees agree to authorize an increase of \$2.0

million in PE 63401F for low cost launch technologies, including Scorpius. Of the funds authorized in PE 63401F, an additional \$13.0 million may be used for low cost launch technologies, including Scorpius.

Special aerospace materials and materials manufacturing processes

The budget request included \$77.2 million for PE 62102F for applied research in materials, \$32.7 million for PE 63112F for advanced development of advanced materials for weapons systems, and \$53.8 million in PE 78011F for the Air Force's manufacturing technology program.

The House amendment would authorize increases of \$4.5 million in PE 62102F, \$4.5 million in PE63112F, and \$3.5 million in PE 78011F to continue the program for development and demonstration of special aerospace materials and materials manufacturing processes.

The Senate bill would authorize an increase of \$16.5 in PE 62102F, including \$5.0 million for improvements in the manufacturing of speciality aerospace materials.

The conferees agree to an increase of \$3.5 million in PE 62102F to continue the program for applied research and development in special aerospace materials and materials manufacturing processes.

The conferees note the continuing need of the military services for advances in speciality aerospace metals and metal alloys for aircraft and space vehicle structures, propulsion, components, and weapon systems. The conferees direct the Secretary of the Air Force, in coordination with the Secretary of the Navy, to assess the requirements for advanced aerospace metals and alloys and report to the congressional defense committees on the plan, including budget, schedule, and technology demonstrations, for meeting these requirements with the submission of the fiscal year 2004 budget request.

Research, Development, Test and Evaluation, Defense-Wide—Overview

The budget request for fiscal year 2002 included an authorization of \$15,050.8 million for Research, Development, Test and Evaluation, Defense-Wide in the Department of Defense.

The Senate bill would authorize \$13,878.7 million.

The House amendment would authorize \$15,109.6 million.

The conferees recommended an authorization of \$14,372.6 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Arrow missile defense system

The budget request included \$65.7 million in PE 63881C for the Arrow ballistic missile defense system, a joint development program between the United States and Israel.

The Senate bill would authorize an increase of \$76.0 million in PE 63881C for the Arrow System Improvement Program and for continued joint interoperability efforts.

The House amendment would authorize an increase of \$30.0 million in PE 63881C for acceleration of the Arrow System Improvement Program.

The conferees agree to authorize, from within funds available to the Ballistic Missile Defense Organization, an increase of \$53.0 million in PE 63881C to accelerate the Arrow System Improvement Program and to continue joint interoperability efforts for U.S. and Israeli missile defense systems.

Ballistic missile defense advanced technology

To support critical ballistic missile defense technology activities, the conferees agree that, of the funding authorized for the Ballistic Missile Defense Organization, certain amounts may be used for advanced technology activities as specified below:

(1) up to \$9.0 million for the Magdalena Ridge Observatory in PE 63175C;

(2) up to \$5.0 million for Phase III of the Software Defined Radio program in PE 63175C;

(3) up to \$8.0 million for the Army Space and Missile Defense Command's Advanced Research Center (ARC) in PE 63880C;

(4) up to \$8.0 million for the Airborne Infrared Surveillance System (AIRS) in PE 63175C;

(5) up to \$2.5 million for Bottom Anti-Reflective Coatings (BARC) for circuit boards in PE 63175C;

(6) up to \$7.5 million for ultra-flat planarization technology for integrated circuits in PE 63175C; and

(7) up to \$10.0 million for the Atmospheric Interceptor Technology (AIT) program in PE 63175C.

Common database asset for biological security

The budget request included \$125.5 million in PE 62384BP for applied research in chemical and biological defense.

The Senate bill would authorize an increase of \$1.5 million to develop a database of biological pathogen information and bioinformatics tools to support development of medical biological countermeasures.

The House amendment included no similar authorization.

The conferees agree to authorize an increase of \$1.5 million for the development of a common database asset to support development of medical biological countermeasures. The database would integrate genomic and other biological data about high-priority pathogens, underlying scientific research and bioinformatics tools, and would serve those agencies addressing threats to biological security.

ITEMS OF SPECIAL INTEREST

Navy research and development budget exhibits

The Senate report accompanying S. 1438 (S. Rept. 107–62) would require the Navy to comply with the research and development budget justification guidelines included in the Department of Defense (DOD) Financial Management Regulation (DOD 7000.14–R). Subsequent to the passage of the Senate bill, the Navy provided additional budget justification information to the congressional defense committees.

The conferees share the concern expressed in the Senate report regarding the reorganization of the Navy's science and technology program elements in the fiscal year 2002 budget justification material. The failure of the Navy to display explicitly the transition between the fiscal year 2001 program element structure and the new fiscal year 2002 structure detracted from the ability of the defense authorizing committees to exercise their oversight responsibilities.

The conferees also share the Senate's concern about the priority given to Fleet and Force operational and support issues in the Navy's science and technology program and direct the Secretary of the Navy to report to the congressional defense committees by March 31, 2002, on the measures being taken to address these issues.

The conferees direct the Secretary of the Navy and the Under Secretary of Defense (Comptroller) to ensure that the Navy's budget justification information accompanying the fiscal year 2003 budget request adequately describes the Navy's science and technology program and complies with the requirements of DOD 7000.14–R. The Under Secretary shall report to the congressional defense committees with submission of the budget request any deficiencies in the budget justification material and the estimated date by which those deficiencies will be resolved.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Authorization of Appropriations

Authorization of appropriations (secs. 201–202)

The Senate bill contained provisions (secs. 201–202) that would authorize the recommended fiscal year 2002 funding levels for all research, development, test, and evaluation accounts.

The House amendment contained similar provisions.

The conference agreement includes these provisions.

Supplemental authorization of appropriations for fiscal year 2001 for Research, Development, Test, and Evaluation Defense-Wide (sec. 203)

The Senate bill contained a provision (sec. 233) that would authorize an increase of \$1.0 million in fiscal year 2001 for intelligent spatial technologies for smart maps.

The House amendment contained no similar provision.

The House recesses.

Subtitle B—Program Requirements, Restrictions, and Limitations

Naval surface fire support assessment (sec. 211)

The House amendment contained a provision (sec. 212) that would direct the Secretary of Defense to establish a competitive program for the development of an advanced land attack missile (ALAM) for the DD-21, and would designate \$20.0 million in PE 63795N for that purpose. The provision would also require the Secretary to submit a report on the program plan, schedule and funding for the ALAM program.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to carry out an assessment of the requirements for naval surface fire support of ground forces operating in the littoral environment, including the role of an advanced fire support missile system for Navy combatant vessels. The amended provision would require that the Secretary submit a report on the results of that assessment by March 31, 2002.

Collaborative program for development of advanced radar systems (sec. 212)

The House amendment contained a provision (sec. 213) that would establish a cooperative research program to develop electronic materials for advanced radar applications.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would eliminate reference to specific dollar amounts for the programs. These dollar issues are treated in the funding tables in this report.

The conferees agree to a provision that would establish a cooperative research program to develop electronic materials for advanced radar applications. The conferees recognize the emerging importance of advanced electronic materials on future military systems, including advanced radar systems and other applications across services.

The provision would direct the Director of Defense Research and Engineering, the Secretary of the Navy, the Director of Defense Advanced Research Projects Agency (DARPA), and other appropriate services and agencies to enter into a collaborative agreement in order to coordinate ongoing efforts within this critical emerging technology area. The conferees believe that the agreement should focus on: (1) activities needed for technology development to extend the range and sensitivity of naval radars, including high frequency and high power wide band gap semiconductor materials and devices; and (2) acquisition systems to accelerate the deployment of the new technology.

The conferees expect the agreement to be constructed in a manner such that the Services and Agencies will increase financial investments to support necessary research, technology transition, and technology insertion activities. The conferees are concerned that, despite a recognition within the Navy of the importance of this emerging technology, the Office of Naval Research budget submission includes only very limited funding for wide band gap electronics research.

In addition, the conferees expect that any agreement will enable DARPA to maintain the flexibility to invest in a variety of research programs and directions associated with wide band gap technologies that will apply to numerous cross-service applications. This will preserve DARPA's role of developing revolutionary technologies and capabilities, while remaining relatively unconstrained from near-term requirements.

Repeal of limitations on total cost of engineering and manufacturing development for F-22 aircraft program (sec. 213)

The Senate bill contained a provision (sec. 211) that would repeal the cost limitation on the engineering and manufacturing development (EMD) phase for the F-22 aircraft program.

The House amendment contained a provision (sec. 214) that would have raised the cost limitation on the F-22 EMD program by \$250.0 million.

The House recedes with an amendment that would clarify that the repeal of the cost limitation would apply only to the EMD phase of the program.

Joint biological defense program (sec. 214)

The Senate bill contained a provision (sec. 214) that would extend through fiscal year 2002 section 217 (a) of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 to define permissible obligations and identify reports to be provided to Congress concerning procurement of anthrax vaccine.

The House amendment contained no similar provision.

The House recedes.

Cooperative Department of Defense-Department of Veterans Affairs Medical Research Program (sec. 215)

The House amendment contained a provision (sec. 211) that would authorize funding for the cooperative Department of Defense/Department of Veterans Affairs medical research program.

The Senate bill contained no similar provision.

The Senate recedes with an amendment.

The conferees agree to authorize \$2.5 million in PE 63738D8Z for the cooperative Department of Defense/Department of Veterans Affairs medical research program for research on the efficacy of antiarrhythmic drugs with implantable cardioverter defibrillators. The conferees direct the Secretary of Defense to transfer such amount no later than 30 days after the date of the enactment of this Act.

C-5 aircraft reliability enhancement and reengining program (sec. 216)

The Senate bill contained a provision (sec. 212) that would require the Secretary of the Air Force to ensure that engineering and manufacturing development (EMD) under the C-5 aircraft reliability enhancement and reengining program (RERP) includes kit development for an equal number of C-5A and C-5B aircraft. The Air Force program envisioned a total of four aircraft in the RERP EMD program.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Secretary to include at least one aircraft from among the 74 C-5A aircraft in the C-5 RERP EMD program.

SUBTITLE C—BALLISTIC MISSILE DEFENSE

Transfer of responsibility for procurement for missile defense programs from Ballistic Missile Defense Organization to military departments (sec. 231)

The House amendment contained a provision (sec. 231) that would amend section 224 of title 10, United States Code, to change the term “procurement” to the term “research, development, test and evaluation” with respect to the display of budget amounts in budget requests for the Ballistic Missile Defense Organization (BMDO). The provision would also require the Secretary of Defense to establish criteria for the transfer of ballistic missile defense programs from the BMDO to the military departments and to submit these criteria to the congressional defense committees. Prior to the transfer of such a program, the Secretary would be required to notify Congress of his intent to make such a transfer and to certify that the program had met the criteria for transfer. The provision would permit such a transfer 60 days after Congress is notified.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to ensure that, for any transferred program, all appropriate conforming changes are made to proposed or projected funding allocations in the future years defense program. This will ensure that the funding is transferred with a program from the BMDO to a military department. The amendment would also require that, before a program is transferred, the roles and responsibilities are clearly defined for follow-on research, development, test and evaluation related to system improvement for that program.

The budget request proposed transferring the Patriot PAC-3 and the Medium Extended Air Defense System (MEADS) to the Army, and the Navy Area Defense system to the Navy. This provision would delay any such transfer until the requirements of the provision have been met. Consequently, the conferees agree to authorize funding for these ballistic missile defense programs within the BMDO accounts, and not with the military departments.

Program elements for Ballistic Missile Defense Organization (sec. 232)

The House amendment contained a provision (sec. 232) that would repeal section 223 of title 10, United States Code, which established program elements for ballistic missile defense (BMD) programs.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would revise the program elements for ballistic missile defense and require certain information and reviews concerning BMD activities.

The amendment would establish six new functional program elements and require that additional program elements be estab-

lished for BMD programs entering into engineering and manufacturing development (EMD).

The amendment would require the Secretary of Defense to establish cost, schedule, testing and performance goals for BMD programs for the period covered by the future years defense program and to submit a statement of those goals to Congress each year.

The amendment would require the Secretary of Defense to submit to Congress each year an annual program plan for BMD programs that enter EMD or the equivalent phase, including a funding profile that displays estimated total funding and expenditures for significant procurement, construction and research and development, as well as a program schedule for significant procurement, construction, research and development, flight tests, and other significant test activities. Information included in annual budget justification documents need not be included in the plan.

The amendment would require that specified Department of Defense officials and elements review and comment on the development of goals and the annual program plan required in the provision.

The amendment would require the Director of the Ballistic Missile Defense Organization (BMDO) to develop a plan to ensure that each critical technology for a BMD program is demonstrated in an appropriate environment before entering operational service. The Director of Operational Test and Evaluation would review and comment on the plan.

The amendment would require, at the end of fiscal years 2002 and 2003, the Comptroller General of the United States to assess the extent to which the BMDO achieved the goals established by the Secretary of Defense for BMD programs, as required by the provision, and to report to Congress on the assessment.

The amendment would also require the Director of Operational Test and Evaluation to assess each year the adequacy and sufficiency of the BMDO test program for the preceding year, and to report to Congress on the assessment.

Ballistic missile defense budget justification

The President's budget proposed moving most ballistic missile defense programs into Research, Development, Test and Evaluation, Defense-Wide, and grouping them primarily into five large program elements.

The conferees are concerned that this year's budget justification documentation does not include the level of detail provided in past years for many of the projects within the new program elements. While supportive of the administration's intent to experiment with and test new technologies prior to committing to system development and acquisition, the conferees expect to receive appropriate levels of detailed funding, schedule, and test event information as required by annual budget justification reporting guidelines.

In addition to information provided for those programs that have entered engineering and manufacturing development, or an equivalent phase as described in the legislative provision, the Secretary of Defense shall ensure that each year's budget justification

documents include the following information for programs and projects in earlier stages of research and development:

- (1) funding appropriated in the previous year;
- (2) the expected funding requirement for the next six years, by year; and
- (3) detailed schedule including hardware and software deliveries, to the extent known, and planned decision points and test events, at least through completion of the planned testing and evaluation of the prototype or experiment.

This information shall be provided as part of the annual program plan report required by the provision, for programs and projects as identified above and any program or project identified as a matter of special interest, provided the information is not already included in budget justification materials accompanying the annual budget request.

Ballistic missile defense programs are among the most technologically challenging and complex in the Department of Defense. The exploration of leading edge technologies associated with missile defense programs often involves significant costs. Department of Defense directives and instructions (e.g., Department of Defense Instruction 5000.2) require the compilation of acquisition cost, life-cycle cost, and total ownership costs for defense projects and programs where available and approved. The conferees direct the Department of Defense to fully comply with the requirements of these DOD directives and instructions, including Department of Defense Instruction 5000.2.

Support of ballistic missile defense activities of the Department of Defense by the National Defense Laboratories of the Department of Energy (sec. 233)

The House amendment contained a provision (sec. 233) that would, at the discretion of the Director of the Ballistic Missile Defense Organization (BMDO), make available from funds authorized to be appropriated for the BMDO up to \$25.0 million for research development and demonstration activities at the national laboratories of the Department of Energy National Nuclear Security Administration (NNSA) in support of the missions of the BMDO. The funds would be available subject to the provision of matching funds by the NNSA. Activities funded using this authority would be conducted under terms of the September 14, 2001 Memorandum of Understanding (MOU) between the Director of the BMDO and the Administrator of the National Nuclear Security Administration for use of the national laboratories by the BMDO.

The Senate bill contained no similar provision.

The Senate recedes.

The provision would authorize the Director of the BMDO to use funds available to BMDO, on a discretionary basis, to utilize the national laboratories of the NNSA under the terms and conditions of the MOU. The terms of this MOU require that jointly-funded work done pursuant to the MOU be mutually beneficial to the missions of the two Departments.

The conferees note that the NNSA laboratories do a substantial amount of work for the Department of Defense in their role as federally funded research and development centers on a Work for

Others basis. The conferees do not intend for this provision in any way to affect the ability of the BMDO to contract with the NNSA laboratories to conduct work under the Work for Others program. On the contrary, the conferees urge the Director to look closely at the capabilities of the NNSA laboratories and to utilize these capabilities fully.

Missile defense testing initiative (sec. 234)

The House amendment contained a provision (sec. 234) that would establish certain guidelines and requirements for the ballistic missile defense testing program of the Department of Defense.

The Senate bill contained no similar provision.

The Senate recesses with a clarifying amendment.

Construction of test bed facilities for missile defense system (sec. 235)

The House amendment contained a provision (sec. 235) that would authorize the Secretary of Defense to use up to \$500.0 million of funds appropriated for research, development, test and evaluation for fiscal years after fiscal year 2001 that are available for the Ballistic Missile Defense Organization to carry out construction projects, including construction of facilities “of general utility,” to establish and operate the missile defense system test bed. The provision would also authorize the Secretary of Defense to use such funds to provide assistance to communities to meet increased needs for services or facilities resulting from construction or operation of the test bed, subject to certain conditions.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that would make clear that funds may be used for all construction projects necessary to establish and operate the test bed, but removes the reference to facilities “of general utility.” The conferees understand that this authorization would permit the construction of such facilities as a power generation plant, a heating plant and roads. The conferees believe that the term “of general utility” could have been construed to mean facilities not necessary for establishing or operating the test bed, which would be inconsistent with congressional intent.

The amendment would also limit the use of funds for community assistance to funds appropriated for fiscal year 2002. If the Secretary of Defense determines that additional authority is needed to use funds for community assistance, the conferees direct the Secretary to provide full and specific justification for such authority.

Subtitle D—Air Force Science and Technology for the 21st Century
Air Force science and technology for the 21st Century Act (sec. 251–252)

The House amendment contained two provisions (secs. 251 and 252) that establish a sense of Congress regarding the Air Force science and technology development planning process.

The Senate bill contained no similar provisions.

The Senate recesses.

Study and report on effectiveness of Air Force science and technology program changes (sec. 253)

The House amendment contained a provision (sec. 253) that would require the Air Force and the National Research Council to study how changes to the Air Force science and technology program implemented over the past two years affect the future capabilities of the Air Force.

The Senate bill contained no similar provision.

The Senate recedes with a clarifying amendment.

The conferees direct the Air Force to ensure that the National Research Council is provided sufficient resources to adequately conduct the study called for by the provision.

Subtitle E—Other Matters

Establishment of unmanned aerial vehicle joint operational test bed system (sec. 261)

The House amendment contained a provision (sec. 241) that would require the Commander in Chief, U.S. Joint Forces Command to establish a joint operational test bed (JOTB) system to evaluate and ensure joint interoperability of unmanned aerial vehicle (UAV) systems. The provision would also direct the Secretary of the Navy to transfer certain Predator UAVs and related equipment to the Joint Forces Command for use in the JOTB system.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would delete the requirement for the transfer, but ensure that the Commander-in-Chief, U.S. Joint Forces Command controls the priority for use of these predators and UAVs.

Demonstration project to increase small business and university participation in Office of Naval Research efforts to extend benefits of science and technology research to fleet (sec. 262)

The House amendment contained a provision (sec. 242) that would require the Chief of Naval Research to carry out a demonstration project to increase access to Navy facilities of small businesses and universities that are engaged in science and technology research beneficial to the fleet.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would ensure that the Secretary of the Navy has discretion over which Navy facilities to make available for the demonstration project and is able to charge an appropriate fee for the use of these facilities.

The conferees strongly encourage the Chief of Naval Research to reach out to small, high-technology companies and encourage them to participate in this demonstration program. As a part of this outreach effort, the conferees encourage the Chief of Naval Research to consider the use of third-party partners, where appropriate, to help create and maintain contacts and relationships with the high-technology communities.

Communication of safety concerns from operational test and evaluation officials to program managers (sec. 263)

The Senate bill contained a provision (sec. 232) that would amend section 139 of title 10, United States Code. The provision would add a subsection requiring the Director of Operational Test and Evaluation to ensure that any safety concerns found during the operational test and evaluation of a weapon system under a major defense acquisition program are communicated in a timely manner to the program manager responsible for the acquisition of that weapon system.

The House amendment contained no similar provision.

The House recedes.

LEGISLATIVE PROVISIONS NOT ADOPTED

Big Crow

The Senate bill contained a provision (sec. 216) that would authorize funding for the Big Crow program.

C-5 aircraft modernization

The House amendment contained a provision (sec. 215) that would restore a reduction of \$30.0 million in the amount requested in Research, Development, Test, and Evaluation, Air Force, for re-engining and avionics modernization programs for the C-5 aircraft.

The Senate bill contained no similar provision.

The House recedes.

The conferees agree to authorize the budget request.

The House amendment contained a provision (sec. 243) that would extend the time period during which the Secretary of Defense and the Chairman of the Joint Chiefs would have to provide an annual certification about the adequacy of the Navy's mine countermeasures programs. The provision would change the ending date of that requirement from fiscal year 2003 to fiscal year 2008.

The Senate bill contained no similar provision.

The House recedes.

Review of alternatives to the V-22 Osprey aircraft

The Senate bill contained a provision (sec. 213) that would require the Under Secretary of Defense (Acquisition, Technology, and Logistics) to conduct a review of Marine Corps and Special Operations Command requirements that are expected to be met by the V-22 Osprey aircraft in order to identify potential alternatives to the V-22 in the event that the V-22 program were to be terminated. The provision would also set aside \$5.0 million that would be available to conduct this review.

The House amendment contained no similar provision.

The Senate recesses.

Special operations forces command, control, communications, computers, and intelligence systems threat warning and situational awareness program

The Senate bill contained a provision (sec. 204) that would authorize an increase of \$2.8 in PE 116405BB for the special operations forces command, control, communications, computers, and intelligence (SOF C4I) systems threat warning and situational awareness (PRIVATEER) program.

The House amendment contained no similar provision.

The Senate recesses on the provision.

TITLE III—OPERATION AND MAINTENANCE

Overview

The budget request for fiscal year 2002 requested an authorization of \$125,350.0 million for operation and maintenance programs and \$2,458.4 million for working capital fund accounts for the Department of Defense for fiscal year 2002.

The Senate bill would authorize \$125,386.3 million for operation and maintenance accounts and \$2,408.1 million for working capital fund accounts.

The House amendment would authorize \$124,025.0 million for operation and maintenance accounts and \$2,359.7 million for working capital fund accounts.

The conferees recommend an authorization of \$123,259.9 million for the operation and maintenance accounts and \$1,656.4 million for the working capital fund accounts of the Department of Defense for fiscal year 2002. The conferees agree to a reduction of \$295.6 million in the Defense Working Capital Fund to reflect lower fuel prices; and a reduction of \$125.0 million to reflect adjustments in utility prices, to be allocated proportionately among the Army, Navy, Marine Corps, Air Force and Defense-Wide accounts. Unless noted explicitly in the statement of managers, all funding changes are made without prejudice.

The following table lists the amounts authorized to be appropriated for each program in the operation and maintenance accounts of the Department of Defense.

Management reform initiatives

The conferees agree to reduce operations and maintenance accounts by \$1.07 billion to reflect savings from management reform initiatives, as discussed in Title VIII.

Combating terrorism initiative

The budget request included \$5.6 billion to continue improving the ability of U.S. forces to deter and defend against the growing terrorist threat.

The House amendment would authorize the requested amount.

The Senate bill would authorize the \$5.6 billion request, but included an additional \$217.2 million to further improve U.S. capabilities to combat terrorism. Of this increase, \$108.0 million was added to operation and maintenance accounts. This included: \$77.7 million to address force protection vulnerabilities on Army installations; \$14.3 million for enhanced counterterrorism training for U.S. Special Operations Forces; \$10.0 million for the combating terrorism readiness initiatives fund for combatant commands; and \$6.0 million to purchase hand-held explosive detectors for seagoing Navy vessels.

The conferees note that many of the vulnerabilities to terrorist attacks have become high priorities for the Department of Defense. This is reflected in the fact that a significant portion of the additional funds included in the Senate bill have already been funded in the fiscal year 2001 emergency supplemental appropriations act. Specifically, the conferees understand that, as of the end of September 2001, the Army had received \$257.0 million in supplemental funding for force protection improvements at its installations, and the Special Operations Command had received \$151.0 million for combating terrorism, including immediate counterterrorism training needs. The conferees agree, therefore, to authorize an additional \$10.0 million for the combatant commands' Combating Terrorism Readiness Initiatives Fund, and \$3.0 million to purchase hand-held explosive detectors for the Navy.

Commercial imagery to support military requirements

The budget request included \$30.0 million for purchasing commercial imagery products in support of national needs.

The Senate bill would authorize an increase of \$10.0 million to establish prototype contracts that the National Imagery and Mapping Agency (NIMA) would use to establish stronger ties with the private sector to satisfy commercial satellite imagery needs. The Senate report (S. Rept. 107-62) indicated that NIMA officials have suggested that the NIMA might enter into prototype contracts with commercial remote sensing entities to provide commercial satellite imagery for the NIMA.

The conferees understand that, under such an approach, the NIMA would contract with one or more U.S. commercial satellite imagery providers to provide a portion of this imagery directly to a network of geospatial production companies, each of which supports NIMA customers with interests in a particular region.

The House amendment would approve the budget request.

The conferees believe that the United States should prioritize the use of commercial remote sensing as envisioned in Presidential

Decision Directive–23. Moreover, the conferees believe that allocating certain satellite imagery requirements to the U.S. commercial remote sensing industry will allow the government to focus its own assets on more demanding intelligence requirements. The conferees continue to support using commercial satellite imagery and geospatial products and services to satisfy the non-time-critical low and medium resolution requirements of the Secretary of Defense, including the regional commanders in chief, and the intelligence community.

The conferees also understand that the administration is developing a commercial imagery strategy to support these requirements and endorses the development and implementation of such a strategy. The conferees believe, however, that the U.S. Government must become a reliable, long-term customer of commercial satellite imagery if the strategy is to be successful. The conferees recognize that there are budgetary and contracting issues, but do not believe these are beyond solution.

Therefore, the conferees direct the Secretary of Defense and the Director of Central Intelligence to plan and carry out a program to purchase a significant portion of their non-time-critical low and medium resolution satellite imagery requirements from the U.S. commercial remote sensing industry by 2005.

The conferees note that substantial resources relating to commercial imagery activities have been included in the Emergency Terrorism Response Supplemental Appropriations Act, 2001. Therefore, the conferees recommend no additional funding above the President's budget request for fiscal year 2002. The conferees expect that the NIMA and the administration will make appropriate use of these funds to implement this commercial imagery strategy.

Revision of deadline for annual report on commercial and industrial activities (sec. 344)

The Senate bill contained a provision (sec. 1024) that would change the due date for the Commercial Activities Report to Congress, required by section 2461(g) of title 10, United States Code, from February 1 to June 30 of each year, as requested by the Department of Defense.

The House recesses.

Pilot manpower reporting system in Department of the Army (sec. 345)

The House amendment contained a provision (sec. 333) that would require the Department of the Army to report annually on the size of its contractor workforce.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that would require the Secretary of the Army to provide to Congress an annual report describing the use of non-federal entities that provide services to the Department of the Army during fiscal years 2002 through 2004. The amendment would also clarify that the Secretary of the Army would be required to use existing data collection and reporting systems to compile this report, and would not be permitted to impose any new data requirements on non-federal entities.

The conferees note that a similar provision, applicable to all three military services, was included in section 343 of the National Defense Authorization Act for Fiscal Year 2000. The Navy and the Air Force complied with this provision without establishing any new data collection systems or imposing any new data requirements on contractors. The conferees expect the Army to implement the new provision in a similar manner, without establishing any new data collection systems or imposing any new data requirements on contractors.

Development of Army Workload and Performance System and Wholesale Logistics Modernization Program (sec. 346)

The House amendment contained a provision (sec. 334) that prohibited the Secretary of the Army from expanding the Wholesale Logistics Modernization Program (WLMP) beyond the original legacy systems until those legacy systems have been replaced.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that requires the Secretary of the Army to maintain the functionality and identity of the Army Workload and Performance System (AWPS) as the WLMP moves forward. The Secretary of the Army will also ensure that the AWPS continues to be the standard Army-wide manpower system.

The amendment requires an annual report to the Congress on AWPS implementation. The report will be evaluated by the General Accounting Office.

Subtitle E—Defense Dependents Education

Assistance to local educational agencies that benefit dependents of members of the armed forces and Department of Defense civilian employees (sec. 351)

The House amendment contained a provision (sec. 341) that would authorize \$30.0 million for educational assistance to local education agencies where the standard for the minimum level of education within the state could not be maintained because of the large number of military connected students, and \$1.0 million for payments to local education agencies to assist in adjusting to reductions in military dependent students resulting from the closure or realignment of military installations.

The Senate bill contained a similar provision (sec. 304) that would authorize \$35.0 million for impact aid to local education agencies.

The Senate recesses.

Impact aid for children with severe disabilities (sec. 352)

The Senate bill contained a provision (sec. 305) that would authorize \$5.0 million for continuation of the Department of Defense assistance program to local educational agencies that benefit dependents with severe disabilities.

The House amendment contained no similar provision.

The House recesses with a technical amendment.

Availability of auxiliary services of defense dependents' education system for dependents who are home school students (sec. 353)

The House amendment contained a provision (sec. 342) that would require the Department of Defense (DOD) to provide support for home schooled students who are otherwise eligible to attend DOD schools.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that would remove participation in individual academic courses from the services available to dependents who are home schooled and add a requirement that the home schooled students must comply with the standards of conduct applicable to other students using or receiving the same auxiliary services.

Comptroller General study of adequacy of compensation provided for teachers in the Department of Defense overseas dependents' schools (sec. 354)

The Senate bill contained a provision (sec. 1122) that would require the Comptroller General to conduct a study and report on whether compensation for teachers in the defense dependents' education program is adequate for recruiting and retaining high quality teachers, and whether changes in the methodology for computing teacher pay are necessary.

The House amendment contained a similar provision (sec. 343) that would require the Secretary of Defense to conduct the study.

The House recesses with an amendment that would change the date to May 1, 2002, that the Comptroller General must report to Congress on the results of the study.

Subtitle F—Other Matters

Availability of excess defense personal property to support Department of Veterans Affairs initiative to assist homeless veterans (sec. 361)

The House amendment contained a provision (sec. 351) that would permit the Secretary of Defense to make excess clothing, shoes, sleeping bags, and related non-lethal excess supplies available, without reimbursement, to the Secretary of Veterans Affairs for distribution to homeless veterans and programs assisting homeless veterans.

The Senate bill contained no similar provision.

The Senate recedes.

The conferees direct the Secretary of Defense to ensure that adequate safeguards are in place to prevent procurement of those items and declaring them excess and available for distribution shortly after receipt.

Incremental implementation of Navy-Marine Corps Intranet contract (sec. 362)

The House amendment contained a provision (sec. 352) that permanently excluded the Marine Corps from the Navy-Marine Corps Intranet (NMCI) program, and extended exclusions for naval aviation depots and shipyards through fiscal year 2002.

The Senate bill contained a provision (sec. 334) that codified the Department of Defense's plan to rephase the implementation of the NMCI program, based on achievement of specified testing and performance milestones.

The House recedes with an amendment that more fully describes additional phase-in authority for the NMCI. The amendment allows the Secretary of the Navy to contract for an additional 100,000 work stations (the "second increment"), pending joint approval by the Under Secretary of Defense (Acquisition, Technology, and Logistics) and the Department of Defense (DOD) Chief Information Officer (CIO). This approval is dependent on successful completion of a three-phase customer test and evaluation (known as CT&E3), as detailed in the Master Test Plan maintained by the NMCI contractor. Tests shall be conducted on a representative, statistically-significant sample population of NMCI work stations. The validity of the results will be independently evaluated and confirmed by the Institute for Defense Analyses.

The amendment permits the Secretary of the Navy to order a third increment of an additional 150,000 work stations, pending successful performance of at least 20,000 work stations operating on the NMCI network. Certification of this performance must be made by the Navy CIO to the Secretary of the Navy and the DOD CIO. The amendment further restricts the NMCI contractor from assuming responsibility for more than half of the work stations allowed to be ordered in the third increment until the Navy CIO certifies to the Secretary of the Navy and the DOD CIO that the work stations for the full headquarters at the Naval Air Systems Command (NAVAIR) are meeting applicable service-level agreements.

The amendment also requires the Secretary of the Navy to submit to Congress a report on the scope and status of testing and

implementation of the NMCI network at the point at which the second and third increments of work stations are ordered. The same information shall be submitted when the performance requirements for NAVAIR headquarters have been met and authority for the NMCI contractor to assume responsibility for the remaining 75,000 seats in the third increment is granted. The conferees intend for these reports to be complete but succinct, and to the extent possible to draw upon information already reported within the Department of Defense.

The amendment also requires the General Accounting Office to conduct a study of the impact of NMCI implementation on the rate structure of naval shipyards and depots. Finally, the amendment requires the Secretary of the Navy to identify a single individual whose sole responsibility will be to direct and oversee the NMCI program.

The conferees are concerned that schedule delays have limited the amount of empirical information about the viability and performance of the NMCI. The slowdowns in the NMCI program have resulted in a difficult situation. Continuing the program requires additional orders of work stations, but so few work stations have been converted to the network that it is not yet clear whether the program will operate as intended. Despite some lingering concerns, the conferees have adopted a plan, based on continued demonstrations of successful testing and performance capabilities, that is intended to allow the program to move forward in a prudent manner. The conferees expect that the Navy, in a departure from past practice, will be fully and readily forthcoming with information about and explanations for any future delays or performance concerns. The conferees' designation of a single NMCI manager is intended to facilitate such communication with the Congress, which is of particular importance given the size and operational impact of the NMCI program.

Comptroller General Study and Report of National Guard Distributive Training Technology Project (sec. 363)

The Senate bill contained a provision (sec. 1027) that directed the Comptroller General to conduct a study of the interconnectivity between the voice, data, and video networks of the National Guard Distributive Training Technology Project (DTTP) and other Department of Defense, federal, state and private networks.

The purpose of the study was to identify existing capabilities and future networking requirements for operational support of disaster response, homeland defense, command and control of premobilization forces, training of military personnel, training of first responders and shared use of the DTTP networks by government and members of the networks. The Comptroller General was also directed to identify appropriate connections between DTTP networks and those networks at the federal and state level responsible for disaster response and to identify requirements for, impediments to, and means of improving connectivity between DTTP and the other networks. The Comptroller General was required to submit a report on the study to the Armed Services Committees of the Senate and the House of Representatives no more than 180 days after the date of enactment of the Act.

The House amendment contained no similar provision.

The House recedes with an amendment that clarifies the need for the Army National Guard to establish the current and future requirements associated with the DTTP. In order for the Comptroller General to conduct a proper review and analysis, the Army National Guard must first clearly articulate these requirements. Under the conference agreement the Comptroller General shall submit its report to the Armed Services Committees of the Senate and the House of Representatives within 270 days after the date of enactment of this Act.

Reauthorization of warranty claims recovery pilot program (sec. 364)

The Senate bill contained a provision (sec. 336) that would reauthorize a pilot program allowing the Secretary of Defense to use commercial services to improve the collection of Department of Defense claims for aircraft engine warranties.

The House amendment contained no similar provision.

The House recedes.

Evaluation of current demonstration programs to improve quality of personal property shipments of members (sec. 365)

The House amendment contained a provision (sec. 353) that would require the Department of Defense to complete all demonstration programs to improve the movement on household goods for members of the Armed Forces. The provision also required the Secretary of Defense to submit to the Congress an evaluation of these programs no later than August 31, 2002.

The Senate bill contained no similar provision.

The conferees understand that the Department of Defense has cancelled the remaining pilot program that would have been continued under the House provision. The conferees maintain that re-engineering the household goods moving process continues to be an important quality of life initiative, and that termination of the Full Service Moving Project does not relieve the Department of Defense of its responsibilities to improve the moving process. The Senate therefore recedes with an amendment that would require the Secretary of Defense to complete an evaluation of all ongoing test programs for household goods moves. No later than March 31, 2002, the Secretary shall submit to the Congress a report on the findings of this evaluation, recommendations for policy improvements, and an estimate of associated costs.

Sense of Congress regarding security to be provided at 2002 Winter Olympic Games (sec. 366)

The House amendment contained a provision (sec. 355) that would express the sense of Congress that the Secretary of Defense should provide public safety support for the 2002 Winter Olympic Games in Salt Lake City, Utah.

The Senate bill contained no similar provision.

The Senate recedes with a clarifying amendment that notes the need for the certification of the Attorney General pursuant to section 2564(a) of title 10, United States Code.

LEGISLATIVE PROVISIONS NOT ADOPTED

The Senate recedes on the provision.

The conferees agree to authorize \$6.0 million of the funds available for Operation and Maintenance, Navy, for the critical infrastructure protection initiative.

Environmental restoration, Formerly Used Defense Sites

The Senate bill contained a provision (sec. 307) that would increase the authorized funding for the environmental restoration of Formerly Used Defense Sites (FUDS) by \$40.0 million.

The House amendment contained no similar provision.

The Senate recedes.

The conferees agree to increase funding for environmental restoration of FUDS by \$40.0 million.

The conferees note that there are over 9,000 properties identified for inclusion in the FUDS program, hundreds of which could be categorized as former ranges. Historically, the FUDS program has experienced significant funding shortfalls, making it difficult to execute much needed remediation projects at these sites. In an effort to address this problem, Congress included additional funds for FUDS remediation in fiscal years 2000 and 2001. These funding increases merely helped to address some, not all of the funding shortfalls. The fiscal year 2002 budget request again failed to adequately address this funding problem.

The conferees direct the Secretary of Defense to comprehensively resolve this issue within the Department of Defense with a special emphasis on the Department of the Army. The conferees expect the Secretary of Defense to ensure that the fiscal year 2003 budget request reflects progress in this area. In addition, the conferees direct the Secretary of Defense to submit a report in conjunction with the fiscal year 2003 budget request that provides a future years plan for resolution of the FUDS funding shortfalls.

Expansion of entities eligible for loan, gift, and exchange of documents, historical artifacts, and obsolete combat materiel

The House amendment contained a provision (sec. 354) that would expand the list of entities eligible to receive certain materials from the Department of Defense.

Improvements in instrumentation and targets at Army live-fire training ranges

The Senate bill contained a provision (sec. 306) that would increase funding for improvements in Army live-fire ranges by \$11.9 million, offset by reductions in the fuel accounts of the Defense Working Capital Fund.

The House amendment contained no similar provision.

The Senate recedes on the provision, and the conferees agree to authorize additional funds.

Limitation on workforce reviews

The House amendment contained a provision (sec. 331) that would: (1) limit the number of workforce reviews that could be performed by the Department of Defense until certain conditions were met; and (2) prohibit the conversion of Department of Defense func-

tions to private sector performance unless the cost savings from doing so would be at least 10 percent.

The Senate bill contained no similar provision.
The House recesses.

TITLE V—MILITARY PERSONNEL POLICY

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Officer Personnel Policy

Enhanced flexibility for management of senior general and flag officer positions (sec. 501)

The Senate bill contained a provision (sec. 501) that would increase the grade of the Vice Chief of the National Guard Bureau to lieutenant general, the grades of the heads of the Nurse Corps for the Army and the Air Force to major general and of the Navy to rear admiral (upper half), and the grade of the Chief of Army Veterinary Corps to brigadier general. The provision would also authorize one additional Marine general above the grade of major general and exclude an officer serving as the Senior Military Assistant to the Secretary of Defense in the grade of general or lieutenant general, or admiral or vice admiral, from the limit on officers serving in that grade for his or her service, and would repeal the limit on the number of officers on active duty in the grades of general or admiral.

The House amendment contained a provision (sec. 501) that would repeal the limit on the number of officers on active duty in the grades of general or admiral.

The House recedes with an amendment that would repeal the limit on the number of officers on active duty in the grades of general or admiral.

The conferees are concerned about the various proposals received each year for authorizing new general or flag officer positions, increasing the total number of general and flag officers, and exempting general and flag officers from current grade limits. The conferees are also aware that changes made as a result of the Defense Strategy Review and the Quadrennial Defense Review may result in changes in requirements for general and flag officers.

Rather than addressing individual proposals piecemeal, the conferees direct the Secretary of Defense, using current data and requirements, to conduct a comprehensive review, as delineated by section 1213 of the National Defense Authorization Act for Fiscal Year 1997, of the existing statutory reserve and active general and flag officer authorizations. The Secretary should report the results of the review to Congress no later than six months after the date of enactment of this Act, together with any recommendations for revisions to those authorizations.

Certifications of satisfactory performance for retirement of officers in grades above major general and rear admiral (sec. 502)

The Senate bill contained a provision (sec. 507) that would authorize the Secretary of Defense to delegate to the Under Secretary of Defense for Personnel and Readiness or the Deputy Under Secretary of Defense for Personnel and Readiness the authority to cer-

tify to the President and to Congress that certain officers have served satisfactorily in the grade of general, admiral, lieutenant general, or vice admiral before authorizing retirement in that grade. The provision would require the Secretary of Defense to act personally on cases where there is potentially adverse information that has not previously been reported to the Senate in connection with a previous appointment.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

Review of actions of selection boards (sec. 503)

The Senate bill contained a provision (sec. 585) that would provide that service members or former service members challenging the results of selection boards or promotion boards are not entitled to relief in a judicial proceeding unless the matter was first considered by a special board or a special selection board, or the secretary concerned denied such consideration.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

The conferees do not intend, by this provision, to change the existing authority of the federal courts to determine the validity of any statute, regulation or policy relating to selection boards in any applicable form of action, including, when authorized by law or by the rules of the court, a class action.

Temporary reduction of time-in-grade requirement for eligibility for promotion for certain active-duty list officers in grades of first lieutenant and lieutenant (junior grade) (sec. 504)

The Senate bill contained a provision (sec. 502) that would reduce the minimum time-in-grade for promotion of lieutenants and lieutenants (junior grade) from two years to 18 months.

The House amendment contained a similar provision (sec. 503).

The House recedes with an amendment that would limit this provision to officers with 18 months time-in-grade as first lieutenants and lieutenants (junior grade) before October 1, 2005.

Authority for promotion without selection board consideration for all fully qualified officers in grade of first lieutenant or lieutenant (junior grade) in the Navy (sec. 505)

The Senate bill contained a provision (sec. 503) that would authorize the promotion of officers on the active-duty list and on the reserve active-status list to captain in the Army, Air Force, or Marine Corps, or to the grade of lieutenant in the Navy without selection board action when the secretary concerned determines that all fully qualified officers eligible for consideration for promotion are needed in the next higher grade to accomplish mission objectives. The recommended provision would provide that an officer who is not promoted because the secretary concerned determines that the officer is not fully qualified for promotion would be treated as having failed of selection for promotion.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

Authority to adjust date of rank of certain promotions delayed by reason of unusual circumstances (sec. 506)

The Senate bill contained a provision (sec. 504) that would authorize the service secretaries to adjust dates of rank of officers in grades 0–6 and below when the officers' promotions are delayed because of unusual circumstances causing an unintended delay in the processing or approval of a report of a selection board or promotion list.

The House amendment contained no similar provision.
The House recedes with a clarifying amendment.

Authority for limited extension of medical deferment of mandatory retirement or separation (sec. 507)

The House amendment contained a provision (sec. 505) that would authorize the secretaries of the military departments to extend for an additional 30 days the deferment of mandatory retirement or separation for medical reasons to provide a member additional time to prepare for retirement or separation.

The Senate bill contained a similar provision (sec. 505).
The Senate recedes.

Authority for limited extension on active duty of members subject to mandatory retirement or separation (sec. 508)

The House amendment contained a provision (sec. 506) that would authorize the secretaries of the military departments to extend for an additional 90 days the deferment of mandatory retirement or separation due to the implementation of stop loss authority to provide the military member additional time to prepare for retirement or separation.

Exemption from certain administrative limitations for retired officers ordered to active duty as defense or service attachés (sec. 509)

The Senate bill contained a provision (sec. 506) that would exclude retired members recalled to active duty for service as defense or service attachés from the limitations on the number of retired members who can be recalled to active duty and from the time limit on the period of a recall to active duty.

The House amendment contained no similar provision.
The House recedes with a clarifying amendment.

The Secretary of Defense has repeatedly sought additional exceptions to the limitations on retired members recalled to active duty. The conferees believe that the Secretary of Defense should have more flexibility to recall retired members without seeking legislative authority to do so. Accordingly, the conferees direct the Secretary of Defense to report, not later than March 31, 2002, to the Committees on Armed Services of the Senate and the House of Representatives on an appropriate limit on the number of retirees in pay grade 0–6 and below who could serve on active duty at any one time if the exceptions contained in sections 688(e)(2) and 690(b)(2) of title 10, United States Code, were eliminated.

The House recesses with an amendment that would also authorize the Secretary of the Navy to waive, on a case by case basis, the requirement for a baccalaureate degree in the case of reserve officers whose original appointment as a reserve officer in the Marine Corps was through the Marine Corps meritorious commissioning program.

The conferees intend that the service secretaries grant waivers only to those officers who have demonstrated substantial progress toward achieving the goal of earning a baccalaureate degree.

Improved disability benefits for certain reserve component members (sec. 513)

The House amendment contained a provision (sec. 514) that would remove the requirement that reservists must be performing inactive-duty for training at a site that is outside normal commuting distance before being eligible for disability benefits and programs if they incur or aggravate an injury, illness, or disease in the line of duty when remaining overnight at training locations before or between inactive-duty training periods.

Subtitle C—Joint Specialty Officers and Joint Professional Military Education

Nominations and promotions for joint specialty officers (sec. 521)

The House amendment contained a provision (sec. 521) that would provide for the automatic nomination of any officer who, before or after the enactment of this provision, meets the statutory education and service requirements for nomination as a joint specialty officer (JSO).

The Senate bill contained no similar provision.

The Senate recesses with an amendment that would provide that, during the three-year period following enactment, officers with a joint specialty are expected, as a group, to be promoted at a rate not less than the rate for officers of the same armed force in the same grade and competitive category.

The conferees intend that JSOs must remain highly qualified and competitive for promotion within their services. Following an assessment of recommendations made by an independent study of joint officer management and joint professional military education reforms, Congress will reassess the promotion standard.

Requirement for selection for joint specialty before promotion to general or flag officer grade (sec. 525)

The House amendment contained a provision (sec. 525) that would require that after September 20, 2007, officers promoted to brigadier general or rear admiral (lower half) must be selected as a joint specialty officer (JSO) prior to their promotion.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that would permit waiver of the requirement that officers must be selected as a JSO as a condition for promotion to flag or general officer under certain circumstances.

The conferees note that the Goldwater-Nichols Defense Reorganization Act provided that both joint professional military education and completion of one full tour of joint duty, or, in certain circumstances, completion of two full tours of duty in a joint duty assignment, were required to qualify an officer as a JSO. In addition, the Goldwater-Nichols Act required not only that all future senior leaders of joint forces be joint specialty officers as a condition of assignment as commander of a unified or specified command, but also established that future Vice Chairmen of the Joint Chiefs of Staff would also come from the ranks of JSOs. However, as a precondition for promotion to brigadier general, or rear admiral (lower half) the Goldwater-Nichols Act established a less demanding standard, requiring only the completion of one "full tour" of joint duty, and not requiring Joint Professional Military Education (JPME). Fifteen years after the enactment of the Goldwater-Nichols Act, the conferees believe that it is appropriate to require that officers selected for general and flag officer rank should be drawn from the ranks of JSOs.

The conferees believe that persons promoted to flag and general officer should be held at least to the same standard as other officers qualifying as JSOs. The conferees also believe that it is not unreasonable to expect the services to include completion of JPME and a joint duty tour in the career paths of officers who are ultimately selected for promotion to general and flag officer rank. To that end, the conferees desire that the serving-in waiver be eliminated, if possible, through creative approaches to career management, such as extending mandatory retirement dates upon completion of JPME and/or designation as a JSO; and require that the independent study required elsewhere in this report specifically address the feasibility and implications of eliminating the serving-in waiver.

The conferees expect the Department of Defense to exercise its authority to waive reimbursement in a fiscally prudent manner, recognizing the extraordinary value of a service academy education. The Department should give full consideration to all the factors concerning the ability of the foreign country to provide partial or complete reimbursement. The conferees direct the Secretary of Defense to include in the justification materials submitted with the annual budget request an exhibit describing the number of waivers granted and the rationale for approving the waivers in each service.

The conferees believe that the decision of whether or not to award campaign medals should be the prerogative of the Secretary of Defense.

The Senate bill contained no similar provision.

The Senate recedes with a clarifying amendment.

The conferees note that the Secretary of Defense, using the authority under section 991(d) of title 10, United States Code, recently suspended the requirement for general or flag officers to manage the deployment of certain members and the accumulation of deployment days by individual members. This suspension was justified, and, by delaying the actual payment of high-deployment per diem to individual members, provides additional time for the services to analyze its impact on personnel and assignment policies. To ensure a smooth transition upon termination of this suspension, the conferees urge the Secretary of Defense to afford the services sufficient time to initiate any necessary policy changes to optimize the efficient deployment of military personnel.

The conferees are pleased that effective tracking systems for individual tempo of operations are being developed in all the services and that a robust dialogue within the Department of Defense about the policy, based on facts, is in progress. The Commandant of the Marine Corps and the Chief of Naval Operations, in particular, have expressed concern about potential adverse impact on sailors and Marines who volunteer for extended sea duty and oper-

ational deployments. The Secretary's timely report on the administration of section 991 of title 10, United States Code, due on March 31, 2002, will be a key factor in determining the future course of the management of deployments of service members.

Clarification of disability severance pay computation (sec. 593)

Continued Department of Defense administration of National Guard Challenge Program and Department of Defense STARBASE Program (sec. 596)

The House amendment contained a provision (sec. 587) that, effective October 1, 2002, would eliminate the \$62.5 million statutory limit on Department of Defense spending for the National Guard Youth Challenge Program, and revise the Department of Defense cost share for each state's program from 60 percent to 75 percent.

The Senate bill contained a provision (sec. 1061) that would require the Secretary of Defense to conduct the National Guard Challenge Program and the STARBASE Program.

The House recesses with an amendment that would eliminate the \$62.5 million statutory limit on Department of Defense spending for the National Guard Youth Challenge Program, and provide that the Secretary of Defense would remain the executive agent to carry out the National Guard Challenge Program and the STARBASE Program regardless of the source of funds for the programs or any transfer of jurisdiction over the programs within the Executive Branch.

The conferees believe that both the Challenge and STARBASE programs are being effectively administered by the Department of Defense, and do not mean to suggest by the recommended amendments that either program should be transferred from the DOD to another department of the Executive Branch. Furthermore, the conferees believe that to effect such a transfer would require amendments to current law. If such a transfer were to be proposed and subsequently approved by Congress, the conferees believe that the continuing involvement of the Secretary of Defense would be essential to the long-term effectiveness of both programs. The conferees intend to ensure that the Department of Defense remains closely involved in the conduct of both the STARBASE and Challenge programs.

Report on Defense Science Board recommendation on original appointments in regular grades for academy graduates and certain other new officers (sec. 597)

The House amendment contained a provision (sec. 502) that would require that graduates of the service academies, Reserve Officer Training Corps distinguished graduates, and distinguished graduates of other officer commissioning programs, such as officer candidate schools, be given an initial appointment as an officer in the Regular Army, Navy, Marine Corps and Air Force, as long as they meet the criteria for such appointment.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to submit, within six months of enactment of this Act, a report to the Committees on Armed Services of the Senate and the House of Representatives on the legislative and policy changes required to implement the recommendation of the Defense Science Board that all officers be given initial regular commissions.

Sense of Congress regarding the selection of officers for recommendation for appointment as Commander, United States Transportation Command (sec. 598)

The Senate bill contained a provision (sec. 903) that would have expressed the sense of Congress that the Secretary of Defense should give careful consideration to recommending an officer from the Army or Marine Corps to serve as Commander, U.S. Transportation Command.

The House amendment contained no similar provision.

The House recedes with an amendment that would express the sense of Congress that, when deciding on the next officer to be recommended for appointment as Commander, U.S. Transportation Command, the Secretary of Defense should not rely upon one service which has traditionally provided officers to fill that position, but should select for such recommendation the best qualified officer of the Army, Navy, Air Force, or Marine Corps.

The Senate bill contained no similar provision.
The House recesses.

The conferees note that section 1491(b)(2) of title 10, United States Code, requires that a funeral honors detail for a deceased veteran include at least two members of the armed forces, at least one of whom is a member of the veteran's armed force. Members of the Army National Guard of the United States and the Air National Guard of the United States are members of the armed forces even when performing in a state status. They can participate in a funeral honors detail in either a state or federal status, and should be considered as one of the required members of the armed forces.

The Senate bill contained no similar provision.

The House recesses.

The conferees are aware that this issue has been submitted to the Joint Service Committee on Military Justice for review. The conferees direct that the Secretary of Defense report the results of this review to the Committees on Armed Services of the Senate and the House of Representatives no later than March 1, 2002.

TITLE VI—COMPENSATION AND OTHER PERSONNEL BENEFITS

ITEMS OF SPECIAL INTEREST

Personal and family financial management programs

The conferees are concerned that the secretaries of the military departments are not providing service members sufficient training on the management of personal and family finances, including matters relating to the purchase and financing of automobiles and the use of payday-lender services. The conferees are also concerned that when personal financial problems do occur, the secretaries are not providing adequate supervision to ensure that service members and their families regain financial security.

Accordingly, the conferees direct the secretaries of the military departments to conduct a comprehensive examination of the personal financial management programs operated within their respective departments. The examination shall include, at a minimum: an assessment of the severity and type of personal financial challenges confronting service members; the magnitude of personal debt accumulated by service members; the adequacy of training

and assistance programs available to service members; and the merits of other programs recommended to meet the needs of service members.

The conferees further direct the Secretary of Defense to consolidate and review the examinations conducted by the secretaries of the military departments, identify the best practices from each examination, and assess the need to improve and standardize the programs operated by the secretaries of the military departments. The conferees direct the Secretary of Defense to report the findings of his review to the Committees on Armed Services of the Senate and the House of Representatives by March 31, 2002.

also authorize payment of a single dislocation allowance to married service members, where both husband and wife are members without dependents, when both move to a new duty station and occupy government family quarters.

Subtitle D—Retirement and Survivor Benefit Matters

Contingent authority for concurrent receipt of military retired pay and veterans' disability compensation and enhancement of special compensation authority (sec. 641)

The House amendment contained a provision (sec. 641) that would authorize members of the uniformed services who are qualified for retirement to receive Department of Veterans Affairs disability compensation without a reduction in retired pay if the President proposes and the Congress enacts legislation that would offset the "PayGo" costs of this initiative.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

The conferees are concerned about the current inconsistent practice involving expedited approval of physical disability retirement when death of a service member is imminent and the service member is unable to elect SBP options. In many cases, the services authorize benefits greater than those chosen by most retirees who elect to participate in the Survivor Benefit Plan. The conferees direct the Secretary of Defense to issue regulations by July 1, 2002, governing imminent death retirements.

Subtitle E—Other Matters

Payment for unused leave in excess of 60 days accrued by members of reserve components on active duty for one year or less (sec. 651)

The Senate bill contained a provision (sec. 608) that would authorize payment for accrued leave in excess of the current limit of 60 days to certain members of the reserve components.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

Additional authority to provide assistance for families of members of the armed forces (sec. 652)

The Senate bill contained two provisions regarding assistance to families of members of the armed forces. One provision (sec. 681) would authorize the Secretary of Defense to provide assistance to families of members of the armed forces serving on active duty during fiscal year 2002 in order to ensure that the children of such families obtain needed child care and youth services. Another provision (sec. 682) would authorize the Secretary of Defense to provide family education and support services to families of members of the armed services to the same extent that these services were provided during the Persian Gulf War.

The House amendment contained no similar provision.

The House recedes with an amendment that would combine these provisions.

The conferees' intent is to ensure that the Secretary of Defense has authority to provide the types of family support services provided during the Persian Gulf War.

The conferees recognize that families of deployed members may need expanded family support services, such as crisis intervention, family counseling, family support groups, respite care, and transportation assistance. The conferees encourage the Secretary to expand family support programs associated with military installations and to establish family support centers in other communities that have large populations of families of deployed members. In overseas areas, the Secretary is encouraged to take all reasonable precautions to ensure the safety of children during transportation to and from Department of Defense schools. The conferees also encourage the Secretary to accelerate the completion and dissemination of the High Stress Parenting Materials currently under development through an agreement with the Department of Agriculture.

The conferees are particularly concerned that families of National Guard and Reserve members who are geographically separated from military installations have services comparable to those provided at active duty installations. These services should be available at rates comparable to rates paid by families using military child care and youth programs. Providing affordable child care and youth services to these families may require cooperative agreements between the military and other government or community-based organizations, as well as non-governmental organizations.

Authorization of transitional compensation and commissary and exchange benefits for dependents of commissioned officers of the Public Health Service and the National Oceanic and Atmospheric Administration who are separated for dependent abuse (sec. 653)

The Senate bill contained a provision (sec. 617) that would ensure receipt of career sea pay by all military members, regardless of rank, pay grade, or accrued time in service, if they are assigned to qualifying sea duty.

The House amendment contained no similar provision.

The Senate recesses.

The conferees are pleased that the Navy has recently approved new enhanced sea pay rates and prescribed career sea pay to all sailors on sea duty, including those in pay grades E-1, E-2, and E-3. The conferees expect advance notice of any change in policy that would exclude members of any pay grade from receiving career sea pay who are otherwise eligible.

Equal treatment of reservists performing inactive-duty training for receipt of aviation career incentive pay

The House amendment contained a provision (sec. 616) that would entitle qualified reserve aviators to be paid the full amount of monthly Aviation Career Incentive Pay in the same amount as paid to active duty aviators with the same number of years of aviation service.

The Senate bill contained no similar provision.

The House recesses.

Increase in basic allowance for housing in the United States

The Senate bill contained a provision (sec. 605) that would accelerate the current five-year plan to eliminate out-of-pocket housing expenses by two years, increasing the Basic Allowance for Housing so that, after September 30, 2002, it would not be less than the median cost of adequate housing for members in that grade and dependency status in that area.

The House amendment contained no similar provision.

The Senate recesses.

The conferees believe that service members should not be required to pay out-of-pocket a percentage of their housing costs when they are unable to live in government quarters. The conferees support the plan to eliminate these out-of-pocket expenses and strongly encourage the Secretary of Defense to accelerate this plan.

The Senate bill contained a provision (sec. 713) that would reinforce and expedite reform of TRICARE payment methods. The recommended provision would expedite adoption of Medicare's prospective payments rates for nursing home care, outpatient services, and durable medical equipment.

The House amendment contained a similar provision (sec. 701).

The House recedes with an amendment that would make the effective date 90 days after the date of enactment.

Improvements in administration of the TRICARE program (sec. 708)

The House amendment contained a provision (sec. 703) that would authorize the Secretary of Defense to enter into new contracts for support of delivery of health care under TRICARE by providing flexibility in the choice of contract vehicle and to reduce the nine-month contract start-up time for certain managed care support contractors.

The Senate bill contained no similar provision.

The Senate recedes with a clarifying amendment that would authorize the flexibility in the choice for contract vehicle during the one-year period after the date of enactment of this Act.

The current legislative restrictions pertaining to health care contracting were the result of considerable review and oversight of the Defense Health Program by Congress. This provision will provide the Department of Defense the ability to employ the best contracting practices to improve TRICARE contracts. The conferees wish to allow for review of any proposed changes and careful evaluation prior to permanent modification of legislation pertaining to the program, given the significant impact on beneficiaries and potential cost implications. It is the conferees' intent that any new contracting practices employed by the Department under this provision ensure a smooth transition for beneficiaries and strengthen the integration of health care delivery.

Subtitle B—Senior Health Care

Clarifications and improvements regarding the Department of Defense Medicare-Eligible Retiree Health Care Fund (sec. 711)

The House amendment contained a provision (sec. 715) that would: authorize all uniformed services to participate in TRICARE for Life; clarify that funding for the accrual fund must come from funds available for the health care programs of the participating uniformed services; clarify that Military Treatment Facilities may receive payments from the accrual fund; and limit the Department of Defense's annual cost contribution to the accrual fund to an

amount not to exceed expected payments from the fund in a given year.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would authorize all uniformed services to participate in TRICARE for Life, clarify that funding for the accrual fund must come from funds available for the health care programs of the participating uniformed services, and clarify that Military Treatment Facilities may receive payments from the accrual fund.

Subtitle C—Studies and Reports

The House recedes with an amendment that would change the date to May 1, 2002, by which the Comptroller General must report the results of the study to Congress.

Repeal of obsolete report requirement (sec. 723)

The House amendment contained a provision (sec. 714) that would repeal a reporting requirement in the National Defense Authorization Act for Fiscal Year 2000 (Public Law 106–65; 10 U.S.C. 1074g note) by striking subsection 701(d).

The Senate bill contained no similar provision.

The Senate recedes.

Subtitle D—Other Matters

Prohibition against requiring military retirees to receive health care solely through the Department of Defense (sec. 731)

The House amendment contained a provision (sec. 711) that would prohibit the Secretary of Defense from implementing a policy of forced choice enrollment by military retirees who are eligible for care in the health care facilities and programs of both the Department of Defense and the Department of Veterans Affairs.

The Senate bill contained no similar provision.

The Senate recedes with a clarifying amendment.

Fees for trauma and other medical care provided to civilians (sec. 732)

The House amendment contained a provision (sec. 712) that would direct the Secretary of Defense to conduct a pilot program under which the Brooke Army Medical Center and the Wilford Hall Air Force Medical Center in San Antonio, Texas, may charge civilians, who are not covered TRICARE beneficiaries, fees representing the actual costs of trauma and other medical care provided.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to implement procedures throughout the military health care system to charge civilians who are not covered TRICARE beneficiaries, or their insurers, fees representing the costs of trauma and other medical care provided to those civilians.

Enhancement of medical product development (sec. 733)

The House amendment contained a provision (sec. 713) that would authorize the Secretary of Defense to waive the prohibition against the use of human subjects in research in order to advance research into the treatment of combat casualties.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the research project to directly benefit the subject and to comply with all other applicable laws and regulations.

The conferees intend that the Secretary of Defense would be authorized to waive the requirement for informed consent for research on human subjects only when: (1) the subjects are in a life threatening situation; (2) obtaining informed consent is not feasible; and (3) the research holds out the prospect of direct benefit to the health of the subject. Furthermore, the conferees intend that the research project and the waiver of informed consent must comply with all other statutes and implementing regulations governing human subjects' protection.

Pilot program providing for Department of Veterans Affairs support in the performance of separation physical examinations (sec. 734)

The Senate bill contained a provision (sec. 717) that would authorize the Secretary of Defense and the Secretary of Veterans Affairs to carry out a pilot program in which the Veterans Health Administration would conduct physical examinations of members separating from the uniformed services.

The House amendment contained no similar provision.

The House recesses.

The conferees are aware that the Department of Veterans Affairs is currently conducting a congressionally mandated pilot program for the performance of the physical examinations required in connection with the separation of members of the uniformed services, as well as other disability evaluations.

Several software tools have been developed and implemented and incorporated into the ongoing pilot program. These software tools have resulted in a more streamlined, efficient and accurate disability evaluation process. The software creates the information needed by the Department of Defense for the separating service member and concurrently provides the Department of Veterans Affairs with the information required to determine compensation benefits. This eliminates the need for a second exam and standardizes a "one exam" process while automatically providing the specific information required by the Department of Defense and the Department of Veterans Affairs on their own unique forms.

The conferees direct that, in order to insure consistency in both pilot programs, the Department of Veterans Affairs conduct the separation exams for the Department of Defense utilizing the software developed and implemented in the ongoing pilot program.

Modification of prohibition on requirement of nonavailability statement or preauthorization (sec. 735)

The Senate bill contained a provision (sec. 718) that would authorize the Secretary of Defense to waive the prohibition against requiring statements of nonavailability for authorized health care services, other than mental health services, if certain conditions are met and both beneficiary and congressional notification occurs, with a waiting period prior to implementation. The nonavailability requirement applies to those beneficiaries receiving care under TRICARE Standard.

The House amendment contained a similar provision (sec. 702).

The House recesses with a clarifying amendment that would preclude the Secretary of Defense from waiving the prohibition against requiring nonavailability statements for maternity care.

Transitional health care for members separated from active duty (sec. 736)

The Senate bill contained a provision (sec. 719) that would make permanent the authority for transitional health care benefits for members who are involuntarily separated from active duty, members of reserve components who are separated from active duty of more than 30 days in support of a contingency operation, and members separated from active duty when involuntarily re-

tained on active duty under section 12305 of title 10, United States Code.

The House amendment contained no similar provision.

The House recesses.

Two-year extension of health care management demonstration program (sec. 737)

The Senate bill contained a provision (sec. 714) that would extend, until December 31, 2003, the demonstration program of simulation modeling to improve health care delivery in the Defense Health Program authorized in section 733 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001.

The Senate bill contained a provision (sec. 538) that would authorize the Secretary of Defense and the Secretary of Veterans Affairs to jointly carry out a pilot program of graduate medical education and training for medical personnel of the armed forces in Department of Veterans Affairs' medical centers.

The House amendment contained no similar provision.

The House recesses with an amendment that would include the authority to provide graduate medical education and training of physician employees of the Department of Veterans Affairs as part of the pilot program.

LEGISLATIVE PROVISIONS NOT ADOPTED

Effective date

The Senate bill contained a provision (sec. 710) that would make the TRICARE Benefits Modernization provisions effective on October 1, 2001.

The House amendment contained no similar provision.

The Senate recesses.

TITLE VIII—ACQUISITION POLICY, ACQUISITION MANAGEMENT, AND RELATED MATTERS

ITEMS OF SPECIAL INTEREST

Management reform initiatives

The Secretary of Defense has testified that the Department of Defense (DOD) should be able to achieve five percent savings throughout the Department through management improvements. These savings goals are consistent with analysis presented in numerous governmental and advisory commission reports in past years. For example, in November 2000 the General Accounting Office (GAO) reported that “[m]ost DOD contracting officers included in our review did not follow the General Services Administration’s established procedures intended to ensure fair and reasonable prices when using the Federal Supply Schedule.” The GAO also found, in its January 2001 assessment of performance and accountability in the DOD, that “a number of the Department’s key busi-

ness processes are inefficient and ineffective,” including acquisition processes that are “still too slow and costly” and systems deficiencies that “significantly contribute to improper payments.” In addition, the DOD Inspector General, in an August 2001 report, stated that the DOD is “not obtaining the benefits of sustained competition and reduced costs” that are permitted under current law. The Business Executives for National Security (BENS) Tail-to-Tooth Commission also stated in its October 1997 report that “billions continue to be wasted on inefficient business practices.” Based on these and other reports, and the Secretary’s commitment to improvements in this area, the conferees believe that the Department should be able to achieve significant savings in fiscal year 2002 through more efficient management; reform of business processes; improved processes for the procurement of property and services; and increased use of best business practices adopted from the private sector.

Titles I, II and III of the conference report include reductions totaling \$1.3 billion, to be achieved through management reform initiatives. The conferees expect the Department of Defense to achieve these savings by implementing the requirements of Title VIII, and by pursuing other management efficiencies developed by the Department’s Business Initiative Council. The conferees expect the Department to distribute these reductions across budget activities and programs within the relevant appropriations accounts, based on the dollar value of contracts within those budget activities and programs to which improvements may be appropriately applied.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Procurement Management and Administration

Management of procurement of services (sec. 801)

The Senate bill contained a provision (sec. 801) that would improve the Department of Defense’s management of the acquisition of services by requiring the Department to: (1) Establish a management structure for purchases of services; (2) collect and analyze data on purchases of services; and (3) establish a program review process for major purchases of services.

The House amendment contained no similar provision.

The House recedes with an amendment that would: (1) Ensure that the management structure for the procurement of services shall be comparable to the management structure already in place for the procurement of products; (2) clarify that officials designated to exercise responsibility for the management of the procurement of services may delegate their authority in accordance with criteria established by the Department; and (3) delete redundant requirements and streamline the reporting requirements in the provision.

Savings goals for procurements of services (sec. 802)

The Senate bill contained a provision (sec. 802) that would establish savings goals for the Department of Defense to achieve through the use of improved management practices for procurements of services, including performance-based services con-

tracting; competition for task orders under services contracts; and program review, spending analyses, and other best practices commonly used in the commercial sector.

The House amendment contained no similar provision.

The House recedes with an amendment deleting the requirement for a report by the Comptroller General. The conferees note that this provision directs the Department to achieve savings through improved management practices. It is not intended to require the Department to reduce needed support services provided by contractors.

Competition requirement for purchase of services pursuant to multiple award contracts (sec. 803)

The Senate bill contained a provision (sec. 803) that would require that purchases of products and services in excess of \$50,000 awarded under a multiple award contract shall be made on a competitive basis, subject to limited exceptions.

The House amendment contained no similar provision.

The House recedes with an amendment that would: (1) apply the competition requirement only to purchases of services; (2) raise the threshold for the competition requirement to \$100,000; (3) require that notice to offerors include a description of the work to be performed and the basis on which the selection will be made; and (4) clarify the manner in which the provision would apply to purchases pursuant to the multiple award schedules administered by the Administrator for General Services (GSA schedules). Under the conference agreement, notice could be provided to fewer than all contractors under the GSA schedules, provided that: (1) notice is provided to as many contractors as practicable; and (2) offers are received from at least three qualified contractors or a contracting officer of the Department of Defense determines in writing that he or she was unable to identify additional qualified contractors despite making a reasonable effort to do so.

Reports on maturity of technology at initiation of Major Defense Acquisition Programs (sec. 804)

The Senate bill contained a provision (sec. 804) that would require that critical technologies be successfully demonstrated in a relevant environment before they may be incorporated into a major defense acquisition program.

The House amendment contained no similar provision.

The House recedes with an amendment that would substitute an annual report, in calendar years 2003 through 2006, on the compliance of the Department of Defense (DOD) with the technological maturity requirement established in DOD Instruction 5000.2. Paragraph 4.7.3.2.2.2 of that Instruction states in relevant part:

Technology must have been demonstrated in a relevant environment * * * or, preferably, in an operational environment * * * to be considered mature enough to use for product development in systems integration. If technology is not mature, the DOD Component shall use alternative technology that is mature and that can meet the user's needs.

The report required by the conference agreement would identify and explain any circumstance in which the DOD fails to comply with this requirement with regard to a Major Defense Acquisition Program.

Subtitle B—Use of Preferred Sources

Applicability of competition requirements to purchases from a required source (sec. 811)

The Senate bill contained a provision (sec. 821) that would require Federal Prison Industries (FPI) to compete for future Department of Defense contracts.

The House amendment contained no similar provision.

The House recedes. Under this provision, the Department of Defense, not Federal Prison Industries, will be responsible for determining whether Federal Prison Industries can best meet the Department's needs in terms of price, quality, and time of delivery. If the Department determines that the FPI product is not the best available in terms of price, quality, and time of delivery, the Department is directed to purchase the product on a competitive basis.

Extension of mentor-protége program (sec. 812)

The Senate bill contained a provision (sec. 823) that would codify the pilot mentor-protége program of the Department of Defense and authorize the program in permanent law.

The House amendment contained no similar provision.

The House recedes with an amendment that would extend the program for three years, through September 30, 2005.

Increase of assistance limitation regarding Procurement Technical Assistance Program (sec. 813)

The House amendment contained a provision (sec. 806) that would increase the assistance limitation for the Procurement Technical Assistance Program under section 2414 of title 10, United States Code from \$300,000 to \$600,000.

The Senate bill contained no similar provision.

The Senate recedes. The conferees believe that the Procurement Technical Assistance Program provides valuable support to both state-wide and local centers across the country. The conferees expect the Department of Defense to continue to implement the program in a broad-based manner that supports a variety of both state-wide and local centers.

Subtitle C—Amendments to General Contracting Authorities, Procedures, and Related Matters

Amendments to conform with administrative changes in acquisition phase and milestone terminology and to make related adjustments in certain requirements applicable at milestone transition points (sec. 821)

The Senate bill contained a provision (sec. 831) that would make a series of modifications to title 10, United States Code, and related statutes, to substitute references to the acquisition mile-

stones established by revised Department of Defense Instruction 5000.2 for obsolete references currently contained in those statutes.

The House amendment contained a similar provision (sec. 801).
The House recedes with a technical amendment.

Follow-on production contracts for products developed pursuant to prototype projects (sec. 822)

The Senate bill contained a provision (sec. 805) that would authorize the Department of Defense to enter follow-on production contracts for a limited number of items developed pursuant to transactions (other than contracts, grants, or cooperative agreements) on a sole-source basis.

The House amendment contained no similar provision.
The House recedes.

One-year extension of program applying simplified procedures to certain commercial items (sec. 823)

The House amendment contained a provision (sec. 803) that would extend the test program authorized by section 4202 of the Clinger-Cohen Act of 1996 (Divisions D and E of Public Law 104-106; 110 Stat 654) until January 1, 2004.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would extend the program until January 1, 2003.

Acquisition workforce qualifications (sec. 824)

The Senate bill contained a provision (sec. 813) that would clarify the applicability of the acquisition workforce qualifications in section 1724 of title 10, United States Code and authorize the Secretary of Defense to establish a contracting workforce to deploy in support of contingency operations.

The House amendment contained a similar provision (sec. 802) that would also authorize the Secretary to establish a developmental workforce.

The Senate recedes with an amendment that would clarify that individuals serving in developmental positions may be separated from the civil service if, after a three-year probationary period, they do not meet the qualification requirements established in section 1724 for members of the acquisition workforce.

Report on implementation of recommendations of the Acquisition 2005 Task Force (sec. 825)

The Senate bill contained a provision (sec. 811) that would require the Secretary of Defense to report on the implementation of the recommendations of the Department of Defense Acquisition 2005 Task Force included in the report entitled "Shaping the Civilian Acquisition Workforce of the Future."

The House amendment contained no similar provision.
The House recedes.

Subtitle D—Other Matters

Identification of errors made by executive agencies in payments to contractors and recovery of amounts erroneously paid (sec. 831)

The House amendment contained a series of provisions (sec. 811–819) that would require executive agencies to conduct a program to recover erroneously made payments.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would modify the recovery audit provisions to: (1) modify requirements for the disposition of recovered funds; (2) delete funding requirements for the management improvement program; and (3) delete a provision relating to liability for violation of privacy requirements.

Codification and modification of provision of law known as the “Berry Amendment” (sec. 832)

The House amendment contained a provision (sec. 805) that would codify the requirements of the “Berry Amendment” enacted as section 9005 of the Department of Defense Appropriations Act, 1993 (P.L. 102–396), and modify those requirements to: (1) require advance congressional notification of all waivers; (2) specifically include parachutes on the list of items covered; and (3) clarify that non-appropriated fund entities are not covered.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would codify the requirements of the “Berry Amendment” and clarify that non-appropriated fund entities are not covered. The conferees expect the Department to comply with a reasonable notification request from the Armed Services Committee of the Senate or the House of Representatives. The conferees also expect the Department to ensure that no United States manufacturer can provide the required item in a sufficient quality or quantity before granting a waiver.

Personal services contracts to be performed by individuals or organizations abroad (sec. 833)

The Senate bill contained a provision (sec. 1218) that would amend section 2669 of title 22, United States Code, to authorize the Secretary of State, upon the request of the Secretary of Defense or the head of any other department or agency of the United States, to enter into personal service contracts with individuals to perform services in support of the Department of Defense or such other department or agency.

The House amendment contained a provision (sec. 804) that would authorize the Secretary of Defense to contract with individuals or organizations to perform services in countries with which the United States has no Status of Forces Agreement.

The House recedes.

Requirements regarding insensitive munitions (sec. 834)

The Senate bill contained a provision (sec. 833) that would require the Secretary of Defense to have a program ensuring that munitions are resistant to unplanned stimuli. The provision also required a report to Congress, submitted with the annual budget request. The report would identify all waivers, and the reasons for

such decisions, granted under insensitive munitions regulations, as well as all funding for insensitive munitions programs in the current budget request.

The House amendment contained no similar provision.

The House recedes with an amendment that would clarify the requirement for the Secretary of Defense to ensure that munitions are made as insensitive as possible to unplanned stimuli. It limits the report on waivers granted under insensitive munitions regulations and on associated funding to three years, from fiscal year 2003–2005.

Inapplicability of limitation to small purchases of miniature or instrument ball or roller bearings under certain circumstances (sec. 835)

The Senate bill contained a provision (sec. 832) that would provide certain exceptions to the requirement in section 2534 of title 10, United States Code, to purchase ball and roller bearings from domestic sources.

The House amendment contained no similar provision.

The House recedes with an amendment that would authorize the Department of Defense (DOD) to make purchases of ball and roller bearings from other than domestic sources without obtaining a waiver under section 2534, provided that: (1) no such purchase exceeds the micropurchase threshold of \$2,500; and (2) the cumulative total of such purchases does not exceed \$200,000 in any fiscal year. The DOD would be required to keep track of such purchases to the extent necessary to ensure that it remains in compliance with the annual limitation.

Temporary emergency procurement authority to facilitate the defense against terrorism or biological or chemical attack (sec. 836)

The conference agreement includes a provision that would provide temporary emergency procurement authority to assist the Department of Defense in the defense against terrorism and biological or chemical attack. The provision would provide the following authorities in fiscal years 2002 and 2003: (1) an increase of the micropurchase threshold to \$15,000 for purchases of property and services that would facilitate the defense against terrorism or biological or chemical attack against the United States; (2) an increase of the simplified acquisition threshold to \$250,000 (inside the United States) and to \$500,000 (outside the United States) for contracts awarded in support of a contingency operation or a humanitarian or peacekeeping operation; and (3) authority to treat as commercial items any biotechnology goods and services purchased to facilitate the defense against terrorism or biological or chemical attack. In addition, the provision would require the Secretary of Defense to recommend any additional emergency procurement authority that the Secretary determines is necessary to support operations carried out to combat terrorism.

LEGISLATIVE PROVISIONS NOT ADOPTED

Consolidation of defense contracts

The Senate bill contained a provision (sec. 822) that would prohibit the consolidation of contract requirements in excess of \$5.0 million absent a written determination that the benefits of the acquisition strategy, including the consolidated contract requirements, substantially exceed the benefits of alternative contracting approaches that would involve a lesser degree of consolidation.

The House amendment contained a provision (sec. 807) that would require the Secretary of Defense to track consolidations of contract requirements.

The conference report does not include either provision.

The conferees note that Section 15(p) of the Small Business Act (15 U.S.C. Section 644(p)) requires the Small Business Administration (SBA) to maintain certain data and provide certain reports regarding bundled contracts. This provision also states that the head of a contracting agency shall assist the SBA by providing "procurement information collected through existing agency data collection sources."

There is no requirement in Section 15(p) for the Secretary of Defense to modify existing data collection systems. The conferees direct the Secretary of Defense, when complying with this provision, to ensure that the Department of Defense does not modify existing data collection systems, create new data collection systems, or collect information not available in existing data collection systems to collect data on the consolidation or bundling of contract requirements.

HUBzone small business concerns

The Senate bill contained a provision (sec. 824) that would modify requirements relating to HUBZone small business concerns.

The House amendment contained no similar provision.

The Senate recedes.

Small business procurement competition

The Senate bill contained a provision (sec. 1068) that would address teaming arrangements among small businesses.

The House amendment contained no similar provision.

The Senate recedes.

TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND
MANAGEMENT

ITEMS OF SPECIAL INTEREST

Organizational changes to the Office of the Secretary of Defense

The conferees considered a number of legislative proposals made by the Secretary of Defense to change the organizational structure of the Office of the Secretary of Defense (OSD) to deal with terrorism, homeland defense, and intelligence matters.

While the conferees acknowledge the importance of aligning appropriate organizational resources to address these matters, the conferees decided not to act at this time because of the lack of spec-

ificity of the legislative requests and supporting materials, including the insufficient explanation as to how the proposed changes would fit into the existing statutory structure. The conferees believe that any further changes to the organizational structure of OSD must be made within the context of a unified and consistent framework addressing all elements within the Office.

To that end, the conferees urge the Secretary of Defense to submit to the Committees on Armed Services of the Senate and the House of Representatives a comprehensive plan that would address the following issues related to the organization of the office of the Secretary of Defense: the number and roles of the under secretaries; the appropriate uses of deputy under secretary and principal deputy under secretary positions; the appropriate number and uses of assistant secretaries and their relationship to other positions within the OSD; the consistency of the requirement for Senate confirmation across positions; and the most beneficial organizational structures for increasingly important functions such as combating terrorism, homeland security, and intelligence.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Duties and Functions of Department of Defense Officers

Deputy Under Secretary of Defense for Personnel and Readiness (sec. 901)

The Senate bill contained a provision (sec. 901) that would establish a new position requiring Senate confirmation within the Office of the Secretary of Defense (OSD) known as the Deputy Under Secretary of Defense for Personnel and Readiness. The provision would also reduce the number of assistant secretaries of defense from nine to eight.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

The conferees note that the creation of a Deputy Under-Secretary for Personnel and Readiness will bring the number of deputy under secretaries within the OSD to nine, only four of which require Senate confirmation. Further, there is no consistent organizational approach to the responsibilities and authorities of deputy under secretaries, assistant secretaries, and directors of programmatic offices throughout the four under secretariats within the OSD. The conferees are concerned with this arrangement and have urged the Secretary of Defense elsewhere in this report to submit a comprehensive plan to the Committees on Armed Services of the Senate and the House of Representatives on the optimal organizational structure for the OSD.

Sense of Congress on functions of new Office of Force Transformation in the Office of the Secretary of Defense (sec. 902)

The House amendment contained a provision (sec. 902) that would express the sense of Congress that the Secretary of Defense should consider the establishment of an Office of Transformation within the Office of the Secretary of Defense to advise the Secretary on the various aspects of force transformation and would

further express the sense of Congress that the Secretary should consider providing funding adequate for sponsoring selective prototyping efforts, wargames, and studies and analysis and for appropriate staffing, as recommended by the director of such an Office of Transformation.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that reflects the latest developments in the Department of Defense, including the decision by the Secretary of Defense to establish an Office of Transformation.

Suspension of reorganization of engineering and technical authority policy within the Naval Sea Systems Command pending report to congressional committees (sec. 903)

The Senate bill contained a provision (sec. 906) that would delay the implementation of a Naval Sea Systems Command (NAVSEA) reorganization of engineering and technical authority policy until 60 days after the Secretary of the Navy provides a report on the Navy's plans and justification for the proposed realignment.

The House amendment contained no similar provision.

The House recedes with an amendment that would prohibit the Secretary of the Navy from granting final approval for the reorganization of engineering and technical authority policy within NAVSEA until 45 days after the Secretary submits to the congressional defense committees a report on the details of the reorganization.

Subtitle B—Space Activities

Space Activities (secs. 911–915)

The Senate bill contained a series of provisions (sec. 911–916) that would address concerns about the Department of Defense (DOD) management structure for space activities. The provisions would provide the Secretary of Defense discretionary authority to establish a new position of Under Secretary of Defense for Space, Intelligence and Information; would establish the duties of the position, including serving as the Director of the National Reconnaissance Office; and would require a report from the Secretary on the proposed organization of that office. Upon establishment of the new Under Secretary, the provisions would establish an additional Assistant Secretary of Defense and require that two of the total number of assistant secretaries would have as their principle duties supervision of activities relating to space, intelligence, and information. Both would report to the Under Secretary of Defense for Space, Intelligence, and Information. If the Secretary of Defense failed to exercise the authority to establish the new Under Secretary position, he would be required to submit a report describing the actions he had taken to address the problems in the management and organization of the Department of Defense for space activities that were identified by the Commission to Assess United States National Security Space Management and Organization (Space Commission). The provisions would also require the Comptroller General to assess the progress of the DOD in implementing

the recommendations of the Space Commission; designate the Air Force as the executive agent for space; require the Secretary of Defense to designate space as a major force program; require that the officer commanding the Air Force Space Command have the grade of general; establish a separate space career field; and prohibit the commander of Air Force Space Command from serving simultaneously as the Commander-in-Chief, U.S. Space Command and the commander of the North American Air Defense Command.

The House amendment contained a series of similar provisions (secs. 1401–1408) that would provide discretionary authority for the Secretary of Defense to take the following actions: establish a new position of Under Secretary of Defense for Space Information and Intelligence; establish two new Assistant Secretaries of Defense to serve under the new Under Secretary of Defense; assign the Secretary of the Air Force to be the executive agent of the Department of Defense for planning and execution of space acquisition programs, projects and activities; establish a major force program for the space programs of the Department of Defense; and require that the officer serving as the commander of Air Force Space Command not serve simultaneously as the commander of the North American Air Defense Command or the Commander-in-Chief, U. S. Space Command. The House amendment also included provisions that: would provide discretionary authority to the Secretary of the Air Force to establish a separate space career field and to designate the Under Secretary of the Air Force as the acquisition executive of the Air Force for Department of Defense space programs; and would require an assessment by the Comptroller General of the actions taken by the Secretary of Defense to implement the recommendations contained in the report of the Commission to Assess United States National Security Space Management and Organization. The House amendment also included a provision to clarify that nothing in the foregoing provisions changed the responsibilities of the Director of Central Intelligence.

The conferees recognize that the importance of space programs, projects and activities in support of military activities continues to grow. In the interest of improving the efficiency and effectiveness of U.S. military operations, the conferees agree to a provision (sec. 912) that would require the Secretary of the Air Force to establish and implement policies and procedures to develop a space career field.

The conferees agree to a provision (sec. 913) that would require the Secretary of Defense to submit a report on steps taken to improve management, organization and oversight of space programs, space activities, and funding and personnel resources.

The conferees agree to a provision (sec. 911) that would require the Secretary of Defense to take appropriate actions to ensure that space development and acquisition programs are carried out through joint program offices and, to the maximum extent practicable, ensure that officers of the Army, Navy, Marine Corps, and Air Force are assigned to and hold leadership positions in such joint program offices. This section would also direct the Secretary to designate positions in the Office of the National Security Space Architect as joint duty assignments as appropriate.

The conferees have also included a provision (sec. 914) that requires the Comptroller General to assess the actions taken by the Secretary of Defense to implement the recommendations contained in the Space Commission report.

The conferees also express their view in section 902 that the best qualified officer from any service should be appointed as Commander-in-Chief, U.S. Space Command, and that the appointee be a four-star general or flag officer position.

Both the House and Senate provisions were motivated by a desire to encourage the implementation of the recommendations of the Space Commission, which concluded that the Department of Defense is not adequately organized or focused to meet U.S. national security space needs.

One of the central reforms recommended by the Space Commission was the establishment of a new Under Secretary of Defense for Space, Intelligence, and Information to provide high-level attention and guidance to space programs. This recommendation is not included in the provisions in this conference report primarily because the Secretary of Defense has indicated that he is in the process of implementing the recommendations of the Space Commission and that such a provision would interfere with his freedom to manage the DOD. The conferees, however, do not agree that these provisions would reduce the Secretary's freedom to manage the Department, as the provisions were intended to provide him additional flexibility. The conferees understand, however, that the Secretary has stated his intent not to exercise this authority if it is provided to him.

The conferees also note that the Secretary has stated his intent to designate the Secretary of the Air Force as the executive agent for DOD space programs. The conferees remain concerned that the continuing absence of a coherent, senior-level focus for space programs within the Office of the Secretary of Defense and the concentration of authority and resources for space programs in the Air Force may not be sufficient to resolve the space management and organizational challenges identified by the Space Commission and may inadvertently be a source of new problems. The conferees will carefully review the reports required in sections 913 and 914 and will consider whether there is a need in the future for additional organization and management reforms.

Noting that the Space Commission also concluded that the depth of experience and technical expertise in space operations and technology has suffered over the past decade, the conferees believe establishing a space career field in the Air Force that includes development and operation of space systems and development of space doctrine and operational concepts is key to sustaining U.S. leadership in space. The Chief of Staff of the Air Force recently stated that "space * * * is a separate culture * * * different than what airmen experience in the air * * * We have to respect that, and we have to grow and nurture that culture until it matures."

The conferees are encouraged by the progress made by the Air Force in this direction to date, but believe that the detailed planning and implementation of a space career field must be carefully monitored. The conferees recognize that the commander of Air Force Space Command will be provided the resources and assigned

responsibility to organize, train, and equip for Air Force space development, acquisition and operations. Furthermore, consistent with the implementation guidance issued by the Secretary of Defense on October 18, 2001, the conferees expect that the commander of Air Force Space Command will be assigned appropriate responsibility for managing the space career field.

The conferees further understand that the Secretary of Defense has stated his intent to establish a “virtual major force program” to provide better visibility and insight into DOD funding for space programs and activities. The conferees note that senior DOD officials have contended that establishing a major force program (MFP) for space programs might have serious unintended consequences, although no such consequences have ever been described. The conferees recognize, however, that a virtual MFP—the designation of funding for space programs and activities without formally creating a space MFP—could represent a more flexible approach. Therefore, the conferees expect the virtual MFP for space to be included in the Future Years Defense Program submitted with the 2003 fiscal year budget request.

The conferees, in section 912 of this bill, provided sufficient flexibility in general officer limits to ensure that the commander of Air Force Space Command will serve in the grade of general. The conferees also believe that the officer in this position should not serve concurrently as commander of the North American Air Defense Command or as Commander-in-Chief, U.S. Space Command. The conferees understand that the Secretary intends to implement these Space Commission recommendations and will continue to monitor the Department’s actions in these matters.

Subtitle C—Reports

Revised requirement for Chairman of the Joint Chiefs of Staff to advise Secretary of Defense on the assignment of roles and missions to the armed forces (sec. 921)

The House amendment contained a provision (sec. 904) that would repeal the requirement contained in section 153(b) of title 10, United States Code, for the Chairman of the Joint Chiefs of Staff to submit a review of the assignment of roles and missions of the armed forces to the Secretary of Defense every three years. The provision would also amend section 118 of title 10, United States Code, to require the Chairman to conduct such a review as part of the Quadrennial Defense Review (QDR) process and that the results of that review be included in the Chairman’s assessment of the QDR that is submitted to Congress.

The Senate bill contained a similar provision (sec. 1023).

The Senate recedes with an amendment that also requires the Chairman of the Joint Chiefs of Staff to submit to Congress no later than one year after the date of the enactment of this Act a separate assessment of the assignment of roles and missions of the armed forces based upon the findings in the 2001 QDR issued by the Secretary of Defense on September 30, 2001.

Revised requirements for content of annual report on joint warfighting experimentation (sec. 922)

The Senate bill contained a provision (sec. 905) that would amend section 485 of title 10, United States Code, to clarify some of the contents of the annual joint warfighting report and require the inclusion of a specific assessment of whether there is a need for a major force program, or some other resource mechanism, for funding joint experimentation and for funding the rapid development and acquisition of uniquely joint warfighting technologies that have been empirically demonstrated through such experimentation.

The House amendment contained no similar provision.

The House recedes with a technical amendment.

Repeal of requirement for one of three remaining required reports on activities of Joint Requirements Oversight Council (sec. 923)

The House amendment contained a provision (sec. 905) that would repeal section 916 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 that requires the Chairman of the Joint Chiefs of Staff to submit a semi-annual report to the Committees on Armed Services of the Senate and House of Representatives on specific activities of the Joint Requirements Oversight Council through March 1, 2003.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that repeals the requirement for one of the three remaining reports and provides for the March 1, 2003 report to cover all of the preceding fiscal year.

Revised joint report on establishment of national collaborative information analysis capability (sec. 924)

The House amendment contained a provision (sec. 903) that would require the Secretary of Defense and the Director of Central Intelligence to submit a revised report assessing alternatives for the establishment of a national collaborative information analysis capability. The provision would direct that the revised report focus on only the range of architecture alternatives that would involve the participation of all federal agencies involved in the collection of intelligence.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require that the report identify legislative or regulatory changes that would be needed in order to implement the preferred architecture in the report.

The conferees note that the original provision in the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 included direction that the architectures contemplated for the original report, and, by reference, this revised report, should be consistent with requirements of the Privacy Act of 1974, as amended.

Subtitle D—Other Matters

Conforming amendments relating to change of name of Military Airlift Command to Air Mobility Command (sec. 931)

The Senate bill contained a provision (sec. 907) that would change references in the United States Code to the former Military Airlift Command to refer to the command by its current designation as the Air Mobility Command.

The House amendment contained a similar provision (sec. 906).

The House recedes with an amendment that would clarify that the changes would be made to current references to the Military Airlift Command.

Organizational realignment for Navy Director for Expeditionary Warfare (sec. 932)

The Senate bill contained a similar provision (sec. 904).

The Senate recedes.

LEGISLATIVE PROVISIONS NOT ADOPTED

Reductions in acquisition and support workforce

The Senate bill contained a provision (sec. 812) that would establish a moratorium on further cuts in the acquisition workforce for three years.

The House amendment contained a provision (sec. 901) that would mandate a reduction of 13,000 in the acquisition workforce in fiscal year 2002.

The conference agreement does not include either provision.

Responsibility of the Under Secretary of the Air Force for acquisition of space launch vehicles and space launch services

The Senate bill contained a provision (sec. 902) that would assign responsibility for the acquisition of space launch vehicles and space launch services for the Department of Defense and the National Reconnaissance Office (NRO) to the Under Secretary of the Air Force.

The House amendment contained no similar provision.

The Senate recedes.

The conferees note that the Air Force has managed and contracted for the acquisition of space launch vehicles and services for both the Air Force and the NRO. This arrangement has allowed the Air Force to achieve cost savings and efficiencies of scale for both organizations. The conferees continue to oppose proposals that would require the NRO to manage and contract for its own launch vehicles and services.

TITLE X—GENERAL PROVISIONS

Counter-Drug Activities

The budget request for drug interdiction and other counter-drug activities of the Department of Defense (DOD) for fiscal year 2002 totaled approximately \$1.0 billion: \$820.4 million in the central transfer account; \$166.8 million in the operating budgets of the military services for authorized counter-drug operations; and \$12.5 million in the military construction account for infrastructure improvements at the forward operating locations.

The conferees recommend the following fiscal year 2002 budget for the Department's central transfer account.

Operation Caper Focus

The conferees also agree to authorize an additional \$4.0 million for Operation Caper Focus, an important initiative to disrupt narcotics trafficking in the Eastern Pacific. To the extent that assets become available, the conferees expect the Secretary of Defense to make them available for Operation Caper Focus.

Tethered Aerostat Radar System

The conferees direct that a higher priority be given to operational availability of the Tethered Aerostat Radar System than to its modernization.

ITEMS OF SPECIAL INTEREST

Automobile Safety Program

The conferees are concerned with the number of deaths and serious injuries to military service members and Department of Defense civilian employees due to automobile collisions and strongly support innovative safety programs designed to eliminate these accidents. The conferees understand that an automobile safety pro-

gram recently conducted at Fort Polk, Louisiana is proving to be a sound and successful attempt at accident reduction. The conferees recommend that the Secretary of Defense consider an expansion of the program to assist in achieving the Department's safe driving goals.

The Senate recedes.

Maximum amount for National Foreign Intelligence Program (sec. 1006)

The conferees agree to include a provision that would establish a ceiling for authorization for the National Foreign Intelligence Program (NFIP) equal to the amounts requested by the President in the budget request for fiscal year 2002. The provision would allow this ceiling to be increased by any amounts provided for the NFIP in the Emergency Terrorism Response Supplemental Appropriations Act, 2001, and any fiscal year 2002 supplemental appropriations bills.

Clarification of applicability of interest penalties for late payment of interim payments due under contracts for services (sec. 1007)

(1) research, development, test and evaluation of ballistic missile defense programs; and

(2) activities for combating terrorism.

The House amendment contained a comparable provision (sec. 1501) that would increase by \$400.0 million the funding for the following activities to combat terrorism: intelligence programs, anti-terrorism initiatives, counter-terrorism initiatives, and consequence management activities. The provision included transfer authority and provided offsetting reductions of \$265.0 million for ballistic missile defense activities, and \$135.0 million for consulting services in the Defense-Wide operation and maintenance account.

The House amendment also contained a provision (sec. 1502) that would require that funds transferred under the authority of section 1501 be merged with and available for the same period of time as the appropriations to which transferred.

The House recedes with an amendment that would authorize the \$1.3 billion for whichever of the following purposes the President determines to be in the national security interests of the United States:

(1) research, development, test and evaluation of ballistic missile defense programs of the Ballistic Missile Defense Organization; and

(2) activities of the Department of Defense for combating terrorism.

(1) on a grant basis, one *Oliver Hazard Perry*-class frigate and six *Knox*-class frigates; and

(2) on a sale basis, four *Kidd*-class destroyers and two *Oliver Hazard Perry*-class frigates.

The provision would direct that, to the maximum extent practicable, the President shall require, as a condition of transfer, that repair and refurbishment associated with the transfer be accomplished in a shipyard located in the United States.

The House amendment contained no similar provision.

The House recedes with an amendment that would provide authority for the President to waive lease payments for up to one year for vessel transfers that:

(1) would be converted, under the provisions of this Act, from a lease to a grant; and

(2) are among the grant transfers approved in this Act.

Sale of Glomar Explorer to the lessee (sec. 1012)

The Senate bill and the House amendment did not contain any provision relating to the current lease arrangement for the vessel *Glomar Explorer*.

The conferees agree to include a provision that would authorize the Secretary of the Navy, at his discretion, to sell the *Glomar Explorer* (AG-193) to the current lessee. Any such sale would have to be based on a price that represents a fair and reasonable amount, as determined by the Secretary.

Leasing of Navy ships for University National Oceanographic Laboratory System (sec. 1013)

The Senate bill contained a provision (sec. 1067) that would modify section 2667, title 10, United States Code to allow the Navy to renew the five-year leases for certain Navy research vessels without recompeting them, as long as the initial lease was awarded competitively.

The House amendment contained no similar provision.

The House recesses with an amendment that restates section 1004 but does not codify it, makes it effective during fiscal years 2002 through 2006, and makes several technical changes.

Extension of reporting requirement regarding Department of Defense expenditures to support foreign counter-drug activities (sec. 1022)

The House amendment contained a provision (sec. 1021) that would extend for an additional year the requirement in the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 that the Secretary of Defense report to the congressional defense committees detailing the expenditure of funds in direct or indirect support of the counter-drug activities of foreign governments.

The Senate bill contained no similar provisions.

The Senate recesses.

Authority to transfer Tracker aircraft currently used by Armed Forces for counter-drug purposes (sec. 1023)

The House amendment contained a provision (sec. 1022) that would authorize the Secretary of Defense to transfer all Tracker aircraft in the inventory of the Department of Defense to the administrative jurisdiction and operational control of another federal agency. The provision also provided that any Tracker aircraft remaining in the inventory of the Department of Defense after September 30, 2002 may not be used by the armed forces for counter-drug purposes after that date.

The Senate bill contained no similar provision.

The Senate recesses.

Limitation on use of funds for operation of Tethered Aerostat Radar System pending submission of required report (sec. 1024)

The House amendment contained a provision (sec. 1023) that would authorize the Secretary of Defense to transfer to the administrative jurisdiction and operational control of another federal agency the Tethered Aerostat Radar System (TARS) currently used by the armed forces in counter-drug detection and monitoring. The provision also provided that if the TARS is not transferred by September 30, 2002, it may not be used by the armed forces for counter-drug purposes after that date.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that provides that not more than 50 percent of the funds available for fiscal year 2002 for operation of the TARS may be obligated or expended until such time as the Secretary of Defense submits to Congress the report on the status of the TARS required to be submitted by the Secretary, in consultation with the Secretary of the Treasury, by the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001. The conferees direct that the report contain a new review of the requirements of the Department of Defense and the Department of the Treasury, including the U.S. Customs Service, and a new assessment of the value of the TARS in the conduct of counter-drug detection and monitoring and border security and air sovereignty

operations in light of the changed circumstances in the aftermath of the September 11, 2001 terrorist attacks.

Subtitle D—Strategic Forces

Repeal of limitation on retirement or dismantlement of strategic nuclear delivery systems (sec. 1031)

The Senate bill contained a provision (sec. 1011) that would repeal section 1302 of the National Defense Authorization Act for Fiscal Year 1998, which prohibits the obligation or expenditure of funds to retire or prepare to retire certain strategic nuclear delivery systems until the START II Treaty enters into force.

The House amendment contained a similar provision (sec. 1043) that would amend section 1302 to allow the retirement of Peacekeeper Intercontinental Ballistic Missiles.

The House recedes.

Air Force bomber force structure (sec. 1032)

The Senate bill contained a provision (sec. 1012) that would prevent the Department of Defense from retiring or dismantling any of the 93 B-1B Lancer bombers in the Air National Guard, or from transferring or reassigning any of those aircraft, until 30 days after delivery of a series of reports to the Armed Services Committees of the Senate and House of Representatives, including: (1) the national security strategy; (2) the Quadrennial Defense Review; (3) a report detailing the analysis for any consolidation and force structure reduction, along with Department plans for the National Guard units currently flying B-1B bombers; and (4) the revised Nuclear Posture Review. The provision would also require the Comptroller General to conduct a study and submit a Government Accounting Office (GAO) report on the proposed consolidation and force structure reduction by January 31, 2002.

The House amendment contained a similar provision (sec. 1045) that would differ from the Senate position only in that the GAO report would not be due until 180 days after the Department's report of analysis of the consolidation and force structure reduction.

The conferees agree to a provision that would greatly streamline the reporting requirements. The provision would prevent the obligation of funds for retiring, dismantling, transferring, or reassigning any of the 93 B-1B bombers until 15 days after the Secretary of the Air Force submits a report that provides details of the proposed consolidation, force structure reduction, and plans for affected National Guard units. This provision is not intended in any way to prevent the initiation of planning activities for the execution of this plan.

Additional element for revised nuclear posture review (sec. 1033)

The Senate bill contained a provision (sec. 1013) that would amend section 1041 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 by adding a new element to the nuclear posture review. The new element would direct the Secretary of Defense to look at the possibility of deactivating or dealerting nuclear warheads or delivery systems.

The House amendment contained no similar provision.

The House recesses.

The conferees are aware that the concepts of deactivating and early deactivation of nuclear weapons and systems have been the subject of debate and discussion, and that there are a range of views with respect to these critical issues. By adding this additional requirement to the Nuclear Posture Review (NPR), the conferees wish to have the benefit of a careful and thorough review of these concepts in the broader context of the NPR. Inclusion of this additional element is not intended by the conferees to presuppose the outcome of this review.

Report on options for modernization and enhancement of missile wing helicopter support (sec. 1034)

The Senate bill contained a provision (sec. 1073) that would require the Secretary of Defense to submit a report, with submission of the fiscal year 2003 budget request, that would provide information on the Secretary's preferred option for furnishing helicopter support for the Air Force intercontinental ballistic missile wings. The provision included certain options that should be considered, allowed additional options to be considered, and included factors that should be considered in the review process.

The House amendment contained no similar provision.

The House recesses with an amendment that would specify that the report must be submitted not later than the date of the submission of the fiscal year 2003 budget request.

Subtitle E—Other Department of Defense Provisions

Secretary of Defense recommendation on need for Department of Defense review of proposed federal agency actions to consider possible impact on national defense (sec. 1041)

The House amendment contained a provision (sec. 312) that would require the Secretary of Defense to include a national security impact statement in each environmental impact statement or environmental assessment prepared in connection with a Department of Defense action.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that would require the Secretary of Defense to submit to the President the Secretary's recommendation as to whether there should be established within the Executive Branch a defense impact review process and to submit a copy of that recommendation to Congress. For the purposes of this section, a defense impact review process means a process that provides for review of certain proposed actions of other federal agencies to identify any reasonably foreseeable significant adverse impact of such a proposed action on national defense.

Department of Defense reports to Congress to be accompanied by electronic version upon request (sec. 1042)

The House amendment contained a provision (sec. 1031) that would require that the Department of Defense submit copies of reports to Congress in an electronic medium.

The Senate bill contained no similar provision.

The Senate recedes with an amendment providing that the Department must provide electronic reports only upon request.

Department of Defense gift authorities (sec. 1043)

The House amendment contained a provision (sec. 1041) that would clarify items that may be loaned or given under section 7545 of title 10, United States Code. The House amendment also contained a provision (sec. 354) addressing the entities to which such items may be loaned or given.

The Senate bill contained no similar provision.

The Senate recedes with an amendment combining the two provisions.

Acceleration of research, development, and production of medical countermeasures for defense against biological warfare agents (sec. 1044)

The Senate bill contained a provision (sec. 1025) that would authorize the Secretary of Defense, subject to the availability of authorized and appropriated funds for such purpose, to design, construct and operate on an installation of the Department of Defense a government-owned, contractor-operated (GOCO) vaccine production facility. The provision would also require the Secretary of Defense to develop a long-range plan for the production and acquisition of vaccines to defend against biological warfare agents, including an evaluation of vaccine production options, and to report to the congressional defense committees on that plan by February 1, 2002.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to carry out an accelerated program of research, development and production of medical countermeasures to defend against the highest threat biological warfare agents. In order to accomplish this objective, the conferees believe that the Department of Defense should invest in multiple new technologies for the prevention and treatment of anthrax and should take advantage of ideas and candidate technologies from the bio-tech industry. The conferees believe that the Department should consider the following approaches in this effort: understanding the germination process of anthrax spores and the means to inhibit this process; identifying the molecular behavior of the anthrax toxin and the means to intervene against it at the cellular level; investigating recombinant protein antigens and formulating new vaccines, including multivalent vaccines that may be effective against multiple strains of pathogens; investigating technologies to be used as an adjunct to antibiotic treatment that may be more effective in clearing pathogens from circulation; and determining potential means for optimizing and extending immunity in humans.

The amendment would also require a study by the National Research Council and the Institute of Medicine of the review and approval process for such medical countermeasures. Finally, the amendment would provide discretion for the Defense Department to use up to \$10.0 million of available research and development funds for the accelerated program.

The conferees note the importance to the Department of Defense of producing and acquiring products needed to prevent or mitigate the physiological effects of exposure to biological warfare agents, including vaccines, decontamination capabilities and therapeutic treatments. The Department of Defense has made significant progress in this area, as indicated in the July 2001 Annual Report to Congress on the Department of Defense Chemical and Biological Defense Program.

However, the conferees believe that more needs to be done to ensure the development and acquisition of needed products, including the transition of developmental items through the review and approval process, particularly vaccines and drugs. The conferees urge the Department to expand its efforts to acquire new technologies and products to defend against biological warfare agents.

Chemical and biological protective equipment for military personnel and civilian employees of the Department of Defense (sec. 1045)

The Senate bill contained a provision (sec. 1069) that would require a report on the requirements of the Department of Defense regarding chemical and biological protective equipment for military personnel and civilian employees of the Department. The provision would also express the sense of Congress on possible sources of funding for such equipment.

The House amendment contained no similar provision.

The House recedes with an amendment that would include an assessment of an appropriate level of protection for civilian employees of the Department of Defense against chemical and biological attack, and would eliminate the proposed sense of Congress.

Sale of goods and services by Naval Magazine, Indian Island, Alaska (sec. 1046)

The Senate bill contained a provision (sec. 1070) that would allow the Secretary of the Navy to sell, on a reimbursable basis, goods and services from Naval Magazine, Indian Island, that are not available from other commercial sources.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

Report on procedures and guidelines for embarkation of civilian guests on naval vessels for public affairs purposes (sec. 1047)

The Senate bill contained a provision (sec. 1072) that would require the Secretary of the Navy to submit a plan to Congress to ensure that the embarkation of civilian guests for the purpose of furthering public awareness of the Navy and its mission does not interfere with the operational readiness and safe operation of Navy vessels. The plan would cover a number of specific areas.

The House amendment contained no similar provision.

The House recedes with an amendment that requires the Secretary of the Navy to submit a report to the Committees on Armed Services of the Senate and the House of Representatives setting forth the procedures and guidelines of the Navy for the embarkation of civilian guests on naval vessels for public affairs purposes and that modifies the specific areas to be covered in the report.

Technical and clerical amendments (sec. 1048)

The House amendment contained a provision (sec. 1046) making technical and clerical amendments to title 10, United States Code, and related statutes.

The Senate bill contained no similar provision.

The Senate recesses.

Termination of referendum requirement regarding continuation of military training on the island of Vieques, Puerto Rico, and imposition of additional conditions on closure of training range (sec. 1049)

The House amendment contained a provision (sec. 1042) that would repeal the provisions contained in Title XV of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 that would require a referendum on the continuation of military training on Vieques and authorize additional economic assistance for Vieques in the event continued training was approved by such referendum. The House amendment would specify that the Secretary of the Navy could close the Vieques range only if the Chief of Naval Operations and the Commandant of the Marine Corps jointly certified that an alternative training facility was available that provided an equivalent or superior level of training at a single location.

The House amendment would also revise the provisions of that Act transferring jurisdiction of the training range and other lands on the eastern end of Vieques to the Secretary of the Interior if training operations on Vieques were terminated, and would instead require that the land be retained by the Secretary of the Navy.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that would give the Secretary of the Navy the authority to close the Vieques Naval Training Range if the Secretary certifies to the President and Congress that an alternative training facility or facilities that provide equivalent or superior training exist and are available. The Secretary's certification would take into account the views and recommendations of the Chief of Naval Operations and the Commandant of the Marine Corps. If the Secretary terminates training operations on Vieques, the lands on the eastern end of the island would be transferred to the jurisdiction of the Secretary of the Interior.

The conferees note the views of the administration on this matter, as stated in a letter from the Deputy Secretary of Defense on November 29, 2001:

Consistent with the commitments made by both the President and Secretary England, the Navy remains committed to identifying a suitable alternative and is planning to discontinue training operations on the island of Vieques in May of 2003, contingent upon the identification and establishment of a suitable alternative. However, until a suitable alternative is established, Vieques remains an important element in the training of our forces deploying to fight the war.

Subtitle F—Other Matters

Assistance for firefighters (sec. 1061)

The Senate bill contained a provision (sec. 1071) that would increase the authorization of appropriations for federal grants to state or local firefighters in section 33 of the Federal Fire Prevention and Control Act of 1974, as added by title XVII of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001, from \$300.0 million to \$600.0 million in fiscal year 2002, and would extend and increase the authorizations to \$800.0 million in fiscal year 2003 and \$1.0 billion in fiscal year 2004.

The House amendment contained a provision (sec. 1049) that would name the program after the late Floyd D. Spence and would state the sense of Congress that the grant program should be reauthorized at increased funding levels.

The House recedes with an amendment that would increase the authorization of appropriations for these grants to \$900.0 million per year for fiscal years 2002, 2003 and 2004, clarify that grants under this program would be available for training and equipment to respond to terrorism or the use of weapons of mass destruction, and specify that up to three percent of the funds authorized for these grants could be used for administration of the grant program by the Federal Emergency Management Agency.

The House amendment contained a similar provision (sec. 1048) that contained findings regarding the volunteer aviators who fought with the Lafayette Escadrille during World War I and the state of the memorial, and that would express the sense of Congress that funds should be provided to restore the memorial.

The House recedes with an amendment that would authorize the Secretary of the Air Force to make the grant after he submits a report on the contributions to the restoration made by the government of France. The conferees also agree to require an annual report on the use of the grant funds, to require that the Foundation make their records available for audit by the Air Force and the General Accounting Office, and to require an engineering analysis of and report on the cost of fully restoring the memorial. The additional cost of the engineering analysis is not intended to reduce the amount of the grant to the Foundation. The cost of both the grant and the engineering analysis would be funded from the operation and maintenance account of the Air Force.

The conferees do not intend this provision to establish a precedent for federal funding of privately operated memorials.

LEGISLATIVE PROVISIONS NOT ADOPTED

Action to promote national defense features program

The House amendment contained a provision (sec. 1053) that would direct the Secretary of Defense to certify to the Federal Maritime Commission restrictive trade practices for cases in which vessels built, or to be built, under the National Defense Features (NDF) program are involved.

The Senate bill contained no similar provision.

The House recedes.

The conferees agree the NDF program has the potential to provide incentive for construction of commercial ships in the U.S.

The strategic sealift NDF program provides compensation for commercial ships that have Defense Department unique alterations required for carrying defense cargo. The program was intended to reduce the requirement for government-owned ships by supplementing them, when required, with commercial shipping capable of carrying Defense Department unique cargo such as tanks, heavy vehicles, and ammunition.

The NDF program can only be successful if commercial ship owners decide to build ships in U.S. shipyards based on the potential for successful operations when not involved in defense department operations.

Although it is not the responsibility of the Secretary of Defense to monitor commercial shipping trade issues, it is within the purview of the Secretary to assess and report to Congress on the Defense Department's ability to provide the required strategic sealift.

Thus, the Secretary is directed to notify Congress when he determines that a strategic sealift deficiency exists, and measures to correct such a deficiency are not being undertaken because of the unwillingness of commercial ship owners to participate in the NDF program.

Assignment of members to assist border patrol and control

The House amendment contained a provision (sec. 1024) that would authorize the use of military personnel to assist the Immigration and Naturalization Service and the Customs Service in preventing the entry of terrorists, drug traffickers, weapons of mass destruction, illegal narcotics and related items into the United States.

The Senate bill contained no similar provision.

The House recesses.

In the wake of the events of September 11, the conferees believe that a full review of the strategy, roles and responsibilities of the Department of Defense in combating terrorism is warranted. Therefore, the conferees direct elsewhere in this report that the Secretary of Defense conduct a study of the appropriate role of the Department with respect to homeland security and report to Congress on such matters.

The decision not to include this provision in this conference report does not reflect any change in the strong support for the issuance of savings bonds in both Houses of Congress, as expressed by the Senate when it approved this provision and by the House of Representatives when it approved H.R. 2899, the "Freedom Bonds Act of 2001".

The conferees note that the administration has been reviewing the current nonproliferation programs. The conferees urge the administration to bring this review to a close, decide on a path forward for these important programs, and implement a coordinated government-wide nonproliferation strategy as soon as possible. As President Bush stated in his November 13, 2001 joint statement with Russian President Putin: “Our highest priority is to keep terrorists from acquiring weapons of mass destruction. The Senate recedes with an amendment that would prohibit the Secretary of Defense from spending more than 50 percent of the funds available for the CTR program for fiscal year 2002 until the Secretary submits the reports required by the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001.

Requirement to consider use of revenue generated by activities carried out under Cooperative Threat Reduction programs (sec. 1304)

The House amendment contained a provision (sec. 1304) that would require the Secretary of Defense to submit a report describing plans to monitor the use of revenue generated by Cooperative Threat Reduction (CTR) program activities in Russia and Ukraine.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would direct the Secretary of Defense to consider the revenue generated by CTR program-related activities in Russia when carrying out the CTR program.

Prohibition against use of funds for second wing of fissile material storage facility (sec. 1305)

The House amendment contained a provision (sec. 1305) that would prohibit the use of all Cooperative Threat Reduction (CTR) program funds for construction of a second wing for the fissile ma-

terial storage facility in Mayak, Russia. The provision would also cap the amount of funds spent on the first wing of the facility at \$412.6 million.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would prohibit fiscal year 2002 CTR funds, and CTR funds previously authorized and appropriated, from being used to construct a second wing of the storage facility for fissile material storage in Mayak, Russia. The conferees believe that if the Department of Defense should decide in the future that a second wing of the facility is needed, the Secretary should specifically request funds for this purpose. The provisions would also clarify that the spending cap on the Mayak facility would not apply to any expenditures related to security.

Prohibition against use of funds for certain construction activities (sec. 1306)

The House amendment contained a provision (sec. 1306) that would prohibit the use of Cooperative Threat Reduction (CTR) program funds from being used for construction or refurbishment of fossil fuel energy plants in Russia.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would prohibit the use of fiscal year 2002 funds from being used for construction activities associated with the program with the Russian government to eliminate the production of weapons grade plutonium. The conferees direct the Secretary of Defense to use the funds authorized in section 1302 to identify a workable cooperative program and plan that would allow these reactors to be shut down or to stop producing plutonium as quickly and as inexpensively as possible. The plan should include specific milestones and budgetary information for all construction, manufacturing, and operational costs associated with the plan. In formulating the approach, the Secretary should take into consideration the ability of the Russian government and the international community to contribute to this effort. The conferees continue to support the goal of eliminating plutonium production and urge the Secretary to request funds in the future for this effort to support an agreed-upon program plan. The conferees note that this program has been delayed by the lack of an agreed-upon program plan for several years.

Reports on activities and assistance under Cooperative Threat Reduction programs (sec. 1307)

The House amendment contained a provision (sec. 1307) that would amend section 1308 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 to modify the report on activities and assistance under Cooperative Threat Reduction (CTR) programs.

The Senate bill contained no similar provision.

The Senate recedes.

Chemical weapons destruction (sec. 1308)

The Senate bill contained a provision (sec. 1203) that would amend section 1305 of the National Defense Authorization Act for Fiscal Year 2000 to establish a certification process by the Sec-

retary of Defense that must be completed before any funds could be spent for construction of a chemical weapons destruction facility at Shchuch'ye, Russia. The provision would also provide authority for the President to waive the prerequisite dealing with information provided by Russia about its stockpile of chemical munitions. The provision also required a commitment on the part of others to assist with the costs related to the facility.

The House amendment contained a similar provision (sec. 1309) that would require preconditions but did not provide authority to waive the one prerequisite and did not contain the requirement for a commitment by others to assist with the costs.

The Senate recesses with an amendment that would include the requirement on cost contributions by others and would clarify the requirements of the certification with respect to the Russian disclosure of its chemical weapons. This clarification will allow the certification to be made as soon as the United States assesses that the disclosure by Russia is accurate. The conferees believe that the certification, as clarified, can be made promptly, and thus believe that the waiver authority is not required. The conferees support this important program and urge the Secretary to implement this program as soon as possible.

Additional matter in annual report on activities and assistance under Cooperative Threat Reduction programs (sec. 1309)

The Senate bill contained a provision (sec. 1205) that would amend the annual report to include a new section describing the amount of the annual commitment from the international community and from Russia for the chemical weapons destruction facility at Shchuch'ye.

The House amendment contained no similar provision.

The House recesses.

LEGISLATIVE PROVISIONS NOT ADOPTED

Report on responsibility for carrying out Cooperative Threat Reduction programs

The House amendment contained a provision (sec. 1308) that would require the Secretary of Defense to submit a report containing an assessment of Cooperative Threat Reduction (CTR) projects currently under the auspices of the Department of Defense (DOD) and describing options for transferring responsibility for CTR projects to other agencies, as appropriate.

The Senate bill contained a related provision (sec. 1204) that would require the CTR program to continue to be financed, managed, and implemented by the DOD.

The House recesses and the Senate recesses.

The Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (NDAA) directed the Secretary to submit a report similar to that requested in the House provision. The Secretary has not submitted this report, which was due in January, 2001. The conferees are aware that the report is complete. The conferees urge the Secretary to submit the required report and other required reports on the CTR program, which are also late, as quickly as possible. The conferees note that in spite of statutory changes made

in the NDAA to the reporting requirements to accommodate DOD concerns, the DOD still has not submitted the reports required by law.

TITLE XIV—ARMED FORCES RETIREMENT HOME

LEGISLATIVE PROVISIONS ADOPTED

Amendment of Armed Forces Retirement Home Act of 1991 (sec. 1401)

The Senate bill contained a provision (sec. 1041) that would revise the Armed Forces Retirement Home Act of 1991 to implement changes resulting from a Department of Defense review of the management structure of the Armed Forces Retirement Home.

The House amendment contained no similar provision.

The House recesses.

The conferees note that the organizational and operational changes reflected in Title XIV reflect the collective judgment and recommendations of the Assistant Secretary of Defense (Force Management Policy), the Vice Chief of Staff of the Army, the Vice Chief of Naval Operations, the Vice Chief of Staff of the Air Force, and the Assistant Commandant of the Marine Corps. The conferees compliment the determined efforts of all involved in reaching a consensus on initiatives to be taken. The commitment of the Department of Defense and the services to the operational efficiency and fiscal well-being of the Armed Forces Retirement Homes is an essential precondition for success.

The conferees anticipate that the legislative changes in Title XIV will be complemented by additional departmental and service initiatives (e.g., implementation of a fifty cent increase in the active duty military payroll deduction and recapitalization of facilities). To this end, the conferees urge the Committees on Armed Services of the Senate and the House of Representatives to provide maximum opportunities during the second session of the 107th Congress for interested individuals and groups to provide information and recommendations for additional improvements needed in the management and organization of the Armed Forces Retirement Homes.

The Senate bill contained a provision (sec. 1044) that would authorize the Secretary of Defense to appoint a Chief Operating Officer for the Retirement Home who would be responsible for the overall direction, operation, and management of the Armed Forces Retirement Home and who would report to the Secretary of Defense.

The House amendment contained no similar provision.

The House recesses with a clarifying amendment.

Residents of Retirement Home (sec. 1405)

The House recesses with a clarifying amendment.

Local boards of trustees (sec. 1406)

The Senate bill contained a provision (sec. 1046) that would require the Secretary of Defense to appoint a local board of trustees for each facility of the Armed Forces Retirement Home to serve in an advisory capacity to the Director of the facility and to the Chief Operating Officer.

The House amendment contained no similar provision.

The House recesses with a clarifying amendment.

Directors, Deputy Directors, Associate Directors, and staff of facilities (sec. 1407)

The Senate bill contained a provision (sec. 1047) that would require the Secretary of Defense to appoint a Director and a Deputy Director for each facility of the Armed Forces Retirement Home.

The House amendment contained no similar provision.

The House recesses with a clarifying amendment that would also require appointment of an Associate Director to serve as an ombudsman for the residents and to perform other duties assigned by the Director.

Disposition of effects of deceased persons and unclaimed property (sec. 1408)

The Senate bill contained a provision (sec. 1048) that would authorize the Director of a facility of the Armed Forces Retirement Home to designate an attorney who is a full-time officer or employee of the United States or a member of the armed forces on active duty to serve as attorney or agent for the facility in certain probate proceedings.

The House amendment contained no similar provision.

The House recesses.

TITLE XV—ACTIVITIES RELATING TO COMBATING TERRORISM

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Increased Funding for Combating Terrorism

Authorization of emergency appropriations under the 2001 Emergency Supplemental Appropriations Act for Recovering From and Response to Terrorist Attacks on the United States (secs. 1501–1506)

The Senate bill contained a provision (sec. 1010) that would authorize the supplemental appropriations for the Department of Defense enacted in the Emergency Terrorist Response Supplemental Appropriations Act, 2001 (Public Law 107–38), which provided supplemental funding for Department of Defense programs in response to terrorist attacks against the United States. The Senate bill would also require quarterly reports by the Secretary of Defense to the Committees on Armed Services of the Senate and the House of Representatives on the use of funds made available to the Department of Defense, as well as reports on the allocation of funds under that Act that are made available to the Department of Defense subject to the 15-day notification requirement.

The House amendment contained no similar provision.

The House recesses with an amendment that would: authorize supplemental appropriations for the Department of Defense and the national security activities of the Department of Energy, including the National Nuclear Security Administration, for com-

bating terrorism for fiscal year 2001 and 2002, including the use of such appropriations to carry out military construction projects; and clarify the reporting requirement. The conferees expect the information provided by the Department of Defense and the Department of Energy on the use of funds appropriated in this supplemental, regardless of whether the funds were available immediately, subject to 15-day notification, or required subsequent appropriation by Congress, to be consistent with the level of detail provided for previous supplementals, including a description of the accounts and programs for which the funds were used for each service.

SUBTITLE B—POLICY MATTERS RELATING TO COMBATING
TERRORISM

Study and report on the role of the Department of Defense with respect to homeland security (sec. 1511)

The Senate bill contained a provision (sec. 1022) that directed the Secretary of Defense to submit a report to Congress on the Department of Defense (DOD) policies, plans and procedures for combating terrorism. The intent of the provision was to achieve a clear description of the structure, strategy, roles, relationships and responsibilities of the various DOD entities with responsibilities relating to combating terrorism. The report was to serve as the means for the single designated civilian in the DOD to address the various issues pertaining to combating terrorism.

The House amendment contained four provisions related to the Department's role in homeland security or combating terrorism. One provision (sec. 1032) required the Secretary of Defense to submit to Congress a report on the appropriate role of the DOD in homeland security matters. A second House provision (sec. 1511) required the Secretary of Defense to submit to Congress and the President a report containing an assessment of the Department's ability to provide support for the consequence management activities of other federal, state, and local agencies, taking into account the terrorist attacks on the United States on September 11, 2001. A third House provision (sec. 1512) directed the Secretary of Defense to report on the ability of the DOD to protect the United States from airborne threats, including those originating from within U.S. borders. A fourth House provision (sec. 1514) directed the Secretary of Defense to seek an agreement with the Directors of the Federal Bureau of Investigation and Federal Emergency Management Agency that clarifies the roles and missions of the DOD Weapons of Mass Destruction-Civil Support Teams (WMD-CSTs) relative to those agencies in crisis response and consequence management efforts.

The conferees agreed to merge the four House amendment provisions into the Senate bill provision. The conferees direct the Secretary of Defense to conduct a study on the appropriate role for the Department of Defense with respect to homeland security. The study would include a description of the plans, policies, and procedures of the Department of Defense for combating terrorism. It would also identify how the DOD will interact with the Office of Homeland Security, and how intelligence-sharing efforts of the De-

partment will be coordinated relative to other federal, state and local entities. In addition, the report would address the ability of the DOD to protect the United States from airborne attacks, and the manner in which the WMD-CSTs interact with lead federal agencies during crisis response or consequence management situations. The report will also discuss improvements that could be made to enhance homeland security and recommended actions and programs aimed at addressing vulnerabilities.

Combating Terrorism Readiness Initiatives Fund for combatant commands (sec. 1512)

The Senate bill contained a provision (sec. 1008) that would codify in title 10, United States Code, the authority and specific activities to be funded under the Combating Terrorism Readiness Initiative Fund.

The House amendment contained no similar provision.

The House recedes.

Conveyances of equipment and related materials loaned to state and local governments as assistance for emergency response to a use or threatened use of a weapon of mass destruction (sec. 1513)

The Senate bill contained a provision (sec. 1063) that would require the Department of Defense (DOD) to transfer to state and local authorities training equipment it has loaned to them as part of the Domestic Preparedness Program, which was established in accordance with the Defense Against Weapons of Mass Destruction Act of 1996 (otherwise known as the Nunn-Lugar-Domenici Act) (Title XIV of the National Defense Authorization Act for Fiscal Year 1997).

The equipment was purchased by the Department on behalf of cities participating in the Domestic Preparedness Program. That equipment has been permanently retained and maintained on loan due to the legal prohibition against transferring DOD property directly to non-Federal Government agencies. As a result, the Department has been required to inventory, and to hold some liability for, this equipment. In addition, local authorities have incurred the additional task of maintaining records to DOD standards. This one-time transfer was intended to eliminate the financial cost, labor and liabilities associated with this equipment so long as it remains DOD property.

The House amendment contained no similar provision.

The House recedes.

The conferees agree that this is a one-time transfer and will not set any precedent.

Two-year extension of the Advisory Panel to Assess Domestic Response Capabilities for Terrorism Involving Weapons of Mass Destruction (sec. 1514)

The House amendment contained a provision (sec. 1052) that would amend section 1405 of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 to extend the Advisory Panel to Assess Domestic Response Capabilities for Terrorism Involving Weapons of Mass Destruction (WMD) by two additional years. The life of the panel would thereby be extended until 2003.

The Senate bill contained no such provision.

The Senate recesses with an amendment to provide compensation to the members of the panel for the days that they serve from the enactment of this Act until they complete their work in 2003.

The conferees recognize that the panel can continue to provide valuable assessments and recommendations to the Federal Government in its efforts to improve federal homeland security efforts. The conferees expect that the panel will study not only WMD, but also conventional and cyber terrorist threats.

LEGISLATIVE PROVISIONS NOT ADOPTED

Establishment of combating terrorism as a national security mission

The House amendment contained a provision (sec. 1513) that would amend section 108(b)(2) of the National Security Act of 1947 to establish that acts of terrorism are included in the term “aggression.”

The Senate bill contained no similar provision.

The House recesses.

The conferees note that there is general agreement that acts of terrorism are included in the term “aggression.”

TITLE XVI—UNIFORMED SERVICES VOTING

LEGISLATIVE PROVISIONS ADOPTED

Sense of Congress regarding the importance of voting (sec. 1601)

The Senate bill contained a provision (sec. 571) that would express the sense of the Senate that each administrator of a federal, state, or local election should be aware of the importance of the ability of each uniformed services voter to exercise the right to vote; that the administrators should perform their duties with the intent to ensure that each uniformed services voter receives the utmost consideration and cooperation when voting; that each valid ballot cast by such a voter is duly counted; and that all eligible American voters should have an equal opportunity to cast a vote and to have that vote counted.

The House amendment contained no similar provision.

The House recesses with a clarifying amendment that would express a sense of the Congress.

Voting assistance programs (sec. 1602)

The Senate bill contained a provision (sec. 578) that would require the Secretary of Defense to promulgate regulations to ensure that each service complies with directives implementing the Federal Voting Assistance Program (FVAP) and require the Inspector General of each service to conduct an annual review of compliance with the FVAP and report the results to the Department of Defense Inspector General, who would report annually to Congress.

The House amendment contained a similar provision (sec. 551) that would also establish certain requirements for voting assistance officers, and require polling of units and ships at sea regarding the availability of voting materials prior to congressional elections.

The House recesses with an amendment that would combine elements of the two provisions.

Guarantee of residency for military personnel (sec. 1603)

The Senate bill contained a provision (sec. 573) that would provide that for purposes of voting in any federal, state or local election, a person absent from a state pursuant to military orders would not, solely by reason of that absence, be deemed to have: (1) lost a residence or domicile in that state; (2) acquired a residence or domicile in another state; or (3) become a resident in or of any other state.

The House amendment contained no similar provision.

The House recesses.

Electronic voting demonstration project (sec. 1604)

The Senate bill contained a provision (sec. 577) that would require the Department of Defense to conduct an electronic voting demonstration for absent military voters in the November, 2002, federal elections.

The House amendment contained a similar provision (sec. 552).

The House recesses with a clarifying amendment.

The conferees are aware of the Department's concern about having sufficient lead time to prepare for a meaningful demonstration project in 2002. The conferees encourage the Department to consider use of commercially available, off-the-shelf, electronic voting products to expedite preparation for the 2002 demonstration.

Governors' reports on implementation of recommendations for changes in state law made under Federal Voting Assistance Program (sec. 1605)

The Senate bill contained a provision (sec. 580) that would require the chief executive officer of a state to report on the implementation of a uniformed services voting assistance legislative recommendation within 90 days of receipt of that recommendation.

The House amendment contained no similar provision.

The House recesses with a clarifying amendment.

Simplification of voter registration and absentee ballot application procedures for absent uniformed services and overseas voters (sec. 1606)

The Senate bill contained a provision (sec. 575) that would require states to accept and process the official postcard form as a simultaneous absentee voter register application and absentee ballot application. The Senate bill also contained a provision (sec. 576) that would require states to accept and process a single absentee ballot application from an absent uniformed services voter or overseas voter for all general, special, primary, and runoff federal elections occurring during a year if the application is received not less than 30 days before the first federal election occurring that year.

The House amendment contained no similar provision.

The House recesses with an amendment that would combine the two provisions and require states to provide absentee ballots for each subsequent federal election during a year only if the voter

requests that the application be considered an application for each subsequent federal election.

Use of certain Department of Defense facilities as polling places (sec. 1607)

The House amendment contained a provision (sec. 2813) that would authorize the service secretaries to make buildings located on military installations and reserve component facilities available for use as polling places for federal, state, and local elections.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would permit use of Department of Defense facilities as polling places if the facilities were designated as of December 31, 2000, or have been used since January 1, 1996, as official polling places, unless local security conditions preclude such use.

LEGISLATIVE PROVISIONS NOT ADOPTED

Extension of registration and balloting rights for absent uniformed services voters to state and local elections

The Senate bill contained a provision (sec. 574) that would require states to permit uniformed services voters to use absentee procedures to register and vote in state and local elections.

The House amendment contained no similar provision.

The Senate recedes.

Maximization of access of recently separated uniformed service voters to the polls

The Senate bill contained a provision (sec. 579) that would require states to accept absentee registration applications by military personnel before they separate from the military and that would allow them, after they leave the military, to vote in any election for which they are properly registered.

The House amendment contained no similar provision.

The Senate recedes.

Standard for invalidation of ballots cast by absent uniformed services voters in federal elections

The Senate bill contained a provision (sec. 572) that would prescribe standards for invalidation of ballots cast by absent uniformed services voters in federal elections.

The House amendment contained no similar provision.

The Senate recedes.

DIVISION B—MILITARY CONSTRUCTION AUTHORIZATIONS

Overview

The budget request for fiscal year 2002 requested authorization of appropriations of \$9,971.3 million for the military construction and family housing construction and operation accounts of the Department of Defense.

The Senate bill would authorize \$10,430.5 million for military construction and family housing.

The House amendment would authorize \$10,324.7 million for these accounts.

The conferees recommend authorization of appropriations of \$10,681.3 million for the military construction and family housing accounts of the Department of Defense for fiscal year 2002. Including the impact of reductions in the authorization of appropriations for military construction for prior years made in this Act, and of the rescission of military construction appropriations for prior years for foreign currency savings and for a Forward Operating Location in Aruba contained in the Military Construction Appropriations Act, 2002 (Public Law 107-64), the conference agreement is consistent with a budget authority level of \$10,500.0 million for military construction and family housing.

The following tables list the amounts authorized to be appropriated for the military construction and family housing accounts, and for each military construction and family housing project.

TITLE XXI—ARMY

Overview

The Senate bill would authorize \$3,068.3 million for Army military construction and family housing programs for fiscal year 2002.

The House amendment would authorize \$3,018.1 million for this purpose.

The conferees recommend authorization of appropriations of \$3,155.6 million for Army military construction and family housing for fiscal year 2002.

The conferees agree to general reductions of \$29.9 million in the Army military construction and military family housing accounts. The reductions are to be achieved through savings from favorable bids, reduced overhead costs, and cancellations due to force structure changes. The general reductions shall not cancel any military construction authorized by Title XXI of this Act.

The conference agreement provides the planning and design funds needed to execute the construction projects authorized by this Act as well as any planning and design specifically directed in the House report (H. Rept. 107–194) or the Senate report (S. Rept. 107–62).

ITEMS OF SPECIAL INTEREST

Renovation of Womack Army Medical Center, Fort Bragg, North Carolina

The conferees understand that the Army intends to renovate the old Womack Army Medical Center at Fort Bragg, North Carolina, for use as a soldier support center. The soldier support center would not only provide a convenient one-stop processing center for soldiers, it would also allow for the demolition of 87 World War II-era wooden buildings, resulting in considerable savings in maintenance and utilities. While the conferees endorse this creative initiative, the conferees are disappointed that the Secretary of the Army does not intend to request funding for the project until fiscal year 2007. The conferees urge the Secretary of the Army to accelerate this important project and upon completion consider naming the facility for the recently retired former Chairman of the Joint Chiefs of Staff, General Hugh Shelton.

TITLE XXVIII—GENERAL PROVISIONS

ITEMS OF SPECIAL INTEREST

Remediation of former Fort Ord, California

The conferees are aware that two parcels of land at the former Fort Ord, California, will be transferred at no cost to the City of Seaside, California, for the purpose of providing recreational opportunities for disadvantaged youth, once environmental remediation of the land is complete. The conferees understand that the priority has been to transfer the cleanest parcels on the former Fort Ord first, deferring to the future the transfer of land possibly contaminated with unexploded ordnance. Nevertheless, the conferees observe that Fort Ord was selected for closure more than ten years ago and are disappointed that parcels such as these, though encumbered with greater cleanup challenges, are still pending remediation and transfer. The conferees endorse the intended use of these parcels and urge the Secretary of the Army to speed the environmental remediation.

The Secretary would be required to develop a management plan to carry out the initiative at each designated installation and submit that plan to the Congress. If the Foundation accepted the offer, the Foundation would relinquish all claims to the previously approved site for the memorial on Arlington Ridge. In the event construction at the Naval Annex site is impracticable, the location of the memorial would revert to the Arlington Ridge tract location. If the Foundation fails to commence construction of the memorial within five years of the date of enactment of this Act, the Secretary of Defense may revoke the authority to use the Naval Annex property for the Air Force Memorial.

The amendment would require, upon notification by the Foundation that it had accumulated sufficient funds to begin construction, the Secretary of Defense to demolish and remove Wing 8 of the Naval Annex and associated facilities and carry out environmental remediation and such site preparation as the Secretary agreed to undertake, within two years. The amendment would also designate the Department of the Army as the executive agent for finding replacement facilities for the Ballistic Missile Defense Organization, which currently occupies the facilities on this site.

The amendment would direct the Secretary of the Interior to transfer to the administrative jurisdiction of the Secretary of the Army 12 acres, known as the interment zone, as depicted in Map VI-4 on page VI-23 of the Concept Utilization Plan for Arlington National Cemetery dated October 2000. The transferred property would be used by Arlington National Cemetery for additional burial sites. The Secretary of the Interior would be required to preserve in perpetuity the remaining acreage of Section 29, including the portion known as the preservation zone, as an appropriate backdrop and aesthetic setting for Arlington House, The Robert E. Lee Memorial.

The amendment would also prohibit any new structures on the Arlington Ridge tract and would specify that the only other land use to be contemplated in the future for this site would be as additional burial space for Arlington National Cemetery.

The amendment would also amend section 2881 of the Military Construction Authorization Act for Fiscal Year 2000 (division B of Public Law 106-65) to direct the Secretary of Defense to reserve no more than four acres of the Naval Annex property, south of Columbia Pike, as a site for memorials or museums that the Secretary of Defense considers compatible with Arlington Cemetery and the Air Force Memorial.

The conferees direct the Secretary of Defense to provide a report to Congress, prior to the date on which he transfers the three-acre parcel on the Naval Annex site to the Secretary of the Army, providing his determination as to whether construction of the Air

Force Memorial on this site, together with the public access required for the Memorial, is consistent with the security requirements of the Pentagon and the Naval Annex. If the Secretary determines this location is not fully consistent with such security requirements, the Secretary shall include in his recommendations the steps that should be taken to address any security concerns.

Extension of initial withdrawal and reservation (sec. 2911)

This provision would require the Secretary of the Army, no later than three years before the termination of the 25-year withdrawal, to notify Congress and the Secretary of the Interior whether the Army has a continuing military need for the withdrawn lands. If the Secretary of the Army determines there is a continuing military need, the Secretary of the Army shall consult with the Secretary of the Interior regarding any adjustments in the allocation of land management responsibility and file an application for an extension of the withdrawal and reservation with the Secretary of the Interior. The provision would also authorize the Secretary of the Army and the Secretary of the Interior to submit a legislative proposal to Congress on the extension of the land withdrawal. The legislative proposal would be accompanied by an analysis of the environmental impacts, consistent with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

Termination and relinquishment (sec. 2912)

Under this provision, if the Secretary of the Army determines that there is no continuing military need for any withdrawn lands during the first 22 years of the withdrawal period, the Secretary of the Army shall notify the Secretary of the Interior of the intent to relinquish jurisdiction over such lands. If the Secretary of the Interior accepts jurisdiction, the Secretary shall publish in the Federal Register an appropriate order terminating the withdrawal.

Delegation of Authority (sec. 2913)

This provision would authorize the Secretary of the Army and the Secretary of the Interior to delegate the functions necessary to implement this title.

TITLE XXX—REALIGNMENT AND CLOSURE OF MILITARY INSTALLATIONS AND PREPARATION OF INFRASTRUCTURE PLAN FOR THE NUCLEAR WEAPONS COMPLEX

Title XXIX of the Senate bill contained a series of provisions (secs. 2901–2904) that would extend the authorities of the Defense Base Closure and Realignment Act of 1990 (part A of title XXIX of Public Law 101–510, as amended) and authorize a new base realignment and closure (BRAC) round in 2003.

Section 2901 of the Senate bill would extend the authorities of the 1990 Act, which expired after the 1995 BRAC round, to authorize a new BRAC round in 2003 for the Department of Defense (DOD).

Section 2902 of the Senate bill would establish a separate account to track the costs and savings of the 2003 round.

Section 2903 of the Senate bill would make substantive changes in the 1990 Act that would apply to the 2003 round. This provision would: increase the number of commissioners from eight to nine; require that the selection criteria emphasize the military value of installations; require that any selection criteria relating to the cost or savings of proposed closures take into account the impact of the closure on other federal agency operations on that installation; require the Secretary of Defense to review every type of installation and to take into account the anticipated need for and availability of overseas installations in the future; and require the Secretary to consider any notice from a local government that the government would approve of the closure of a neighboring installation.

This section would also: give the commission an additional 24 hours to provide information received from certain individuals to the Congress; require that the Secretary of Defense be given an opportunity to testify before the commission on changes made by the commission to the Secretary's recommendations; prohibit privatization in place of closed or realigned facilities unless it was specifically recommended by the base closure commission and determined to be the most cost-effective option; allow payment to a local redevelopment authority for services provided on property leased back by the United States; and allow the DOD to pay the difference to the recipient if the estimated cost to the recipient to clean up a BRAC site exceeds the value of the property.

Section 2904 of the Senate bill would make technical and clarifying changes to the 1990 Act.

The House amendment contained no similar provisions.

The House recedes with an amendment that would authorize an additional BRAC round in 2005 rather than 2003 and make additional changes to the process authorized under the 1990 Act for the 2005 round.

Unless specifically changed by the provisions of this Act, the 2005 BRAC round would operate under the authorities and re-

quirements of the Defense Base Closure and Realignment Act of 1990 (part A of title XXIX of Public Law 101-510, as amended).

Procedures for the Department of Defense (secs. 3001-3007)

The conferees agree to authorize a round of base realignment and closure for the Department of Defense in 2005. The conference agreement modifies the procedures used in the 1991, 1993 and 1995 rounds as described below.

Recommendations by the Secretary

With respect to the recommendations of the Secretary of Defense, the conferees have modified the process used in prior rounds as follows.

The force structure plan submitted by the Secretary of Defense with the fiscal year 2005 budget would include detailed information on probable end-strength and force levels for the military services, including major ground combat units, combatant vessels and air wings. The Secretary would be required to review every type of installation and to take into account the anticipated need for and availability of overseas installations in the future.

The Secretary would be permitted to submit a revised force structure plan with the fiscal year 2006 budget.

The Secretary would be required to include with the force structure plan: an inventory of military installations; a description of the categories of excess infrastructure; and an economic analysis of the options for eliminating or reducing that excess infrastructure, including potential efficiencies from joint use and tenancy of military installations by more than one service.

The Secretary would be required to certify, when the force structure plan and infrastructure inventory are submitted, whether the need exists for closure or realignment of additional military installations and, if such need exists, that a round of such closures and realignments in 2005 would produce annual net savings within six years. If the Secretary failed to provide this certification, the process for closure or realignment of installations under the provisions of this Act for 2005 would be terminated.

The conferees have specified factors that must be evaluated and incorporated in the Secretary's final list of criteria, including the military value of installations for both the preservation of training areas for traditional warfighting missions and the preservation of installations for homeland defense. However, the Secretary is not limited to the criteria contained in this Act. Any selection criteria relating to the cost or savings of proposed closures would have to take into account the impact of the closure on other federal agency operations on that installation.

The General Accounting Office would be required to submit to Congress an evaluation of the force structure plan, the installation inventory and the selection criteria.

Consideration of the Secretary's proposal by the commission

With respect to the proceedings of the commission, the conferees agree to the following changes.

The number of commissioners for the 2005 round would be increased from eight to nine.

The commission would have 48 hours rather than 24 hours to provide information received from certain individuals of the Department of Defense to the Congress.

Prior to any decision to add an installation not proposed to be closed or realigned by the Secretary to the list of installations to be considered for closure or realignment by the commission, the commission would be required to give the Secretary 15 days to submit an explanation of why the Secretary did not propose that installation for closure or realignment. A decision to add that installation to the list of installations being considered would then have to be supported by at least seven commissioners.

The Secretary of Defense would be given an opportunity to testify before the commission on changes proposed by the commission to the Secretary's recommendations.

Privatization in place of closed or realigned facilities would be prohibited unless it was specifically recommended by the commission and determined to be the most cost-effective option.

Disposal of property

With respect to the disposal of property from closed or realigned facilities, the conferees have modified the process as follows.

The conference agreement would require the Secretary of Defense to obtain fair market value for economic development conveyances in most cases, unless the Secretary determines the circumstances warrant a below-cost or no-cost conveyance.

The conferees agree to allow the Secretary to recommend that an installation be placed in an inactive or caretaker status if the Secretary determines that the installation may be needed in the future for national security purposes, but is not needed at the present time, or that retention of the installation by the Department of Defense is otherwise in the interests of the United States.

The DOD would be authorized to pay to the recipient of the former DOD property the amount by which the estimated cost to the recipient to clean up a BRAC site exceeds the value of the property.

A Department of Defense Closure Account 2005 would be created to fund the costs of implementing any closures or realignments from the 2005 round.

Preparation of infrastructure plan for the nuclear weapons complex (sec. 3008)

The conferees agree to a provision that would require the Secretary of Energy to develop an infrastructure plan for the nuclear weapons complex adequate to support the nuclear weapons stockpile, the Naval Reactor Program and the non-proliferation and national security activities. In preparing the plan, the Secretary would take into consideration the Department of Defense Nuclear Posture Review, any efficiencies and security benefits of consolidation, and the necessity to have a residual nuclear weapons production capacity. The provision would require the Secretary to submit the plan to Congress, along with any implementing recommendations the Secretary considers appropriate, including whether to establish a formal process by which a round of closures and realign-

ments should take place. Finally, the Secretary would also be required to submit a legislative proposal if the Secretary determines the need for additional legislative authority to implement the Secretary's recommendations.

DIVISION C—DEPARTMENT OF ENERGY NATIONAL SECURITY AUTHORIZATIONS AND OTHER AUTHORIZATIONS

TITLE XXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS

Overview

Title XXXI authorizes appropriations for the atomic energy defense activities of the Department of Energy (DOE) for fiscal year 2002, including: the purchase, construction, and acquisition of plant and capital equipment; research and development; nuclear weapons; naval nuclear propulsion; environmental restoration and waste management; operating expenses; and other expenses necessary to carry out the purposes of the Department of Energy Organization Act (Public Law 95–91). The conferees agree to authorize \$6.2 billion for defense environmental management activities, an increase of \$435.2 million. The amount authorized for defense environmental management would be: \$4.9 billion for defense environmental restoration and waste management, an increase of \$393.2 million; \$1.1 billion for defense facilities closure projects, an increase of \$30.0 million; \$959.7 million for site and project completion, an increase of \$47.7 million; \$3.3 billion for post 2006 completion, an increase of \$345.0 million; \$216.0 million for science and technology development, an

increase of \$20.0 million; \$1.3 million for excess facilities, the amount of the request; \$355.8 million for program direction, the amount of the request; and \$153.5 million for defense environmental management privatization, an increase of \$12.0 million. The conferees agree to authorize \$499.7 million for other defense activities, a decrease of \$28.0 million. The amount authorized for other defense activities would include: \$250.4 million for security and emergency operations, a decrease of \$18.8 million; \$40.8 million for the office of intelligence, the amount of the request; \$46.0 million for counterintelligence, a decrease of \$0.4 million; \$14.9 million for independent oversight, the amount of the request; \$113.3 million for environmental safety and health, a decrease of \$1.3 million; \$20.0 million for worker and community transition, a decrease of \$4.4 million; \$22.0 million for national security program administration support, a decrease of \$3.0 million; and \$2.9 million for the office of hearings and appeals, the amount of the request. The conferees agree to authorize \$280.0 million for defense nuclear waste disposal, a decrease of \$30.0 million.

The following table summarizes the budget request and the conferees recommendations:

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—National Security Programs Authorizations

National Nuclear Security Administration (sec. 3101)

The budget request included \$6.8 billion for activities of the Department of Energy National Nuclear Security Administration (NNSA), subject to reductions and offsets.

The Senate bill contained a provision (sec. 3101) that would authorize \$7.4 billion for the activities of the NNSA, subject to offsets and reductions.

The House amendment contained a similar provision (sec. 3101) that would authorize, after reductions and offsets, \$6.9 billion for the activities of the NNSA.

The conferees agree to include a provision that would authorize, after reductions and offsets, \$7.1 billion for the activities of the NNSA. The amounts authorized for the individual program lines reflect the full amount authorized for each program line without the reductions and offsets. The offsets and reductions are included in paragraphs (1)(E) and (2)(G) of this provision. The conferees have included the reduced total amount for the NNSA for convenience only. The total amount authorized is the sum total of the individual program lines. The conferees note that each program is authorized at the full amount reflected in the individual program line prior to application of reductions and offsets.

The conferees agree to combine the program direction accounts for weapons activities and nonproliferation and national security with the funds for the Office of the Administrator of the NNSA in order to create a single account reflecting the efforts of the Administrator to have a more unified NNSA. Not included in this account, however, are the program direction accounts for the Naval Reactors activities and the program direction account for the secure transportation asset.

The conferees also agree to include \$200.0 million for a new account for facilities and infrastructure improvements at the NNSA sites.

Defense environmental restoration and waste management (sec. 3102)

The budget request included \$5.6 billion for environmental management activities, including defense facilities closure projects, subject to reductions and offsets.

The Senate bill contained a provision (sec. 3102) that would authorize, subject to offsets and reductions, \$6.0 billion for environmental management activities, including defense facilities closure projects.

The House amendment contained a similar provision (sec. 3102) that would authorize \$4.6 billion for defense environmental restoration and waste management activities, after offsets and reductions, but not including closure projects. An additional \$1.0 billion was authorized separately for closure projects.

The conferees agree to include a provision that would authorize, after reductions and offsets, \$6.0 billion for defense environmental management activities, including defense facilities closure

projects. The amounts authorized for individual program lines reflect the full amount authorized for each program line without the reductions and offsets. The offsets and reductions are included in subsection (b) of this provision. The conferees have included the reduced total amount for convenience only. The total amount authorized is the sum total of the individual program lines. The conferees note that each program is authorized at the full amount reflected in the individual program line prior to application of reductions and offsets.

Other defense activities (sec. 3103)

The budget request included \$538.3 million for other defense activities, subject to reductions and offsets.

The Senate bill contained a provision (sec. 3103) that would authorize \$512.2 million for other defense activities, subject to reductions and offsets.

The House amendment contained a provision (sec. 3103) that would authorize \$502.1 million, after reductions and offsets.

The conferees agree to include a provision that would authorize, after reductions and offsets, \$499.7 million for other defense activities. The amounts authorized for individual program lines reflect the full amount authorized for each program line without the reductions and offsets. The offsets and reductions are included in subsection (b) of this provision. The conferees have included the reduced total amount for convenience only. The total amount authorized is the sum total of the individual program lines. The conferees note that each program is authorized at the full amount reflected in the individual program lines prior to application of reductions and offsets.

Defense environmental management privatization (sec. 3104)

The budget request included \$141.5 million for defense environmental management privatization projects.

The Senate bill contained a provision (sec. 3104) that would authorize \$157.5 million for defense environmental management privatization projects.

The House amendment contained a provision (sec. 3104) that would authorize \$126.2 million for defense environmental management privatization projects.

The conferees agree to authorize \$153.5 million for defense environmental management privatization accounts.

Defense nuclear waste disposal (sec. 3105)

The budget request included \$310.0 million for defense nuclear waste disposal.

The Senate bill contained a provision (sec. 3105) that would authorize \$250.0 million for defense nuclear waste disposal.

The House amendment contained a provision (sec. 3105) that would authorize \$310.0 million for defense nuclear waste disposal.

The conferees agree to authorize \$280.0 million for defense nuclear waste disposal.

Subtitle B—Recurring General Provisions

Reprogramming (sec. 3121)

The House amendment contained a provision (sec. 3121) that would prohibit the reprogramming of funds excess of the amount authorized for the program until the Secretary of Energy has notified the congressional defense committees and a period of 30 days has elapsed after the date on which the notification is received.

The Senate bill contained a similar provision (sec. 3121).

The Senate recedes with a technical amendment.

The conferees note that this provision significantly limits the ability of the Department of Energy (DOE) to reprogram funds and urge the DOE to work with the congressional defense committees to re-establish an internal reprogramming process.

Limits on minor construction projects (sec. 3122)

The Senate bill contained a provision (sec. 3122) that would authorize the Secretary of Energy to carry out minor construction projects using operation and maintenance funds, or facilities and infrastructure funds, if the total estimated cost of the minor construction project does not exceed \$5.0 million. In addition, the provision would require the Secretary to submit an annual report identifying each minor construction project undertaken during the previous fiscal year.

The House amendment contained a similar provision (sec. 3122) that maintained the description of minor construction projects as general plant projects and that would require a cost variance report.

The House recedes with an amendment that would require the Secretary of Energy to submit immediately a report to the congressional defense committees when any minor construction project is revised so that the cost of the project exceeds \$5.0 million.

The conferees direct the annual report required by this section to be submitted with the budget request. The first report, which would cover fiscal year 2002, should be submitted with the budget request for fiscal year 2004.

Limits on construction projects (sec. 3123)

The Senate bill contained a provision (sec. 3123) that would permit any construction project to be initiated and continued only if the estimated cost for the project does not exceed 125 percent of the higher of the amount authorized for the project or the most recent total estimated cost presented to the Congress as justification for such project. The Secretary of Energy could not exceed such limits until 30 legislative days after the Secretary submits to the congressional defense committees a detailed report setting forth the reasons for the increase. The provision would also specify that the 125 percent limitation would not apply to projects estimated to cost under \$5.0 million.

The House amendment contained an identical provision (sec. 3123).

The conference agreement includes this provision.

Fund transfer authority (sec. 3124)

The Senate bill contained a provision (sec. 3124) that would permit funds authorized by this Act to be transferred to other agencies of the Federal Government for performance of work for which funds were authorized and appropriated. The provision would permit the merger of such transferred funds with the authorizations of the agency to which they are transferred. The provision would also limit, to not more than five percent of the account, the amount of funds authorized by the Act that may be transferred between authorization accounts within the Department of Energy.

The House amendment contained an identical provision (sec. 3124).

The conference agreement includes this provision.

Authority for conceptual and construction design (sec. 3125)

The Senate bill contained a provision (sec. 3125) that would limit the Secretary of Energy's authority to request construction funding until the Secretary has completed a conceptual design. This limitation would apply to construction projects with a total estimated cost greater than \$5.0 million. If the estimated cost to prepare the construction design exceeds \$600,000, the provision would require the Secretary to obtain a specific authorization to obligate such funds. If the estimated cost to prepare a conceptual design exceeds \$3.0 million, the provision would further require the Secretary to submit to Congress a report on each conceptual design completed under this provision. The provision would also provide an exception to these requirements in the case of an emergency.

The House amendment contained a similar provision (sec. 3125).

The House recedes with a technical amendment.

Authority for emergency planning, design, and construction activities (sec. 3126)

The Senate bill contained a provision (sec. 3126) that would permit the Secretary of Energy to perform planning and design with funds available to the Department of Energy (DOE) pursuant to sections 3101–3104 of title XXXI, including those funds authorized for advanced planning and construction design, whenever the Secretary determines that the design must proceed expeditiously to protect the public health and safety, to meet the needs of national defense, or to protect property.

The House amendment contained a similar provision that included funds authorized pursuant to sections 3101–3103 of title XXXI (sec. 3126).

The House recedes.

Funds available for all national security programs of the Department of Energy (sec. 3127)

The Senate bill contained a provision (sec. 3127) that would authorize, subject to section 3121 of title XXXI of this Act, amounts appropriated for management and support activities and for general plant projects to be made available for use in connection with all national security programs of the Department of Energy.

The House amendment contained an identical provision (sec. 3127).

The conference agreement includes this provision.

Availability of funds (sec. 3128)

The House amendment contained a provision (sec. 3128) that would authorize amounts appropriated for operating expenses for plant and capital equipment for the Department of Energy to remain available until expended. Program direction funds would remain available until the end of fiscal year 2003.

The Senate bill contained a similar provision but would make program direction funds available until the end of fiscal year 2004.

The Senate recedes.

Transfer of defense environmental management funds (sec. 3129)

The Senate bill contained a provision (sec. 3129) that would provide the manager of each Department of Energy (DOE) field office with limited authority to transfer up to \$5.0 million in fiscal year 2002 defense environmental management funds from one program or project. The DOE manager could use this authority to transfer funds outside of the normal reprogramming process three times in a fiscal year.

The House amendment contained a provision (sec. 3129) that would provide the manager of the DOE field office authority to make one transfer per fiscal year.

The House recedes.

The conferees agree that this authority shall not be aggregated and that each transfer shall not exceed \$5.0 million.

Transfer of weapons activities funds (sec. 3130)

The Senate bill contained a provision (sec. 3130) that would provide the manager of a Department of Energy/National Nuclear Security Administration (DOE/NNSA) field office with limited authority to transfer up to \$5.0 million in fiscal year 2002 weapons activities funds from one program or project to another, outside of the normal reprogramming process. The DOE/NNSA manager could use this authority up to three times per year.

The House amendment contained a similar provision (sec. 3130) that would provide authority to make one transfer per year and provide the authority to the contractor operator of the DOE/NNSA plant or laboratory.

The Senate recedes with an amendment that would provide the authority to the DOE/NNSA manager to make one transfer per year.

Subtitle C—Program Authorizations, Restrictions, and Limitations

Consolidation of Nuclear Cities Initiative program with Initiatives for Proliferation Prevention program (sec. 3131)

The House amendment contained a provision (sec. 3133) that would consolidate the Nuclear Cities Initiative (NCI) program and the Initiatives for Proliferation Prevention (IPP) program under a common management structure by July 1, 2002.

The Senate bill contained no similar provision, but included language in Senate Report No. 107-62, accompanying S. 1416, that directed the Administrator of the National Nuclear Security Administration to consolidate the IPP program and the NCI program under a single management structure.

The Senate recedes with an amendment that would delete the date.

The conferees agree to include a provision that would direct the Administrator of the National Nuclear Security Administration to consolidate the management of the IPP and the NCI programs under a single management division. The conferees believe, however, that these two programs should remain separate, have different funding lines within the division, retain their individual programmatic requirements as established by statute and retain separate program managers. The two managers should report to a single manager. The conferees note that the Administrator has already begun to implement this direction.

In order to maintain the two program identities, the conferees direct the Deputy Administrator for Defense Nuclear Nonproliferation to submit a plan to the congressional defense committees 30 days prior to obligating fiscal year 2002 funds, for each program laying out how each program intends to utilize fiscal year 2002 funds. Further, the conferees direct the Deputy Administrator to submit to the congressional defense committees a program plan for the IPP and the NCI programs that describes how: (1) the programs will be managed under common senior management; (2) they will share administrative support; (3) management improvements will be made for each program; and (4) greater coordination will be established between the programs and with the relevant interagency working groups. This report is due to the congressional defense committees no later than four months after enactment of the National Defense Authorization Act for Fiscal Year 2002.

Nuclear Cities Initiative (sec. 3132)

The Senate bill contained a provision (sec. 3133) that would prohibit the use of funds authorized to be appropriated after fiscal year 2001 for the Nuclear Cities Initiative (NCI) from being obligated or expended to expand the NCI program beyond its current scope until thirty days after the Administrator of the National Nuclear Security Administration (NNSA) submits to Congress an agreement on access signed by the United States and Russia. The provision also requires an annual report on the NCI program's financial and programmatic activities.

The House amendment contained no similar provision.

The House recedes.

Limitation on availability of funds for weapons activities for facilities and infrastructure (sec. 3133)

The Senate bill contained a provision (sec. 3131) that would direct the Administrator of the National Nuclear Security Administration (NNSA) to establish criteria for the facilities and infrastructure projects. The provision would prohibit the Administrator from obligating or expending more than fifty percent of the facilities and infrastructure account funds until he has submitted to the congress-

sional defense committees the criteria and a list of the projects that will be funded based on the criteria.

The House amendment contained no similar provision.

The House recesses.

The conferees support this new effort to address a backlog of deferred maintenance at NNSA sites, but directs the Administrator to include projects in the fund based on the objective criteria established.

Limitation on availability of funds for other defense activities for national security programs administrative support (sec. 3134)

The Senate bill contained a provision (sec. 3132) that would prevent the Secretary of Energy from using more than \$5.0 million of the funds authorized to be appropriated for national security programs administrative support pursuant to section 3103(a)(8) of this Act until such time as the Secretary submits the future years nuclear security program required by section 3253 of the National Nuclear Security Act (Title XXXII of Public Law 106-65) and until the Secretary submits a justification document for the national security programs administrative support activities describing the activities to be carried out with the funds provided.

The House amendment contained no similar provision.

The House recesses with an amendment that would add an additional condition to be met by the Secretary before obligating more than \$5.0 million of the funds authorized to be appropriated for this activity. The conferees note that the report requested of the Secretary on the feasibility of using an energy savings performance contract mechanism to offset or possibly cover the cost of a new office building for the Albuquerque operations office of the Department of Energy (DOE) has not been submitted. This report was requested in Senate Report 106-50, the report of the Committee on Armed Services of the Senate to accompany S. 1059, the National Defense Authorization Act for Fiscal Year 2000. The amendment would direct the Secretary to submit this report as the third prerequisite to spending more than \$5.0 million of the funds authorized.

Termination date of Office of River Protection, Richland, Washington (sec. 3135)

The House amendment contained a provision (sec. 3131) that would extend the statutory termination date of the Office of River Protection from September 30, 2004 to September 30, 2010 or upon determination that continuation of the Office is no longer necessary to carry out the Department Of Energy responsibilities under the Hanford Federal Facility Compliance Agreement, whichever is later.

The Senate bill contained no similar provision.

The Senate recesses.

Support for public education in the vicinity of Los Alamos National Laboratory, New Mexico (sec. 3136)

The Senate bill contained a provision (sec. 3157) that would extend the period of time in which the Department of Energy (DOE) may make contributions to the Los Alamos Education Foundation

and authorizes \$6.9 million, the amount contained in the budget request, to be paid to the Foundation in fiscal year 2002. In addition, the provision would authorize \$8.0 million for the fiscal year 2002 payment to be made from funds available to the DOE to offset cost of living expenses for school teachers at the Los Alamos Public Schools. The provision would also allow the DOE to extend the current contract with the Los Alamos Public Schools, pursuant to which these funds are paid, through fiscal year 2004. The provision would also require the Secretary of Energy to submit a report evaluating and making recommendations for future payments to the Foundation and the schools.

The House amendment contained a similar provision (sec. 3135) that would authorize the Secretary of Energy to pay \$5.0 million to the Foundation and \$8.0 million to the Los Alamos Public Schools. The provision would allow the DOE to extend the current contract with the schools through fiscal year 2003. The provision would also require a report.

The Senate recedes with an amendment that would authorize a payment of \$6.9 million to the Foundation for fiscal year 2002 and that would direct the Secretary to submit the required report by March 1, 2002.

Reports on achievement of milestones for National Ignition Facility (sec. 3137)

The Senate bill contained a provision (sec. 3156) that would direct the Administrator of the National Nuclear Security Administration to notify the congressional defense committees when the National Ignition Facility (NIF) achieves each level one and level two milestone.

The House amendment contained no similar provision.

The House recedes with an amendment that would terminate the notification requirement at the end of fiscal year 2004.

The conferees have designated the end date of the reporting obligation to coincide with the date on which the NIF should achieve first light of the laser.

Subtitle D—Matters Relating to Management of the National Nuclear Security Administration

Establishment of Principal Deputy Administrator of National Nuclear Security Administration (sec. 3141)

The Senate bill contained a provision (sec. 3141) that would establish a Principle Deputy Administrator for nuclear security at the National Nuclear Security Administration (NNSA). The new position would be appointed by the President with the advice and consent of the Senate.

The House amendment contained a similar provision (sec. 3132(a)) that would establish the position and spell out qualifications for the individual to be appointed to that position.

The House recedes with an amendment that would require that the person appointed for the position has extensive background in organizational management and is well-qualified to manage the nuclear weapons programs, nonproliferation, and material disposition programs of the NNSA.

Elimination of requirement that national security laboratories and nuclear weapons production facilities report to Deputy Administrator for Defense Programs (sec. 3142)

The Senate bill contained a provision (sec. 3142) that would amend section 3214 of the National Nuclear Security Administration Act by striking subsection (c), which directs the contractor managers and directors of the National Nuclear Security Administration weapons production plants and national laboratories to report to the Deputy Administrator for Defense Programs.

The House amendment contained an identical provision (sec. 3132(b)).

The conference agreement includes this provision.

Repeal of duplicative provision relating to dual office holding by personnel of National Nuclear Security Administration (sec. 3143)

The House amendment contained a provision (sec. 3132(c)) that would repeal a duplicative statutory prohibition on the ability of non-National Nuclear Security Administration (NNSA) employees of the Department of Energy to serve concurrently in the NNSA.

The Senate bill contained no similar provision.

The Senate recesses.

Report on adequacy of federal pay and hiring authorities to meet personnel requirements of National Nuclear Security Administration (sec. 3144)

The Senate bill contained a provision (sec. 3144) that would amend section 3241 of the National Nuclear Security Administration Act to allow the National Nuclear Security Administration (NNSA) to expand the number of scientific and technical positions from the current 300 positions to 500 positions.

The House amendment contained no similar provision.

The House recesses with an amendment that would require the Administrator of the NNSA to prepare a report on what hiring and pay authorities are available to the NNSA, what authorities are being used, and what additional authorities are required.

The conferees believe that the Administrator should work with the Office of Personnel Management to determine the appropriate status of all employees in the NNSA. The conferees are aware that the Administrator would like to convert all federal employees of the NNSA to an excepted service type status. The report required should discuss the Administrator's plans and options for appropriate pay and hiring authorities at the NNSA.

Subtitle E—Other Matters

Improvements to energy employees occupational illness compensation program (sec. 3151)

The Senate bill contained a provision (sec. 3151) that would amend the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA) (title XXXVI of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001). These amendments were designed to create greater parity between

certain provisions in the EEOICPA and similar provisions in the Radiation Employees Compensation Act.

The House amendment contained no similar provision.

The House recedes with an amendment.

The conferees have agreed to include language that would amend the EEOICPA in several areas, including: revising the threshold standard for determining if a covered employee has contracted silicosis; clarifying attorney's fees provisions; clarifying who qualifies as survivors and their entitlement to lump-sum benefits not paid to the covered employee; adding a technical amendment dealing with covered Leukemias; clarifying the effect of the EEOICPA on tort actions filed both before and after the EEOICPA date of enactment, and subsequent to the date of enactment of this Act; and directing the director of the National Institute for Occupational Safety and Health to conduct a new study on potential health effects of any residual contamination at certain facilities.

The provision clarifies that Leukemia, other than chronic Lymphocytic Leukemia, is covered if the initial occupational exposure occurred before the age of twenty-one and if the onset of the Leukemia occurred more than two years after such exposure. This amendment makes it clear that occupational exposure received prior to age twenty-one falls within the purview of the EEOICPA.

The provision amends section 3626(b) of the EEOICPA to include employees of an atomic energy weapons employer facility for consideration as a member of the special exposure cohort.

The provision amends section 3627(e)(2)(A) of the EEOICPA to change the threshold criteria for determining if a covered employee has silicosis to a 1/0 reading from a 1/1 reading. This change brings the EEOICPA in line with the Radiation Exposure Compensation Act (42 U.S.C. 2210 note).

The provision amends sections 3628(e) and 3630(e) of the EEOICPA to clarify that any compensation payments not made to covered employees prior to their death shall be paid to survivors living at the time payment is to be made and to define who qualifies as survivors for purposes of receiving such payments. The provision ensures that certain surviving minor children will receive the benefit owed to the deceased covered employee. The provision would also repeal paragraph 18 of section 3621 of the EEOICPA, defining survivors.

The provision amends section 3645 of the EEOICPA to clarify the election of remedies under certain circumstances. The amendments were included to address the situation where a tort case for compensation filed prior to October 30, 2000 had been dismissed, but where the dismissal was not a voluntary dismissal sought by the plaintiff. Under such a circumstance, the plaintiff would still be eligible to seek compensation under EEOICPA if the non-voluntary dismissal occurs prior to December 31, 2003. The provision would retain, however, the prohibition that if the tort case has not been involuntarily dismissed prior to December 31, 2003, the plaintiff would not be eligible to seek compensation under the EEOICPA unless the plaintiff voluntarily dismissed the case. The conferees were primarily concerned that a plaintiff in a previously filed case that had been involuntarily dismissed prior to December 31, 2003 would not be eligible to seek compensation under the EEOICPA.

Under this provision, this individual would be eligible to file a claim for compensation. The amendment would, however, preclude any individual who had filed a tort case between October 30, 2000 and the date of the enactment of this Act, from being eligible to receive compensation or benefits under the EEOICPA unless the case is dismissed by the individual before the last permissible date. The permissible date is the later of April 30, 2003 or 30 months after discovering that the individual has a covered illness that results from the individual's covered occupational exposure.

In addition, the provision would provide that if the individual files a tort case after the date of enactment of this Act, the individual is not eligible for compensation if there is a final court decision adverse to the plaintiff rendered prior to the last permissible date for a voluntary dismissal. The last permissible date for a voluntary dismissal is the later of April 30, 2003 or 30 months after discovering that the individual has a covered illness that results from the individual's covered occupational exposure.

The provision would amend section 3648 of the EEOICPA to clarify that the two-percent limitation on attorney fees applies to initial claims for lump-sum compensation and that the ten-percent limitation on attorney fees applies to assistance provided with respect to objections to a recommended decision denying payment of a lump-sum compensation. The provision would also clarify that the limitations on attorney fees does not apply to attorney fees for services rendered for matters not pertaining to or in connection with lump-sum claims.

Finally, the provision would require the National Institute for Occupational Safety and Health to conduct a study in coordination with the Department of Energy (DOE) and the Department of Labor to determine whether there is any significant residual contamination at beryllium vendors or atomic weapons employer facilities that could have caused or substantially contributed to the cancer or beryllium illness of a covered employee. An interim report is due 180 days after enactment of this Act, and the final report is due one year after the date of enactment.

The conferees are aware of draft regulations promulgated by the DOE and intended to implement subtitle D of the EEOICPA. The conferees are concerned that the DOE appears to have misinterpreted the intent of Congress in this area. Subtitle D was intended to provide an alternative path to state workers compensation systems that would rely on the independent judgment of a physicians panel as to whether a worker's illness was related to exposure to a toxic substance while working at a DOE facility. In cases where this independent panel finds that the illness was related to occupational exposure, the conferees expect that the DOE will direct its contractors not to contest the worker's claim in the state proceedings. Subtitle D was intended to overcome existing procedural barriers within state workers compensation systems that prevent workers with occupational illnesses from receiving assistance from these systems. In implementing subtitle D, the DOE should not re-impose the same or similar procedural barriers that subtitle D was designed to remove or overcome.

Department of Energy counterintelligence polygraph program (sec. 3152)

The Senate bill contained a provision (sec. 3152) that would direct the Secretary of Energy to develop a new interim polygraph program, and then establish a new permanent polygraph program. The new permanent program would be established by regulations issued pursuant to the Administrative Procedures Act, after the DOE completes the ongoing Polygraph Review. The provision would also repeal section 3154 of the Department of Energy Facilities Safeguards, Security and Counterintelligence Enhancement Act of 1999 (Title XXXI of the National Defense Authorization Act for Fiscal Year 2000).

The House amendment contained no similar provision.

The House recedes with an amendment that would direct the Secretary of Energy to establish a new permanent polygraph program by regulations issued pursuant to the Administrative Procedures Act. The provision would repeal section 3154 only after the DOE has implemented the final rule and the Secretary submits a certification to the congressional defense committees to that effect.

One-year extension of authority of Department of Energy to pay voluntary separation incentive payments (sec. 3153)

The Senate bill contained a provision (sec. 3153) that would amend section 3161(a) of the National Defense Authorization Act for Fiscal Year 2000 to provide a one-year extension of the Department of Energy (DOE) authority to make voluntary separation incentive payments through January 1, 2004.

The House amendment contained no similar provision.

The House recedes with an amendment stating that the provision may be superceded by an applicable government-wide statute providing voluntary separation incentive payments.

The conferees note that the administration is seeking government-wide authority setting uniform standards to be applied by federal agencies in making voluntary separation incentive payments. In the event that Congress enacts such a law, the conferees anticipate that it would supercede this provision and conform the DOE and Department of Defense authority to that provided to all federal agencies.

Annual assessment and report on vulnerability of Department of Energy facilities to terrorist attack (sec. 3154)

The Senate bill contained a provision (sec. 3159) that would direct the Secretary of Energy to conduct an annual assessment on the vulnerabilities of Department of Energy (DOE) facilities to terrorist attack. The report would be due on January 31 of each year. The first report would be due on January 31, 2003.

The House amendment contained no similar provision.

The House recedes.

Disposition of surplus defense plutonium at Savannah River Site, Aiken, South Carolina (sec. 3155)

The House amendment contained a provision (sec. 3134) that would require the Secretary of Energy to consult with the Governor of South Carolina on any decisions or plans regarding the disposi-

tion of surplus defense plutonium at the Savannah River Site and to submit a plan to Congress by February 1, 2002, for the disposal of surplus defense plutonium currently located at the site, as well as for defense plutonium that may be shipped to the site in the future. If the plan is not submitted by February 1, 2002, then no shipments of plutonium could be made to the Savannah River Site.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that would require the Secretary to provide a notice to the congressional defense committees 30 days before the Secretary shipped any defense plutonium or defense plutonium materials to the Savannah River Site. The conferees note that a similar report is required by the conference report for the Energy and Water Development Appropriations Act for Fiscal Year 2002 (Public Law 107-66).

The provision would also require the Secretary to prepare a comprehensive plan for the long-term disposition of defense plutonium and defense plutonium materials. If the Secretary should decide not to proceed with the immobilization facility or the mixed oxide facility, then the Secretary shall include in the plan required to be submitted on February 1, 2002 a disposition path for the material.

Modification of date of report of Panel to Assess the Reliability, Safety, and Security of the United States Nuclear Stockpile (sec. 3156)

The Senate bill contained a provision (sec. 3155) that would amend section 3159(d) of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 by extending the due date for the third report required by that section from October 1, 2001 to February 1, 2002.

The House amendment contained no similar provision.

The House recesses.

Subtitle F—Rocky Flats National Wildlife Refuge

Rocky Flats National Wildlife Refuge (sec. 3171-3182)

The Senate bill contained a series of provisions (sec. 3171-3181) that would transfer the Department of Energy Rocky Flats site to the Department of Interior (DOI) to establish the Rocky Flats National Wildlife Refuge. The transfer would occur after the DOE has completed the environmental cleanup of the site.

The House amendment contained no similar provision.

The House recesses with amendments that would clarify the relationship between the Department of Energy (DOE) and the DOI and remove the requirement for the DOI to conduct any interim management activities prior to the transfer of jurisdiction over Rocky Flats.

This designation will ensure that appropriate land uses are maintained and that an environmentally sound end state will result. As cleanup and closure continues, the committee urges the DOE to consult with the U.S. Fish and Wildlife Service to ensure a smooth transition from the DOE to the DOI.

Through a Memorandum of Understanding (MOU), the DOE and the DOI should address any remaining issues related to the

transition, determine how to resolve those issues, and develop the best path forward for transferring the land. The MOU should also address longer term relationships between the DOE and the DOI and address such things as indemnification for any costs that may result after the transfer.

The provisions would also require that any conflicts between the two agencies over cleanup activities on the land retained by the DOE be resolved so that cleanup activities take priority.

The Act provides that prior to the transfer, the Environmental Protection Agency must certify that the site is cleaned up and closed as a DOE facility pursuant to existing laws, regulations, and agreements. The conferees note that the State of Colorado has recently passed a new statute concerning the enforceability of environmental real covenants. Several federal agencies have raised questions about the applicability of this provision to federal lands. The conferees do not attempt to resolve any issues associated with the applicability of this new Colorado statute and do not intend these provisions to be interpreted as either supporting or refuting the applicability of this statute to federal lands, including the wildlife refuge that would be created in this Act.

While it is expected that most structures will be demolished when the property is transferred from the DOE to the Fish and Wildlife Service, any cleanup facilities or structures related to long-term treatment and control of contamination that the DOE must maintain and remain liable for will be excluded from transfer. In addition, the provision also allows the DOI to designate any buildings that it might need for managing the refuge.

The Act also anticipates that wastes and materials will be removed for off-site disposal and that there should not be any need for a long-term storage facility at the site.

The provision clarifies that these provisions shall not be interpreted or construed to reduce the required cleanup levels, and that these levels should reflect a cleanup level that is fully protective of human health and the environment for the long-term.

The provisions also require that the refuge shall be managed in accordance with the National Wildlife Refuge System Administration Act. Accordingly, the Fish and Wildlife Service must consult with local communities and ensure public participation during development of the Rocky Flats Wildlife Refuge plans. This Act also recognizes and preserves the existence of other property rights on the Rocky Flats site, such as mineral rights, water rights, and utility rights-of-way for all relevant parties. The conferees recognize that the DOE's top priority at Rocky Flats is safe cleanup and closure, and strongly support continuation of efforts to achieve the 2006 closure date. The conferees further recognize that the accelerated cleanup at Rocky Flats and creation of the Wildlife Refuge has been achieved through strong support and cooperation from the surrounding communities, the State of Colorado, and the Colorado Congressional delegation. Creation of the Rocky Flats National Wildlife Refuge provides an important path forward for Rocky Flats and a model for other DOE cleanup sites across the nation.

LEGISLATIVE PROVISIONS NOT ADOPTED

Additional objective for Department of Energy defense nuclear facility workforce restructuring plan

The Senate bill contained a provision (sec. 3154) that would amend section 3161(c) of the National Defense Authorization Act for Fiscal Year 1993 by adding a new requirement to the workforce restructuring plan. The new requirement would direct the Secretary of Energy to provide assistance to promote the diversification of the economies of the communities in the vicinity of the Department of Energy (DOE).

The House amendment contained no similar provision.

The Senate recesses.

The conferees believe that the DOE, in its work with the Department of Commerce and the Department of Labor in preparing and carrying out workforce restructuring plans, already looks at economic diversification as an element of the plan. The conferees direct the Secretary to continue to promote diversification of the economies in the vicinity of any DOE defense nuclear facility that may be affected by a workforce restructuring and to include in the plan a description of the steps taken in support of this goal.

Clarification of status within the Department of Energy of Administration and contractor personnel of the National Nuclear Security Administration

The Senate bill contained a provision (sec. 3143) that would amend section 3219 of the National Nuclear Security Administration Act (Title XXXII of the National Defense Act for Fiscal Year 2000) to clarify that when work is performed at National Nuclear Security Administration (NNSA) facilities and sponsored by offices outside of the NNSA, the sponsoring office can supervise the work being performed and that NNSA employees can serve on DOE task forces.

The House amendment contained no similar provision.

The Senate recesses.

The conferees do not include this provision because they do not believe that the existing law prohibits or limits either non-NNSA agencies and offices from providing authority direction and control over programs that they sponsor at NNSA facilities or NNSA employees from serving as full members of any DOE task force.

Construction of Department of Energy operations office complex

The Senate bill contained a provision (sec. 3134) that would authorize the Secretary of Energy to provide for the design and construction of a new operations office complex for the Department of Energy (DOE) in accordance with the feasibility study regarding such operations office complex conducted under the National Defense Authorization Act for Fiscal Year 2000. The provision would provide authority to the Secretary to use one or more energy savings performance (ESP) contracts, entered into under Title VII of the National Energy Policy Conservation Act, 42 U.S.C. 8287 et seq., to design and construct the complex. The provision would require that the construction and operation costs of the complex be paid from the energy savings and ancillary operations and mainte-

nance savings that result from the replacement of a current DOE operations office complex.

The House amendment contained no similar provision.

The Senate recesses.

Improvements to Corral Hollow Road, Livermore, California

The Senate bill contained a provision (sec. 3158) that would authorize up to \$0.3 million for safety improvements to Corral Hollow Road, the amount of the budget request.

The House amendment contained no similar provision.

The Senate recesses.

The conferees agree that funds for road improvements that are for roads not on Department of Energy (DOE) sites should be specifically requested in the DOE budget request. The conferees also agree that specific authorization is not required for such road projects unless the total project cost for the project exceeds \$5.0 million.

Increased amount for nonproliferation and verification

The House amendment contained a provision (sec. 3106) that would increase the amounts authorized for defense nuclear nonproliferation by \$10.0 million for operation and maintenance for nonproliferation and verification research and development.

The Senate bill contained a provision (sec. 3302) that would provide the Secretary of Defense with greater flexibility in the disposal of materials from the National Defense Stockpile. The provision would allow the sale of materials over 10 years, based on market conditions, rather than according to a specific timetable limiting quantities that could be disposed of in any given year.
