^a Transportation use of natural gas is gas consumed in the operation of pipelines, primarily in compressors, and, since 1990, is also gas consumed as vehicle fuel.

Where shown, (s) = Btu value less than 0.05 or physical unit value less than 0.5.

Notes: • Data in billion cubic feet are for natural gas, plus a small amount of supplemental gaseous fuels that cannot be identified separately. Data in trillion Btu are for natural gas only, excluding the

estimated heat content of the supplemental gaseous fuels. • Totals may not equal sum of components due to independent rounding.

Sources: Data sources, estimation procedures, and assumptions are described in the Technical Notes.
