

**Blind and Disabled  
Recipients Who  
Work**

---

---

**Chart 3.**  
**Percentage distribution, by age, December 2003**

One-third of the working recipients in December 2003 were under age 30, and 25 percent were aged 30–39. Only 21 percent were aged 50 or older.

SOURCE: Table 7.

NOTE: Data include section 1619(b) participants.

**Chart 4.**  
**Percentage distribution, by diagnostic group, December 2003**

A large majority of working SSI recipients aged 18–64 in December 2003 were disabled because of a mental impairment. Forty-two percent were diagnosed with mental retardation and 22 percent with other mental disorders. Nine percent had diseases of the nervous system and sense organs, mostly blindness. Nine percent had diseases of the nervous system and sense organs, mostly blindness.

SOURCE: Table 3.

NOTE: Data include section 1619(b) participants.

**Chart 5.**  
**Percentage distribution, by monthly earnings, December 2003**

Two out of three working recipients earned less than \$500 in December 2003. This amount would not affect their status as disabled, since it is less than the substantial gainful activity level of \$800 for 2003. One out of seven earned \$1,000 or more. This proportion includes those receiving special cash benefits, or special Medicaid status, under section 1619.

SOURCE: Table 7.

NOTE: Data include section 1619(b) participants.

**Table 6.**  
**Number participating in section 1619(a) or 1619(b) and others who work, by state or other area,**

SOURCE: Social Security Administration, Supplemental Security Record (Characteristic Extract Record format), 100 percent data.

NOTE: Includes section 1619(b) participants.

a. The sum of the entries may be greater than the total because some recipients may receive more than one type of earned or unearned income, or both earned and unearned income, or benefit from more than one work incentive provision.

b. Number of working recipients with a plan for achieving self-support (PASS). See Tables 14–17 for data on all recipients with a PASS.
