Public Comment for OMB regulations

,

Dear Public Comment for OMB regulations:

I am very concernd about your plan to privitize i feel service will deteriorate and it semms to me now that this administration is trying to take decent jobs and wants americans to work for minimum wage so they cant afford a decent living i have voted for many republicans including the last two elections but i now fell the curant administration is to corporate frendly i consider them to be corporate terrorist and can no longer vote for any republican until this administration is out off office because as i said it seems they want to take everthing from the workers

Sincerely,

james macmilan
