Because the complexity of modern life intensifies the need in a federal form of government for the fullest cooperation and coordination of activities between the levels of government, and because population growth and scientific developments portend an increasingly complex society in future years, it is essential that an appropriate agency be established to give continuing attention to intergovernmental problems.

It is intended that the Commission, in the performance of its duties, will—

(1) bring together representatives of the Federal, State, and local governments for the consideration of common problems;

(2) provide a forum for discussing the administration and coordination of Federal grant and other programs requiring intergovernmental cooperation;

(3) give critical attention to the conditions and controls involved in the administration of Federal grant programs;

(4) make available technical assistance to the executive and legislative branches of the Federal Government in the review of proposed legislation to determine its overall effect on the Federal system;

(5) encourage discussion and study at an early stage of emerging public problems that are likely to require intergovernmental cooperation;

(6) recommend, within the framework of the Constitution, the most desirable allocation of governmental functions, responsibilities, and revenues among the several levels of government; and

(7) recommend methods of coordinating and simplifying tax laws and administrative practices to achieve a more orderly and less competitive fiscal relationship between the levels of government and to reduce the burden of compliance for taxpayers.

Prepared by the President and transmitted to the Senate and the House of Representatives in Congress assembled, July 9, 1970, pursuant to the provisions of Chapter 9 of Title 5 of the United States Code.

ENVIRONMENTAL PROTECTION AGENCY

SECTION 1. ESTABLISHMENT OF AGENCY

(a) There is hereby established the Environmental Protection Agency, hereinafter referred to as the ''Agency.''

MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I transmit herewith Reorganization Plan No. 3 of 1970, prepared in accordance with chapter 9 of title 5 of the United States Code and providing for an Environmental Protection Agency. My reasons for transmitting this plan are stated in a more extended accompanying message.

After investigation, I have found and hereby declare that each reorganization included in Reorganization Plan No. 3 of 1970 is necessary to accomplish one or more of the purposes set forth in section 901(a) of title 5 of the United States Code. In particular, the plan is responsive to section 901(a)(1), ''to promote the better execution of the laws, the more effective management of the executive branch and of its agencies and functions, and the expeditious administration of the public business;'' and section 901(a)(3), ''to increase the efficiency of the operations of the Government to the fullest extent practicable.''

The reorganizations provided for in the plan make necessary the appointment and compensation of new officers as specified in section 1 of the plan. The rates of compensation fixed for these officers are comparable to those fixed for other officers in the executive branch who have similar responsibilities.

Section 907 of title 5 of the United States Code will operate to preserve administrative proceedings, including any public hearing proceedings, related to the transferred functions, which are pending immediately prior to the taking effect of the reorganization plan.

The reorganization plan should result in more efficient operation of the Government. It is not practical, however, to itemize or aggregate the exact expenditure reductions which will result from this action.

RICHARD NIXON.

THE WHITE HOUSE, July 9, 1970.

MESSAGE OF THE PRESIDENT

To the Congress of the United States:

As concern with the condition of our physical environment has intensified, it has become increasingly clear that we need to know more about the total environment—land, water and air. It also has become increasingly clear that only by reorganizing our Federal efforts can we develop that knowledge, and effectively ensure the protection, development and enhancement of the total environment itself.

The Government's environmentally-related activities have grown up piecemeal over the years. The time has come to organize them rationally and systematically. As a major step in this direction, I am transmitting today two reorganization plans: one to establish an Environmental Protection Agency, and one to establish, within the Department of Commerce, a National Oceanic and Atmospheric Administration.

ENVIRONMENTAL PROTECTION AGENCY (EPA)

Our national government today is not structured to make a coordinated attack on the pollutants which debase the air we breathe, the water we drink, and the land that grows our food. Indeed, the present governmental structure for dealing with environmental pollution often defies effective and concerted action.

Despite its complexity, for pollution control purposes the environment must be perceived as a single, interrelated system. Present assignments of departmental responsibilities do not reflect this interrelatedness.

Many agency missions, for example, are designed primarily along media lines—air, water, and land. Yet the sources of air, water, and land pollution are interrelated and often interchangeable. A single source may pollute the air with smoke and chemicals, the land with solid wastes, and a river or lake with chemical and other wastes. Control of the air pollution may produce more solid wastes, which then pollute the land or water. Control of the water-polluting effluent may convert it into solid wastes, which must be disposed of on land.

Similarly, some pollutants—chemicals, radiation, pesticides—appear in all media. Successful control of them at present requires the coordinated efforts of a variety of separate agencies and departments. The results are not always successful.

A far more effective approach to pollution control would:

—identify pollutants.
—trace them through the entire ecological chain, observing and recording changes in form as they occur.
—Determine the total exposure of man his environment.
—Examine interactions among forms of pollution.
—Identify where in the ecological chain interdiction would be most appropriate.

In organizational terms, this requires pulling together into one agency a variety of research, monitoring, standard-setting and enforcement activities now scattered through several departments and agencies. It also requires that the new agency include sufficient support elements—in research and in aids to State and local anti-pollution programs, for example—to give it the needed strength and potential for carrying out its mission. The new agency would also, of course, draw upon the results of research conducted by other agencies.

COMPONENTS OF THE EPA

Under the terms of Reorganization Plan No. 3, the following would be moved to the new Environmental Protection Agency:

—The functions carried out by the Federal Water Quality Administration (from the Department of the Interior).
—Functions with respect to pesticides studies now vested in the Department of the Interior.
—The functions carried out by the National Air Pollution Control Administration (from the Department of Health, Education, and Welfare).
—The functions carried out by the Bureau of Solid Waste Management and the Bureau of Water Hygiene, and portions of the functions carried out by the Bureau of Radiological Health of the Environmental Control Administration (from the Department of Health, Education, and Welfare).
—Certain functions with respect to pesticides carried out by the Food and Drug Administration (from the Department of Health, Education, and Welfare).
—Authority to perform studies relating to ecological systems now vested in the Council on Environmental Quality.
—Certain functions respecting radiation criteria and standards now vested in the Atomic Energy Commission and the Federal Radiation Council.

—Functions respecting pesticides registration and related activities now carried out by the Agricultural Research Service (from the Department of Agriculture).

With its broad mandate, EPA would also develop competence in areas of environmental protection that have not previously been given enough attention, such, for example, as the problem of noise, and it would provide an organization to which new programs in these areas could be added.

In brief, these are the principal functions to be transferred:

Federal Water Quality Administration.—Charged with the control of pollutants which impair water quality, it is broadly concerned with the impact of degraded water quality. It performs a wide variety of functions, including research, standard-setting and enforcement, and provides construction grants and technical assistance.

Certain pesticides research authority from the Department of the Interior.—Authority for research on the effects of pesticides on fish and wildlife would be provided to the EPA through transfer of the specialized research authority of the pesticides act enacted in 1958. Interior would retain its responsibility to do research on all factors affecting fish and wildlife. Under this provision, only one laboratory would be transferred to the EPA—the Gulf Breeze Biological Laboratory of the Bureau of Commercial Fisheries. The EPA would work closely with the fish and wildlife laboratories remaining with the Bureau of Sport Fisheries and Wildlife.

National Air Pollution Control Administration.—As the principal Federal agency concerned with air pollution, it conducts research on the effects of air pollution, operates a monitoring network, and promulgates criteria which serve as the basis for setting air quality standards. Its regulatory functions are similar to those of the Federal Water Quality Administration. NAPCA is responsible for administering the Clean Air Act, which involves designating air quality regions, approving State standards and providing financial and technical assistance to State Control agencies to enable them to comply with the Act's provisions. It also sets and enforces Federal automotive emission standards.

Elements of the Environmental Control Administration.—ECA is the focal point within HEW for evaluation and control of a broad range of environmental health problems, including water quality, solid wastes, and radiation. Programs in the ECA involve research, development of criteria and standards, and the administration of planning and demonstration grants. From the ECA, the activities of the Bureaus of Water Hygiene and Solid Waste Management and portions of the activities of the Bureau of Radiological Health would be transferred. Other functions of the ECA including those related to the regulation of radiation from consumer products and occupational safety and health would remain in HEW.

Pesticides research and standard-setting programs of the Food and Drug Administration.—FDA's pesticides program consists of setting and enforcing standards which limit pesticide residues in food. EPA would have the authority to set pesticide standards and to monitor compliance with them, as well as to conduct related research. However, as an integral part of its food protection activities, FDA would retain its authority to remove from the market food with excess pesticide residues.

General ecological research from the Council on Environmental Quality.—This authority to perform studies and research relating to ecological systems would be in addition to EPA's other specific research authorities, and it would help EPA to measure the impact of pollutants. The Council on Environmental Quality would retain its authority to conduct studies and research relating to environmental quality.

Environmental radiation standards programs.—The Atomic Energy Commission is now responsible for establishing environmental radiation standards and emission limits for radioactivity. Those standards have been based largely on broad guidelines recommended by the Federal Radiation Council. The Atomic Energy Commission's authority to set standards for the protection of the general environment from radioactive material would be transferred to the Environmental Protection Agency. The functions of the Federal Radiation Council would also be transferred. AEC would retain responsibility for the implementation and enforcement of radiation standards through its licensing authority.

Pesticides registration program of the Agricultural Research Service.—The Department of Agriculture is currently responsible for several distinct functions related to pesticides use. It conducts research on the efficacy of various pesticides as related to other pest control methods and on the effects of pesticides on nontarget plants, livestock, and poultry. It registers pesticides, monitors their persistence and carries out an educational program on pesticide use through the extension service. It conducts extensive pest control programs which utilize pesticides.

By transferring the Department of Agriculture's pesticides registration and monitoring function to the EPA and merging it with the pesticides programs being transferred from HEW and Interior, the new agency would be given a broad capability for control over the introduction of pesticides into the environment.

The Department of Agriculture would continue to conduct research on the effectiveness of pesticides. The Department would furnish this information to the EPA, which would have the responsibility for actually licensing pesticides for use after considering environmental and health effects. Thus the new agency would be able to make use of the expertise of the Department.

ADVANTAGES OF REORGANIZATION

This reorganization would permit response to environmental problems in a manner beyond the previous capability of our pollution control programs. The EPA would have the capacity to do research on important pollutants irrespective of the media in which they appear, and on the impact of these pollutants on the total environment. Both by itself and together with other agencies, the EPA would monitor the condition of the environment—biological as well as physical. With these data, the EPA would be able to establish quantitative ''environmental baselines''—critical if we are to measure adequately the success or failure of our pollution abatement efforts.

As no disjointed array of separate programs can, the EPA would be able—in concert with the States—to set and enforce standards for air and water quality and for individual pollutants. This consolidation of pollution control authorities would help assure that we do not create new environmental problems in the process of controlling existing ones. Industries seeking to minimize the adverse impact of their activities on the environment would be assured of consistent standards covering the full range of their waste disposal problems. As the States develop and expand their own pollution control programs, they would be able to look to one agency to support their efforts with financial and technical assistance and training.

In proposing that the Environmental Protection Agency be set up as a separate new agency, I am making an exception to one of my own principles: that, as a matter of effective and orderly administration, additional new independent agencies normally should not be created. In this case, however, the arguments against placing environmental protection activities under the jurisdiction of one or another of the existing departments and agencies are compelling.

In the first place, almost every part of government is concerned with the environment in some way, and affects it in some way. Yet each department also has its own primary mission—such as resource development, transportation, health, defense, urban growth or agriculture—which necessarily affects its own view of environmental questions.

In the second place, if the critical standard-setting functions were centralized within any one existing de-

partment, it would require that department constantly to make decisions affecting other departments—in which, whether fairly or unfairly, its own objectivity as an impartial arbiter could be called into question.

Because environmental protection cuts across so many jurisdictions, and because arresting environmental deterioration is of great importance to the quality of life in our country and the world, I believe that in this case a strong, independent agency is needed. That agency would, of course, work closely with and draw upon the expertise and assistance of other agencies having experience in the environmental area.

ROLES AND FUNCTIONS OF EPA

The principal roles and functions of the EPA would include:

—The establishment and enforcement of environmental protection standards consistent with national environmental goals.

—The conduct of research on the adverse effects of pollution and on methods and equipment for controlling it, the gathering of information on pollution, and the use of this information in strengthening environmental protection programs and recommending policy changes.

—Assisting others, through grants, technical assistance and other means in arresting pollution of the environment.

—Assisting the Council on Environmental Quality in developing and recommending to the President new policies for the protection of the environment.

One natural question concerns the relationship between the EPA and the Council on Environmental Quality, recently established by Act of Congress.

It is my intention and expectation that the two will work in close harmony, reinforcing each other's mission. Essentially, the Council is a top-level advisory group (which might be compared with the Council of Economic Advisers), while the EPA would be an operating, ''line'' organization. The Council will continue to be a part of the Executive Office of the President and will perform its overall coordinating and advisory roles with respect to all Federal programs related to environmental quality.

The Council, then, is concerned with all aspects of environmental quality—wildlife preservation, parklands, land use, and population growth, as well as pollution. The EPA would be charged with protecting the environment by abating pollution. In short, the Council focuses on what our broad policies in the environment field should be; the EPA would focus on setting and enforcing pollution control standards. The two are not competing, but complementary—and taken together, they should give us, for the first time, the means to mount an effectively coordinated campaign against environmental degradation in all of its many forms.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

The oceans and the atmosphere are interacting parts of the total environmental system upon which we depend not only for the quality of our lives, but for life itself.

We face immediate and compelling needs for better protection of life and property from natural hazards, and for a better understanding of the total environment—and understanding which will enable us more effectively to monitor and predict its actions, and ultimately, perhaps to exercise some degree of control over them.

We also face a compelling need for exploration and development leading to the intelligent use of our marine resources. The global oceans, which constitute nearly three-fourths of the surface of our planet, are today the least-understood, the least-developed, and the least-protected part of our earth. Food from the oceans will increasingly be a key element in the world's fight against hunger. The mineral resources of the ocean beds and of the oceans themselves, are being increasingly tapped to meet the growing world demand. We must understand the nature of these resources, and assure their development without either contaminating the marine environment or upsetting its balance.

Establishment of the National Oceanic and Atmospheric Administration—NOAA—within the Department of Commerce would enable us to approach these tasks in a coordinated way. By employing a unified approach to the problems of the oceans and atmosphere, we can increase our knowledge and expand our opportunities not only in those areas, but in the third major component of our environment, the solid earth, as well.

Scattered through various Federal departments and agencies, we already have the scientific, technological, and administrative resources to make an effective, unified approach possible. What we need is to bring them together. Establishment of NOAA would do so.

By far the largest of the components being merged would be the Commerce Department's Environmental Science Services Administration (ESSA), with some 10,000 employees (70 percent of NOAA's total personnel strength) and estimated Fiscal 1970 expenditures of almost $200 million. Placing NOAA within the Department of Commerce therefore entails the least dislocation, while also placing it within a Department which has traditionally been a center for service activities in the scientific and technological area.

COMPONENTS OF NOAA

Under terms of Reorganization Plan No. 4, the programs of the following organizations would be moved into NOAA:

—The Environmental Science Services Administration (from within the Department of Commerce).

—Elements of the Bureau of Commercial Fisheries (from the Department of the Interior).

—The marine sport fish program of the Bureau of Sport Fisheries and Wildlife (from the Department of the Interior).

—The Marine Minerals Technology Center of the Bureau of Mines (from the Department of the Interior).

—The Office of Sea Grant Programs (from the National Science Foundation).

—Elements of the United States Lake Survey (from the Department of the Army).

In addition, by executive action, the programs of the following organizations would be transferred to NOAA:

—The National Oceanographic Data Center (from the Department of the Navy).

—The National Oceanographic Instrumentation Center (from the Department of the Navy).

—The National Data Buoy Project (from the Department of Transportation).

In brief, these are the principal functions of the programs and agencies to be combined:

THE ENVIRONMENTAL SCIENCE SERVICES ADMINISTRATION

(ESSA) comprises the following components:

—The Weather Bureau (weather, marine, river and flood forecasting and warning).

—The Coast and Geodetic Survey (earth and marine description, mapping and charting).

—The Environmental Data Service (storage and retrieval of environmental data).

—The National Environmental Satellite Center (observation of the global environment from earth-orbiting satellites).

—The ESSA Research Laboratories (research on physical environmental problems).

ESSA's activities include observing and predicting the state of the oceans, the state of the lower and upper atmosphere, and the size and shape of the earth. It maintains the nation's warning systems for such natural hazards as hurricanes, tornadoes, floods, earthquakes and seismic sea waves. It provides information for national defense, agriculture, transportation and industry.

ESSA monitors atmospheric, oceanic and geophysical phenomena on a global basis, through an unparalleled complex of air, ocean, earth and space facilities. It also prepares aeronautical and marine maps and charts.

Bureau of Commercial Fisheries and marine sport fish activities.—Those fishery activities of the Department of the Interior's U.S. Fish and Wildlife Service which are ocean related and those which are directed toward commercial fishing would be transferred. The Fish and Wildlife Service's Bureau of Commercial Fisheries has the dual function of strengthening the fishing industry and promoting conservation of fishery stocks. It conducts research on important marine species and on fundamental oceanography, and operates a fleet of oceanographic vessels and a number of laboratories. Most of its activities would be transferred. From the Fish and Wildlife Service's Bureau of Sport Fisheries and Wildlife, the marine sport fishing program would be transferred. This involves five supporting laboratories and three ships engaged in activities to enhance marine sport fishing opportunities.

The Marine Minerals Technology Center is concerned with the development of marine mining technology.

Office of Sea Grant Programs.—The Sea Grant Program was authorized in 1966 to permit the Federal Government to assist the academic and industrial communities in developing marine resources and technology. It aims at strengthening education and training of marine specialists, supporting applied research in the recovery and use of marine resources, and developing extension and advisory services. The Office carries out these objectives by making grants to selected academic institutions.

The U.S. Lake Survey has two primary missions. It prepares and publishes navigation charts of the Great Lakes and tributary waters and conducts research on a variety of hydraulic and hydrologic phenomena of the Great Lakes' waters. Its activities are very similar to those conducted along the Atlantic and Pacific coasts by ESSA's Coast and Geodetic Survey.

The National Oceanographic Data Center is responsible for the collection and dissemination of oceanographic data accumulated by all Federal agencies.

The National Oceanographic Instrumentation Center provides a central Federal service for the calibration and testing of oceanographic instruments.

The National Data Buoy Development Project was established to determine the feasibility of deploying a system of automatic ocean buoys to obtain oceanic and atmospheric data.

ROLE OF NOAA

Drawing these activities together into a single agency would make possible a balanced Federal program to improve our understanding of the resources of the sea, and permit their development and use while guarding against the sort of thoughtless exploitation that in the past laid waste to so many of our precious natural assets. It would make possible a consolidated program for achieving a more comprehensive understanding of oceanic and atmospheric phenomena, which so greatly affect our lives and activities. It would facilitate the cooperation between public and private interests that can best serve the interests of all.

I expect that NOAA would exercise leadership in developing a national oceanic and atmospheric program of research and development. It would coordinate its own scientific and technical resources with the technical and operational capabilities of other government agencies and private institutions. As important, NOAA would continue to provide those services to other agencies of government, industry and private individuals which have become essential to the efficient operation of our transportation systems, our agriculture and our national security. I expect it to maintain continuing and close liaison with the new Environmental Protection Agency and the Council on Environmental Quality as part of an effort to ensure that environmental questions are dealt with in their totality and they benefit from the full range of the government's technical and human resources.

Authorities who have studied this matter, including the Commission on Marine Science, Engineering and Resources, strongly recommended the creation of a National Advisory Committee for the Oceans. I agree. Consequently, I will request, upon approval of the plan, that the Secretary of Commerce establish a National Advisory Committee for the Oceans and the Atmosphere to advise him on the progress of governmental and private programs in achieving the nation's oceanic and atmospheric objectives.

AN ON-GOING PROCESS

The reorganizations which I am here proposing afford both the Congress and the Executive Branch an opportunity to re-evaluate the adequacy of existing program authorities involved in these consolidations. As these two new organizations come into being, we may well find that supplementary legislation to perfect their authorities will be necessary. I look forward to working with the Congress in this task.

In formulating these reorganization plans, I have been greatly aided by the work of the President's Advisory Council on Executive Organization (the Ash Council), the Commission on Marine Science, Engineering and Resources (the Stratton Commission, appointed by President Johnson), my special task force on oceanography headed by Dr. James Wakelin, and by the information developed during both House and Senate hearings on proposed NOAA legislation.

Many of those who have advised me have proposed additional reorganizations, and it may well be that in the future I shall recommend further changes. For the present, however, I think the two reorganizations transmitted today represent a sound and significant beginning. I also think that in practical terms, in this sensitive and rapidly developing area, it is better to proceed a step at a time—and thus to be sure that we are not caught up in a form of organizational indigestion from trying to rearrange too much at once. As we see how these changes work out, we will gain a better understanding of what further changes—in addition to these—might be desirable.

Ultimately, our objective should be to insure that the nation's environmental and resource protection activities are so organized as to maximize both the effective coordination of all and the effective functioning of each.

The Congress, the Administration and the public all share a profound commitment to the rescue of our natural environment, and the preservation of the Earth as a place both habitable by and hospitable to man. With its acceptance of these reorganization plans, the Congress will help us fulfill that commitment.

RICHARD NIXON.

EX. ORD. NO. 11514. PROTECTION AND ENHANCEMENT OF ENVIRONMENTAL QUALITY

Ex. Ord. No. 11514, Mar. 5, 1970, 35 F.R. 4247, as amended by Ex. Ord. No. 11991, May 24, 1977, 42 F.R. 26967, provided:

By virtue of the authority vested in me as President of the United States and in furtherance of the purpose and policy of the National Environmental Policy Act of 1969 (Public Law No. 91–190, approved January 1, 1970) [this chapter], it is ordered as follows:

SECTION 1. *Policy*. The Federal Government shall provide leadership in protecting and enhancing the quality of the Nation's environment to sustain and enrich human life. Federal agencies shall initiate measures needed to direct their policies, plans and programs so as to meet national environmental goals. The Council on Environmental Quality, through the Chairman, shall advise and assist the President in leading this national effort.

SEC. 2. *Responsibilities of Federal agencies*. Consonant with Title I of the National Environmental Policy Act of 1969 [42 U.S.C. 4331 et seq.], hereafter referred to as the ''Act'', the heads of Federal agencies shall:

(a) Monitor, evaluate, and control on a continuing basis their agencies' activities so as to protect and enhance the quality of the environment. Such activities shall include those directed to controlling pollution and enhancing the environment and those designed to accomplish other program objectives which may affect the quality of the environment. Agencies shall develop programs and measures to protect and enhance environmental quality and shall assess progress in meeting the specific objectives of such activities. Heads of agencies shall consult with appropriate Federal, State and local agencies in carrying out their activities as they affect the quality of the environment.

(b) Develop procedures to ensure the fullest practicable provision of timely public information and understanding of Federal plans and programs with environmental impact in order to obtain the views of interested parties. These procedures shall include, whenever appropriate, provision for public hearings, and shall provide the public with relevant information, including information on alternative courses of action. Federal agencies shall also encourage State and local agencies to adopt similar procedures for informing the public concerning their activities affecting the quality of the environment.

(c) Insure that information regarding existing or potential environmental problems and control methods developed as part of research, development, demonstration, test, or evaluation activities is made available to Federal agencies, States, counties, municipalities, institutions, and other entities, as appropriate.

(d) Review their agencies' statutory authority, administrative regulations, policies, and procedures, including those relating to loans, grants, contracts, leases, licenses, or permits, in order to identify any deficiencies or inconsistencies therein which prohibit or limit full compliance with the purposes and provisions of the Act. A report on this review and the corrective actions taken or planned, including such measures to be proposed to the President as may be necessary to bring their authority and policies into conformance with the intent, purposes, and procedures of the Act, shall be provided to the Council on Environmental Quality not later than September 1, 1970.

(e) Engage in exchange of data and research results, and cooperate with agencies of other governments to foster the purposes of the Act.

(f) Proceed, in coordination with other agencies, with actions required by section 102 of the Act [42 U.S.C. 4332].

(g) In carrying out their responsibilities under the Act and this Order, comply with the regulations issued by the Council except where such compliance would be inconsistent with statutory requirements.

SEC. 3. *Responsibilities of Council on Environmental Quality*. The Council on Environmental Quality shall:

(a) Evaluate existing and proposed policies and activities of the Federal Government directed to the control of pollution and the enhancement of the environment and to the accomplishment of other objectives which affect the quality of the environment. This shall include continuing review of procedures employed in the development and enforcement of Federal standards affecting environmental quality. Based upon such evaluations the Council shall, where appropriate, recommend to the President policies and programs to achieve more effective protection and enhancement of environmental quality and shall, where appropriate, seek resolution of significant environmental issues.

(b) Recommend to the President and to the agencies priorities among programs designed for the control of pollution and for enhancement of the environment.

(c) Determine the need for new policies and programs for dealing with environmental problems not being adequately addressed.

(d) Conduct, as it determines to be appropriate, public hearings or conferences on issues of environmental significance.

(e) Promote the development and use of indices and monitoring systems (1) to assess environmental conditions and trends, (2) to predict the environmental impact of proposed public and private actions, and (3) to determine the effectiveness of programs for protecting and enhancing environmental quality.

(f) Coordinate Federal programs related to environmental quality.

(g) Advise and assist the President and the agencies in achieving international cooperation for dealing with environmental problems, under the foreign policy guidance of the Secretary of State.

(h) Issue regulations to Federal agencies for the implementation of the procedural provisions of the Act (42 U.S.C. 4332(2)). Such regulations shall be developed after consultation with affected agencies and after such public hearings as may be appropriate. They will be designed to make the environmental impact statement process more useful to decisionmakers and the public; and to reduce paperwork and the accumulation of extraneous background data, in order to emphasize the need to focus on real environmental issues and alternatives. They will require impact statements to be concise, clear, and to the point, and supported by evidence that agencies have made the necessary environmental analyses. The Council shall include in its regulations procedures (1) for the early preparation of environmental impact statements, and (2) for the referral to the Council of conflicts between agencies concerning the implementation of the National Environmental Policy Act of 1969, as amended [this chapter], and Section 309 of the Clean Air Act, as amended [42 U.S.C. 7609], for the Council's recommendation as to their prompt resolution.

(i) Issue such other instructions to agencies, and request such reports and other information from them, as may be required to carry out the Council's responsibilities under the Act.

(j) Assist the President in preparing the annual Environmental Quality Report provided for in section 201 of the Act [42 U.S.C. 4341].

(k) Foster investigations, studies, surveys, research, and analyses relating to (i) ecological systems and environmental quality, (ii) the impact of new and changing technologies thereon, and (iii) means of preventing or reducing adverse effects from such technologies.

EXECUTIVE ORDER NO. 11643

Ex. Ord. No. 11643, eff. Feb. 8, 1972, 37 F.R. 2875, as amended by Ex. Ord. No. 11870, eff. July 18, 1975, 40 F.R. 30611; Ex. Ord. No. 11917, eff. May 28, 1976, 41 F.R. 22239, which related to environmental safeguards on activities for animal damage control on Federal lands, was revoked by Ex. Ord. No. 12342, Jan. 27, 1982, 47 F.R. 4223.

EX. ORD. NO. 11644. USE OF OFF-ROAD VEHICLES ON PUBLIC LANDS

Ex. Ord. No. 11644, Feb. 8, 1972, 37 F.R. 2877, as amended by Ex. Ord. No. 11989, May 24, 1977, 42 F.R. 26959; Ex. Ord. No. 12608, Sept. 9, 1987, 52 F.R. 34617, provided:

An estimated 5 million off-road recreational vehicles—motorcycles, minibikes, trail bikes, snowmobiles, dunebuggies, all-terrain vehicles, and others—are in use in the United States today, and their popularity continues to increase rapidly. The widespread use of such vehicles on the public lands—often for legitimate purposes but also in frequent conflict with wise land and resource management practices, environmental values, and other types of recreational activity—has demonstrated the need for a unified Federal policy toward the use of such vehicles on the public lands.

NOW, THEREFORE, by virtue of the authority vested in me as President of the United States by the Constitution of the United States and in furtherance of the purpose and policy of the National Environmental Policy Act of 1969 (42 U.S.C. 4321), it is hereby ordered as follows:

SECTION 1. *Purpose.* It is the purpose of this order to establish policies and provide for procedures that will ensure that the use of off-road vehicles on public lands will be controlled and directed so as to protect the resources of those lands, to promote the safety of all users of those lands, and to minimize conflicts among the various uses of those lands.

SEC. 2. *Definitions.* As used in this order, the term:

(1) ''public lands'' means (A) all lands under the custody and control of the Secretary of the Interior and the Secretary of Agriculture, except Indian lands, (B) lands under the custody and control of the Tennessee Valley Authority that are situated in western Kentucky and Tennessee and are designated as ''Land Between the Lakes,'' and (C) lands under the custody and control of the Secretary of Defense;

(2) ''respective agency head'' means the Secretary of the Interior, the Secretary of Defense, the Secretary of Agriculture, and the Board of Directors of the Tennessee Valley Authority, with respect to public lands under the custody and control of each;

(3) ''off-road vehicle'' means any motorized vehicle designed for or capable of cross-country travel on or immediately over land, water, sand, snow, ice, marsh, swampland, or other natural terrain; except that such term excludes (A) any registered motorboat, (B) any fire, military, emergency or law enforcement vehicle when used for emergency purposes, and any combat or combat support vehicle when used for national defense purposes, and (C) any vehicle whose use is expressly authorized by the respective agency head under a permit, lease, license, or contract; and

(4) ''official use'' means use by an employee, agent, or designated representative of the Federal Government or one of its contractors in the course of his employment, agency, or representation.

SEC. 3. *Zones of Use*. (a) Each respective agency head shall develop and issue regulations and administrative instructions, within six months of the date of this order, to provide for administrative designation of the specific areas and trails on public lands on which the use of off-road vehicles may be permitted, and areas in which the use of off-road vehicles may not be permitted, and set a date by which such designation of all public lands shall be completed. Those regulations shall direct that the designation of such areas and trails will be based upon the protection of the resources of the public lands, promotion of the safety of all users of those lands, and minimization of conflicts among the various uses of those lands. The regulations shall further require that the designation of such areas and trails shall be in accordance with the following—

(1) Areas and trails shall be located to minimize damage to soil, watershed, vegetation, or other resources of the public lands.

(2) Areas and trails shall be located to minimize harassment of wildlife or significant disruption of wildlife habitats.

(3) Areas and trails shall be located to minimize conflicts between off-road vehicle use and other existing or proposed recreational uses of the same or neighboring public lands, and to ensure the compatibility of such uses with existing conditions in populated areas, taking into account noise and other factors.

(4) Areas and trails shall not be located in officially designated Wilderness Areas or Primitive Areas. Areas and trails shall be located in areas of the National Park system, Natural Areas, or National Wildlife Refuges and Game Ranges only if the respective agency head determines that off-road vehicle use in such locations will not adversely affect their natural, aesthetic, or scenic values.

(b) The respective agency head shall ensure adequate opportunity for public participation in the promulgation of such regulations and in the designation of areas and trails under this section.

(c) The limitations on off-road vehicle use imposed under this section shall not apply to official use.

SEC. 4. *Operating Conditions*. Each respective agency head shall develop and publish, within one year of the date of this order, regulations prescribing operating conditions for off-road vehicles on the public lands. These regulations shall be directed at protecting resource values, preserving public health, safety, and welfare, and minimizing use conflicts.

SEC. 5. *Public Information*. The respective agency head shall ensure that areas and trails where off-road vehicle use is permitted are well marked and shall provide for the publication and distribution of information, including maps, describing such areas and trails and explaining the conditions on vehicle use. He shall seek cooperation of relevant State agencies in the dissemination of this information.

SEC. 6. *Enforcement*. The respective agency head shall, where authorized by law, prescribe appropriate penalties for violation of regulations adopted pursuant to this order, and shall establish procedures for the enforcement of those regulations. To the extent permitted by law, he may enter into agreements with State or local governmental agencies for cooperative enforcement of laws and regulations relating to off-road vehicle use.

SEC. 7. *Consultation*. Before issuing the regulations or administrative instructions required by this order or designating areas or trails are required by this order and those regulations and administrative instructions, the Secretary of the Interior shall, as appropriate, consult with the Secretary of Energy and the Nuclear Regulatory Commission.

SEC. 8. *Monitoring of Effects and Review*. (a) The respective agency head shall monitor the effects of the use of off-road vehicles on lands under their jurisdictions. On the basis of the information gathered, they shall from time to time amend or rescind designation of areas or other actions taken pursuant to this order as necessary to further the policy of this order.

(b) The Council on Environmental Quality shall maintain a continuing review of the implementation of this order.

SEC. 9. *Special Protection of the Public Lands*. (a) Notwithstanding the provisions of Section 3 of this Order, the respective agency head shall, whenever he determines that the use of off-road vehicles will cause or is causing considerable adverse effects on the soil, vegetation, wildlife, wildlife habitat or cultural or historic resources of particular areas or trails of the public lands, immediately close such areas or trails to the type of off-road vehicle causing such effects, until such time as he determines that such adverse effects have been eliminated and that measures have been implemented to prevent future recurrence.

(b) Each respective agency head is authorized to adopt the policy that portions of the public lands within his jurisdiction shall be closed to use by off-road vehicles except those areas or trails which are suitable and specifically designated as open to such use pursuant to Section 3 of this Order.

EXECUTIVE ORDER NO. 11987

Ex. Ord. No. 11987, May 24, 1977, 42 F.R. 26949, which directed executive agencies, and encouraged States, local governments, and private citizens, to restrict the introduction of exotic species into the natural ecosystems on lands and waters under their control, and which directed executive agencies to restrict the exportation of native species for introduction of such species into ecosystems outside the United States where they do not naturally occur, unless such introduction or exportation was found not to have an adverse effect on natural ecosystems, was revoked by Ex. Ord. No. 13112, § 6(b), Feb. 3, 1999, 64 F.R. 6186, set out below.

EX. ORD. NO. 11988. FLOODPLAIN MANAGEMENT

Ex. Ord. No. 11988, May 24, 1977, 42 F.R. 26951, as amended by Ex. Ord. No. 12148, July 20, 1979, 44 F.R. 43239, provided:

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in furtherance of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.), the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4001 et seq.), and the Flood Disaster Protection Act of 1973 (Public Law 93–234, 87 Stat. 975) [see Short Title of 1973 Amendment note set out under 42 U.S.C. 4001], in order to avoid to the extent possible the long and short term adverse impacts associated with the occupancy and modification of floodplains and to avoid direct or indirect support of floodplain development wherever there is a practicable alternative, it is hereby ordered as follows:

SECTION 1. Each agency shall provide leadership and shall take action to reduce the risk of flood loss, to minimize the impact of floods on human safety, health and welfare, and to restore and preserve the natural and beneficial values served by floodplains in carrying out its responsibilities for (1) acquiring, managing, and disposing of Federal lands and facilities; (2) providing Federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities.

SEC. 2. In carrying out the activities described in Section 1 of this Order, each agency has a responsibility to evaluate the potential effects of any actions it may take in a floodplain; to ensure that its planning programs and budget requests reflect consideration of flood hazards and floodplain management; and to prescribe procedures to implement the policies and requirements of this Order, as follows:

(a)(1) Before taking an action, each agency shall determine whether the proposed action will occur in a floodplain—for major Federal actions significantly affecting the quality of the human environment, the

evaluation required below will be included in any statement prepared under Section 102(2)(C) of the National Environmental Policy Act [42 U.S.C. 4332(2)(C)]. This determination shall be made according to a Department of Housing and Urban Development (HUD) floodplain map or a more detailed map of an area, if available. If such maps are not available, the agency shall make a determination of the location of the floodplain based on the best available information. The Water Resources Council shall issue guidance on this information not later than October 1, 1977.

(2) If an agency has determined to, or proposes to, conduct, support, or allow an action to be located in a floodplain, the agency shall consider alternatives to avoid adverse effects and incompatible development in the floodplains. If the head of the agency finds that the only practicable alternative consistent with the law and with the policy set forth in this Order requires siting in a floodplain, the agency shall, prior to taking action, (i) design or modify its action in order to minimize potential harm to or within the floodplain, consistent with regulations issued in accord with Section 2(d) of this Order, and (ii) prepare and circulate a notice containing an explanation of why the action is proposed to be located in the floodplain.

(3) For programs subject to the Office of Management and Budget Circular A–95, the agency shall send the notice, not to exceed three pages in length including a location map, to the state and areawide A–95 clearinghouses for the geographic areas affected. The notice shall include: (i) the reasons why the action is proposed to be located in a floodplain; (ii) a statement indicating whether the action conforms to applicable state or local floodplain protection standards and (iii) a list of the alternatives considered. Agencies shall endeavor to allow a brief comment period prior to taking any action.

(4) Each agency shall also provide opportunity for early public review of any plans or proposals for actions in floodplains, in accordance with Section 2(b) of Executive Order No. 11514, as amended [set out above], including the development of procedures to accomplish this objective for Federal actions whose impact is not significant enough to require the preparation of an environmental impact statement under Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended [42 U.S.C. 4332(2)(C)].

(b) Any requests for new authorizations or appropriations transmitted to the Office of Management and Budget shall indicate, if an action to be proposed will be located in a floodplain, whether the proposed action is in accord with this Order.

(c) Each agency shall take floodplain management into account when formulating or evaluating any water and land use plans and shall require land and water resources use appropriate to the degree of hazard involved. Agencies shall include adequate provision for the evaluation and consideration of flood hazards in the regulations and operating procedures for the licenses, permits, loan or grants-in-aid programs that they administer. Agencies shall also encourage and provide appropriate guidance to applicants to evaluate the effects of their proposals in floodplains prior to submitting applications for Federal licenses, permits, loans or grants.

(d) As allowed by law, each agency shall issue or amend existing regulations and procedures within one year to comply with this Order. These procedures shall incorporate the Unified National Program for Floodplain Management of the Water Resources Council, and shall explain the means that the agency will employ to pursue the nonhazardous use of riverine, coastal and other floodplains in connection with the activities under its authority. To the extent possible, existing processes, such as those of the Council on Environmental Quality and the Water Resources Council, shall be utilized to fulfill the requirements of this Order. Agencies shall prepare their procedures in consultation with the Water Resources Council, the Director of the Federal Emergency Management Agency, and the Council on Environmental Quality, and shall update such procedures as necessary.

SEC. 3. In addition to the requirements of Section 2, agencies with responsibilities for Federal real property and facilities shall take the following measures:

(a) The regulations and procedures established under Section 2(d) of this Order shall, at a minimum, require the construction of Federal structures and facilities to be in accordance with the standards and criteria and to be consistent with the intent of those promulgated under the National Flood Insurance Program. They shall deviate only to the extent that the standards of the Flood Insurance Program are demonstrably inappropriate for a given type of structure or facility.

(b) If, after compliance with the requirements of this Order, new construction of structures or facilities are to be located in a floodplain, accepted floodproofing and other flood protection measures shall be applied to new construction or rehabilitation. To achieve flood protection, agencies shall, wherever practicable, elevate structures above the base flood level rather than filling in land.

(c) If property used by the general public has suffered flood damage or is located in an identified flood hazard area, the responsible agency shall provide on structures, and other places where appropriate, conspicuous delineation of past and probable flood height in order to enhance public awareness of and knowledge about flood hazards.

(d) When property in floodplains is proposed for lease, easement, right-of-way, or disposal to non-Federal public or private parties, the Federal agency shall (1) reference in the conveyance those uses that are restricted under identified Federal, State or local floodplain regulations; and (2) attach other appropriate restrictions to the uses of properties by the grantee or purchaser and any successors, except where prohibited by law; or (3) withhold such properties from conveyance.

SEC. 4. In addition to any responsibilities under this Order and Sections 202 and 205 of the Flood Disaster Protection Act of 1973, as amended (42 U.S.C. 4106 and 4128), agencies which guarantee, approve, regulate, or insure any financial transaction which is related to an area located in a floodplain shall, prior to completing action on such transaction, inform any private parties participating in the transaction of the hazards of locating structures in the floodplain.

SEC. 5. The head of each agency shall submit a report to the Council on Environmental Quality and to the Water Resources Council on June 30, 1978, regarding the status of their procedures and the impact of this Order on the agency's operations. Thereafter, the Water Resources Council shall periodically evaluate agency procedures and their effectiveness.

SEC. 6. As used in this Order:

(a) The term ''agency'' shall have the same meaning as the term ''Executive agency'' in Section 105 of Title 5 of the United States Code and shall include the military departments; the directives contained in this Order, however, are meant to apply only to those agencies which perform the activities described in Section 1 which are located in or affecting floodplains.

(b) The term ''base flood'' shall mean that flood which has a one percent or greater chance of occurrence in any given year.

(c) The term ''floodplain'' shall mean the lowland and relatively flat areas adjoining inland and coastal waters including floodprone areas of offshore islands, including at a minimum, that area subject to a one percent or greater chance of flooding in any given year.

SEC. 7. Executive Order No. 11296 of August 10, 1966, is hereby revoked. All actions, procedures, and issuances taken under that Order and still in effect shall remain in effect until modified by appropriate authority under the terms of this Order.

SEC. 8. Nothing in this Order shall apply to assistance provided for emergency work essential to save lives and protect property and public health and safety, performed pursuant to Sections 305 and 306 of the Disaster Relief Act of 1974 (88 Stat. 148, 42 U.S.C. 5145 and 5146).

SEC. 9. To the extent the provisions of Section 2(a) of this Order are applicable to projects covered by Section 104(h) of the Housing and Community Development Act of 1974, as amended (88 Stat. 640, 42 U.S.C. 5304(h)), the responsibilities under those provisions may be assumed by the appropriate applicant, if the applicant has also assumed, with respect to such projects, all of the responsibilities for environmental review, decision-making, and action pursuant to the National Environmental Policy Act of 1969, as amended [42 U.S.C. 4321].

EX. ORD. NO. 11990. PROTECTION OF WETLANDS

Ex. Ord. No. 11990, May 24, 1977, 42 F.R. 26961, as amended by Ex. Ord. No. 12608, Sept. 9, 1987, 52 F.R. 34617, provided:

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in furtherance of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*), in order to avoid to the extent possible the long and short term adverse impacts associated with the destruction or modification of wetlands and to avoid direct or indirect support of new construction in wetlands wherever there is a practicable alternative, it is hereby ordered as follows:

SECTION 1. (a) Each agency shall provide leadership and shall take action to minimize the destruction, loss or degradation of wetlands, and to preserve and enhance the natural and beneficial values of wetlands in carrying out the agency's responsibilities for (1) acquiring, managing, and disposing of Federal lands and facilities; and (2) providing Federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities.

(b) This Order does not apply to the issuance by Federal agencies of permits, licenses, or allocations to private parties for activities involving wetlands on non-Federal property.

SEC. 2. (a) In furtherance of Section 101(b)(3) of the National Environmental Policy Act of 1969 (42 U.S.C. 4331(b)(3)) to improve and coordinate Federal plans, functions, programs and resources to the end that the Nation may attain the widest range of beneficial uses of the environment without degradation and risk to health or safety, each agency, to the extent permitted by law, shall avoid undertaking or providing assistance for new construction located in wetlands unless the head of the agency finds (1) that there is no practicable alternative to such construction, and (2) that the proposed action includes all practicable measures to minimize harm to wetlands which may result from such use. In making this finding the head of the agency may take into account economic, environmental and other pertinent factors.

(b) Each agency shall also provide opportunity for early public review of any plans or proposals for new construction in wetlands, in accordance with Section 2(b) of Executive Order No. 11514, as amended [set out above], including the development of procedures to accomplish this objective for Federal actions whose impact is not significant enough to require the preparation of an environmental impact statement under Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended [42 U.S.C. 4332(2)(C)].

SEC. 3. Any requests for new authorizations or appropriations transmitted to the Office of Management and Budget shall indicate, if an action to be proposed will be located in wetlands, whether the proposed action is in accord with this Order.

SEC. 4. When Federally-owned wetlands or portions of wetlands are proposed for lease, easement, right-of-way or disposal to non-Federal public or private parties, the Federal agency shall (a) reference in the conveyance those uses that are restricted under identified Federal, State or local wetlands regulations; and (b) attach other appropriate restrictions to the uses of properties by the grantee or purchaser and any successor, except where prohibited by law; or (c) withhold such properties from disposal.

SEC. 5. In carrying out the activities described in Section 1 of this Order, each agency shall consider factors relevant to a proposal's effect on the survival and quality of the wetlands. Among these factors are:

(a) public health, safety, and welfare, including water supply, quality, recharge and discharge; pollution; flood and storm hazards; and sediment and erosion;

(b) maintenance of natural systems, including conservation and long term productivity of existing flora and fauna, species and habitat diversity and stability, hydrologic utility, fish, wildlife, timber, and food and fiber resources; and

(c) other uses of wetlands in the public interest, including recreational, scientific, and cultural uses.

SEC. 6. As allowed by law, agencies shall issue or amend their existing procedures in order to comply with this Order. To the extent possible, existing processes, such as those of the Council on Environmental Quality, shall be utilized to fulfill the requirements of this Order.

SEC. 7. As used in this Order:

(a) The term ''agency'' shall have the same meaning as the term ''Executive agency'' in Section 105 of Title 5 of the United States Code and shall include the military departments; the directives contained in this Order, however, are meant to apply only to those agencies which perform the activities described in Section 1 which are located in or affecting wetlands.

(b) The term ''new construction'' shall include draining, dredging, channelizing, filling, diking, impounding, and related activities and any structures or facilities begun or authorized after the effective date of this Order.

(c) The term ''wetlands'' means those areas that are inundated by surface or ground water with a frequency sufficient to support and under normal circumstances does or would support a prevalence of vegetative or aquatic life that requires saturated or seasonally saturated soil conditions for growth and reproduction. Wetlands generally include swamps, marshes, bogs, and similar areas such as sloughs, potholes, wet meadows, river overflows, mud flats, and natural ponds.

SEC. 8. This Order does not apply to projects presently under construction, or to projects for which all of the funds have been appropriated through Fiscal Year 1977, or to projects and programs for which a draft or final environmental impact statement will be filed prior to October 1, 1977. The provisions of Section 2 of this Order shall be implemented by each agency not later than October 1, 1977.

SEC. 9. Nothing in this Order shall apply to assistance provided for emergency work, essential to save lives and protect property and public health and safety, performed pursuant to Sections 305 and 306 of the Disaster Relief Act of 1974 (88 Stat. 148, 42 U.S.C. 5145 and 5146).

SEC. 10. To the extent the provisions of Sections 2 and 5 of this Order are applicable to projects covered by Section 104(h) of the Housing and Community Development Act of 1974, as amended (88 Stat. 640, 42 U.S.C. 5304(h)), the responsibilities under those provisions may be assumed by the appropriate applicant, if the applicant has also assumed, with respect to such projects, all of the responsibilities for environmental review, decisionmaking, and action pursuant to the National Environmental Policy Act of 1969, as amended [42 U.S.C. 4321 et seq.].

EX. ORD. NO. 12114. ENVIRONMENTAL EFFECTS ABROAD OF MAJOR FEDERAL ACTIONS

Ex. Ord. No. 12114, Jan. 4, 1979, 44 F.R. 1957, provided:

By virtue of the authority vested in me by the Constitution and the laws of the United States, and as President of the United States, in order to further environmental objectives consistent with the foreign policy and national security policy of the United States, it is ordered as follows:

SECTION 1

1–1. *Purpose and Scope.* The purpose of this Executive Order is to enable responsible officials of Federal agencies having ultimate responsibility for authorizing and approving actions encompassed by this Order to be informed of pertinent environmental considerations and to take such considerations into account, with other pertinent considerations of national policy, in making decisions regarding such actions. While based on independent authority, this Order furthers the purpose of the National Environmental Policy Act [42 U.S.C. 4321 et seq.] and the Marine Protection Research and Sanctuaries Act [16 U.S.C. 1431 et seq. and 33 U.S.C. 1401 et seq.] and the Deepwater Port Act [33 U.S.C. 1501 et seq.] consistent with the foreign policy and national security policy of the United States, and represents the United States government's exclusive and complete determination of the procedural and other actions to be taken by Federal agencies to further the purpose of the National Environmental Policy Act, with respect to the environment outside the United States, its territories and possessions.

SECTION 2

2–1. *Agency Procedures.* Every Federal agency taking major Federal actions encompassed hereby and not exempted herefrom having significant effects on the environment outside the geographical borders of the United States and its territories and possessions shall within eight months after the effective date of this Order have in effect procedures to implement this Order. Agencies shall consult with the Department of State and the Council on Environmental Quality concerning such procedures prior to placing them in effect.

2–2. *Information Exchange.* To assist in effectuating the foregoing purpose, the Department of State and the Council on Environmental Quality in collaboration with other interested Federal agencies and other nations shall conduct a program for exchange on a continuing basis of information concerning the environment. The objectives of this program shall be to provide information for use by decisionmakers, to heighten awareness of and interest in environmental concerns and, as appropriate, to facilitate environmental cooperation with foreign nations.

2–3. *Actions Included.* Agencies in their procedures under Section 2–1 shall establish procedures by which their officers having ultimate responsibility for authorizing and approving actions in one of the following categories encompassed by this Order, take into consideration in making decisions concerning such actions, a document described in Section 2–4(a):

(a) major Federal actions significantly affecting the environment of the global commons outside the jurisdiction of any nation (e.g., the oceans or Antarctica);

(b) major Federal actions significantly affecting the environment of a foreign nation not participating with the United States and not otherwise involved in the action;

(c) major Federal actions significantly affecting the environment of a foreign nation which provide to that nation:

(1) a product, or physical project producing a principal product or an emission or effluent, which is prohibited or strictly regulated by Federal law in the United States because its toxic effects on the environment create a serious public health risk; or

(2) a physical project which in the United States is prohibited or strictly regulated by Federal law to protect the environment against radioactive substances.

(d) major Federal actions outside the United States, its territories and possessions which significantly affect natural or ecological resources of global importance designated for protection under this subsection by the President, or, in the case of such a resource protected by international agreement binding on the United States, by the Secretary of State. Recommendations to the President under this subsection shall be accompanied by the views of the Council on Environmental Quality and the Secretary of State.

2–4. *Applicable Procedures.* (a) There are the following types of documents to be used in connection with actions described in Section 2–3:

(i) environmental impact statements (including generic, program and specific statements);

(ii) bilateral or multilateral environmental studies, relevant or related to the proposed action, by the United States and one [or more] more foreign nations, or by an international body or organization in which the United States is a member or participant; or

(iii) concise reviews of the environmental issues involved, including environmental assessments, summary environmental analyses or other appropriate documents.

(b) Agencies shall in their procedures provide for preparation of documents described in Section 2–4(a), with respect to actions described in Section 2–3, as follows:

(i) for effects described in Section 2–3(a), an environmental impact statement described in Section 2–4(a)(i);

(ii) for effects described in Section 2–3(b), a document described in Section 2–4(a)(ii) or (iii), as determined by the agency;

(iii) for effects described in Section 2–3(c), a document described in Section 2–4(a)(ii) or (iii), as determined by the agency;

(iv) for effects described in Section 2–3(d), a document described in Section 2–4(a)(i), (ii) or (iii), as determined by the agency.

Such procedures may provide that an agency need not prepare a new document when a document described in Section 2–4(a) already exists.

(c) Nothing in this Order shall serve to invalidate any existing regulations of any agency which have been adopted pursuant to court order or pursuant to judicial settlement of any case or to prevent any agency from providing in its procedures for measures in addition to those provided for herein to further the purpose of the National Environmental Policy Act [43 U.S.C. 4321 et seq.] and other environmental laws, including the Marine Protection Research and Sanctuaries Act [16 U.S.C. 1431 et seq. and 33 U.S.C. 1401 et seq.], and the Deepwater Port Act [33 U.S.C. 1501 et seq.], consistent with the foreign and national security policies of the United States.

(d) Except as provided in Section 2–5(b), agencies taking action encompassed by this Order shall, as soon as feasible, inform other Federal agencies with relevant expertise of the availability of environmental documents prepared under this Order.

Agencies in their procedures under Section 2–1 shall make appropriate provision for determining when an affected nation shall be informed in accordance with Section 3–2 of this Order of the availability of environmental documents prepared pursuant to those procedures.

In order to avoid duplication of resources, agencies in their procedures shall provide for appropriate utilization of the resources of other Federal agencies with relevant environmental jurisdiction or expertise.

2–5. *Exemptions and Considerations.* (a) Notwithstanding Section 2–3, the following actions are exempt from this Order:

(i) actions not having a significant effect on the environment outside the United States as determined by the agency;

(ii) actions taken by the President;

(iii) actions taken by or pursuant to the direction of the President or Cabinet officer when the national security or interest is involved or when the action occurs in the course of an armed conflict;

(iv) intelligence activities and arms transfers;

(v) export licenses or permits or export approvals, and actions relating to nuclear activities except actions providing to a foreign nation a nuclear production or utilization facility as defined in the Atomic Energy Act of 1954 [42 U.S.C. 2011 et seq.], as amended, or a nuclear waste management facility;

(vi) votes and other actions in international conferences and organizations;

(vii) disaster and emergency relief action.

(b) Agency procedures under Section 2–1 implementing Section 2–4 may provide for appropriate modifications in the contents, timing and availability of documents to other affected Federal agencies and affected nations, where necessary to:

(i) enable the agency to decide and act promptly as and when required;

(ii) avoid adverse impacts on foreign relations or infringement in fact or appearance of other nations' sovereign responsibilities, or

(iii) ensure appropriate reflection of:

(1) diplomatic factors;

(2) international commercial, competitive and export promotion factors;

(3) needs for governmental or commercial confidentiality;

(4) national security considerations;

(5) difficulties of obtaining information and agency ability to analyze meaningfully environmental effects of a proposed action; and

(6) the degree to which the agency is involved in or able to affect a decision to be made.

(c) Agency procedure under Section 2–1 may provide for categorical exclusions and for such exemptions in addition to those specified in subsection (a) of this Section as may be necessary to meet emergency circumstances, situations involving exceptional foreign policy and national security sensitivities and other such special circumstances. In utilizing such additional exemptions agencies shall, as soon as feasible, consult with the Department of State and the Council on Environmental Quality.

(d) The provisions of Section 2–5 do not apply to actions described in Section 2–3(a) unless permitted by law.

SECTION 3

3–1. *Rights of Action*. This Order is solely for the purpose of establishing internal procedures for Federal agencies to consider the significant effects of their actions on the environment outside the United States, its territories and possessions, and nothing in this Order shall be construed to create a cause of action.

3–2. *Foreign Relations*. The Department of State shall coordinate all communications by agencies with foreign governments concerning environmental agreements and other arrangements in implementation of this Order.

3–3. *Multi-Agency Actions*. Where more than one Federal agency is involved in an action or program, a lead agency, as determined by the agencies involved, shall have responsibility for implementation of this Order.

3–4. *Certain Terms*. For purposes of this Order, ''environment'' means the natural and physical environment and excludes social, economic and other environments; and an action significantly affects the environment if it does significant harm to the environment even though on balance the agency believes the action to be beneficial to the environment. The term ''export approvals'' in Section 2–5(a)(v) does not mean or include direct loans to finance exports.

3–5. *Multiple Impacts*. If a major Federal action having effects on the environment of the United States or the global commons requires preparation of an environmental impact statement, and if the action also has effects on the environment of a foreign nation, an environmental impact statement need not be prepared with respect to the effects on the environment of the foreign nation.

EX. ORD. NO. 12898. FEDERAL ACTIONS TO ADDRESS ENVIRONMENTAL JUSTICE IN MINORITY POPULATIONS AND LOW-INCOME POPULATIONS

Ex. Ord. No. 12898, Feb. 11, 1994, 59 F.R. 7629, as amended by Ex. Ord. No. 12948, Jan. 30, 1995, 60 F.R. 6381, provided:

By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered as follows:

SECTION 1–1. IMPLEMENTATION.

1–101. *Agency Responsibilities*. To the greatest extent practicable and permitted by law, and consistent with the principles set forth in the report on the National Performance Review, each Federal agency shall make achieving environmental justice part of its mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minority populations and low-income populations in the United States and its territories and possessions, the District of Columbia, the Commonwealth of Puerto Rico, and the Commonwealth of the Mariana Islands.

1–102. *Creation of an Interagency Working Group on Environmental Justice*. (a) Within 3 months of the date of this order, the Administrator of the Environmental Protection Agency (''Administrator'') or the Administrator's designee shall convene an interagency Federal Working Group on Environmental Justice (''Working Group''). The Working Group shall comprise the heads of the following executive agencies and offices, or their designees: (a) Department of Defense; (b) Department of Health and Human Services; (c) Department of Housing and Urban Development; (d) Department of Labor; (e) Department of Agriculture; (f) Department of Transportation; (g) Department of Justice; (h) Department of the Interior; (i) Department of Commerce; (j) Department of Energy; (k) Environmental Protection Agency; (*l*) Office of Management and Budget; (m) Office of Science and Technology Policy; (n) Office of the Deputy Assistant to the President for Environmental Policy; (*o*) Office of the Assistant to the President for Domestic Policy; (p) National Economic Council; (q) Council of Economic Advisers; and (r) such other Government officials as the President may designate. The Working Group shall report to the President through the Deputy Assistant to the President for Environmental Policy and the Assistant to the President for Domestic Policy.

(b) The Working Group shall: (1) provide guidance to Federal agencies on criteria for identifying disproportionately high and adverse human health or environmental effects on minority populations and low-income populations;

(2) coordinate with, provide guidance to, and serve as a clearinghouse for, each Federal agency as it develops an environmental justice strategy as required by section 1–103 of this order, in order to ensure that the administration, interpretation and enforcement of programs, activities and policies are undertaken in a consistent manner;

(3) assist in coordinating research by, and stimulating cooperation among, the Environmental Protection Agency, the Department of Health and Human Services, the Department of Housing and Urban Development, and other agencies conducting research or other activities in accordance with section 3–3 of this order;

(4) assist in coordinating data collection, required by this order;

(5) examine existing data and studies on environmental justice;

(6) hold public meetings as required in section 5–502(d) of this order; and

(7) develop interagency model projects on environmental justice that evidence cooperation among Federal agencies.

1–103. *Development of Agency Strategies*. (a) Except as provided in section 6–605 of this order, each Federal agency shall develop an agency-wide environmental justice strategy, as set forth in subsections (b)–(e) of this section that identifies and addresses disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minority populations and low-income populations. The environmental justice strategy shall list programs, policies, planning and public participation processes, enforcement, and/or rulemakings related to human health or the environment that should be revised to, at a minimum: (1) promote enforcement of all health and environmental statutes in areas with minority populations and low-income populations; (2) ensure greater public participation; (3) improve research and data collection relating to the health of and environment of minority populations and low-income populations; and (4) identify differential patterns of consumption of natural resources among minority populations and low-income populations. In addition, the environmental justice strategy shall include, where appropriate, a timetable for undertaking identified revisions and consideration of economic and social implications of the revisions.

(b) Within 4 months of the date of this order, each Federal agency shall identify an internal administrative process for developing its environmental justice strategy, and shall inform the Working Group of the process.

(c) Within 6 months of the date of this order, each Federal agency shall provide the Working Group with an outline of its proposed environmental justice strategy.

(d) Within 10 months of the date of this order, each Federal agency shall provide the Working Group with its proposed environmental justice strategy.

(e) By March 24, 1995, each Federal agency shall finalize its environmental justice strategy and provide a copy and written description of its strategy to the Working Group. From the date of this order through March 24, 1995, each Federal agency, as part of its environmental justice strategy, shall identify several specific projects that can be promptly undertaken to address particular concerns identified during the development of the proposed environmental justice strategy, and a schedule for implementing those projects.

(f) Within 24 months of the date of this order, each Federal agency shall report to the Working Group on its progress in implementing its agency-wide environmental justice strategy.

(g) Federal agencies shall provide additional periodic reports to the Working Group as requested by the Working Group.

1–104. *Reports to the President*. Within 14 months of the date of this order, the Working Group shall submit to the President, through the Office of the Deputy Assistant to the President for Environmental Policy and the Office of the Assistant to the President for Domestic Policy, a report that describes the implementation of this order, and includes the final environmental justice strategies described in section 1–103(e) of this order.

SEC. 2–2. FEDERAL AGENCY RESPONSIBILITIES FOR FEDERAL PROGRAMS. Each Federal agency

shall conduct its programs, policies, and activities that substantially affect human health or the environment, in a manner that ensures that such programs, policies, and activities do not have the effect of excluding persons (including populations) from participation in, denying persons (including populations) the benefits of, or subjecting persons (including populations) to discrimination under, such programs, policies, and activities, because of their race, color, or national origin.

SEC. 3–3. RESEARCH, DATA COLLECTION, AND ANALYSIS.

3–301. *Human Health and Environmental Research and Analysis.* (a) Environmental human health research, whenever practicable and appropriate, shall include diverse segments of the population in epidemiological and clinical studies, including segments at high risk from environmental hazards, such as minority populations, low-income populations and workers who may be exposed to substantial environmental hazards.

(b) Environmental human health analyses, whenever practicable and appropriate, shall identify multiple and cumulative exposures.

(c) Federal agencies shall provide minority populations and low-income populations the opportunity to comment on the development and design of research strategies undertaken pursuant to this order.

3–302. *Human Health and Environmental Data Collection and Analysis.* To the extent permitted by existing law, including the Privacy Act, as amended (5 U.S.C. section 552a): (a) each Federal agency, whenever practicable and appropriate, shall collect, maintain, and analyze information assessing and comparing environmental and human health risks borne by populations identified by race, national origin, or income. To the extent practical and appropriate, Federal agencies shall use this information to determine whether their programs, policies, and activities have disproportionately high and adverse human health or environmental effects on minority populations and low-income populations;

(b) In connection with the development and implementation of agency strategies in section 1–103 of this order, each Federal agency, whenever practicable and appropriate, shall collect, maintain and analyze information on the race, national origin, income level, and other readily accessible and appropriate information for areas surrounding facilities or sites expected to have a substantial environmental, human health, or economic effect on the surrounding populations, when such facilities or sites become the subject of a substantial Federal environmental administrative or judicial action. Such information shall be made available to the public, unless prohibited by law; and

(c) Each Federal agency, whenever practicable and appropriate, shall collect, maintain, and analyze information on the race, national origin, income level, and other readily accessible and appropriate information for areas surrounding Federal facilities that are: (1) subject to the reporting requirements under the Emergency Planning and Community Right-to-Know Act, 42 U.S.C. section 11001–11050 as mandated in Executive Order No. 12856 [former 42 U.S.C. 11001 note]; and (2) expected to have a substantial environmental, human health, or economic effect on surrounding populations. Such information shall be made available to the public, unless prohibited by law.

(d) In carrying out the responsibilities in this section, each Federal agency, whenever practicable and appropriate, shall share information and eliminate unnecessary duplication of efforts through the use of existing data systems and cooperative agreements among Federal agencies and with State, local, and tribal governments.

SEC. 4–4. SUBSISTENCE CONSUMPTION OF FISH AND WILDLIFE.

4–401. *Consumption Patterns.* In order to assist in identifying the need for ensuring protection of populations with differential patterns of subsistence consumption of fish and wildlife, Federal agencies, whenever practicable and appropriate, shall collect, maintain, and analyze information on the consumption patterns of populations who principally rely on fish and/or wildlife for subsistence. Federal agencies shall communicate to the public the risks of those consumption patterns.

4–402. *Guidance.* Federal agencies, whenever practicable and appropriate, shall work in a coordinated manner to publish guidance reflecting the latest scientific information available concerning methods for evaluating the human health risks associated with the consumption of pollutant-bearing fish or wildlife. Agencies shall consider such guidance in developing their policies and rules.

SEC. 5–5. PUBLIC PARTICIPATION AND ACCESS TO INFORMATION. (a) The public may submit recommendations to Federal agencies relating to the incorporation of environmental justice principles into Federal agency programs or policies. Each Federal agency shall convey such recommendations to the Working Group.

(b) Each Federal agency may, whenever practicable and appropriate, translate crucial public documents, notices, and hearings relating to human health or the environment for limited English speaking populations.

(c) Each Federal agency shall work to ensure that public documents, notices, and hearings relating to human health or the environment are concise, understandable, and readily accessible to the public.

(d) The Working Group shall hold public meetings, as appropriate, for the purpose of fact-finding, receiving public comments, and conducting inquiries concerning environmental justice. The Working Group shall prepare for public review a summary of the comments and recommendations discussed at the public meetings.

SEC. 6–6. GENERAL PROVISIONS.

6–601. *Responsibility for Agency Implementation.* The head of each Federal agency shall be responsible for ensuring compliance with this order. Each Federal agency shall conduct internal reviews and take such other steps as may be necessary to monitor compliance with this order.

6–602. *Executive Order No. 12250.* This Executive order is intended to supplement but not supersede Executive Order No. 12250 [42 U.S.C. 2000d–1 note], which requires consistent and effective implementation of various laws prohibiting discriminatory practices in programs receiving Federal financial assistance. Nothing herein shall limit the effect or mandate of Executive Order No. 12250.

6–603. *Executive Order No. 12875.* This Executive order is not intended to limit the effect or mandate of Executive Order No. 12875 [former 5 U.S.C. 601 note].

6–604. *Scope.* For purposes of this order, Federal agency means any agency on the Working Group, and such other agencies as may be designated by the President, that conducts any Federal program or activity that substantially affects human health or the environment. Independent agencies are requested to comply with the provisions of this order.

6–605. *Petitions for Exemptions.* The head of a Federal agency may petition the President for an exemption from the requirements of this order on the grounds that all or some of the petitioning agency's programs or activities should not be subject to the requirements of this order.

6–606. *Native American Programs.* Each Federal agency responsibility set forth under this order shall apply equally to Native American programs. In addition, the Department of the Interior, in coordination with the Working Group, and, after consultation with tribal leaders, shall coordinate steps to be taken pursuant to this order that address Federally-recognized Indian Tribes.

6–607. *Costs.* Unless otherwise provided by law, Federal agencies shall assume the financial costs of complying with this order.

6–608. *General.* Federal agencies shall implement this order consistent with, and to the extent permitted by, existing law.

6–609. *Judicial Review.* This order is intended only to improve the internal management of the executive branch and is not intended to, nor does it create any

right, benefit, or trust responsibility, substantive or procedural, enforceable at law or equity by a party against the United States, its agencies, its officers, or any person. This order shall not be construed to create any right to judicial review involving the compliance or noncompliance of the United States, its agencies, its officers, or any other person with this order.

WILLIAM J. CLINTON.

EX. ORD. NO. 13045. PROTECTION OF CHILDREN FROM ENVIRONMENTAL HEALTH RISKS AND SAFETY RISKS

Ex. Ord. No. 13045, Apr. 21, 1997, 62 F.R. 19885, as amended by Ex. Ord. No. 13229, Oct. 9, 2001, 66 F.R. 52013, provided:

By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered as follows:

SECTION 1. *Policy*.

1–101. A growing body of scientific knowledge demonstrates that children may suffer disproportionately from environmental health risks and safety risks. These risks arise because: children's neurological, immunological, digestive, and other bodily systems are still developing; children eat more food, drink more fluids, and breathe more air in proportion to their body weight than adults; children's size and weight may diminish their protection from standard safety features; and children's behavior patterns may make them more susceptible to accidents because they are less able to protect themselves. Therefore, to the extent permitted by law and appropriate, and consistent with the agency's mission, each Federal agency:

(a) shall make it a high priority to identify and assess environmental health risks and safety risks that may disproportionately affect children; and

(b) shall ensure that its policies, programs, activities, and standards address disproportionate risks to children that result from environmental health risks or safety risks.

1–102. Each independent regulatory agency is encouraged to participate in the implementation of this order and comply with its provisions.

SEC. 2. *Definitions*. The following definitions shall apply to this order.

2–201. ''Federal agency'' means any authority of the United States that is an agency under 44 U.S.C. 3502(1) other than those considered to be independent regulatory agencies under 44 U.S.C. 3502(5). For purposes of this order, ''military departments,'' as defined in 5 U.S.C. 102, are covered under the auspices of the Department of Defense.

2–202. ''Covered regulatory action'' means any substantive action in a rulemaking, initiated after the date of this order or for which a Notice of Proposed Rulemaking is published 1 year after the date of this order, that is likely to result in a rule that may:

(a) be ''economically significant'' under Executive Order 12866 [5 U.S.C. 601 note] (a rulemaking that has an annual effect on the economy of $100 million or more or would adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities); and

(b) concern an environmental health risk or safety risk that an agency has reason to believe may disproportionately affect children.

2–203. ''Environmental health risks and safety risks'' mean risks to health or to safety that are attributable to products or substances that the child is likely to come in contact with or ingest (such as the air we breath, the food we eat, the water we drink or use for recreation, the soil we live on, and the products we use or are exposed to).

SEC. 3. *Task Force on Environmental Health Risks and Safety Risks to Children*.

3–301. There is hereby established the Task Force on Environmental Health Risks and Safety Risks to Children (''Task Force'').

3–302. The Task Force will report to the President in consultation with the Domestic Policy Council, the National Science and Technology Council, the Council on Environmental Quality, and the Office of Management and Budget (OMB).

3–303. *Membership*. The Task Force shall be composed of the:

(a) Secretary of Health and Human Services, who shall serve as a Co-Chair of the Council;

(b) Administrator of the Environmental Protection Agency, who shall serve as a Co-Chair of the Council;

(c) Secretary of Education;

(d) Secretary of Labor;

(e) Attorney General;

(f) Secretary of Energy;

(g) Secretary of Housing and Urban Development;

(h) Secretary of Agriculture;

(i) Secretary of Transportation;

(j) Director of the Office of Management and Budget;

(k) Chair of the Council on Environmental Quality;

(l) Chair of the Consumer Product Safety Commission;

(m) Assistant to the President for Economic Policy;

(n) Assistant to the President for Domestic Policy;

(o) Assistant to the President and Director of the Office of Science and Technology Policy;

(p) Chair of the Council of Economic Advisers; and

(q) Such other officials of executive departments and agencies as the President may, from time to time, designate.

Members of the Task Force may delegate their responsibilities under this order to subordinates.

3–304. *Functions*. The Task Force shall recommend to the President Federal strategies for children's environmental health and safety, within the limits of the Administration's budget, to include the following elements:

(a) statements of principles, general policy, and targeted annual priorities to guide the Federal approach to achieving the goals of this order;

(b) a coordinated research agenda for the Federal Government, including steps to implement the review of research databases described in section 4 of this order;

(c) recommendations for appropriate partnerships among Federal, State, local, and tribal governments and the private, academic, and nonprofit sectors;

(d) proposals to enhance public outreach and communication to assist families in evaluating risks to children and in making informed consumer choices;

(e) an identification of high-priority initiatives that the Federal Government has undertaken or will undertake in advancing protection of children's environmental health and safety; and

(f) a statement regarding the desirability of new legislation to fulfill or promote the purposes of this order.

3–305. The Task Force shall prepare a biennial report on research, data, or other information that would enhance our ability to understand, analyze, and respond to environmental health risks and safety risks to children. For purposes of this report, cabinet agencies and other agencies identified by the Task Force shall identify and specifically describe for the Task Force key data needs related to environmental health risks and safety risks to children that have arisen in the course of the agency's programs and activities. The Task Force shall incorporate agency submissions into its report and ensure that this report is publicly available and widely disseminated. The Office of Science and Technology Policy and the National Science and Technology Council shall ensure that this report is fully considered in establishing research priorities.

3–306. The Task Force shall exist for 6 years from the date of this order. At least 6 months prior to the expiration of that period, the member agencies shall assess the need for continuation of the Task Force or its functions, and make appropriate recommendations to the President.

SEC. 4. *Research Coordination and Integration*.

4–401. Within 6 months of the date of this order, the Task Force shall develop or direct to be developed a re-

view of existing and planned data resources and a proposed plan for ensuring that researchers and Federal research agencies have access to information on all research conducted or funded by the Federal Government that is related to adverse health risks in children resulting from exposure to environmental health risks or safety risks. The National Science and Technology Council shall review the plan.

4–402. The plan shall promote the sharing of information on academic and private research. It shall include recommendations to encourage that such data, to the extent permitted by law, is available to the public, the scientific and academic communities, and all Federal agencies.

SEC. 5. *Agency Environmental Health Risk or Safety Risk Regulations.*

5–501. For each covered regulatory action submitted to OMB's Office of Information and Regulatory Affairs (OIRA) for review pursuant to Executive Order 12866 [5 U.S.C. 601 note], the issuing agency shall provide to OIRA the following information developed as part of the agency's decisionmaking process, unless prohibited by law:

(a) an evaluation of the environmental health or safety effects of the planned regulation on children; and

(b) an explanation of why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the agency.

5–502. In emergency situations, or when an agency is obligated by law to act more quickly than normal review procedures allow, the agency shall comply with the provisions of this section to the extent practicable. For those covered regulatory actions that are governed by a court-imposed or statutory deadline, the agency shall, to the extent practicable, schedule any rulemaking proceedings so as to permit sufficient time for completing the analysis required by this section.

5–503. The analysis required by this section may be included as part of any other required analysis, and shall be made part of the administrative record for the covered regulatory action or otherwise made available to the public, to the extent permitted by law.

SEC. 6. *Interagency Forum on Child and Family Statistics.*

6–601. The Director of the OMB (''Director'') shall convene an Interagency Forum on Child and Family Statistics (''Forum''), which will include representatives from the appropriate Federal statistics and research agencies. The Forum shall produce an annual compendium (''Report'') of the most important indicators of the well-being of the Nation's children.

6–602. The Forum shall determine the indicators to be included in each Report and identify the sources of data to be used for each indicator. The Forum shall provide an ongoing review of Federal collection and dissemination of data on children and families, and shall make recommendations to improve the coverage and coordination of data collection and to reduce duplication and overlap.

6–603. The Report shall be published by the Forum in collaboration with the National Institute of Child Health and Human Development. The Forum shall present the first annual Report to the President, through the Director, by July 31, 1997. The Report shall be submitted annually thereafter, using the most recently available data.

SEC. 7. *General Provisions.*

7–701. This order is intended only for internal management of the executive branch. This order is not intended, and should not be construed to create, any right, benefit, or trust responsibility, substantive or procedural, enforceable at law or equity by a party against the United States, its agencies, its officers, or its employees. This order shall not be construed to create any right to judicial review involving the compliance or noncompliance with this order by the United States, its agencies, its officers, or any other person.

7–702. Executive Order 12606 of September 2, 1987 is revoked.

EX. ORD. NO. 13061. FEDERAL SUPPORT OF COMMUNITY EFFORTS ALONG AMERICAN HERITAGE RIVERS

Ex. Ord. No. 13061, Sept. 11, 1997, 62 F.R. 48445, as amended by Ex. Ord. No. 13093, July 27, 1998, 63 F.R. 40357, provided:

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the National Environmental Policy Act of 1969 (Public Law 91–190) [42 U.S.C. 4321 et seq.], and in order to protect and restore rivers and their adjacent communities, it is hereby ordered as follows:

SECTION 1. *Policies.*

(a) The American Heritage Rivers initiative has three objectives: natural resource and environmental protection, economic revitalization, and historic and cultural preservation.

(b) Executive agencies (''agencies''), to the extent permitted by law and consistent with their missions and resources, shall coordinate Federal plans, functions, programs, and resources to preserve, protect, and restore rivers and their associated resources important to our history, culture, and natural heritage.

(c) Agencies shall develop plans to bring increased efficiencies to existing and authorized programs with goals that are supportive of protection and restoration of communities along rivers.

(d) In accordance with Executive Order 12630 [5 U.S.C. 601 note], agencies shall act with due regard for the protection of private property provided for by the Fifth Amendment to the United States Constitution. No new regulatory authority is created as a result of the American Heritage Rivers initiative. This initiative will not interfere with matters of State, local, and tribal government jurisdiction.

(e) In furtherance of these policies, the President will designate rivers that meet certain criteria as ''American Heritage Rivers.''

(f) It is the policy of the Federal Government that communities shall nominate rivers as American Heritage Rivers and the Federal role will be solely to support community-based efforts to preserve, protect, and restore these rivers and their communities.

(g) Agencies should, to the extent practicable, help identify resources in the private and nonprofit sectors to aid revitalization efforts.

(h) Agencies are encouraged, to the extent permitted by law, to develop partnerships with State, local, and tribal governments and community and nongovernmental organizations. Agencies will be responsive to the diverse needs of different kinds of communities from the core of our cities to remote rural areas and shall seek to ensure that the role played by the Federal Government is complementary to the plans and work being carried out by State, local, and tribal governments. To the extent possible, Federal resources will be strategically directed to complement resources being spent by these governments.

(i) Agencies shall establish a method for field offices to assess the success of the American Heritage River initiative and provide a means to recommend changes that will improve the delivery and accessibility of Federal services and programs. Agencies are directed, where appropriate, to reduce and make more flexible procedural requirements and paperwork related to providing assistance to communities along designated rivers.

(j) Agencies shall commit to a policy under which they will seek to ensure that their actions have a positive effect on the natural, historic, economic, and cultural resources of American Heritage River communities. The policy will require agencies to consult with American Heritage River communities early in the planning stages of Federal actions, take into account the communities' goals and objectives and ensure that actions are compatible with the overall character of these communities. Agencies shall seek to ensure that their help for one community does not adversely affect neighboring communities. Additionally, agencies are encouraged to develop formal and informal partner-

ships to assist communities. Local Federal facilities, to the extent permitted by law and consistent with the agencies' missions and resources, should provide public access, physical space, technical assistance, and other support for American Heritage River communities.

(k) In addition to providing support to designated rivers, agencies will work together to provide information and services to all communities seeking support.

SEC. 2. *Process for Nominating an American Heritage River*.

(a) *Nomination*. Communities, in coordination with their State, local, or tribal governments, can nominate their river, river stretch, or river confluence for designation as an American Heritage River. When several communities are involved in the nomination of the same river, nominations will detail the coordination among the interested communities and the role each will play in the process. Individuals living outside the community may not nominate a river.

(b) *Selection Criteria*. Nominations will be judged based on the following:

(1) the characteristics of the natural, economic, agricultural, scenic, historic, cultural, or recreational resources of the river that render it distinctive or unique;

(2) the effectiveness with which the community has defined its plan of action and the extent to which the plan addresses, either through planned actions or past accomplishments, all three American Heritage Rivers objectives, which are set forth in section 1(a) of this order;

(3) the strength and diversity of community support for the nomination as evidenced by letters from elected officials; landowners; private citizens; businesses; and especially State, local, and tribal governments. Broad community support is essential to receiving the American Heritage River designation; and

(4) willingness and capability of the community to forge partnerships and agreements to implement their plan to meet their goals and objectives.

(c) *Recommendation Process*.

The Chair of the Council on Environmental Quality (''CEQ'') shall develop a fair and objective procedure to obtain the views of a diverse group of experts for the purpose of making recommendations to the President as to which rivers shall be designated. These experts shall reflect a variety of viewpoints, such as those representing natural, cultural, and historic resources; scenic, environmental, and recreation interests; tourism, transportation, and economic development interests; and industries such as agriculture, hydropower, manufacturing, mining, and forest management. The Chair of the CEQ will ensure that the rivers recommended represent a variety of stream sizes, diverse geographical locations, and a wide range of settings from urban to rural and ensure that relatively pristine, successful revitalization efforts are considered as well as degraded rivers in need of restoration.

(d) *Designation*.

(1) The President will designate certain rivers as American Heritage Rivers. Based on the receipt of a sufficient number of qualified nominations, up to 20 rivers will be designated in the first phase of the initiative.

(2) The Interagency Committee provided for in section 3 of this order shall develop a process by which any community that nominates and has its river designated may have this designation terminated at its request.

(3) Upon a determination by the Chair of the CEQ that a community has failed to implement its plan, the Chair may recommend to the President that a designation be revoked. The Chair shall notify the community at least 30 days prior to making such a recommendation to the President. Based on that recommendation, the President may revoke the designation.

SEC. 3. *Establishment of an Interagency Committee*. There is hereby established the American Heritage Rivers Interagency Committee (''Committee''). The Committee shall have two co-chairs. The Chair of the CEQ shall be a permanent co-chair. The other co-chair will rotate among the heads of the agencies listed below.

(a) The Committee shall be composed of the following members or their designees at the Assistant Secretary level or equivalent:

(1) The Secretary of Defense;

(2) The Attorney General;

(3) The Secretary of the Interior;

(4) The Secretary of Agriculture;

(5) The Secretary of Commerce;

(6) The Secretary of Housing and Urban Development;

(7) The Secretary of Transportation;

(8) The Secretary of Energy;

(9) The Administrator of the Environmental Protection Agency;

(10) The Chair of the Advisory Council on Historic Preservation;

(11) The Chairperson of the National Endowment for the Arts; and

(12) The Chairperson of the National Endowment for the Humanities.

The Chair of the CEQ may invite to participate in meetings of the Committee, representatives of other agencies, as appropriate.

(b) The Committee shall:

(1) establish formal guidelines for designation as an American Heritage River;

(2) periodically review the actions of agencies in support of the American Heritage Rivers;

(3) report to the President on the progress, accomplishments, and effectiveness of the American Heritage Rivers initiative; and

(4) perform other duties as directed by the Chair of the CEQ.

SEC. 4. *Responsibilities of the Federal Agencies*. Consistent with Title I of the National Environmental Policy Act of 1969 [42 U.S.C. 4331 et seq.], agencies shall:

(a) identify their existing programs and plans that give them the authority to offer assistance to communities involved in river conservation and community health and revitalization;

(b) to the extent practicable and permitted by law and regulation, refocus programs, grants, and technical assistance to provide support for communities adjacent to American Heritage Rivers;

(c) identify all technical tools, including those developed for purposes other than river conservation, that can be applied to river protection, restoration, and community revitalization;

(d) provide access to existing scientific data and information to the extent permitted by law and consistent with the agencies mission and resources;

(e) cooperate with State, local, and tribal governments and communities with respect to their activities that take place in, or affect the area around, an American Heritage River;

(f) commit to a policy, as set forth in section 1(j) of this order, in making decisions affecting the quality of an American Heritage River;

(g) select from among all the agencies a single individual called the ''River Navigator,'' for each river that is designated an American Heritage River, with whom the communities can communicate goals and needs and who will facilitate community-agency interchange;

(h) allow public access to the river, for agencies with facilities along American Heritage Rivers, to the extent practicable and consistent with their mission; and

(i) cooperate, as appropriate, with communities on projects that protect or preserve stretches of the river that are on Federal property or adjacent to a Federal facility.

SEC. 5. *Responsibilities of the Committee and the Council on Environmental Quality*. The CEQ shall serve as Executive agent for the Committee, and the CEQ and the Committee shall ensure the implementation of the policies and purposes of this initiative.

SEC. 6. *Definition*. For the purposes of this order, Executive agency means any agency on the Committee and such other agency as may be designated by the President.

SEC. 7. *Judicial Review*. This order does not create any right or benefit, substantive or procedural, enforceable

by any party against the United States, its agencies or instrumentalities, its officers or employees, or any other person.

WILLIAM J. CLINTON.

EXECUTIVE ORDER NO. 13080

Ex. Ord. No. 13080, Apr. 7, 1998, 63 F.R. 17667, as amended by Ex. Ord. No. 13093, July 27, 1998, 63 F.R. 40357, which established the American Heritage Rivers Initiative Advisory Committee, was revoked by Ex. Ord. No. 13225, § 3(b), Sept. 28, 2001, 66 F.R. 50292, set out as a note under section 14 of the Federal Advisory Committee Act in the Appendix to Title 5, Government Organization and Employees.

PROC. NO. 7112. DESIGNATION OF AMERICAN HERITAGE RIVERS

Proc. No. 7112, July 30, 1998, 63 F.R. 41949, provided:

In celebration of America's rivers, and to recognize and reward grassroots efforts to restore them, last year I announced the American Heritage Rivers initiative. My goal was to help communities realize their visions for their rivers by making it easier for them to tap existing programs and resources of the Federal Government. From across the country, hundreds of communities answered my call for nominations, asking that their rivers be designated American Heritage Rivers. I applaud all of the communities that have drawn together and dedicated themselves to the goal of healthy rivers, now and forever.

Having reviewed the recommendations of the American Heritage Rivers Initiative Advisory Committee, I am pleased to be able to recognize a select group of rivers and communities that reflect the true diversity and splendor of America's natural endowment, and the tremendous energy and commitment of its citizenry.

Pursuant to Executive Orders 13061 [set out above], 13080, and 13093 [set out above], I hereby designate the following American Heritage Rivers:

- The Blackstone and Woonasquatucket Rivers, in the States of Massachusetts and Rhode Island;
- The Connecticut River, in the States of Connecticut, Massachusetts, New Hampshire, and Vermont;
- The Cuyahoga River, in the State of Ohio;
- The Detroit River, in the State of Michigan;
- The Hanalei River, in the State of Hawaii;
- The Hudson River, in the State of New York;
- The Upper Mississippi River, in the States of Illinois, Iowa, Minnesota, Missouri, and Wisconsin;
- The Lower Mississippi River, in the States of Louisiana and Tennessee;
- The New River, in the States of North Carolina, Virginia, and West Virginia;
- The Rio Grande, in the State of Texas;
- The Potomac River, in the District of Columbia and the States of Maryland, Pennsylvania, Virginia, and West Virginia;
- The St. Johns River, in the State of Florida;
- The Upper Susquehanna and Lackawanna Rivers, in the State of Pennsylvania;
- The Willamette River, in the State of Oregon.

IN WITNESS WHEREOF, I have hereunto set my hand this thirtieth day of July, in the year of our Lord nineteen hundred and ninety-eight, and of the Independence of the United States of America the two hundred and twenty-third.

WILLIAM J. CLINTON.

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*), Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990, as amended (16 U.S.C. 4701 *et seq.*), Lacey Act, as amended (18 U.S.C. 42), Federal Plant Pest Act (7 U.S.C. 150aa *et seq.*), Federal Noxious Weed Act of 1974, as amended (7 U.S.C. 2801 *et seq.*), Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), and other pertinent statutes, to prevent the introduction of invasive species and provide for their control and to minimize the economic, ecological, and human health impacts that invasive species cause, it is ordered as follows:

SECTION 1. *Definitions.*

(a) ''Alien species'' means, with respect to a particular ecosystem, any species, including its seeds, eggs, spores, or other biological material capable of propagating that species, that is not native to that ecosystem.

(b) ''Control'' means, as appropriate, eradicating, suppressing, reducing, or managing invasive species populations, preventing spread of invasive species from areas where they are present, and taking steps such as restoration of native species and habitats to reduce the effects of invasive species and to prevent further invasions.

(c) ''Ecosystem'' means the complex of a community of organisms and its environment.

(d) ''Federal agency'' means an executive department or agency, but does not include independent establishments as defined by 5 U.S.C. 104.

(e) ''Introduction'' means the intentional or unintentional escape, release, dissemination, or placement of a species into an ecosystem as a result of human activity.

(f) ''Invasive species'' means an alien species whose introduction does or is likely to cause economic or environmental harm or harm to human health.

(g) ''Native species'' means, with respect to a particular ecosystem, a species that, other than as a result of an introduction, historically occurred or currently occurs in that ecosystem.

(h) ''Species'' means a group of organisms all of which have a high degree of physical and genetic similarity, generally interbreed only among themselves, and show persistent differences from members of allied groups of organisms.

(i) ''Stakeholders'' means, but is not limited to, State, tribal, and local government agencies, academic institutions, the scientific community, nongovernmental entities including environmental, agricultural, and conservation organizations, trade groups, commercial interests, and private landowners.

(j) ''United States'' means the 50 States, the District of Columbia, Puerto Rico, Guam, and all possessions, territories, and the territorial sea of the United States.

SEC. 2. *Federal Agency Duties.* (a) Each Federal agency whose actions may affect the status of invasive species shall, to the extent practicable and permitted by law,

(1) identify such actions;

(2) subject to the availability of appropriations, and within Administration budgetary limits, use relevant programs and authorities to: (i) prevent the introduction of invasive species; (ii) detect and respond rapidly to and control populations of such species in a cost-effective and environmentally sound manner; (iii) monitor invasive species populations accurately and reliably; (iv) provide for restoration of native species and habitat conditions in ecosystems that have been invaded; (v) conduct research on invasive species and develop technologies to prevent introduction and provide for environmentally sound control of invasive species; and (vi) promote public education on invasive species and the means to address them; and

(3) not authorize, fund, or carry out actions that it believes are likely to cause or promote the introduction or spread of invasive species in the United States or elsewhere unless, pursuant to guidelines that it has prescribed, the agency has determined and made public its determination that the benefits of such actions clearly outweigh the potential harm caused by invasive species; and that all feasible and prudent measures to minimize risk of harm will be taken in conjunction with the actions.

(b) Federal agencies shall pursue the duties set forth in this section in consultation with the Invasive Species Council, consistent with the Invasive Species Management Plan and in cooperation with stakeholders, as appropriate, and, as approved by the Department of State, when Federal agencies are working with international organizations and foreign nations.

SEC. 3. *Invasive Species Council.* (a) An Invasive Species Council (Council) is hereby established whose members shall include the Secretary of State, the Secretary of the Treasury, the Secretary of Defense, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Commerce, the Secretary of Transportation, the Secretary of Homeland Security, and the Administrator of the Environmental Protection Agency. The Council shall be Co-Chaired by the Secretary of the Interior, the Secretary of Agriculture, and the Secretary of Commerce. The Council may invite additional Federal agency representatives to be members, including representatives from subcabinet bureaus or offices with significant responsibilities concerning invasive species, and may prescribe special procedures for their participation. The Secretary of the Interior shall, with concurrence of the Co-Chairs, appoint an Executive Director of the Council and shall provide the staff and administrative support for the Council.

(b) The Secretary of the Interior shall establish an advisory committee under the Federal Advisory Committee Act, 5 U.S.C. App., to provide information and advice for consideration by the Council, and shall, after consultation with other members of the Council, appoint members of the advisory committee representing stakeholders. Among other things, the advisory committee shall recommend plans and actions at local, tribal, State, regional, and ecosystem-based levels to achieve the goals and objectives of the Management Plan in section 5 of this order. The advisory committee shall act in cooperation with stakeholders and existing organizations addressing invasive species. The Department of the Interior shall provide the administrative and financial support for the advisory committee.

SEC. 4. *Duties of the Invasive Species Council.* The Invasive Species Council shall provide national leadership regarding invasive species, and shall:

(a) oversee the implementation of this order and see that the Federal agency activities concerning invasive species are coordinated, complementary, cost-efficient, and effective, relying to the extent feasible and appropriate on existing organizations addressing invasive species, such as the Aquatic Nuisance Species Task Force, the Federal Interagency Committee for the Management of Noxious and Exotic Weeds, and the Committee on Environment and Natural Resources;

(b) encourage planning and action at local, tribal, State, regional, and ecosystem-based levels to achieve the goals and objectives of the Management Plan in section 5 of this order, in cooperation with stakeholders and existing organizations addressing invasive species;

(c) develop recommendations for international cooperation in addressing invasive species;

(d) develop, in consultation with the Council on Environmental Quality, guidance to Federal agencies pursuant to the National Environmental Policy Act on prevention and control of invasive species, including the procurement, use, and maintenance of native species as they affect invasive species;

(e) facilitate development of a coordinated network among Federal agencies to document, evaluate, and monitor impacts from invasive species on the economy, the environment, and human health;

(f) facilitate establishment of a coordinated, up-to-date information-sharing system that utilizes, to the greatest extent practicable, the Internet; this system shall facilitate access to and exchange of information concerning invasive species, including, but not limited to, information on distribution and abundance of invasive species; life histories of such species and invasive characteristics; economic, environmental, and human health impacts; management techniques, and laws and programs for management, research, and public education; and

(g) prepare and issue a national Invasive Species Management Plan as set forth in section 5 of this order.

SEC. 5. *Invasive Species Management Plan.* (a) Within 18 months after issuance of this order, the Council shall prepare and issue the first edition of a National Invasive Species Management Plan (Management Plan), which shall detail and recommend performance-oriented goals and objectives and specific measures of success for Federal agency efforts concerning invasive species. The Management Plan shall recommend specific objectives and measures for carrying out each of the Federal agency duties established in section 2(a) of this order and shall set forth steps to be taken by the Council to carry out the duties assigned to it under section 4 of this order. The Management Plan shall be developed through a public process and in consultation with Federal agencies and stakeholders.

(b) The first edition of the Management Plan shall include a review of existing and prospective approaches and authorities for preventing the introduction and spread of invasive species, including those for identifying pathways by which invasive species are introduced and for minimizing the risk of introductions via those pathways, and shall identify research needs and recommend measures to minimize the risk that introductions will occur. Such recommended measures shall provide for a science-based process to evaluate risks associated with introduction and spread of invasive species and a coordinated and systematic risk-based process to identify, monitor, and interdict pathways that may be involved in the introduction of invasive species. If recommended measures are not authorized by current law, the Council shall develop and recommend to the President through its Co-Chairs legislative proposals for necessary changes in authority.

(c) The Council shall update the Management Plan biennially and shall concurrently evaluate and report on success in achieving the goals and objectives set forth in the Management Plan. The Management Plan shall identify the personnel, other resources, and additional levels of coordination needed to achieve the Management Plan's identified goals and objectives, and the Council shall provide each edition of the Management Plan and each report on it to the Office of Management and Budget. Within 18 months after measures have been recommended by the Council in any edition of the Management Plan, each Federal agency whose action is required to implement such measures shall either take the action recommended or shall provide the Council with an explanation of why the action is not feasible. The Council shall assess the effectiveness of this order no less than once each 5 years after the order is issued and shall report to the Office of Management and Budget on whether the order should be revised.

SEC. 6. *Judicial Review and Administration.* (a) This order is intended only to improve the internal management of the executive branch and is not intended to create any right, benefit, or trust responsibility, substantive or procedural, enforceable at law or equity by a party against the United States, its agencies, its officers, or any other person.

(b) Executive Order 11987 of May 24, 1977, is hereby revoked.

(c) The requirements of this order do not affect the obligations of Federal agencies under 16 U.S.C. 4713 with respect to ballast water programs.

(d) The requirements of section 2(a)(3) of this order shall not apply to any action of the Department of State or Department of Defense if the Secretary of State or the Secretary of Defense finds that exemption from such requirements is necessary for foreign policy or national security reasons.

EX. ORD. NO. 13148. GREENING THE GOVERNMENT THROUGH LEADERSHIP IN ENVIRONMENTAL MANAGEMENT

Ex. Ord. No. 13148, Apr. 21, 2000, 65 F.R. 24595, provided:

By the authority vested in me as President by the Constitution and the laws of the United States of

America, including the Emergency Planning and Community Right-to-Know Act of 1986 (42 U.S.C. 11001–11050) (EPCRA), the Pollution Prevention Act of 1990 (42 U.S.C. 13101–13109) (PPA), the Clean Air Act (42 U.S.C. 7401–7671q) (CAA), and section 301 of title 3, United States Code, it is hereby ordered as follows:

PART 1—PREAMBLE

SECTION 101. *Federal Environmental Leadership.* The head of each Federal agency is responsible for ensuring that all necessary actions are taken to integrate environmental accountability into agency day-to-day decisionmaking and long-term planning processes, across all agency missions, activities, and functions. Consequently, environmental management considerations must be a fundamental and integral component of Federal Government policies, operations, planning, and management. The head of each Federal agency is responsible for meeting the goals and requirements of this order.

PART 2—GOALS

SEC. 201. *Environmental Management.* Through development and implementation of environmental management systems, each agency shall ensure that strategies are established to support environmental leadership programs, policies, and procedures and that agency senior level managers explicitly and actively endorse these strategies.

SEC. 202. *Environmental Compliance.* Each agency shall comply with environmental regulations by establishing and implementing environmental compliance audit programs and policies that emphasize pollution prevention as a means to both achieve and maintain environmental compliance.

SEC. 203. *Right-to-Know and Pollution Prevention.* Through timely planning and reporting under the EPCRA, Federal facilities shall be leaders and responsible members of their communities by informing the public and their workers of possible sources of pollution resulting from facility operations. Each agency shall strive to reduce or eliminate harm to human health and the environment from releases of pollutants to the environment. Each agency shall advance the national policy that, whenever feasible and cost-effective, pollution should be prevented or reduced at the source. Funding for regulatory compliance programs shall emphasize pollution prevention as a means to address environmental compliance.

SEC. 204. *Release Reduction: Toxic Chemicals.* Through innovative pollution prevention, effective facility management, and sound acquisition and procurement practices, each agency shall reduce its reported Toxic Release Inventory (TRI) releases and off-site transfers of toxic chemicals for treatment and disposal by 10 percent annually, or by 40 percent overall by December 31, 2006.

SEC. 205. *Use Reduction: Toxic Chemicals and Hazardous Substances and Other Pollutants.* Through identification of proven substitutes and established facility management practices, including pollution prevention, each agency shall reduce its use of selected toxic chemicals, hazardous substances, and pollutants, or its generation of hazardous and radioactive waste types at its facilities by 50 percent by December 31, 2006. If an agency is unable to reduce the use of selected chemicals, that agency will reduce the use of selected hazardous substances or its generation of other pollutants, such as hazardous and radioactive waste types, at its facilities by 50 percent by December 31, 2006.

SEC. 206. *Reductions in Ozone-Depleting Substances.* Through evaluating present and future uses of ozone-depleting substances and maximizing the purchase and the use of safe, cost effective, and environmentally preferable alternatives, each agency shall develop a plan to phase out the procurement of Class I ozone-depleting substances for all nonexcepted uses by December 31, 2010.

SEC. 207. *Environmentally and Economically Beneficial Landscaping.* Each agency shall strive to promote the sustainable management of Federal facility lands through the implementation of cost-effective, environmentally sound landscaping practices, and programs to reduce adverse impacts to the natural environment.

PART 3—PLANNING AND ACCOUNTABILITY

SEC. 301. *Annual Budget Submission.* Federal agencies shall place high priority on obtaining funding and resources needed for implementation of the Greening the Government Executive Orders, including funding to address findings and recommendations from environmental management system audits or facility compliance audits conducted under sections 401 and 402 of this order. Federal agencies shall make such requests as required in Office of Management and Budget (OMB) Circular A–11.

SEC. 302. *Application of Life Cycle Assessment Concepts.* Each agency with facilities shall establish a pilot program to apply life cycle assessment and environmental cost accounting principles. To the maximum extent feasible and cost-effective, agencies shall apply those principles elsewhere in the agency to meet the goals and requirements of this order. Such analysis shall be considered in the process established in the OMB Capital Programming Guide and OMB Circular A–11. The Environmental Protection Agency (EPA), in coordination with the Workgroup established in section 306 of this order, shall, to the extent feasible, assist agencies in identifying, applying, and developing tools that reflect life cycle assessment and environmental cost accounting principles and provide technical assistance to agencies in developing life cycle assessments and environmental cost accounting assessments under this Part.

SEC. 303. *Pollution Prevention to Address Compliance.* Each agency shall ensure that its environmental regulatory compliance funding policies promote the use of pollution prevention to achieve and maintain environmental compliance at the agency's facilities. Agencies shall adopt a policy to preferentially use pollution prevention projects and activities to correct and prevent noncompliance with environmental regulatory requirements. Agency funding requests for facility compliance with Federal, State, and local environmental regulatory requirements shall emphasize pollution prevention through source reduction as the means of first choice to ensure compliance, with reuse and recycling alternatives having second priority as a means of compliance.

SEC. 304. *Pollution Prevention Return-on-Investment Programs.* Each agency shall develop and implement a pollution prevention program at its facilities that compares the life cycle costs of treatment and/or disposal of waste and pollutant streams to the life cycle costs of alternatives that eliminate or reduce toxic chemicals or pollutants at the source. Each agency shall implement those projects that are life-cycle cost-effective, or otherwise offer substantial environmental or economic benefits.

SEC. 305. *Policies, Strategies, and Plans.*

(a) Within 12 months of the date of this order, each agency shall ensure that the goals and requirements of this order are incorporated into existing agency environmental directives, policies, and documents affected by the requirements and goals of this order. Where such directives and policies do not already exist, each agency shall, within 12 months of the date of this order, prepare and endorse a written agency environmental management strategy to achieve the requirements and goals of this order. Agency preparation of directives, policies, and documents shall reflect the nature, scale, and environmental impacts of the agency's activities, products, or services. Agencies are encouraged to include elements of relevant agency policies or strategies developed under this part in agency planning documents prepared under the Government Performance and Results Act of 1993, Public Law 103–62 [see Short Title of 1993 Amendment note set out under 31 U.S.C. 1101].

(b) By March 31, 2002, each agency shall ensure that its facilities develop a written plan that sets forth the

facility's contribution to the goals and requirements established in this order. The plan should reflect the size and complexity of the facility. Where pollution prevention plans or other formal environmental planning instruments have been prepared for agency facilities, an agency may elect to update those plans to meet the requirements and goals of this section.

(c) The Federal Acquisition Regulation (FAR) Council shall develop acquisition policies and procedures for contractors to supply agencies with all information necessary for compliance with this order. Once the appropriate FAR clauses have been published, agencies shall use them in all applicable contracts. In addition, to the extent that compliance with this order is made more difficult due to lack of information from existing contractors, or concessioners, each agency shall take practical steps to obtain the information needed to comply with this order from such contractors or concessioners.

SEC. 306. *Interagency Environmental Leadership Workgroup.* Within 4 months of the date of this order, EPA shall convene and chair an Interagency Environmental Leadership Workgroup (the Workgroup) with senior-level representatives from all executive agencies and other interested independent Government agencies affected by this order. The Workgroup shall develop policies and guidance required by this order and member agencies shall facilitate implementation of the requirements of this order in their respective agencies. Workgroup members shall coordinate with their Agency Environmental Executive (AEE) designated under section 301(d) of Executive Order 13101 [42 U.S.C. 6961 note] and may request the assistance of their AEE in resolving issues that may arise among members in developing policies and guidance related to this order. If the AEEs are unable to resolve the issues, they may request the assistance of the Chair of the Council on Environmental Quality (CEQ).

SEC. 307. *Annual Reports.* Each agency shall submit an annual progress report to the Administrator on implementation of this order. The reports shall include a description of the progress that the agency has made in complying with all aspects of this order, including, but not limited to, progress in achieving the reduction goals in sections 502, 503, and 505 of this order. Each agency may prepare and submit the annual report in electronic format. A copy of the report shall be submitted to the Federal Environmental Executive (FEE) by EPA for use in the biennial Greening the Government Report to the President prepared in accordance with Executive Order 13101 [42 U.S.C. 6961 note]. Within 9 months of the date of this order, EPA, in coordination with the Workgroup established under section 306 of this order, shall prepare guidance regarding the information and timing for the annual report. The Workgroup shall coordinate with those agencies responsible for Federal agency reporting guidance under the Greening the Government Executive orders to streamline reporting requirements and reduce agency and facility-level reporting burdens. The first annual report shall cover calendar year 2000 activities.

PART 4—PROMOTING ENVIRONMENTAL MANAGEMENT AND LEADERSHIP

SEC. 401. *Agency and Facility Environmental Management Systems.* To attain the goals of section 201 of this order:

(a) Within 18 months of the date of this order, each agency shall conduct an agency-level environmental management system self assessment based on the Code of Environmental Management Principles for Federal Agencies developed by the EPA (61 Fed. Reg. 54062) and/or another appropriate environmental management system framework. Each assessment shall include a review of agency environmental leadership goals, objectives, and targets. Where appropriate, the assessments may be conducted at the service, bureau, or other comparable level.

(b) Within 24 months of the date of this order, each agency shall implement environmental management systems through pilot projects at selected agency facilities based on the Code of Environmental Management Principles for Federal Agencies and/or another appropriate environmental management system framework. By December 31, 2005, each agency shall implement an environmental management system at all appropriate agency facilities based on facility size, complexity, and the environmental aspects of facility operations. The facility environmental management system shall include measurable environmental goals, objectives, and targets that are reviewed and updated annually. Once established, environmental management system performance measures shall be incorporated in agency facility audit protocols.

SEC. 402. *Facility Compliance Audits.* To attain the goals of section 202 of this order:

(a) Within 12 months of the date of this order, each agency that does not have an established regulatory environmental compliance audit program shall develop and implement a program to conduct facility environmental compliance audits and begin auditing at its facilities within 6 months of the development of that program.

(b) An agency with an established regulatory environmental compliance audit program may elect to conduct environmental management system audits in lieu of regulatory environmental compliance audits at selected facilities.

(c) Facility environmental audits shall be conducted periodically. Each agency is encouraged to conduct audits not less than every 3 years from the date of the initial or previous audit. The scope and frequency of audits shall be based on facility size, complexity, and the environmental aspects of facility operations. As appropriate, each agency shall include tenant, contractor, and concessioner activities in facility audits.

(d) Each agency shall conduct internal reviews and audits and shall take such other steps, as may be necessary, to monitor its facilities' compliance with sections 501 and 504 of this order.

(e) Each agency shall consider findings from the assessments or audits conducted under Part 4 in program planning under section 301 of this order and in the preparation and revisions to facility plans prepared under section 305 of this order.

(f) Upon request and to the extent practicable, the EPA shall provide technical assistance in meeting the requirements of Part 4 by conducting environmental management reviews at Federal facilities and developing policies and guidance for conducting environmental compliance audits and implementing environmental management systems at Federal facilities.

SEC. 403. *Environmental Leadership and Agency Awards Programs.*

(a) Within 12 months of the date of this order, the Administrator shall establish a Federal Government environmental leadership program to promote and recognize outstanding environmental management performance in agencies and facilities.

(b) Each agency shall develop an internal agency-wide awards program to reward and highlight innovative programs and individuals showing outstanding environmental leadership in implementing this order. In addition, based upon criteria developed by the EPA in coordination with the Workgroup established in section 306 of this order, Federal employees who demonstrate outstanding leadership in implementation of this order may be considered for recognition under the White House awards program set forth in section 803 of Executive Order 13101 of September 14, 1998 [42 U.S.C. 6961 note].

SEC. 404. *Management Leadership and Performance Evaluations.*

(a) To ensure awareness of and support for the environmental requirements of this order, each agency shall include training on the provisions of the Greening the Government Executive orders in standard senior level management training as well as training for program managers, contracting personnel, procurement and acquisition personnel, facility managers, contrac-

tors, concessioners, and other personnel as appropriate. In coordination with the Workgroup established under section 306 of this order, the EPA shall prepare guidance on implementation of this section.

(b) To recognize and reinforce the responsibilities of facility and senior headquarters program managers, regional environmental coordinators and officers, their superiors, and, to the extent practicable and appropriate, others vital to the implementation of this order, each agency shall include successful implementation of pollution prevention, community awareness, and environmental management into its position descriptions and performance evaluations for those positions.

SEC. 405. *Compliance Assistance.*

(a) Upon request and to the extent practicable, the EPA shall provide technical advice and assistance to agencies to foster full compliance with environmental regulations and all aspects of this order.

(b) Within 12 months of the date of this order, the EPA shall develop a compliance assistance center to provide technical assistance for Federal facility compliance with environmental regulations and all aspects of this order.

(c) To enhance landscaping options and awareness, the United States Department of Agriculture (USDA) shall provide information on the suitability, propagation, and the use of native plants for landscaping to all agencies and the general public by USDA in conjunction with the center under subsection (b) of this section. In implementing Part 6 of this order, agencies are encouraged to develop model demonstration programs in coordination with the USDA.

SEC. 406. *Compliance Assurance.*

(a) In consultation with other agencies, the EPA may conduct such reviews and inspections as may be necessary to monitor compliance with sections 501 and 504 of this order. Each agency is encouraged to cooperate fully with the efforts of the EPA to ensure compliance with those sections.

(b) Whenever the Administrator notifies an agency that it is not in compliance with section 501 or 504 of this order, the agency shall provide the EPA a detailed plan for achieving compliance as promptly as practicable.

(c) The Administrator shall report annually to the President and the public on agency compliance with the provisions of sections 501 and 504 of this order.

SEC. 407. *Improving Environmental Management.* To ensure that government-wide goals for pollution prevention are advanced, each agency is encouraged to incorporate its environmental leadership goals into its Strategic and Annual Performance Plans required by the Government Performance and Results Act of 1993, Public Law 103–62 [see Short Title of 1993 Amendment note set out under 31 U.S.C. 1101], starting with performance plans accompanying the FY 2002 budget.

PART 5—EMERGENCY PLANNING, COMMUNITY RIGHT-TO-KNOW, AND POLLUTION PREVENTION

SEC. 501. *Toxics Release Inventory/Pollution Prevention Act Reporting.* To attain the goals of section 203 of this order:

(a) Each agency shall comply with the provisions set forth in section 313 of EPCRA [42 U.S.C. 11023], section 6607 of PPA [42 U.S.C. 13106], all implementing regulations, and future amendments to these authorities, in light of applicable EPA guidance.

(b) Each agency shall comply with these provisions without regard to the Standard Industrial Classification (SIC) or North American Industrial Classification System (NAICS) delineations. Except as described in subsection (d) of this section, all other existing statutory or regulatory limitations or exemptions on the application of EPCRA section 313 to specific activities at specific agency facilities apply to the reporting requirements set forth in subsection (a) of this section.

(c) Each agency required to report under subsection (a) of this section shall do so using electronic reporting as provided in EPA's EPCRA section 313 guidance.

(d) Within 12 months of the date of this order, the Administrator shall review the impact on reporting of existing regulatory exemptions on the application of EPCRA section 313 at Federal facilities. Where feasible, this review shall include pilot studies at Federal facilities. If the review indicates that application of existing exemptions to Federal Government reporting under this section precludes public reporting of substantial amounts of toxic chemicals under subsection 501(a), the EPA shall prepare guidance, in coordination with the Workgroup established under section 306 of this order, clarifying application of the exemptions at Federal facilities. In developing the guidance, the EPA should consider similar application of such regulatory limitations and exemptions by the private sector. To the extent feasible, the guidance developed by the EPA shall be consistent with the reasonable application of such regulatory limitations and exemptions in the private sector. The guidance shall ensure reporting consistent with the goal of public access to information under section 313 of EPCRA and section 6607 of PPA. The guidance shall be submitted to the AEEs established under section 301(d) of Executive Order 13101 [42 U.S.C. 6961 note] for review and endorsement. Each agency shall apply any guidance to reporting at its facilities as soon as practicable but no later than for reporting for the next calendar year following release of the guidance.

(e) The EPA shall coordinate with other interested Federal agencies to carry out pilot projects to collect and disseminate information about the release and other waste management of chemicals associated with the environmental response and restoration at their facilities and sites. The pilot projects will focus on releases and other waste management of chemicals associated with environmental response and restoration at facilities and sites where the activities generating wastes do not otherwise meet EPCRA section 313 thresholds for manufacture, process, or other use. Each agency is encouraged to identify applicable facilities and voluntarily report under subsection (a) of this section the releases and other waste management of toxic chemicals managed during environmental response and restoration, regardless of whether the facility otherwise would report under subsection (a). The releases and other waste management of chemicals associated with environmental response and restoration voluntarily reported under this subsection will not be included in the accounting established under sections 503(a) and (c) of this order.

SEC. 502. *Release Reduction: Toxic Chemicals.* To attain the goals of section 204 of this order:

(a) Beginning with reporting for calendar year 2001 activities, each agency reporting under section 501 of this order shall adopt a goal of reducing, where cost effective, the agency's total releases of toxic chemicals to the environment and off-site transfers of such chemicals for treatment and disposal by at least 10 percent annually, or by 40 percent overall by December 31, 2006. Beginning with activities for calendar year 2001, the baseline for measuring progress in meeting the reduction goal will be the aggregate of all such releases and off-site transfers of such chemicals for treatment and disposal as reported by all of the agency's facilities under section 501 of this order. The list of toxic chemicals applicable to this goal is the EPCRA section 313 [42 U.S.C. 11023] list as of December 1, 2000. If an agency achieves the 40 percent reduction goal prior to December 31, 2006, that agency shall establish a new baseline and reduction goal based on agency priorities.

(b) Where an agency is unable to pursue the reduction goal established in subsection (a) for certain chemicals that are mission critical and/or needed to protect human health and the environment or where agency off-site transfer of toxic chemicals for treatment is directly associated with environmental restoration activities, that agency may request a waiver from the EPA for all or part of the requirement in subsection (a) of this section. As appropriate, waiver requests must provide: (1) an explanation of the mission critical use of the chemical; (2) an explanation of the nature of the need for the chemical to protect human health; (3) a description of efforts to identify a less harmful substitute

chemical or alternative processes to reduce the release and transfer of the chemical in question; and (4) a description of the off-site transfers of toxic chemicals for treatment directly associated with environmental restoration activities. The EPA shall respond to the waiver request within 90 days and may grant such a waiver for no longer than 2 years. An agency may resubmit a request for waiver at the end of that period. The waiver under this section shall not alter requirements to report under section 501 of this order.

(c) Where a specific component (e.g., bureau, service, or command) within an agency achieves a 75 percent reduction in its 1999 reporting year publicly reported total releases of toxic chemicals to the environment and off-site transfers of such chemicals for treatment and disposal, based on the 1994 baseline established in Executive Order 12856 [former 42 U.S.C. 11001 note], that agency may independently elect to establish a reduction goal for that component lower than the 40 percent target established in subsection (a) of this section. The agency shall formally notify the Workgroup established in section 306 of this order of the elected reduction target.

SEC. 503. *Use Reduction: Toxic Chemicals, Hazardous Substances, and Other Pollutants.* To attain the goals of section 205 of this order:

(a) Within 18 months of the date of this order, each agency with facilities shall develop and support goals to reduce the use at such agencies' facilities of the priority chemicals on the list under subsection (b) of this section for identified applications and purposes, or alternative chemicals and pollutants the agency identifies under subsection (c) of this section, by at least 50 percent by December 31, 2006.

(b) Within 9 months of the date of this order the Administrator, in coordination with the Workgroup established in section 306 of this order, shall develop a list of not less than 15 priority chemicals used by the Federal Government that may result in significant harm to human health or the environment and that have known, readily available, less harmful substitutes for identified applications and purposes. In addition to identifying the applications and purposes to which such reductions apply, the Administrator, in coordination with the Workgroup shall identify a usage threshold below which this section shall not apply. The chemicals will be selected from listed EPCRA section 313 [42 U.S.C. 11023] toxic chemicals and, where appropriate, other regulated hazardous substances or pollutants. In developing the list, the Administrator, in coordination with the Workgroup shall consider: (1) environmental factors including toxicity, persistence, and bio-accumulation; (2) availability of known, less environmentally harmful substitute chemicals that can be used in place of the priority chemical for identified applications and purposes; (3) availability of known, less environmentally harmful processes that can be used in place of the priority chemical for identified applications and purposes; (4) relative costs of alternative chemicals or processes; and (5) potential risk and environmental and human exposure based upon applications and uses of the chemicals by Federal agencies and facilities. In identifying alternatives, the Administrator should take into consideration the guidance issued under section 503 of Executive Order 13101 [42 U.S.C. 6961 note].

(c) If an agency, which has facilities required to report under EPCRA, uses at its facilities less than five of the priority chemicals on the list developed in subsection (b) of this section for the identified applications and purposes, the agency shall develop, within 12 months of the date of this order, a list of not less than five chemicals that may include priority chemicals under subsection (b) of this section or other toxic chemicals, hazardous substances, and/or other pollutants the agency uses or generates, the release, transfer or waste management of which may result in significant harm to human health or the environment.

(d) In lieu of requirements under subsection (a) of this section, an agency may, upon concurrence with the Workgroup established under section 306 of this order, develop within 12 months of the date of this order, a list of not less than five priority hazardous or radioactive waste types generated by its facilities. Within 18 months of the date of this order, the agency shall develop and support goals to reduce the agency's generation of these wastes by at least 50 percent by December 31, 2006. To the maximum extent possible, such reductions shall be achieved by implementing source reduction practices.

(e) The baseline for measuring reductions for purposes of achieving the 50 percent reduction goal in subsections (a) and (d) of this section for each agency is the first calendar year following the development of the list of priority chemicals under subsection (b) of this section.

(f) Each agency shall undertake pilot projects at selected facilities to gather and make publicly available materials accounting data related to the toxic chemicals, hazardous substances, and/or other pollutants identified under subsections (b), (c), or (d) of this section.

(g) Within 12 months of the date of this order, the Administrator shall develop guidance on implementing this section in coordination with the Workgroup. The EPA shall develop technical assistance materials to assist agencies in meeting the 50 percent reduction goal of this section.

(h) Where an agency can demonstrate to the Workgroup that it has previously reduced the use of a priority chemical identified in subsection 503(b) by 50 percent, then the agency may elect to waive the 50 percent reduction goal for that chemical.

SEC. 504. *Emergency Planning and Reporting Responsibilities.* Each agency shall comply with the provisions set forth in sections 301 through 312 of the EPCRA [42 U.S.C. 11001–11022], all implementing regulations, and any future amendments to these authorities, in light of any applicable guidance as provided by the EPA.

SEC. 505. *Reductions in Ozone-Depleting Substances.* To attain the goals of section 206 of this order:

(a) Each agency shall ensure that its facilities: (1) maximize the use of safe alternatives to ozone-depleting substances, as approved by the EPA's Significant New Alternatives Policy (SNAP) program; (2) consistent with subsection (b) of this section, evaluate the present and future uses of ozone-depleting substances, including making assessments of existing and future needs for such materials, and evaluate use of, and plans for recycling, refrigerants, and halons; and (3) exercise leadership, develop exemplary practices, and disseminate information on successful efforts in phasing out ozone-depleting substances.

(b) Within 12 months of the date of this order, each agency shall develop a plan to phase out the procurement of Class I ozone-depleting substances for all non-excepted uses by December 31, 2010. Plans should target cost effective reduction of environmental risk by phasing out Class I ozone depleting substance applications as the equipment using those substances reaches its expected service life. Exceptions to this requirement include all exceptions found in current or future applicable law, treaty, regulation, or Executive order.

(c) Each agency shall amend its personal property management policies and procedures to preclude disposal of ozone depleting substances removed or reclaimed from its facilities or equipment, including disposal as part of a contract, trade, or donation, without prior coordination with the Department of Defense (DoD). Where the recovered ozone-depleting substance is a critical requirement for DoD missions, the agency shall transfer the materials to the DoD. The DoD will bear the costs of such transfer.

PART 6—LANDSCAPING MANAGEMENT PRACTICES

SEC. 601. *Implementation.*

(a) Within 12 months from the date of this order, each agency shall incorporate the Guidance for Presidential Memorandum on Environmentally and Economically Beneficial Landscape Practices on Federal Landscaped

Grounds (60 Fed. Reg. 40837) developed by the FEE into landscaping programs, policies, and practices.

(b) Within 12 months of the date of this order, the FEE shall form a workgroup of appropriate Federal agency representatives to review and update the guidance in subsection (a) of this section, as appropriate.

(c) Each agency providing funding for nonfederal projects involving landscaping projects shall furnish funding recipients with information on environmentally and economically beneficial landscaping practices and work with the recipients to support and encourage application of such practices on Federally funded projects.

SEC. 602. *Technical Assistance and Outreach.* The EPA, the General Services Administration (GSA), and the USDA shall provide technical assistance in accordance with their respective authorities on environmentally and economically beneficial landscaping practices to agencies and their facilities.

PART 7—ACQUISITION AND PROCUREMENT

SEC. 701. *Limiting Procurement of Toxic Chemicals, Hazardous Substances, and Other Pollutants.*

(a) Within 12 months of the date of this order, each agency shall implement training programs to ensure that agency procurement officials and acquisition program managers are aware of the requirements of this order and its applicability to those individuals.

(b) Within 24 months of the date of this order, each agency shall determine the feasibility of implementing centralized procurement and distribution (e.g., ''pharmacy'') programs at its facilities for tracking, distribution, and management of toxic or hazardous materials and, where appropriate, implement such programs.

(c) Under established schedules for review of standardized documents, DoD and GSA, and other agencies, as appropriate, shall review their standardized documents and identify opportunities to eliminate or reduce their use of chemicals included on the list of priority chemicals developed by the EPA under subsection 503(b) of this order, and make revisions as appropriate.

(d) Each agency shall follow the policies and procedures for toxic chemical release reporting in accordance with FAR section 23.9 effective as of the date of this order and policies and procedures on Federal compliance with right-to-know laws and pollution prevention requirements in accordance with FAR section 23.10 effective as of the date of this order.

SEC. 702. *Environmentally Benign Adhesives.* Within 12 months after environmentally benign pressure sensitive adhesives for paper products become commercially available, each agency shall revise its specifications for paper products using adhesives and direct the purchase of paper products using those adhesives, whenever technically practicable and cost effective. Each agency should consider products using the environmentally benign pressure sensitive adhesives approved by the U.S. Postal Service (USPS) and listed on the USPS Qualified Products List for pressure sensitive recyclable adhesives.

SEC. 703. *Ozone-Depleting Substances.* Each agency shall follow the policies and procedures for the acquisition of items that contain, use, or are manufactured with ozone-depleting substances in accordance with FAR section 23.8 and other applicable FAR provisions.

SEC. 704. *Environmentally and Economically Beneficial Landscaping Practices.*

(a) Within 18 months of the date of this order, each agency shall have in place acquisition and procurement practices, including provision of landscaping services that conform to the guidance referred to in section 601 of this order, for the use of environmentally and economically beneficial landscaping practices. At a minimum, such practices shall be consistent with the policies in the guidance referred to in section 601 of this order.

(b) In implementing landscaping policies, each agency shall purchase environmentally preferable and recycled content products, including EPA-designated items such as compost and mulch, that contribute to environmentally and economically beneficial practices.

PART 8—EXEMPTIONS

SEC. 801. *National Security Exemptions.* Subject to subsection 902(c) of this order and except as otherwise required by applicable law, in the interest of national security, the head of any agency may request from the President an exemption from complying with the provisions of any or all provisions of this order for particular agency facilities, provided that the procedures set forth in section 120(j)(1) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (42 U.S.C. 9620(j)(1)), are followed, with the following exceptions: (a) an exemption issued under this section will be for a specified period of time that may exceed 1 year; (b) notice of any exemption granted under this section for provisions not otherwise required by law is only required to the Director of OMB, the Chair of the CEQ, and the Director of the National Security Council; and (c) an exemption under this section may be issued due to lack of appropriations, provided that the head of the agency requesting the exemption shows that necessary funds were requested by the agency in its budget submission and agency plan under Executive Order 12088 of October 13, 1978 [set out as a note above], and were not contained in the President's budget request or the Congress failed to make available the requested appropriation. To the maximum extent practicable, and without compromising national security, each agency shall strive to comply with the purposes, goals, and implementation steps in this order. Nothing in this order affects limitations on the dissemination of classified information pursuant to law, regulation, or Executive order.

SEC. 802. *Compliance.* After January 1, 2002, OMB, in consultation with the Chair of the Workgroup established by section 306 of this order, may modify the compliance requirements for an agency under this order, if the agency is unable to comply with the requirements of the order. An agency requesting modification must show that it has made substantial good faith efforts to comply with the order. The cost-effectiveness of implementation of the order can be a factor in OMB's decision to modify the requirements for that agency's compliance with the order.

PART 9—GENERAL PROVISIONS

SEC. 901. *Revocation.* Executive Order 12843 of April 21, 1993 [former 42 U.S.C. 7671*l* note], Executive Order 12856 of August 3, 1993 [former 42 U.S.C. 11001 note], the Executive Memorandum on Environmentally Beneficial Landscaping of April 26, 1994 [not classified to the Code], Executive Order 12969 of August 8, 1995 [former 41 U.S.C. 401 note], and section 1–4. (c) Nothing in this order alters the obligations under EPCRA, PPA, and CAA independent of this order for Government-owned, contractor-operated facilities and Government corporations owning or operating facilities or subjects such facilities to EPCRA, PPA, or CAA if they are otherwise excluded. However, each agency shall include the releases and other waste management of chemicals for all such facilities to meet the agency's reporting responsibilities under section 501 of this order.

(d) Nothing in this order shall be construed to make the provisions of CAA sections [sic] 304 [42 U.S.C. 7604] and EPCRA sections 325 and 326 [42 U.S.C. 11045, 11046] applicable to any agency or facility, except to the extent that an agency or facility would independently be subject to such provisions.

SEC. 903. *Community Outreach.* Each agency is encouraged to establish a process for local community advice and outreach for its facilities relevant to aspects of this and other related Greening the Government Executive orders. SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in title 20 section 5604.

§ 4332. Cooperation of agencies; reports; availability of information; recommendations; international and national coordination of efforts

The Congress authorizes and directs that, to the fullest extent possible: (1) the policies, regulations, and public laws of the United States shall be interpreted and administered in accordance with the policies set forth in this chapter, and (2) all agencies of the Federal Government shall—

(A) utilize a systematic, interdisciplinary approach which will insure the integrated use of the natural and social sciences and the environmental design arts in planning and in decisionmaking which may have an impact on man's environment;

(B) identify and develop methods and procedures, in consultation with the Council on Environmental Quality established by subchapter II of this chapter, which will insure that presently unquantified environmental amenities and values may be given appropriate consideration in decisionmaking along with economic and technical considerations;

(C) include in every recommendation or report on proposals for legislation and other major Federal actions significantly affecting the quality of the human environment, a detailed statement by the responsible official on—

(i) the environmental impact of the proposed action,

(ii) any adverse environmental effects which cannot be avoided should the proposal be implemented,

(iii) alternatives to the proposed action,

(iv) the relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity, and

(v) any irreversible and irretrievable commitments of resources which would be involved in the proposed action should it be implemented.

Prior to making any detailed statement, the responsible Federal official shall consult with and obtain the comments of any Federal agency which has jurisdiction by law or special expertise with respect to any environmental impact involved. Copies of such statement and the comments and views of the appropriate Federal, State, and local agencies, which are authorized to develop and enforce environmental standards, shall be made available to the President, the Council on Environmental Quality and to the public as provided by section 552 of title 5, and shall accompany the proposal through the existing agency review processes;

(D) Any detailed statement required under subparagraph (C) after January 1, 1970, for any major Federal action funded under a program of grants to States shall not be deemed to be legally insufficient solely by reason of having been prepared by a State agency or official, if:

(i) the State agency or official has statewide jurisdiction and has the responsibility for such action,

(ii) the responsible Federal official furnishes guidance and participates in such preparation,

(iii) the responsible Federal official independently evaluates such statement prior to its approval and adoption, and

(iv) after January 1, 1976, the responsible Federal official provides early notification to, and solicits the views of, any other State or any Federal land management entity of any action or any alternative thereto which may have significant impacts upon such State or affected Federal land management entity and, if there is any disagreement on such impacts, prepares a written assessment of such impacts and views for incorporation into such detailed statement.

The procedures in this subparagraph shall not relieve the Federal official of his responsibilities for the scope, objectivity, and content of the entire statement or of any other responsibility under this chapter; and further, this subparagraph does not affect the legal sufficiency of statements prepared by State agencies with less than statewide jurisdiction.[1]

(E) study, develop, and describe appropriate alternatives to recommended courses of action in any proposal which involves unresolved conflicts concerning alternative uses of available resources;

(F) recognize the worldwide and long-range character of environmental problems and,

where consistent with the foreign policy of the United States, lend appropriate support to initiatives, resolutions, and programs designed to maximize international cooperation in anticipating and preventing a decline in the quality of mankind's world environment;

(G) make available to States, counties, municipalities, institutions, and individuals, advice and information useful in restoring, maintaining, and enhancing the quality of the environment;

(H) initiate and utilize ecological information in the planning and development of resource-oriented projects; and

(I) assist the Council on Environmental Quality established by subchapter II of this chapter.

PART A—DEVELOPMENT OF A NATIONAL URBAN POLICY

§ 4502. Congressional findings and declaration of policy

(a) The Congress finds that rapid changes in patterns of urban settlement, including change in population distribution and economic bases of urban areas, have created an imbalance between the Nation's needs and resources and seriously threaten our physical and social environment, and the financial viability of our cities, and that the economic and social development of the Nation, the proper conservation of our energy and other natural resources, and the achievement of satisfactory living standards depend upon the sound, orderly, and more balanced development of all areas of the Nation.

(b) The Congress further finds that Federal programs affect the location of population, economic growth, and the character of urban development; that such programs frequently conflict and result in undesirable and costly patterns of urban development and redevelopment which adversely affect the environment and wastefully use energy and other natural resources; and that existing and future programs must be interrelated and coordinated within a system of orderly development and established priorities consistent with a national urban policy.

(c) To promote the general welfare and properly apply the resources of the Federal Government in strengthening the economic and social

health of all areas of the Nation and more adequately protect the physical environment and conserve energy and other natural resources, the Congress declares that the Federal Government, consistent with the responsibilities of State and local government and the private sector, must assume responsibility for the development of a national urban policy which shall incorporate social, economic, and other appropriate factors. Such policy shall serve as a guide in making specific decisions at the national level which affect the pattern of urban development and redevelopment and shall provide a framework for development of interstate, State, and local urban policy.

(d) The Congress further declares that the national urban policy should—

(1) favor patterns of urbanization and economic development and stabilization which offer a range of alternative locations and encourage the wise and balanced use of physical and human resources in metropolitan and urban regions as well as in smaller urban places which have a potential for accelerated growth;

(2) foster the continued economic strength of all parts of the United States, including central cities, suburbs, smaller communities, local neighborhoods, and rural areas;

(3) encourage patterns of development and redevelopment which minimize disparities among States, regions, and cities;

(4) treat comprehensively the problems of poverty and employment (including the erosion of tax bases, and the need for better community services and job opportunities) which are associated with disorderly urbanization and rural decline;

(5) develop means to encourage good housing for all Americans without regard to race or creed;

(6) refine the role of the Federal Government in revitalizing existing communities and encouraging planned, large-scale urban and new community development;

(7) strengthen the capacity of general governmental institutions to contribute to balanced urban growth and stabilization; and

(8) increase coordination among Federal programs that seek to promote job opportunities and skills, decent and affordable housing, public safety, access to health care, educational opportunities, and fiscal soundness for urban communities and their residents.

(Pub. L. 91–609, title VII, §702, Dec. 31, 1970, 84 Stat. 1791; Pub. L. 95–128, title VI, §601(b), Oct. 12, 1977, 91 Stat. 1143; Pub. L. 98–479, title II, §204(i), Oct. 17, 1984, 98 Stat. 2233; Pub. L. 102–550, title IX, §921(1), Oct. 28, 1992, 106 Stat. 3883.)

AMENDMENTS

1992—Subsec. (d)(8). Pub. L. 102–550 added par. (8) and struck out former par. (8) which read as follows: ''facilitate increased coordination in the administration of Federal programs so as to encourage desirable patterns of urban development and redevelopment, encourage the prudent use of energy and other natural resources, and protect the physical environment.''

1984—Subsec. (d)(8). Pub. L. 98–479 struck out ''of'' before ''the physical environment''.

1977—Subsec. (a). Pub. L. 95–128, §601(b)(1), substituted ''rapid changes in patterns of urban settlement, including change in population distribution and economic bases of urban areas, have created'' for ''the rapid growth of urban population and uneven expansion of urban development in the United States, together with a decline in farm population, slower growth in rural areas, and migration to the cities, has created'' and included the threat to ''social'' environment and the financial viability of our cities, and conservation of ''energy''.

Subsec. (b). Pub. L. 95–128, §601(b)(2), included findings respecting costly urban redevelopment and wasteful use of energy and struck out ''growth'' after ''national urban''.

Subsec. (c). Pub. L. 95–128, §601(b)(3), included conservation of ''energy'', struck out ''growth'' after ''nation urban'' in first sentence and substituted in second sentence ''urban development and redevelopment'' for ''urban growth'' and ''urban policy'' for ''growth and stabilization policy''.

(2) approximately ten million, or 7 percent, of the adults in the United States are alcoholics or problem drinkers;

(3) it is estimated that alcoholism and other alcohol related problems cost the United States over $43,000,000,000 annually in lost production, medical and public assistance expenditures, police and court costs, and motor vehicle and other accidents;

(4) alcohol abuse is found with increasing frequency among persons who are multiple-drug abusers and among former heroin users who are being treated in methadone maintenance programs;

(6) alcohol abuse and alcoholism have a substantial impact on the families of alcohol abusers and alcoholics and contributes to domestic violence;

(7) alcohol abuse and alcoholism, together with abuse of other legal and illegal drugs, present a need for prevention and intervention programs designed to reach the general population and members of high risk populations such as youth, women, the elderly, and families of alcohol abusers and alcoholics; and

(8) alcoholism is an illness requiring treatment and rehabilitation through the assistance of a broad range of community health and social services and with the cooperation of law enforcement agencies, employers, employee associations, and associations of concerned individuals.

(b) It is the policy of the United States and the purpose of this chapter to approach alcohol

abuse and alcoholism from a comprehensive community care standpoint, and to meet the problems of alcohol abuse and alcoholism through—

(1) comprehensive Federal, State, and local planning for, and effective use of, Federal assistance to States, and direct Federal assistance to community-based programs to meet the urgent needs of special populations, in coordination with all other governmental and nongovernmental sources of assistance;

(b) Determinations of eligibility

(1) Promulgation of regulations

Not later than 1 year after November 21, 1997, after providing notice and an opportunity for public comment, the head of the lead agency shall promulgate regulations to carry out subsection (a) of this section.

(2) Contents of regulations

Regulations promulgated under paragraph (1) shall—

(A) prescribe the processes, procedures, and information that a displacing agency must use in determining whether a displaced person is an alien not lawfully present in the United States;

(B) prohibit a displacing agency from discriminating against any displaced person;

(C) ensure that each eligibility determination is fair and based on reliable information; and

(D) prescribe standards for a displacing agency to apply in making determinations relating to exceptional and extremely unusual hardship under subsection (c) of this section.

(c) Exceptional and extremely unusual hardship

If a displacing agency determines by clear and convincing evidence that a determination of the ineligibility of a displaced person under subsection (a) of this section would result in exceptional and extremely unusual hardship to an individual who is the displaced person's spouse, parent, or child and who is a citizen of the United States or an alien lawfully admitted for permanent residence in the United States, the displacing agency shall provide relocation payments and other assistance to the displaced person under this chapter if the displaced person would be eligible for the assistance but for subsection (a) of this section.

(d) Limitation on statutory construction

Nothing in this section affects any right available to a displaced person under any other provision of Federal or State law.

SUBCHAPTER II—UNIFORM RELOCATION ASSISTANCE

§ 4621. Declaration of findings and policy

(a) Findings

The Congress finds and declares that—

(1) displacement as a direct result of programs or projects undertaken by a Federal agency or with Federal financial assistance is caused by a number of activities, including rehabilitation, demolition, code enforcement, and acquisition;

(2) relocation assistance policies must provide for fair, uniform, and equitable treatment of all affected persons;

(3) the displacement of businesses often results in their closure;

(4) minimizing the adverse impact of displacement is essential to maintaining the economic and social well-being of communities; and

(5) implementation of this chapter has resulted in burdensome, inefficient, and inconsistent compliance requirements and procedures which will be improved by establishing a lead agency and allowing for State certification and implementation.

(b) Policy

This subchapter establishes a uniform policy for the fair and equitable treatment of persons displaced as a direct result of programs or projects undertaken by a Federal agency or with Federal financial assistance. The primary purpose of this subchapter is to ensure that such persons shall not suffer disproportionate injuries as a result of programs and projects designed for the benefit of the public as a whole and to minimize the hardship of displacement on such persons.

(c) Congressional intent

It is the intent of Congress that—

(1) Federal agencies shall carry out this subchapter in a manner which minimizes waste, fraud, and mismanagement and reduces unnecessary administrative costs borne by States and State agencies in providing relocation assistance;

(2) uniform procedures for the administration of relocation assistance shall, to the maximum extent feasible, assure that the unique circumstances of any displaced person are taken into account and that persons in essen-

tially similar circumstances are accorded equal treatment under this chapter;

(3) the improvement of housing conditions of economically disadvantaged persons under this subchapter shall be undertaken, to the maximum extent feasible, in coordination with existing Federal, State, and local governmental programs for accomplishing such goals; and

(4) the policies and procedures of this chapter will be administered in a manner which is consistent with fair housing requirements and which assures all persons their rights under title VIII of the Act of April 11, 1968 (Public Law 90–284), commonly known as the Civil Rights Act of 1968 [42 U.S.C. 3601 et seq.], and title VI of the Civil Rights Act of 1964 [42 U.S.C. 2000d et seq.].

§ 4622. Moving and related expenses

(a) General provision

Whenever a program or project to be undertaken by a displacing agency will result in the displacement of any person, the head of the displacing agency shall provide for the payment to the displaced person of—

(1) actual reasonable expenses in moving himself, his family, business, farm operation, or other personal property;

(2) actual direct losses of tangible personal property as a result of moving or discontinuing a business or farm operation, but not to exceed an amount equal to the reasonable expenses that would have been required to relocate such property, as determined by the head of the agency;

(3) actual reasonable expenses in searching for a replacement business or farm; and

(4) actual reasonable expenses necessary to reestablish a displaced farm, nonprofit organization, or small business at its new site, but not to exceed $10,000.

(b) Displacement from dwelling; election of payments: expense and dislocation allowance

Any displaced person eligible for payments under subsection (a) of this section who is displaced from a dwelling and who elects to accept the payments authorized by this subsection in lieu of the payments authorized by subsection (a) of this section may receive an expense and dislocation allowance, which shall be determined according to a schedule established by the head of the lead agency.

(c) Displacement from business or farm operation; election of payments; minimum and maximum amounts; eligibility

Any displaced person eligible for payments under subsection (a) of this section who is displaced from the person's place of business or farm operation and who is eligible under criteria established by the head of the lead agency may elect to accept the payment authorized by this subsection in lieu of the payment authorized by subsection (a) of this section. Such payment shall consist of a fixed payment in an amount to be determined according to criteria established

by the head of the lead agency, except that such payment shall not be less than $1,000 nor more than $20,000. A person whose sole business at the displacement dwelling is the rental of such property to others shall not qualify for a payment under this subsection.

(d) Certain utility relocation expenses

(1) Except as otherwise provided by Federal law—

(A) if a program or project (i) which is undertaken by a displacing agency, and (ii) the purpose of which is not to relocate or reconstruct any utility facility, results in the relocation of a utility facility;

(B) if the owner of the utility facility which is being relocated under such program or project has entered into, with the State or local government on whose property, easement, or right-of-way such facility is located, a franchise or similar agreement with respect to the use of such property, easement, or right-of-way; and

(C) if the relocation of such facility results in such owner incurring an extraordinary cost in connection with such relocation;

the displacing agency may, in accordance with such regulations as the head of the lead agency may issue, provide to such owner a relocation payment which may not exceed the amount of such extraordinary cost (less any increase in the value of the new utility facility above the value of the old utility facility and less any salvage value derived from the old utility facility).

(2) For purposes of this subsection, the term—

(A) ''extraordinary cost in connection with a relocation'' means any cost incurred by the owner of a utility facility in connection with relocation of such facility which is determined by the head of the displacing agency, under such regulations as the head of the lead agency shall issue—

(i) to be a non-routine relocation expense;

(ii) to be a cost such owner ordinarily does not include in its annual budget as an expense of operation; and

(iii) to meet such other requirements as the lead agency may prescribe in such regulations; and

(B) ''utility facility'' means—

(i) any electric, gas, water, steam power, or materials transmission or distribution system;

(ii) any transportation system;

(iii) any communications system (including cable television); and

(iv) any fixtures, equipment, or other property associated with the operation, maintenance, or repair of any such system;

located on property which is owned by a State or local government or over which a State or local government has an easement or right-of-way. A utility facility may be publicly, privately, or cooperatively owned.

AMENDMENTS

1987—Subsec. (a). Pub. L. 100–17, § 405(a)(1), inserted introductory provisions and struck out former introductory provisions which read as follows: ''Whenever the acquisition of real property for a program or project undertaken by a Federal agency in any State will result in the displacement of any person on or after January 2, 1971, the head of such agency shall make a payment to any displaced person, upon proper application as approved by such agency head, for—''.

Subsec. (b). Pub. L. 100–17, § 405(b), substituted ''an expense and dislocation allowance, which shall be determined according to a schedule established by the head of the lead agency'' for ''a moving expense allowance, determined according to a schedule established by the head of the Federal agency, not to exceed $300; and a dislocation allowance of $200''.

Subsec. (c). Pub. L. 100–17, § 405(c), amended subsec. (c) generally. Prior to amendment, subsec. (c) read as follows: ''Any displaced person eligible for payments under subsection (a) of this section who is displaced from his place of business or from his farm operation and who elects to accept the payment authorized by this subsection in lieu of the payment authorized by subsection (a) of this section, may receive a fixed payment in an amount equal to the average annual net earnings of the business or farm operation, except that such payment shall be not less than $2,500 nor more than $10,000. In the case of a business no payment shall be made under this subsection unless the head of the Federal agency is satisfied that the business (1) cannot be relocated without a substantial loss of its existing patronage, and (2) is not a part of a commercial enterprise having at least one other establishment not being acquired by the United States, which is engaged in the same or similar business. For purposes of this subsection, the term 'average annual net earnings' means one-half of any net earnings of the business or farm operation, before Federal, State, and local income taxes, during the two taxable years immediately preceding the taxable year in which such business or farm operation moves from the real property acquired for such project, or during such other period as the head of such agency determines to be more equitable for establishing such earnings, and includes any compensation paid by the business or farm operation to the owner, his spouse, or his dependents during such period.''

EFFECTIVE DATE OF 1987 AMENDMENT

Amendment by Pub. L. 100–17 effective on effective date provided in regulations promulgated under section 4633 of this title (as amended by section 412 of Pub. L. 100–17), but not later than 2 years after Apr. 2, 1987, see section 418 of Pub. L. 100–17, set out as a note under section 4601 of this title.

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 4601, 4630 of this title; title 25 section 640d–14.

§ 4623. Replacement housing for homeowner; mortgage insurance

(a)(1) In addition to payments otherwise authorized by this subchapter, the head of the displacing agency shall make an additional payment not in excess of $22,500 to any displaced person who is displaced from a dwelling actually owned and occupied by such displaced person for not less than one hundred and eighty days prior to the initiation of negotiations for the acquisition of the property. Such additional payment shall include the following elements:

(A) The amount, if any, which when added to the acquisition cost of the dwelling acquired by the displacing agency, equals the reasonable cost of a comparable replacement dwelling.

(B) The amount, if any, which will compensate such displaced person for any increased interest

costs and other debt service costs which such person is required to pay for financing the acquisition of any such comparable replacement dwelling. Such amount shall be paid only if the dwelling acquired by the displacing agency was encumbered by a bona fide mortgage which was a valid lien on such dwelling for not less than 180 days immediately prior to the initiation of negotiations for the acquisition of such dwelling.

(C) Reasonable expenses incurred by such displaced person for evidence of title, recording fees, and other closing costs incident to the purchase of the replacement dwelling, but not including prepaid expenses.

(2) The additional payment authorized by this section shall be made only to a displaced person who purchases and occupies a decent, safe, and sanitary replacement dwelling within 1 year after the date on which such person receives final payment from the displacing agency for the acquired dwelling or the date on which the displacing agency's obligation under section 4625(c)(3) of this title is met, whichever is later, except that the displacing agency may extend such period for good cause. If such period is extended, the payment under this section shall be based on the costs of relocating the person to a comparable replacement dwelling within 1 year of such date.

(b) The head of any Federal agency may, upon application by a mortgagee, insure any mortgage (including advances during construction) on a comparable replacement dwelling executed by a displaced person assisted under this section, which mortgage is eligible for insurance under any Federal law administered by such agency notwithstanding any requirements under such law relating to age, physical condition, or other personal characteristics of eligible mortgagors, and may make commitments for the insurance of such mortgage prior to the date of execution of the mortgage.

(Pub. L. 91–646, title II, § 203, Jan. 2, 1971, 84 Stat. 1896; Pub. L. 100–17, title IV, § 406, Apr. 2, 1987, 101 Stat. 251.)

AMENDMENTS

1987—Subsec. (a)(1). Pub. L. 100–17, § 406(1)–(3), substituted ''displacing agency'' for ''Federal agency'' and ''$22,500'' for ''$15,000'' in introductory provisions, and in subpar. (A) ''acquired by the displacing agency, equals the reasonable cost of a comparable replacement dwelling'' for ''acquired by the Federal agency, equals the reasonable cost of a comparable replacement dwelling which is a decent, safe, and sanitary dwelling adequate to accommodate such displaced person, reasonably accessible to public services and places of employment and available on the private market. All determinations required to carry out this subparagraph shall be made in accordance with standards established by the head of the Federal agency making the additional payment''.

Subsec. (a)(1)(B). Pub. L. 100–17, § 406(4), added subpar. (B) and struck out former subpar. (B) which read as follows: ''The amount, if any, which will compensate such displaced person for any increased interest costs which such person is required to pay for financing the acquisition of any such comparable replacement dwelling. Such amount shall be paid only if the dwelling acquired by the Federal agency was encumbered by a bona fide mortgage which was a valid lien on such dwelling for not less than one hundred and eighty days prior to the initiation of negotiations for the acquisition of such dwelling. Such amount shall be equal to the excess in the aggregate interest and other debt service costs of that amount of the principal of the mortgage on the replacement dwelling which is equal to the unpaid balance of the mortgage on the acquired dwelling, over the remainder term of the mortgage on the acquired dwelling, reduced to discounted present value. The discount rate shall be the prevailing interest rate paid on savings deposits by commercial banks in the general area in which the replacement dwelling is located.''

Subsec. (a)(2). Pub. L. 100–17, § 406(5), added par. (2) and struck out former par. (2) which read as follows: ''The additional payment authorized by this subsection shall be made only to such a displaced person who purchases and occupies a replacement dwelling which is decent, safe, and sanitary not later than the end of the one year period beginning on the date on which he receives from the Federal agency final payment of all costs of the acquired dwelling, or on the date on which he moves from the acquired dwelling, whichever is the later date.''

EFFECTIVE DATE OF 1987 AMENDMENT

Amendment by Pub. L. 100–17 effective on effective date provided in regulations promulgated under section 4633 of this title (as amended by section 412 of Pub. L. 100–17), but not later than 2 years after Apr. 2, 1987, see section 418 of Pub. L. 100–17, set out as a note under section 4601 of this title.

§ 4624. Replacement housing for tenants and certain others

(a) In addition to amounts otherwise authorized by this subchapter, the head of a displacing agency shall make a payment to or for any displaced person displaced from any dwelling not eligible to receive a payment under section 4623 of this title which dwelling was actually and lawfully occupied by such displaced person for not less than 90 days immediately prior to (1) the initiation of negotiations for acquisition of such dwelling, or (2) in any case in which displacement is not a direct result of acquisition, such other event as the head of the lead agency shall prescribe. Such payment shall consist of the amount necessary to enable such person to lease or rent for a period not to exceed 42 months, a comparable replacement dwelling, but not to exceed $5,250. At the discretion of the head of the displacing agency, a payment under this subsection may be made in periodic installments. Computation of a payment under this subsection to a low-income displaced person for a comparable replacement dwelling shall take into account such person's income.

(b) Any person eligible for a payment under subsection (a) of this section may elect to apply such payment to a down payment on, and other incidental expenses pursuant to, the purchase of a decent, safe, and sanitary replacement dwelling. Any such person may, at the discretion of the head of the displacing agency, be eligible under this subsection for the maximum payment allowed under subsection (a) of this section, except that, in the case of a displaced homeowner who has owned and occupied the displacement dwelling for at least 90 days but not more than 180 days immediately prior to the initiation of

§ 4625. Relocation planning, assistance coordination, and advisory services

(a) Planning of programs or projects undertaken by Federal agencies or with Federal financial assistance

Programs or projects undertaken by a Federal agency or with Federal financial assistance shall be planned in a manner that (1) recognizes, at an early stage in the planning of such programs or projects and before the commencement of any actions which will cause displacements, the problems associated with the displacement of individuals, families, businesses, and farm operations, and (2) provides for the resolution of such problems in order to minimize adverse impacts on displaced persons and to expedite program or project advancement and completion.

(b) Availability of advisory services

The head of any displacing agency shall ensure that the relocation assistance advisory services described in subsection (c) of this section are made available to all persons displaced by such agency. If such agency head determines that any person occupying property immediately adjacent to the property where the displacing activity occurs is caused substantial economic injury as a result thereof, the agency head may make available to such person such advisory services.

(c) Measures, facilities, or services; description

Each relocation assistance advisory program required by subsection (b) of this section shall include such measures, facilities, or services as may be necessary or appropriate in order to—

(1) determine, and make timely recommendations on, the needs and preferences, if any, of displaced persons for relocation assistance;

(2) provide current and continuing information on the availability, sales prices, and rental charges of comparable replacement dwellings for displaced homeowners and tenants and suitable locations for businesses and farm operations;

(3) assure that a person shall not be required to move from a dwelling unless the person has had a reasonable opportunity to relocate to a comparable replacement dwelling, except in the case of—

(A) a major disaster as defined in section 5122(2) of this title;

(5) supply (A) information concerning other Federal and State programs which may be of assistance to displaced persons, and (B) technical assistance to such persons in applying for assistance under such programs; and

(6) provide other advisory services to displaced persons in order to minimize hardships to such persons in adjusting to relocation.

(d) Coordination of relocation activities with other Federal, State, or local governmental actions

The head of a displacing agency shall coordinate the relocation activities performed by such agency with other Federal, State, or local governmental actions in the community which could affect the efficient and effective delivery of relocation assistance and related services.

(e) Selection of implementation procedures

Whenever two or more Federal agencies provide financial assistance to a displacing agency other than a Federal agency, to implement functionally or geographically related activities which will result in the displacement of a person, the heads of such Federal agencies may agree that the procedures of one of such agencies shall be utilized to implement this subchapter with respect to such activities. If such agreement cannot be reached, then the head of the lead agency shall designate one of such agencies as the agency whose procedures shall be utilized to implement this subchapter with respect to such activities. Such related activities shall constitute a single program or project for purposes of this chapter.

(f) Tenants occupying property acquired for programs or projects; eligibility for advisory services

Notwithstanding section 4601(1) of this title, in any case in which a displacing agency acquires property for a program or project, any person who occupies such property on a rental basis for a short term or a period subject to termination when the property is needed for the program or project shall be eligible for advisory services to the extent determined by the displacing agency.

(a) If a program or project undertaken by a Federal agency or with Federal financial assistance cannot proceed on a timely basis because comparable replacement dwellings are not available, and the head of the displacing agency determines that such dwellings cannot otherwise be made available, the head of the displacing agency may take such action as is necessary or appropriate to provide such dwellings by use of funds authorized for such project. The head of the displacing agency may use this section to exceed the maximum amounts which may be paid under sections 4623 and 4624 of this title on a case-by-case basis for good cause as determined in accordance with such regulations as the head of the lead agency shall issue.

SUBCHAPTER III—UNIFORM REAL PROPERTY ACQUISITION POLICY

SUBCHAPTER REFERRED TO IN OTHER SECTIONS

This subchapter is referred to in section 4631 of this title.

§ 4651. Uniform policy on real property acquisition practices

In order to encourage and expedite the acquisition of real property by agreements with owners, to avoid litigation and relieve congestion in the courts, to assure consistent treatment for owners in the many Federal programs, and to promote public confidence in Federal land acquisition practices, heads of Federal agencies shall, to the greatest extent practicable, be guided by the following policies:

(1) The head of a Federal agency shall make every reasonable effort to acquire expeditiously real property by negotiation.

(2) Real property shall be appraised before the initiation of negotiations, and the owner or his

designated representative shall be given an opportunity to accompany the appraiser during his inspection of the property, except that the head of the lead agency may prescribe a procedure to waive the appraisal in cases involving the acquisition by sale or donation of property with a low fair market value.

(3) Before the initiation of negotiations for real property, the head of the Federal agency concerned shall establish an amount which he believes to be just compensation therefor and shall make a prompt offer to acquire the property for the full amount so established. In no event shall such amount be less than the agency's approved appraisal of the fair market value of such property. Any decrease or increase in the fair market value of real property prior to the date of valuation caused by the public improvement for which such property is acquired, or by the likelihood that the property would be acquired for such improvement, other than that due to physical deterioration within the reasonable control of the owner, will be disregarded in determining the compensation for the property. The head of the Federal agency concerned shall provide the owner of real property to be acquired with a written statement of, and summary of the basis for, the amount he established as just compensation. Where appropriate the just compensation for the real property acquired and for damages to remaining real property shall be separately stated.

(4) No owner shall be required to surrender possession of real property before the head of the Federal agency concerned pays the agreed purchase price, or deposits with the court in accordance with section 3114(a) to (d) of title 40, for the benefit of the owner, an amount not less than the agency's approved appraisal of the fair market value of such property, or the amount of the award of compensation in the condemnation proceeding for such property.

(5) The construction or development of a public improvement shall be so scheduled that, to the greatest extent practicable, no person lawfully occupying real property shall be required to move from a dwelling (assuming a replacement dwelling as required by subchapter II of this chapter will be available), or to move his business or farm operation, without at least ninety days' written notice from the head of the Federal agency concerned, of the date by which such move is required.

(6) If the head of a Federal agency permits an owner or tenant to occupy the real property acquired on a rental basis for a short term or for a period subject to termination by the Government on short notice, the amount of rent required shall not exceed the fair rental value of the property to a short-term occupier.

(7) In no event shall the head of a Federal agency either advance the time of condemnation, or defer negotiations or condemnation and the deposit of funds in court for the use of the owner, or take any other action coercive in nature, in order to compel an agreement on the price to be paid for the property.

(8) If any interest in real property is to be acquired by exercise of the power of eminent domain, the head of the Federal agency concerned shall institute formal condemnation proceedings. No Federal agency head shall intentionally make it necessary for an owner to institute legal proceedings to prove the fact of the taking of his real property.

(9) If the acquisition of only a portion of a property would leave the owner with an uneconomic remnant, the head of the Federal agency concerned shall offer to acquire that remnant. For the purposes of this chapter, an uneconomic remnant is a parcel of real property in which the owner is left with an interest after the partial acquisition of the owner's property and which the head of the Federal agency concerned has determined has little or no value or utility to the owner.

(10) A person whose real property is being acquired in accordance with this subchapter may, after the person has been fully informed of his right to receive just compensation for such property, donate such property, and part thereof, any interest therein, or any compensation paid therefor to a Federal agency, as such person shall determine.

§ 4701. Congressional findings and declaration of policy

The Congress hereby finds and declares—

That effective State and local governmental institutions are essential in the maintenance and development of the Federal system in an increasingly complex and interdependent society.

That, since numerous governmental activities administered by the State and local governments are related to national purpose and are financed in part by Federal funds, a national interest exists in a high caliber of public service in State and local governments.

That the quality of public service at all levels of government can be improved by the development of systems of personnel administration consistent with such merit principles as—

(1) recruiting, selecting, and advancing employees on the basis of their relative ability, knowledge, and skills, including open consideration of qualified applicants for initial appointment;

(2) providing equitable and adequate compensation;

(3) training employees, as needed, to assure high-quality performance;

(4) retaining employees on the basis of the adequacy of their performance, correcting inadequate performance, and separating employees whose inadequate performance cannot be corrected;

(5) assuring fair treatment of applicants and employees in all aspects of personnel administration without regard to political affiliation, race, color, national origin, sex, or religious creed and with proper regard for their privacy and constitutional rights as citizens; and

(6) assuring that employees are protected against coercion for partisan political purposes and are prohibited from using their official authority for the purpose of interfering with or affecting the result of an election or a nomination for office.

That Federal financial and technical assistance to State and local governments for strengthening their personnel administration in a manner consistent with these principles is in the national interest.

§ 4723. Local government programs and grants

(a) Population served; amount of grants; executive certification; State grant, conditions

The Office is authorized to make grants to a general local government, or a combination of general local governments, that serve a population of fifty thousand or more, for up to 75 per centum (or, with respect to fiscal years commencing after the expiration of three years following the effective date of the grant provisions of this chapter, for up to 50 per centum) of the costs of developing and carrying out programs or projects, on the certification of the mayor(s), or chief executive officer(s), of the general local government or combination of local governments that the programs or projects are consistent with the applicable principles set forth in clauses (1)–(6) of the third paragraph of section 4701 of this title, to strengthen the personnel administration of such governments. Such a grant may not be made—

(1) if, at the time of submission of an application, the State concerned has an approved plan which, with the agreement of the particular local government concerned, provides for strengthening one or more aspects of personnel administration in that local government, unless the local government concerned has problems which are not met by the previously approved plan and for which, with the agreement of the State government concerned with respect to those aspects of personnel administration covered in the approved plan, it is submitting an application; or

(2) after the State concerned has a statewide plan which has been developed by an appropriate State agency designated or established pursuant to State law which provides such agency with adequate authority, administrative organization, and staffing to develop and administer such a statewide plan, and to provide technical assistance and other appropriate support in carrying out the local components of the plan, and which provides procedures insuring adequate involvement of officials of affected local governments in the development and administration of such a statewide plan, unless the local government concerned has special, unique, or urgent problems which are not met by the approved statewide plan and for which it submits an application for funds to be distributed under section 4766(a) of this title.

Upon the request of a Governor or chief executive authority, a grant to a general local government or combination of such governments in that State may not be made during a period not to exceed ninety days commencing with the date provided in section 4772 of this title, or the date on which official regulations for this chapter are promulgated, whichever date is later: *Provided*, That the request of the Governor or chief executive authority indicates that he is developing a plan under (1) above, or during a period not to exceed one hundred and eighty days commencing with the date provided in section 4772 of this title, or the date on which official regulations for this chapter are promulgated, whichever date is later, provided the request of the Governor or chief executive authority indicates that he is developing a statewide plan under (2) above.

Such a grant may cover the costs of developing the program or project covered by the application. The Office may make grants to general local governments, or combinations of such governments, that serve a population of less than fifty thousand, if it finds that such grants will help meet essential needs in programs or projects of national interest and will assist general local governments experiencing special problems in personnel administration related to such programs or projects.

(c) Gubernatorial review of application; disapproval explanation

An application to be submitted to the Office under subsection (b) of this section shall first be submitted by the general local government or combination of such governments to the Governor for review, comments, and recommendations. The Governor may refer the application to the State office designated under section 4722(b)(1) of this title for review. Comments and recommendations (if any) made as a result of the review, and a statement by the general local government or combination of such governments that it has considered the comments and recommendations of the Governor shall accompany the application to the Office. The application need not be accompanied by the comments and recommendations of the Governor if the general local government or combination of such governments certifies to the Office that the application has been before the Governor for review and comment for a period of sixty days without comment by the Governor. An explanation in writing shall be sent to the Governor of a State by the Office whenever the Office does not concur with recommendations of the Governor in approving any local government applications.

§ 4743. Grants to State and local governments for training

(a) Amount of grants; executive certification; use restrictions; uses for non-Federal share; personnel training and education programs: innovation and diversity in development and execution

If in its judgment training is not adequately provided for under grant-in-aid or other statutes, the Office is authorized to make grants to State and general local governments for up to 75 per centum (or, with respect to fiscal years commencing after the expiration of three years following the effective date of the grant provisions of this chapter, for up to 50 per centum) of the costs of developing and carrying out programs, on the certification of the Governor of that State, or the mayor or chief executive officer of the general local government, that the programs are consistent with the applicable principles set forth in clauses (1)–(6) of the third paragraph of section 4701 of this title, to train and educate their professional, administrative, and technical employees and officials. Such grants may not be used to cover costs of full-time graduate-level study, provided for in section 4745 of this title, or the costs of the construction or acquisition of training facilities. The State and local government share of the cost of developing and carrying out training and education plans and programs may include, but shall not consist solely of, the reasonable value of facilities and of supervisory and other personal services made available by such governments. The authority provided by this section shall be employed in such a manner as to encourage innovation and allow for diversity on the part of State and local governments in developing and carrying out training and education programs for their personnel.

(b) Application; time of making; information; terms and conditions; waiver; development costs

An application for a grant from a State or general local government shall be made at such time or times, and shall contain such information, as the Office may prescribe. The Office may make a grant under subsection (a) of this section, only if the application therefor meets requirements established by this subsection unless any requirement is specifically waived by the Office. Such grant to a State, or to a general local government under subsection (c) of this

section, may cover the costs of developing the program covered by the application. The program covered by the application shall—

(1) provide for designation, by the Governor or chief executive authority, of the State office that will have primary authority and responsibility for the development and administration of the program at the State level;

(2) provide, to the extent feasible, for coordination with relevant training available under or supported by other Federal Government programs or grants;

(3) provide for training needs of the State government and of local governments in that State;

(4) provide, to the extent feasible, for intergovernmental cooperation in employee training matters, especially within metropolitan or regional areas; and

(5) provide assurance that the making of a Federal Government grant will not result in a reduction in relevant State or local government expenditures or the substitution of Federal funds for State or local funds previously made available for these purposes.

(c) Population served; amount of grants; executive certification; State grant, conditions; terms and conditions; waiver

A grant authorized by subsection (a) of this section may be made to a general local government, or a combination of such governments, that serve a population of fifty thousand or more, for up to 75 per centum (or, with respect to fiscal years commencing after the expiration of three years following the effective date of the grant provisions of this chapter, for up to 50 per centum) of the costs of developing and carrying out programs or projects, on the certification of the mayor(s), or chief executive officer(s), of the general local government or combination of local governments that the programs or projects are consistent with the applicable principles set forth in clauses (1)–(6) of the third paragraph of section 4701 of this title to train and educate their professional, administrative, and technical employees and officials. Such a grant may not be made—

(1) if, at the time of submission of an application, the State concerned has an approved plan which, with the agreement of the particular local government concerned, provides for strengthening one or more aspects of training in that local government, unless the local government concerned has problems which are not met by the previously approved plan and for which, with the agreement of the State government concerned with respect to those aspects of training covered in the approved plan, it is submitting an application; or

(2) after the State concerned has a statewide plan which has been developed by an appropriate State agency designated or established pursuant to State law which provides such agency with adequate authority, administrative organization, and staffing to develop and administer such a statewide plan, and to provide technical assistance and other appropriate support in carrying out the local components of the plan, and which provides procedures insuring adequate involvement of officials of affected local governments in the development and administration of such a statewide plan, unless the local government concerned has special, unique, or urgent problems which are not met by the approved statewide plan and for which it submits an application for funds to be distributed under section 4766(a) of this title.

Upon the request of a Governor or chief executive authority, a grant to a general local government or combination of such governments in that State may not be made during a period not to exceed ninety days commencing with the date provided in section 4772 of this title, or the date on which official regulations for this chapter are promulgated, whichever date is later: *Provided*, That the request of the Governor or chief executive authority indicates that he is developing a plan under (1) above, or during a period not to exceed one hundred and eighty days commencing with the date provided in section 4772 of this title, or the date on which official regulations for this chapter are promulgated, whichever date is later, provided the request of the Governor or chief executive authority indicates that he is developing a statewide plan under (2) above. To be approved, an application for a grant under this subsection must meet requirements similar to those established in subsection (b) of this section for State applications, unless any such requirement is specifically waived by the Office, and the requirements of subsection (d) of this section. The Office may make grants to general local governments, or combinations of such governments that serve a population of less than fifty thousand if it finds that such grants will help meet essential needs in programs or projects of national interest and will assist general local governments experiencing special needs for personnel training and education related to such programs or projects.

(d) Gubernatorial review of application; disapproval explanation

An application to be submitted to the Office under subsection (c) of this section shall first be submitted by the general local government or combination of such governments to the Governor for review, comments, and recommendations. The Governor may refer the application to the State office designated under subsection (b)(1) of this section for review. Comments and recommendations (if any) made as a result of the review and a statement by the general local government or combination of such governments that it has considered the comments and recommendations of the Governor shall accompany the application to the Office. The application need not be accompanied by the comments and recommendations of the Governor if the general local government or combination of such governments certifies to the Office that the application has been before the Governor for review and comment for a period of sixty days without comment by the Governor. An explanation in writing shall be sent to the Governor of a State by the Office whenever the Office does not concur with recommendations of the Governor in approving any local government applications.

§ 4821. Development of program; consultation; nature of program; safe level of lead; report to Congress

(a) The Secretary of Housing and Urban Development, in consultation with the Secretary of Health and Human Services, shall develop and carry out a demonstration and research program to determine the nature and extent of the problem of lead based paint poisoning in the United States, particularly in urban areas, including the methods by which the lead based paint hazard can most effectively be removed from interior surfaces, porches, and exterior surfaces of residential housing to which children may be exposed.

(b) The Chairman of the Consumer Product Safety Commission shall conduct appropriate research on multiple layers of dried paint film, containing the various lead compounds commonly used, in order to ascertain the safe level of lead in residential paint products. No later than December 31, 1974, the Chairman shall submit to Congress a full and complete report of his findings and recommendations as developed pursuant to such programs, together with a statement of any legislation which should be enacted or any changes in existing law which should be made in order to carry out such recommendations.

CHANGE OF NAME

''Secretary of Health and Human Services'' substituted for ''Secretary of Health, Education, and Welfare'' in subsec. (a) pursuant to section 509(b) of Pub. L. 96–88, which is classified to section 3508(b) of Title 20, Education.

§ 4822. Requirements for housing receiving Federal assistance

(a) General requirements

(1) Elimination of hazards

The Secretary of Housing and Urban Development (hereafter in this section referred to as the ''Secretary'') shall establish procedures to eliminate as far as practicable the hazards of lead based paint poisoning with respect to any existing housing which may present such hazards and which is covered by an application for mortgage insurance or housing assistance payments under a program administered by the Secretary or otherwise receives more than $5,000 in project-based assistance under a Federal housing program. Beginning on January 1, 1995, such procedures shall apply to all such housing that constitutes target housing, as defined in section 4851b of this title, and shall provide for appropriate measures to conduct risk assessments, inspections, interim controls, and abatement of lead-based paint hazards. At a minimum, such procedures shall require—

(A) the provision of lead hazard information pamphlets, developed pursuant to section 2686 of title 15, to purchasers and tenants;

(B) periodic risk assessments and interim controls in accordance with a schedule determined by the Secretary, the initial risk assessment of each unit constructed prior to 1960 to be conducted not later than January 1, 1996, and, for units constructed between 1960 and 1978—

(i) not less than 25 percent shall be performed by January 1, 1998;

(ii) not less than 50 percent shall be performed by January 1, 2000; and

(iii) the remainder shall be performed by January 1, 2002;

(C) inspection for the presence of lead-based paint prior to federally-funded renovation or rehabilitation that is likely to disturb painted surfaces;

(D) reduction of lead-based paint hazards in the course of rehabilitation projects receiving less than $25,000 per unit in Federal funds;

(E) abatement of lead-based paint hazards in the course of substantial rehabilitation projects receiving more than $25,000 per unit in Federal funds;

(F) where risk assessment, inspection, or reduction activities have been undertaken, the provision of notice to occupants describing the nature and scope of such activities and the actual risk assessment or inspection reports (including available information on the location of any remaining lead-based paint on a surface-by-surface basis); and

(G) such other measures as the Secretary deems appropriate.

(2) Additional measures

The Secretary may establish such other procedures as may be appropriate to carry out the purposes of this section.

(3) Disposition of federally owned housing

(A) Pre-1960 target housing

Beginning on January 1, 1995, procedures established under paragraphs (1) and (2) shall require the inspection and abatement of lead-based paint hazards in all federally owned target housing constructed prior to 1960.

(B) Target housing constructed between 1960 and 1978

Beginning on January 1, 1995, procedures established under paragraphs (1) and (2) shall require an inspection for lead-based paint and lead-based paint hazards in all federally owned target housing constructed between 1960 and 1978. The results of such inspections shall be made available to prospective purchasers, identifying the presence of lead-based paint and lead-based paint hazards on a surface-by-surface basis. The Secretary shall have the discretion to waive the requirement of this subparagraph for housing in which a federally funded risk assessment, performed by a certified contractor, has determined no lead-based paint hazards are present.

(C) Budget authority

To the extent that subparagraphs (A) and (B) increase the cost to the Government of outstanding direct loan obligations or loan guarantee commitments, such activities shall be treated as modifications under section 661c(e) of title 2 and shall be subject to the availability of appropriations. To the extent that paragraphs (A) and (B) impose additional costs to the Resolution Trust Corporation and the Federal Deposit Insurance Corporation, its requirements shall be carried out only if appropriations are provided in advance in an appropriations Act. In the absence of appropriations sufficient to cover the costs of subparagraphs (A) and (B), these requirements shall not apply to the affected agency or agencies.

(D) Definitions

For the purposes of this subsection, the terms ''inspection'', ''abatement'', ''lead-based paint hazard'', ''federally owned housing'', ''target housing'', ''risk assessment'', and ''certified contractor'' have the same meaning given such terms in section 4851b of this title.

(4) Definitions

For purposes of this subsection, the terms ''risk assessment'', ''inspection'', ''interim control'', ''abatement'', ''reduction'', and ''lead-based paint hazard'' have the same meaning given such terms in section 4851b of this title.

(b) Measurement criteria

The procedures established by the Secretary under this section for the risk assessment, interim control, inspection, and abatement of lead-based paint hazards in housing covered by this section shall be based upon guidelines developed pursuant to section 4852c of this title.

(c) Inspection requirements

The Secretary shall require the inspection of all intact and nonintact interior and exterior painted surfaces of housing subject to this section for lead-based paint using an approved x-ray fluorescence analyzer, atomic absorption spectroscopy, or comparable approved sampling or testing technique. A certified inspector or laboratory shall certify in writing the precise results of the inspection. If the results equal or exceed a level of 1.0 milligrams per centimeter squared or 0.5 percent by weight, the results shall be provided to any potential purchaser or tenant of the housing. The Secretary shall periodically review and reduce the level below 1.0 milligram per centimeter squared or 0.5 percent by weight to the extent that reliable technology makes feasible the detection of a lower level and medical evidence supports the imposition of a lower level. The requirements of this subsection shall apply as provided in subsection (d) of this section.

(d) Abatement required

(1) Transitional testing and abatement in public housing receiving modernization assistance

In the case of public housing assisted with capital assistance provided under section 1437g of this title, the Secretary shall require the inspection described in subsection (c) of this section for—

(A) a random sample of dwellings and common areas in all public housing projects assisted under such section; and

(B) each dwelling in any public housing project in which there is a dwelling determined under subparagraph (A) to have lead-based paint hazards, except that the Secretary shall not require the inspection of each dwelling if the Secretary requires the abatement of the lead-based paint hazards for the surfaces of each dwelling in the public housing project that correspond to the surfaces in the sample determined to have such hazards under subparagraph (A).

The Secretary shall require the inspection of all housing subject to this paragraph in accordance with the modernization schedule. A public housing agency may elect to test for lead-based paint using atomic absorption spectroscopy and may elect to abate lead-based paint and dust containing lead under standards more stringent than that in subsection (c) of this section, including the abatement of lead-based paint and dust which exceeds the standard of lead permitted in paints by the Consumer Product Safety Commission under this chapter, and such abatement shall qualify for capital assistance provided under section 1437g of this title. The Secretary shall require abatement of lead-based paint and lead-based paint hazards in housing in which the test results equal or exceed the standard established by or under subsection (c) of this section. Final inspection and certification after abatement shall be made by a qualified inspector, industrial hygienist, or local public health official.

(2) Abatement demonstration program

(A) Abatement demonstration program

In carrying out the requirements of this subsection with respect to single-family and multifamily properties owned by the Department of Housing and Urban Development and public housing, the Secretary shall utilize a sufficient variety of abatement methods in a sufficient number of areas and circumstances to demonstrate their relative cost-effectiveness and their applicability to various types of housing. For purposes of the demonstration, a public housing agency may elect to test for lead-based paint using atomic absorption spectroscopy and may elect to abate lead-based paint and dust containing lead under standards more stringent than that in subsection (c) of this section, including the abatement of lead-based paint and dust which exceeds the standard of lead permitted in paints by the Consumer Product Safety Commission under this chapter, and such abatement shall qualify for assistance under section 1437*l*[1] of this title.

(B) Report

Not later than 18 months after the effective date of the regulations issued to carry out this subsection, the Secretary shall transmit to the Congress the findings and recommendations of the Secretary as a result of the demonstration program, including any recommendations of the Secretary for legislation to revise the requirements of this subsection. Based on the demonstration, the Secretary shall prepare and include in the report a comprehensive and workable plan for the cost-effective inspection and abatement of public housing in accordance with paragraph (3), including an estimate of the total cost of abatement in accordance with paragraph (3)(B). In preparing such report, the Secretary shall examine—

(i) the most reliable technology available for detecting lead-based paint, including X-ray fluorescence and atomic absorption spectroscopy;

(ii) the most efficient and cost-effective methods for abatement, including removal, containment, or encapsulation of the contaminated components, procedures which minimize the generation of dust (including the high efficiency vacuum removal of leaded dust), and procedures that provide for offsite disposal of the removed components, in compliance with all applicable regulatory standards and procedures;

(iii) safety considerations in testing, abatement, and worker protection;

(iv) the overall accuracy and reliability of laboratory testing of physical samples, x-ray fluorescence machines, and other available testing procedures;

(v) availability of qualified samplers and testers;

(vi) an estimate of the amount, characteristics, and regional distribution of housing in the United States that contains lead-based paint hazards at differing levels of contamination; and

(vii) the merits of an interim containment protocol for public housing dwellings that are determined to have lead-based paint hazards but for which comprehensive improvement assistance under section 1437*l*[1] of this title is not available.

(3) Testing and abatement of other public housing

(A) Required inspection

The Secretary shall require the inspection described in subsection (c) of this section for—

(i) a random sample of dwellings and common areas in all public housing that is not subject to paragraph (1); and

(ii) each dwelling in any public housing project in which there is a dwelling determined under clause (i) to have lead-based paint hazards, except that the Secretary shall not require the inspection of each dwelling if the Secretary requires the abatement of the lead-based paint hazards for the surfaces of each dwelling in the public housing project that correspond to the surfaces in the sample determined to have such hazards under clause (i).

(B) Schedule

The Secretary shall require the inspection of all housing subject to this paragraph prior to the expiration of 5 years after the report is required to be transmitted under paragraph (2)(B). The Secretary may prioritize, within such 5-year period, inspections on the basis of vacancy, age of housing, or projected modernization or rehabilitation. The Secretary shall require abatement and final inspection and certification of such housing in accordance with the last two sentences of paragraph (1).

(4) Report required

Not later than 9 months after completion of the demonstration required by paragraph (2), the Secretary shall, based on the demonstration, prepare and transmit to the Congress, a comprehensive and workable plan, including any recommendations for changes in legislation, for the prompt and cost effective inspection and abatement of privately owned single family and multifamily housing, including housing assisted under section 1437f of this title. After the expiration of the 9-month period referred to in the preceding sentence, the Secretary may not obligate or expend any funds or otherwise carry out activities related to any other policy development and research project until the report is transmitted.

(e) Exceptions

The provisions of this section shall not apply to—

(1) housing for the elderly or handicapped, except for any dwelling in such housing in which any child who is less than 7 years of age resides or is expected to reside;

(2) any project for which an application for insurance is submitted under section 1715v, 1715w, 1715z–6, or 1715z–7 of title 12; or

(3) any 0-bedroom dwelling.

(f) Funding

The Secretary shall carry out the provisions of this section utilizing available Federal funding

[1] See References in Text note below.

sources. The Secretary shall use funds available under the Capital Fund under section 1437g of this title to carry out this section in public housing. The Secretary shall submit annually to the Congress an estimate of the funds required to carry out the provisions of this section with the reports required by paragraphs (2)(B) and (4).

(g) Interpretation of section

This section may not be construed to affect the responsibilities of the Environmental Protection Agency with respect to the protection of the public health from hazards posed by lead-based paint.

CHAPTER 63A—RESIDENTIAL LEAD-BASED PAINT HAZARD REDUCTION

CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in title 15 section 2683.

§ 4851. Findings

The Congress finds that—

(1) low-level lead poisoning is widespread among American children, afflicting as many as 3,000,000 children under age 6, with minority and low-income communities disproportionately affected;

(2) at low levels, lead poisoning in children causes intelligence quotient deficiencies, reading and learning disabilities, impaired hearing, reduced attention span, hyperactivity, and behavior problems;

(3) pre-1980 American housing stock contains more than 3,000,000 tons of lead in the form of lead-based paint, with the vast majority of homes built before 1950 containing substantial amounts of lead-based paint;

(4) the ingestion of household dust containing lead from deteriorating or abraded lead-based paint is the most common cause of lead poisoning in children;

(5) the health and development of children living in as many as 3,800,000 American homes is endangered by chipping or peeling lead paint, or excessive amounts of lead-contaminated dust in their homes;

(6) the danger posed by lead-based paint hazards can be reduced by abating lead-based paint or by taking interim measures to prevent paint deterioration and limit children's exposure to lead dust and chips;

(7) despite the enactment of laws in the early 1970's requiring the Federal Government to eliminate as far as practicable lead-based paint hazards in federally owned, assisted, and insured housing, the Federal response to this national crisis remains severely limited; and

(8) the Federal Government must take a leadership role in building the infrastructure—including an informed public, State and local delivery systems, certified inspectors, contractors, and laboratories, trained workers, and available financing and insurance—necessary to ensure that the national goal of eliminating lead-based paint hazards in housing can be achieved as expeditiously as possible.

(Pub. L. 102–550, title X, § 1002, Oct. 28, 1992, 106 Stat. 3897.)

SHORT TITLE

L. 102–550 provided that: ''This title [enacting this chapter and sections 2681 to 2692 of Title 15, Commerce and Trade, amending sections 1437f, 1437aaa–1, 1437aaa–2, 1471, 4822, 5305, 12705, 12742, 12872, 12873, 12892, and 12893 of this title, sections 1703, 1709, and 1715*l* of Title 12, Banks and Banking, sections 2606, 2610, 2612, 2615, 2616, 2618, and 2619 of Title 15, and section 671 of Title 29, Labor, and enacting provisions set out as a note under section 2601 of Title 15] may be cited as the 'Residential Lead-Based Paint Hazard Reduction Act of 1992'.''

§ 4851a. Purposes

The purposes of this chapter are—

(1) to develop a national strategy to build the infrastructure necessary to eliminate lead-based paint hazards in all housing as expeditiously as possible;

(2) to reorient the national approach to the presence of lead-based paint in housing to implement, on a priority basis, a broad program to evaluate and reduce lead-based paint hazards in the Nation's housing stock;

(3) to encourage effective action to prevent childhood lead poisoning by establishing a workable framework for lead-based paint hazard evaluation and reduction and by ending the current confusion over reasonable standards of care;

(4) to ensure that the existence of lead-based paint hazards is taken into account in the development of Government housing policies and in the sale, rental, and renovation of homes and apartments;

(5) to mobilize national resources expeditiously, through a partnership among all levels of government and the private sector, to develop the most promising, cost-effective methods for evaluating and reducing lead-based paint hazards;

(6) to reduce the threat of childhood lead poisoning in housing owned, assisted, or transferred by the Federal Government; and

(7) to educate the public concerning the hazards and sources of lead-based paint poisoning and steps to reduce and eliminate such hazards.

(1) Lead-based paint hazards

Not later than 2 years after October 28, 1992, the Secretary and the Administrator of the Environmental Protection Agency shall promulgate regulations under this section for the disclosure of lead-based paint hazards in target housing which is offered for sale or lease. The regulations shall require that, before the purchaser or lessee is obligated under any contract to purchase or lease the housing, the seller or lessor shall—

(A) provide the purchaser or lessee with a lead hazard information pamphlet, as prescribed by the Administrator of the Environmental Protection Agency under section 406 of the Toxic Substances Control Act [15 U.S.C. 2686];

(B) disclose to the purchaser or lessee the presence of any known lead-based paint, or any known lead-based paint hazards, in such housing and provide to the purchaser or lessee any lead hazard evaluation report available to the seller or lessor; and

(C) permit the purchaser a 10-day period (unless the parties mutually agree upon a different period of time) to conduct a risk assessment or inspection for the presence of lead-based paint hazards.

(2) Contract for purchase and sale

Regulations promulgated under this section shall provide that every contract for the purchase and sale of any interest in target housing shall contain a Lead Warning Statement and a statement signed by the purchaser that the purchaser has—

(A) read the Lead Warning Statement and understands its contents;

(B) received a lead hazard information pamphlet; and

(C) had a 10-day opportunity (unless the parties mutually agreed upon a different period of time) before becoming obligated under the contract to purchase the housing to conduct a risk assessment or inspection for the presence of lead-based paint hazards.

''Every purchaser of any interest in residential real property on which a residential dwelling was built prior to 1978 is notified that such property may present exposure to lead from lead-based paint that may place young children at risk of developing lead poisoning. Lead poisoning in young children may produce permanent neurological damage, including learning disabilities, reduced intelligence quotient, behavioral problems, and impaired memory. Lead poisoning also poses a particular risk to pregnant women. The seller of any interest in residential real property is required to provide the buyer with any information on lead-based paint hazards from risk assessments or inspections in the seller's possession and notify the buyer of any known lead-based paint hazards. A risk assessment or inspection for possible lead-based paint hazards is recommended prior to purchase.''.

CHAPTER 65—NOISE CONTROL

Sec.

CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in section 4365 of this title; title 15 section 2706; title 16 section 228g.

§ 4901. Congressional findings and statement of policy

(a) The Congress finds—

(1) that inadequately controlled noise presents a growing danger to the health and welfare of the Nation's population, particularly in urban areas;

(2) that the major sources of noise include transportation vehicles and equipment, machinery, appliances, and other products in commerce; and

(3) that, while primary responsibility for control of noise rests with State and local governments, Federal action is essential to deal with major noise sources in commerce control of which require national uniformity of treatment.

(b) The Congress declares that it is the policy of the United States to promote an environment for all Americans free from noise that jeopardizes their health or welfare. To that end, it is the purpose of this chapter to establish a means for effective coordination of Federal research and activities in noise control, to authorize the establishment of Federal noise emission standards for products distributed in commerce, and to provide information to the public respecting the noise emission and noise reduction characteristics of such products.

(Pub. L. 92–574, § 2, Oct. 27, 1972, 86 Stat. 1234.)

§ 4903. Federal programs

(a) Furtherance of Congressional policy

The Congress authorizes and directs that Federal agencies shall, to the fullest extent consistent with their authority under Federal laws administered by them, carry out the programs within their control in such a manner as to further the policy declared in section 4901(b) of this title.

(b) Presidential authority to exempt activities or facilities from compliance requirements

Each department, agency, or instrumentality of the executive, legislative, and judicial branches of the Federal Government—

(1) having jurisdiction over any property or facility, or

(2) engaged in any activity resulting, or which may result, in the emission of noise,

shall comply with Federal, State, interstate, and local requirements respecting control and abatement of environmental noise to the same extent that any person is subject to such requirements. The President may exempt any single activity or facility, including noise emission sources or classes thereof, of any department, agency, or instrumentality in the executive branch from compliance with any such requirement if he determines it to be in the paramount interest of the United States to do so; except that no exemption, other than for those products referred to in section 4902(3)(B) of this title, may be granted from the requirements of sections 4905, 4916, and 4917 of this title. No such exemption shall be granted due to lack of appropriation unless the President shall have specifically requested such appropriation as a part of the budgetary process and the Congress shall have failed to make available such requested appropriation. Any exemption shall be for a period not in excess of one year, but additional exemptions may be granted for periods of not to exceed one year upon the President's making a new determination. The President shall report each January to the Congress all exemptions from the requirements of this section granted during the preceding calendar year, together with his reason for granting such exemption.

(c) Coordination of programs of Federal agencies; standards and regulations; status reports

(1) The Administrator shall coordinate the programs of all Federal agencies relating to noise research and noise control. Each Federal agency shall, upon request, furnish to the Administrator such information as he may reasonably require to determine the nature, scope, and results of the noise-research and noise-control programs of the agency.

(2) Each Federal agency shall consult with the Administrator in prescribing standards or regulations respecting noise. If at any time the Administrator has reason to believe that a standard or regulation, or any proposed standard or regulation, of any Federal agency respecting noise does not protect the public health and welfare to the extent he believes to be required and feasible, he may request such agency to review and report to him on the advisability of revising such standard or regulation to provide such protection. Any such request may be published in the Federal Register and shall be accompanied by a detailed statement of the information on which it is based. Such agency shall complete the requested review and report to the Administrator within such time as the Administrator specifies in the request, but such time specified may not be less than ninety days from the date the request was made. The report shall be published in the Federal Register and shall be accompanied by a detailed statement of the findings and conclusions of the agency respecting the revision of its standard or regulation. With respect to the Federal Aviation Administration, section 44715 of title 49 shall apply in lieu of this paragraph.

(3) On the basis of regular consultation with appropriate Federal agencies, the Administrator shall compile and publish, from time to time, a report on the status and progress of Federal activities relating to noise research and noise control. This report shall describe the noise-control programs of each Federal agency and assess the contributions of those programs to the Federal Government's overall efforts to control noise.

(Pub. L. 92–574, § 4, Oct. 27, 1972, 86 Stat. 1235.)

CODIFICATION

In subsec. (c)(2), ''section 44715 of title 49'' substituted for ''section 611 of the Federal Aviation Act of 1958 (as amended by section 7 of this Act)'' on authority of Pub. L. 103–272, § 6(b), July 5, 1994, 108 Stat. 1378, the first section of which enacted subtitles II, III, and V to X of Title 49, Transportation.

TERMINATION OF REPORTING REQUIREMENTS

For termination, effective May 15, 2000, of provisions in subsec. (b) of this section relating to annual report to Congress, see section 3003 of Pub. L. 104–66, as amended, set out as a note under section 1113 of Title 31, Money and Finance, and item 7 on page 20 of House Document No. 103–7.

§ 4904. Identification of major noise sources

(a) Development and publication of criteria

(1) The Administrator shall, after consultation with appropriate Federal agencies and within nine months of October 27, 1972, develop and publish criteria with respect to noise. Such criteria

shall reflect the scientific knowledge most useful in indicating the kind and extent of all identifiable effects on the public health or welfare which may be expected from differing quantities and qualities of noise.

(2) The Administrator shall, after consultation with appropriate Federal agencies and within twelve months of October 27, 1972, publish information on the levels of environmental noise the attainment and maintenance of which in defined areas under various conditions are requisite to protect the public health and welfare with an adequate margin of safety.

(b) Compilation and publication of reports on noise sources and control technology

The Administrator shall, after consultation with appropriate Federal agencies, compile and publish a report or series of reports (1) identifying products (or classes of products) which in his judgment are major sources of noise, and (2) giving information on techniques for control of noise from such products, including available data on the technology, costs, and alternative methods of noise control. The first such report shall be published not later than eighteen months after October 27, 1972.

(c) Supplemental criteria and reports

The Administrator shall from time to time review and, as appropriate, revise or supplement any criteria or reports published under this section.

(d) Publication in Federal Register

Any report (or revision thereof) under subsection (b)(1) of this section identifying major noise sources shall be published in the Federal Register. The publication or revision under this section of any criteria or information on control techniques shall be announced in the Federal Register, and copies shall be made available to the general public.

(Pub. L. 92–574, § 5, Oct. 27, 1972, 86 Stat. 1236.)

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in section 4905 of this title.

§ 4905. Noise emission standards for products distributed in commerce

(a) Proposed regulations

(1) The Administrator shall publish proposed regulations, meeting the requirements of subsection (c) of this section, for each product—

(A) which is identified (or is part of a class identified) in any report published under section 4904(b)(1) of this title as a major source of noise,

(B) for which, in his judgment, noise emission standards are feasible, and

(C) which falls in one of the following categories:

(i) Construction equipment.

(ii) Transportation equipment (including recreational vehicles and related equipment).

(iii) Any motor or engine (including any equipment of which an engine or motor is an integral part).

(iv) Electrical or electronic equipment.

(2)(A) Initial proposed regulations under paragraph (1) shall be published not later than eighteen months after October 27, 1972, and shall apply to any product described in paragraph (1) which is identified (or is a part of a class identified) as a major source of noise in any report published under section 4904(b)(1) of this title on or before the date of publication of such initial proposed regulations.

(B) In the case of any product described in paragraph (1) which is identified (or is part of a class identified) as a major source of noise in a report published under section 4904(b)(1) of this title after publication of the initial proposed regulations under subparagraph (A) of this paragraph, regulations under paragraph (1) for such product shall be proposed and published by the Administrator not later than eighteen months after such report is published.

(3) After proposed regulations respecting a product have been published under paragraph (2), the Administrator shall, unless in his judgment noise emission standards are not feasible for such product, prescribe regulations, meeting the requirements of subsection (c) of this section, for such product—

(A) not earlier than six months after publication of such proposed regulations, and

(B) not later than—

(i) twenty-four months after October 27, 1972, in the case of a product subject to proposed regulations published under paragraph (2)(A), or

(ii) in the case of any other product, twenty-four months after the publication of the report under section 4904(b)(1) of this title identifying it (or a class of products of which it is a part) as a major source of noise.

(b) Authority to publish regulations not otherwise required

The Administrator may publish proposed regulations, meeting the requirements of subsection (c) of this section, for any product for which he is not required by subsection (a) of this section to prescribe regulations but for which, in his judgment, noise emission standards are feasible and are requisite to protect the public health and welfare. Not earlier than six months after the date of publication of such proposed regulations respecting such product, he may prescribe regulations, meeting the requirements of subsection (c) of this section, for such product.

(c) Contents of regulations; appropriate consideration of other standards; participation by interested persons; revision

(1) Any regulation prescribed under subsection (a) or (b) of this section (and any revision thereof) respecting a product shall include a noise emission standard which shall set limits on noise emissions from such product and shall be a standard which in the Administrator's judgment, based on criteria published under section 4904 of this title, is requisite to protect the public health and welfare, taking into account the magnitude and conditions of use of such product (alone or in combination with other noise sources), the degree of noise reduction achievable through the application of the best available technology, and the cost of compliance. In establishing such a standard for any product, the Administrator shall give appropriate consideration to standards under other laws designed

to safeguard the health and welfare of persons, including any standards under chapter 301 of title 49, the Clean Air Act [42 U.S.C. 7401 et seq.], and the Federal Water Pollution Control Act [33 U.S.C. 1251 et seq.]. Any such noise emission standards shall be a performance standard. In addition, any regulation under subsection (a) or (b) of this section (and any revision thereof) may contain testing procedures necessary to assure compliance with the emission standard in such regulation, and may contain provisions respecting instructions of the manufacturer for the maintenance, use, or repair of the product.

(2) After publication of any proposed regulations under this section, the Administrator shall allow interested persons an opportunity to participate in rulemaking in accordance with the first sentence of section 553(c) of title 5.

(3) The Administrator may revise any regulation prescribed by him under this section by (A) publication of proposed revised regulations, and (B) the promulgation, not earlier than six months after the date of such publication, of regulations making the revision; except that a revision which makes only technical or clerical corrections in a regulation under this section may be promulgated earlier than six months after such date if the Administrator finds that such earlier promulgation is in the public interest.

(d) Warranty by manufacturer of conformity of product with regulations; transfer of cost obligation from manufacturer to dealer prohibited

(1) On and after the effective date of any regulation prescribed under subsection (a) or (b) of this section, the manufacturer of each new product to which such regulation applies shall warrant to the ultimate purchaser and each subsequent purchaser that such product is designed, built, and equipped so as to conform at the time of sale with such regulation.

(2) Any cost obligation of any dealer incurred as a result of any requirement imposed by paragraph (1) of this subsection shall be borne by the manufacturer. The transfer of any such cost obligation from a manufacturer to any dealer through franchise or other agreement is prohibited.

(3) If a manufacturer includes in any advertisement a statement respecting the cost or value of noise emission control devices or systems, such manufacturer shall set forth in such statement the cost or value attributed to such devices or systems by the Secretary of Labor (through the Bureau of Labor Statistics). The Secretary of Labor, and his representatives, shall have the same access for this purpose to the books, documents, papers, and records of a manufacturer as the Comptroller General has to those of a recipient of assistance for purposes of section 311 of the Clean Air Act [42 U.S.C. 7611].

(e) State and local regulations

(1) No State or political subdivision thereof may adopt or enforce—

(A) with respect to any new product for which a regulation has been prescribed by the Administrator under this section, any law or regulation which sets a limit on noise emissions from such new product and which is not identical to such regulation of the Administrator; or

(B) with respect to any component incorporated into such new product by the manufacturer of such product, any law or regulation setting a limit on noise emissions from such component when so incorporated.

(2) Subject to sections 4916 and 4917 of this title, nothing in this section precludes or denies the right of any State or political subdivision thereof to establish and enforce controls on environmental noise (or one or more sources thereof) through the licensing, regulation, or restriction of the use, operation, or movement of any product or combination of products.

(f) Publication of notice of receipt of revision petitions and proposed revised regulations

At any time after the promulgation of regulations respecting a product under this section, a State or political subdivision thereof may petition the Administrator to revise such standard on the grounds that a more stringent standard under subsection (c) of this section is necessary to protect the public health and welfare. The Administration shall publish notice of receipt of such petition in the Federal Register and shall within ninety days of receipt of such petition respond by (1) publication of proposed revised regulations in accordance with subsection (c)(3) of this section, or (2) publication in the Federal Register of a decision not to publish such proposed revised regulations at that time, together with a detailed explanation for such decision.

(Pub. L. 92–574, §6, Oct. 27, 1972, 86 Stat. 1237; Pub. L. 95–609, §5, Nov. 8, 1978, 92 Stat. 3081.)

§ 4914. Development of low-noise-emission products

(a) Definitions

For the purpose of this section:

(1) The term ''Committee'' means the Low-Noise-Emission Product Advisory Committee.

(2) The term ''Federal Government'' includes the legislative, executive, and judicial branches of the Government of the United States, and the government of the District of Columbia.

(3) The term ''low-noise-emission product'' means any product which emits noise in amounts significantly below the levels specified in noise emission standards under regulations applicable under section 4905 of this title at the time of procurement to that type of product.

(4) The term ''retail price'' means (A) the maximum statutory price applicable to any type of product; or (B) in any case where there is no applicable maximum statutory price, the most recent procurement price paid for any type of product.

(b) Certification of products; Low-Noise-Emission Product Advisory Committee

(1) The Administrator shall determine which products qualify as low-noise-emission products in accordance with the provisions of this section.

(2) The Administrator shall certify any product—

(A) for which a certification application has been filed in accordance with paragraph (5)(A) of this subsection;

(B) which is a low-noise-emission product as determined by the Administrator; and

(C) which he determines is suitable for use as a substitute for a type of product at that time in use by agencies of the Federal Government.

(3) The Administrator may establish a Low-Noise-Emission Product Advisory Committee to assist him in determining which products qualify as low-noise-emission products for purposes of this section. The Committee shall include the Administrator or his designee, a representative of the National Institute of Standards and Technology, and representatives of such other Federal agencies and private individuals as the Administrator may deem necessary from time to time. Any member of the Committee not employed on a full-time basis by the United States may receive the daily equivalent of the annual rate of basic pay in effect for Grade GS–18 of the General Schedule for each day such member is engaged upon work of the Committee. Each member of the Committee shall be reimbursed for travel expenses, including per diem in lieu of subsistence as authorized by section 5703 of title 5 for persons in the Government service employed intermittently.

(4) Certification under this section shall be effective for a period of one year from the date of issuance.

(5)(A) Any person seeking to have a class or model of product certified under this section shall file a certification application in accordance with regulations prescribed by the Administrator.

(B) The Administrator shall publish in the Federal Register a notice of each application received.

(C) The Administrator shall make determinations for the purpose of this section in accord-

ance with procedures prescribed by him by regulation.

(D) The Administrator shall conduct whatever investigation is necessary, including actual inspection of the product at a place designated in regulations prescribed under subparagraph (A).

(E) The Administrator shall receive and evaluate written comments and documents from interested persons in support of, or in opposition to, certification of the class or model of product under consideration.

(F) Within ninety days after the receipt of a properly filed certification application the Administrator shall determine whether such product is a low-noise-emission product for purposes of this section. If the Administrator determines that such product is a low-noise-emission product, then within one hundred and eighty days of such determination the Administrator shall reach a decision as to whether such product is a suitable substitute for any class or classes of products presently being purchased by the Federal Government for use by its agencies.

(G) Immediately upon making any determination or decision under subparagraph (F), the Administrator shall publish in the Federal Register notice of such determination or decision, including reasons therefor.

(c) Federal procurement of low-noise-emission products

(1) Certified low-noise-emission products shall be acquired by purchase or lease by the Federal Government for use by the Federal Government in lieu of other products if the Administrator of General Services determines that such certified products have procurement costs which are no more than 125 per centum of the retail price of the least expensive type of product for which they are certified substitutes.

(2) Data relied upon by the Administrator in determining that a product is a certified low-noise-emission product shall be incorporated in any contract for the procurement of such product.

(d) Product selection

The procuring agency shall be required to purchase available certified low-noise-emission products which are eligible for purchase to the extent they are available before purchasing any other products for which any low-noise-emission product is a certified substitute. In making purchasing selections between competing eligible certified low-noise-emission products, the procuring agency shall give priority to any class or model which does not require extensive periodic maintenance to retain its low-noise-emission qualities or which does not involve operating costs significantly in excess of those products for which it is a certified substitute.

(e) Waiver of statutory price limitations

For the purpose of procuring certified low-noise-emission products any statutory price limitations shall be waived.

(f) Tests of noise emissions from products purchased by Federal Government

The Administrator shall, from time to time as he deems appropriate, test the emissions of noise from certified low-noise-emission products purchased by the Federal Government. If at any time he finds that the noise-emission levels exceed the levels on which certification under this section was based, the Administrator shall give the supplier of such product written notice of this finding, issue public notice of it, and give the supplier an opportunity to make necessary repairs, adjustments, or replacements. If no such repairs, adjustments, or replacements are made within a period to be set by the Administrator, he may order the supplier to show cause why the product involved should be eligible for recertification.

(g) Authorization of appropriations

There are authorized to be appropriated for paying additional amounts for products pursuant to, and for carrying out the provisions of, this section, $1,000,000 for the fiscal year ending June 30, 1973, and $2,000,000 for each of the two succeeding fiscal years, $2,200,000 for the fiscal year ending June 30, 1976, $550,000 for the transition period of July 1, 1976, through September 30, 1976, and $2,420,000 for the fiscal year ending September 30, 1977.

Any such petition shall be filed within ninety days from the date of such promulgation, or after such date if such petition is based solely on grounds arising after such ninetieth day. Action of either Administrator with respect to which review could have been obtained under this subsection shall not be subject to judicial review in civil or criminal proceedings for enforcement.

(b) Additional evidence

If a party seeking review under this chapter applies to the court for leave to adduce additional evidence, and shows to the satisfaction of the court that the information is material and was not available at the time of the proceeding before the Administrator of such Agency or Administration (as the case may be), the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before such Administrator, and to be adduced upon the hearing, in such manner and upon such terms and conditions as the court may deem proper. Such Administrator may modify his findings as to the facts, or make new findings, by reason of the additional evidence so taken, and he shall file with the court such modified or new findings, and his recommendation, if any, for the modification or setting aside of his original order, with the return of such additional evidence.

(c) Stay of agency action

With respect to relief pending review of an action by either Administrator, no stay of an agency action may be granted unless the reviewing court determines that the party seeking such stay is (1) likely to prevail on the merits in the review proceeding and (2) will suffer irreparable harm pending such proceeding.

(d) Subpenas

For the purpose of obtaining information to carry out this chapter, the Administrator of the Environmental Protection Agency may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and he may administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid witnesses in the courts of the United States. In cases of contumacy or refusal to obey a subpena served upon any person under this subsection, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Administrator, to appear and produce papers, books, and documents before the Administrator, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

§ 4916. Railroad noise emission standards

(a) Regulations; standards; consultation with Secretary of Transportation

(1) Within nine months after October 27, 1972, the Administrator shall publish proposed noise emission regulations for surface carriers engaged in interstate commerce by railroad. Such proposed regulations shall include noise emission standards setting such limits on noise emissions resulting from operation of the equipment and facilities of surface carriers engaged in interstate commerce by railroad which reflect the degree of noise reduction achievable through the application of the best available technology, taking into account the cost of compliance. These regulations shall be in addition to any regulations that may be proposed under section 4905 of this title.

(2) Within ninety days after the publication of such regulations as may be proposed under paragraph (1) of this subsection, and subject to the provisions of section 4915 of this title, the Administrator shall promulgate final regulations. Such regulations may be revised, from time to time, in accordance with this subsection.

(3) Any standard or regulation, or revision thereof, proposed under this subsection shall be promulgated only after consultation with the Secretary of Transportation in order to assure appropriate consideration for safety and technological availability.

(4) Any regulation or revision thereof promulgated under this subsection shall take effect after such period as the Administrator finds necessary, after consultation with the Secretary of Transportation, to permit the development and application of the requisite technology, giving appropriate consideration to the cost of compliance within such period.

(b) Regulations to insure compliance with noise emission standards

The Secretary of Transportation, after consultation with the Administrator, shall promulgate regulations to insure compliance with all standards promulgated by the Administrator under this section. The Secretary of Transportation shall carry out such regulations through the use of his powers and duties of enforcement

(2) Nothing in this section shall diminish or enhance the rights of any State or political subdivision thereof to establish and enforce standards or controls on levels of environmental noise, or to control, license, regulate, or restrict the use, operation, or movement of any product if the Administrator, after consultation with the Secretary of Transportation, determines that such standard, control, license, regulation, or restriction is necessitated by special local conditions and is not in conflict with regulations promulgated under this section.

(d) "Carrier" and "railroad" defined

The terms ''carrier'' and ''railroad'' as used in this section shall have the same meaning as the term ''railroad carrier'' has in section 20102 of title 49.

§ 5011. Grants and contracts for individual service projects

(a) Foster Grandparent projects; amount

The Director is authorized to make grants to or contracts with public and nonprofit private agencies and organizations to pay part or all of the cost of development and operation of projects (including direct payments to individuals serving under this part) designed for the purpose of providing opportunities for low-income persons aged sixty or over to provide supportive person-to-person services in health, education, welfare, and related settings to children having exceptional needs. Such services may include services by individuals serving as foster grandparents to children who are individuals with disabilities, who have chronic health conditions, who are receiving care in hospitals, who are residing in homes for dependent and neglected children, or who are receiving services provided by day care centers, schools, early intervention programs under part H[1] of the Individuals with Disabilities Education Act (20 U.S.C. 1471 et seq.), Head Start agencies under the Head Start Act [42 U.S.C. 9831 et seq.], or any of a variety of other programs, establishments, and institutions providing services for children with special or exceptional needs. Individual foster grandparents may provide person-to-person services to one or more children, depending on the needs of the project and local site. The Director may approve assistance in excess of 90 per centum of the costs of the development and operation of such projects only if the Director determines, in accordance with regulations the Director shall prescribe establishing objective criteria, that such action is required in furtherance of the purpose of this section. Provision for such assistance shall be effective as of September 19, 1972. In the case of any project with respect to which, prior to such

[1] See References in Text note below.

date, a grant or contract has been made under section 3044b(a)[1] of this title or with respect to any project under the Foster Grandparent program in effect prior to September 17, 1969, contributions in cash or in kind from the Bureau of Indian Affairs, Department of the Interior, toward the cost of the project may be counted as part of the cost thereof which is met from non-Federal sources.

(b) Person-to-person services to children in an individual service project by public or private nonprofit agency; authority and criteria for determinations; mutual agreements between parties

(1) Any public or private nonprofit agency or organization responsible for providing person-to-person services to a child in a project carried out under subsection (a) of this section shall have the exclusive authority to determine, pursuant to the provisions of paragraph (2) of this subsection—

(A) which children may receive supportive person-to-person services under such project; and

(B) the period of time during which such services shall be continued in the case of each individual child.

(2) In the event that such an agency or organization determines that it is in the best interests of a mentally retarded child receiving, and of a particular foster grandparent providing, services in such a project, such relationship may be continued after the child reaches the chronological age of 21: *Provided*, That such child was receiving such services prior to attaining the chronological age of 21. If the particular foster grandparent subject to the determination under this paragraph becomes unavailable to serve after such determination is made, the agency or organization may select another foster grandparent.

(3) Any determination made by a public or nonprofit private agency or organization under paragraphs (1) and (2) of this subsection shall be made through mutual agreement by all parties involved with respect to the provision of services to the child involved.

(c) "Child" and "children" defined

For the purposes of this section, the terms ''child'' and ''children'' mean any individual or individuals who are less than 21 years of age.

(d) Domestic Volunteer Service; allowances, stipends, and other support

The Director, in accordance with regulations the Director shall prescribe, may provide to low-income persons serving as volunteers under this part, such allowances, stipends, and other support as the Director determines are necessary to carry out the purpose of this part. Any stipend or allowance provided under this section shall not be less than $2.45 per hour on and after October 1, 1993, and shall be adjusted once prior to December 31, 1997, to account for inflation, as determined by the Director and rounded to the nearest five cents, except that (1) such stipend or allowance shall not be increased as a result of an amendment made to this sentence unless the funds appropriated for carrying out this part are sufficient to maintain for the fiscal year in question a number of participants to serve under this part at least equal to the number of such participants serving during the preceding fiscal year, and (2) in the event that sufficient appropriations for any fiscal year are not available to increase any such stipend or allowance provided to the minimum hourly rate specified in this sentence, the Director shall increase the stipend or allowance to such amount as appropriations for such year permit consistent with clause (1) of this exception. In establishing the amount of, and the effective date for, such adjustment, the Director, in consultation with the State Commissions on National and Community Service (as established under section 12638 of this title) and the heads of the State offices established under section 12651f of this title, shall consider the effect such adjustment will have on the ability of non-federally funded volunteer programs similar to the programs under this subchapter to maintain their current level of volunteer hours.

(e) "Low-income person" and "person of low income" defined

For purposes of this part, the terms ''low-income person'' and ''person of low income'' mean—

(1) any person whose income is not more than 125 per centum of the poverty line defined in section 9902(2) of this title and adjusted by the Director in the manner described in such section; and

(2) any person whose income is not more than 100 per centum of such poverty line, as so adjusted and determined by the Director after taking into consideration existing poverty guidelines as appropriate to local situations.

Persons described in paragraph (2) shall be given special consideration for participation in projects under this part.

(f) Persons entitled to serve as volunteers; application of regulations to volunteers; equal treatment to all volunteers by recipients of grants; conditions of grants; use of funds; payment of costs

(1)(A) Except as provided in subparagraphs (B) and (C), individuals who are not low-income persons may serve as volunteers under this part, in accordance with such regulations as the Director shall issue, if such individuals serve without receiving any allowance, stipend, or other financial support under this part except reimbursement for transportation, meals, and out-of-pocket expenses incident to serving under this part.

(B) The regulations issued by the Director to carry out this part (other than any regulations relating to allowances, stipends, and other financial support authorized by subsection (d) of this section to be paid under this part to low-income persons) shall apply to all volunteers under this part, without regard to whether such volunteers are eligible to receive a stipend under subsection (d) of this section.

(C) Individuals who are not low-income persons may not serve as volunteers under this part in any community in which there are volunteers serving under part A of this subchapter unless such individuals have been referred previously for possible placement as volunteers under part A of this subchapter and such placement did not occur.

(2)(A) Except as provided in subparagraph (B), each recipient of a grant or contract to carry out a project under this part shall give equal treatment to all volunteers who participate in such project, without regard to whether such volunteers are eligible to receive a stipend under subsection (d) of this section.

(B) An individual who is not a low-income person may not become a volunteer under this part if allowing such individual to become a volunteer under this part would prevent a low-income individual from becoming a volunteer under this part or would displace a low-income person from being such a volunteer.

(3) The Director may not take into consideration or require as a condition of receiving a grant or contract to carry out a project under this part, any applicant for such grant or contract—

(A) to accept or recruit individuals who are not low-income persons to serve as volunteers under this part; or

(B) to solicit locally generated contributions, in cash or in kind, to support such individuals.

The Director may not coerce any applicant for, or recipient of, such grant or contract to engage in conduct described in subparagraph (A) or (B).

(4) Funds appropriated to carry out this part may not be used to pay any cost, including any administrative cost, incurred in connection with volunteers under this part who do not receive a stipend under subsection (d) of this section. Such cost incurred with respect to a volunteer may be paid with—

(A) funds received by the Director as unrestricted gifts;

(B) funds received by the Director as gifts to pay such cost;

(C) funds contributed by such volunteer; or

(D) locally generated contributions in excess of the amount required to be contributed under subsection (a) of this section, in the discretion of the recipient of a grant or contract under such subsection.

CONGRESSIONAL FINDINGS

Section 9(a) of Pub. L. 102–586 provided that: ''The Congress finds that—

''(1) circumstances surrounding the death of a young boy named Adam Mann in New York City prompted a shocking documentary focusing on the inability of child protection services to protect suffering children;

''(2) the documentary described in paragraph (1) showed the serious need for systemic changes in our child welfare protection system;

''(3) thorough, coordinated, and comprehensive investigation will, it is hoped, lead to the prevention of abuse, neglect, or death in the future;

''(4) an undue burden is placed on investigation due to strict Federal and State laws and regulations regarding confidentiality;

''(5) while the Congress recognizes the importance of maintaining the confidentiality of records pertaining to child abuse, neglect, and death, often the purpose of confidentiality laws and regulations are [sic] defeated when they have the effect of protecting those responsible;

''(6) comprehensive and coordinated interagency communication needs to be established, with adequate provisions to protect against the public disclosure of any detrimental information need to be established [sic];

''(7) certain States, including Georgia, North Carolina, California, Missouri, Arizona, Minnesota, Oklahoma, and Oregon, have taken steps to establish by statute interagency, multidisciplinary fatality review teams to fully investigate incidents of death believed to be caused by child abuse or neglect;

''(8) teams such as those described in paragraph (7) should be established in every State, and their scope of review should be expanded to include egregious incidents of child abuse and neglect before the child in question dies; and

''(9) teams such as those described in paragraph (7) will increase the accountability of child protection services.''

(a) Findings

Congress finds that—

(1) the number of children in substitute care increased by nearly 61 percent between 1986 and 1994, as our Nation's foster care population included more than 452,000 as of June 1994;

(2) increasingly children entering foster care have complex problems which require intensive services;

(3) an increasing number of infants are born to mothers who did not receive prenatal care, are born addicted to alcohol and other drugs, and exposed to infection with the etiologic agent for the human immunodeficiency virus, are medically fragile, and technology dependent;

(4) the welfare of thousands of children in institutions and foster homes and disabled infants with life-threatening conditions may be in serious jeopardy and some such children are in need of placement in permanent, adoptive homes;

(5) many thousands of children remain in institutions or foster homes solely because of legal and other barriers to their placement in permanent, adoptive homes;

(6) the majority of such children are of school age, members of sibling groups or disabled;

(7)(A) currently, 40,000 children are free for adoption and awaiting placement;

(B) such children are typically school aged, in sibling groups, have experienced neglect or abuse, or have a physical, mental, or emotional disability; and

(C) while the children are of all races, children of color and older children (over the age of 10) are over represented in such group;

(8) adoption may be the best alternative for assuring the healthy development of such children;

(9) there are qualified persons seeking to adopt such children who are unable to do so because of barriers to their placement; and

(10) in order both to enhance the stability and love of the child's home environment and to avoid wasteful expenditures of public funds, such children should not have medically indicated treatment withheld from them nor be maintained in foster care or institutions when adoption is appropriate and families can be found for such children.

(b) Purpose

It is the purpose of this subchapter to facilitate the elimination of barriers to adoption and to provide permanent and loving home environments for children who would benefit from adoption, particularly children with special needs, including disabled infants with life-threatening conditions, by providing a mechanism to—

(1) promote quality standards for adoption services, pre-placement, post-placement, and post-legal adoption counseling, and standards to protect the rights of children in need of adoption;

(2) maintain a national adoption information exchange system to bring together chil-

dren who would benefit from adoption and qualified prospective adoptive parents who are seeking such children, and conduct national recruitment efforts in order to reach prospective parents for children awaiting adoption; and

(3) demonstrate expeditious ways to free children for adoption for whom it has been determined that adoption is the appropriate plan.

The evaluations will be submitted to the Secretary who will compile the results of projects funded by this section and submit a report to the appropriate committees of Congress. The emphasis of this program must focus on the improvement of the placement rate—not the aggregate number of special needs children placed in permanent homes. (B) continue to maintain a reporting rate of at least 80 percent for final dispositions in all identifiable child abuse crime cases in which there has been an event of activity within the preceding 5 years; and

§ 5119a. Background checks

(a) In general

(1) A State may have in effect procedures (established by State statute or regulation) that require qualified entities designated by the State to contact an authorized agency of the State to request a nationwide background check for the purpose of determining whether a provider has been convicted of a crime that bears upon the provider's fitness to have responsibility for the safety and well-being of children, the elderly, or individuals with disabilities.

(2) The authorized agency shall access and review State and Federal criminal history records through the national criminal history background check system and shall make reasonable efforts to respond to the inquiry within 15 business days.

(3) In the absence of State procedures referred to in paragraph (1), a qualified entity designated under paragraph (1) may contact an authorized agency of the State to request national criminal fingerprint background checks. Qualified entities requesting background checks under this paragraph shall comply with the guidelines set forth in subsection (b) of this section and with procedures for requesting national criminal fingerprint background checks, if any, established by the State.

(b) Guidelines

The procedures established under subsection (a) of this section shall require—

(1) that no qualified entity may request a background check of a provider under subsection (a) of this section unless the provider first provides a set of fingerprints and completes and signs a statement that—

(A) contains the name, address, and date of birth appearing on a valid identification document (as defined in section 1028 of title 18) of the provider;

(B) the provider has not been convicted of a crime and, if the provider has been convicted of a crime, contains a description of the crime and the particulars of the conviction;

(C) notifies the provider that the entity may request a background check under subsection (a) of this section;

(D) notifies the provider of the provider's rights under paragraph (2); and

(E) notifies the provider that prior to the completion of the background check the qualified entity may choose to deny the provider unsupervised access to a person to whom the qualified entity provides care;

(2) that each provider who is the subject of a background check is entitled—

(A) to obtain a copy of any background check report; and

(B) to challenge the accuracy and completeness of any information contained in any such report and obtain a prompt determination as to the validity of such challenge before a final determination is made by the authorized agency;

(3) that an authorized agency, upon receipt of a background check report lacking disposition data, shall conduct research in whatever State and local recordkeeping systems are available in order to obtain complete data;

(4) that the authorized agency shall make a determination whether the provider has been convicted of, or is under pending indictment for, a crime that bears upon the provider's fitness to have responsibility for the safety and well-being of children, the elderly, or individuals with disabilities and shall convey that determination to the qualified entity; and

(5) that any background check under subsection (a) of this section and the results thereof shall be handled in accordance with the requirements of Public Law 92–544, except that this paragraph does not apply to any request by a qualified entity for a national criminal fingerprint background check pursuant to subsection (a)(3) of this section.

(c) Regulations

(1) The Attorney General may by regulation prescribe such other measures as may be required to carry out the purposes of this subchapter, including measures relating to the security, confidentiality, accuracy, use, misuse, and dissemination of information, and audits and recordkeeping.

(2) The Attorney General shall, to the maximum extent possible, encourage the use of the best technology available in conducting background checks.

(d) Liability

A qualified entity shall not be liable in an action for damages solely for failure to conduct a criminal background check on a provider, nor shall a State or political subdivision thereof nor any agency, officer or employee thereof, be liable in an action for damages for the failure of a qualified entity (other than itself) to take action adverse to a provider who was the subject of a background check.

(e) Fees

In the case of a background check pursuant to a State requirement adopted after December 20, 1993, conducted with fingerprints on a person who volunteers with a qualified entity, the fees collected by authorized State agencies and the Federal Bureau of Investigation may not exceed eighteen dollars, respectively, or the actual cost, whichever is less, of the background check conducted with fingerprints. The States shall establish fee systems that insure that fees to nonprofit entities for background checks do not discourage volunteers from participating in child care programs.

SUBCHAPTER I—FINDINGS, DECLARATIONS, AND DEFINITIONS

§ 5121. Congressional findings and declarations

(a) The Congress hereby finds and declares that—

(1) because disasters often cause loss of life, human suffering, loss of income, and property loss and damage; and

(2) because disasters often disrupt the normal functioning of governments and communities, and adversely affect individuals and families with great severity;

special measures, designed to assist the efforts of the affected States in expediting the rendering of aid, assistance, and emergency services, and the reconstruction and rehabilitation of devastated areas, are necessary.

(b) It is the intent of the Congress, by this chapter, to provide an orderly and continuing means of assistance by the Federal Government to State and local governments in carrying out their responsibilities to alleviate the suffering and damage which result from such disasters by—

(1) revising and broadening the scope of existing disaster relief programs;

(2) encouraging the development of comprehensive disaster preparedness and assistance plans, programs, capabilities, and organizations by the States and by local governments;

(3) achieving greater coordination and responsiveness of disaster preparedness and relief programs;

(4) encouraging individuals, States, and local governments to protect themselves by obtaining insurance coverage to supplement or replace governmental assistance;

(5) encouraging hazard mitigation measures to reduce losses from disasters, including development of land use and construction regulations; and

(6) providing Federal assistance programs for both public and private losses sustained in disasters[1]

''(5) there is no single Federal agency in a lead or coordinating role with regard to drought;

''(6) State, local, and tribal governments have had to deal individually and separately with each Federal agency involved in drought assistance; and

''(c) PERIOD OF APPOINTMENT; VACANCIES.—Members shall be appointed for the life of the Commission. Any vacancy in the Commission shall not affect its powers, but shall be filled in the same manner as the original appointment.

''(2) review all existing Federal laws and programs relating to drought;

''(3) review State, local, and tribal laws and programs relating to drought that the Commission finds pertinent;

''(4) determine what differences exist between the needs of those affected by drought and the Federal laws and programs designed to mitigate the impacts of and respond to drought;

''(5) collaborate with the Western Drought Coordination Council and other appropriate entities in order to consider regional drought initiatives and the application of such initiatives at the national level;

''(6) make recommendations on how Federal drought laws and programs can be better integrated with ongoing State, local, and tribal programs into a comprehensive national policy to mitigate the impacts of and respond to drought emergencies without diminishing the rights of States to control water through State law and considering the need for protection of the environment;

''(7) make recommendations on improving public awareness of the need for drought mitigation, and prevention; and response on developing a coordinated approach to drought mitigation, prevention, and response by governmental and nongovernmental entities, including academic, private, and nonprofit interests; and

SUBCHAPTER REFERRED TO IN OTHER SECTIONS

This subchapter is referred to in sections 5321, 12840 of this title.

§ 5170. Procedure for declaration

All requests for a declaration by the President that a major disaster exists shall be made by the Governor of the affected State. Such a request shall be based on a finding that the disaster is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local governments and that Federal assistance is necessary. As part of such request, and as a prerequisite to major disaster assistance under this chapter, the Governor shall take appropriate response action under State law and direct execution of the State's emergency plan. The Governor shall furnish information on the nature and amount of State and local resources which have been or will be committed to alleviating the results of the disaster, and shall certify that, for the current disaster, State and local government obligations and expenditures (of which State commitments must be a significant proportion) will comply with all applicable cost-sharing requirements of this chapter. Based on the request of a Governor under this section, the President may declare under this chapter that a major disaster or emergency exists.

(B) Areas with unstable soil

In any case in which a State or local government determines that the public welfare would not best be served by repairing, restoring, reconstructing, or replacing any public facility owned or controlled by the State or local government because soil instability in the disaster area makes repair, restoration, reconstruction, or replacement infeasible, the State or local government may elect to receive, in lieu of a contribution under subsection (a)(1)(A) of this section, a contribution in an amount equal to 90 percent of the Federal share of the Federal estimate of the cost of repairing, restoring, reconstructing, or replacing the facility and of management expenses.

In any case in which a person that owns or operates a private nonprofit facility determines that the public welfare would not best be served by repairing, restoring, reconstructing, or replacing the facility, the person may elect to receive, in lieu of a contribution under subsection (a)(1)(B) of this section, a contribution in an amount equal to 75 percent of the Federal share of the Federal estimate of the cost of repairing, restoring, reconstructing, or replacing the facility and of management expenses.

(2) Amount of reduction

The amount of a reduction in Federal assistance under this section with respect to a facility shall be the lesser of—

(A) the value of such facility on the date of the flood damage or destruction, or

(B) the maximum amount of insurance proceeds which would have been payable with respect to such facility if such facility had been covered by flood insurance under the National Flood Insurance Act of 1968 on such date.

(3) Exception

Paragraphs (1) and (2) shall not apply to a private nonprofit facility which is not covered by flood insurance solely because of the local government's failure to participate in the flood insurance program established by the National Flood Insurance Act.

(4) Dissemination of information

The President shall disseminate information regarding the reduction in Federal assistance provided for by this subsection to State and local governments and the owners and operators of private nonprofit facilities who may be affected by such a reduction.

tection of life and property in the United States from hazards and to vest responsibility for emergency preparedness jointly in the Federal Government and the States and their political subdivisions. The Congress recognizes that the organizational structure established jointly by the Federal Government and the States and their political subdivisions for emergency preparedness purposes can be effectively utilized to provide relief and assistance to people in areas of the United States struck by a hazard. The Federal Government shall provide necessary direction, coordination, and guidance, and shall provide necessary assistance, as authorized in this subchapter so that a comprehensive emergency preparedness system exists for all hazards.

''(8) conduct a program of planning, preparedness, and mitigation related to the multiple direct and indirect hazards resulting from the occurrence of large earthquakes.

MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I transmit herewith Reorganization Plan No. 1 of 1958, prepared in accordance with the Reorganization Act of 1949, as amended. The reorganization plan provides new arrangements for the conduct of Federal defense mobilization and civil defense functions.

In formulating Reorganization Plan No. 1, I have had the benefit of several studies made by the executive branch as well as those conducted by the Congress. The reorganization plan will overcome the major difficulties revealed by those studies and mentioned in my 1959 budget message where I made the following statement:

The structure of Federal organization for the planning, coordination, and conduct of our nonmilitary defense programs has been reviewed, and I have concluded that the existing statues assigning responsibilities for the central coordination and direction of these programs are out of date. The rapid technical advances of military science have led to a serious overlap among agencies carrying on these leadership and planning functions. Because the situation will continue to change and because these functions transcend the responsibility of any single department or agency, I have concluded that they should be vested in no one short of the President. I will make recommendations to the Congress on this subject.

The principal effects of the organization plan are—

First, it transfers to the President the functions vested by law in the Federal Civil Defense Administration and those so vested in the Office of Defense Mobilization. The result is to establish a single pattern with respect to the vesting of defense mobilization and civil defense functions. At the present time disparity exists in that civil defense functions are vested in the President only to a limited degree while a major part of the functions administered by the Office of Defense Mobilization are vested by law in the President and delegated by him to that Office. Under the plan, the broad program responsibilities for coordinating and conducting the interrelated defense mobilization and civil defense functions will be vested in the President for appropriate delegation as the rapidly changing character of the nonmilitary preparedness program warrants.

Second, the reorganization plan consolidates the Office of Defense Mobilization and the Federal Civil Defense Administration to form a new Office of Defense and Civilian Mobilization in the Executive Office of the President. I have concluded that, in many instances, the interests and activities of the Office of Defense Mobilization and the Federal Civil Defense Administration overlap to such a degree that it is not possible to work out a satisfactory division of those activities and interests between the two agencies. I have also concluded that a single civilian mobilization agency of appropriate stature and authority is needed and that such an agency will ensue from the consolidation and from the granting of suitable authority to that agency for directing and coordinating the preparedness activities of the Federal departments and agencies and for providing unified guidance and assistance to the State and local governments.

Third, the reorganization plan transfers the membership of the Director of the Office of Defense Mobilization on the National Security Council to the Director of the Office of Defense and Civilian Mobilization and also transfers the Civil Defense Advisory Council to the Office of Defense and Civilian Mobilization.

Initially, the Office of Defense and Civilian Mobilization will perform the civil defense and defense mobilization functions now performed by the Office of Defense Mobilization and the Federal Civil Defense Administration. One of its first tasks will be to advise me with respect to the actions to be taken to clarify and expand the roles of the Federal departments and agencies in carrying out nonmilitary defense preparedness functions. After such actions are taken, the direction and coordination of the civil defense and defense mobilization activities assigned to the departments and agencies will comprise a principal remaining responsibility of the Office of Defense and Civilian Mobilization.

After investigation, I have found and hereby declare that each reorganization included in Reorganization Plan No. 1 of 1958 is necessary to accomplish one or more of the purposes set forth in section 2(a) of the Reorganization Act of 1949, as amended.

I have also found and hereby declare that it is necessary to include in the accompanying reorganization plan, by reason of reorganizations made thereby, provisions for the appointment and compensation of new officers specified in sections 2 and 3 of the plan. The rates of compensation fixed for these officers are, respectively those which I have found to prevail in respect of comparable officers in the executive branch of the Government.

The taking effect of the reorganizations included in Reorganization Plan No. 1 of 1958 will immediately reduce the number of Federal agencies by one and, by providing sounder organizational arrangements for the administration of the affected functions, should promote the increased economy and effectiveness of the Federal expenditures concerned. It is, however, impracticable to itemize at this time the reduction of expenditures which it is probable will be brought about by such taking effect.

I urge that the Congress allow the reorganization plan to become effective.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, April 24, 1958.

The provisions of this reorganization plan shall take effect as provided by section 906(a) of title 5 of the United States Code, or on July 1, 1973, whichever is later.

MESSAGE OF THE PRESIDENT

To the Congress of the United States:

On January 5 I announced a three-part program to streamline the executive branch of the Federal Government. By concentrating less responsibility in the President's immediate staff and more in the hands of the departments and agencies, this program should significantly improve the services of the Government. I believe these reforms have become so urgently necessary that I intend, with the cooperation of the Congress, to pursue them with all of the resources of my office during the coming year.

The first part of this program is a renewed drive to achieve passage of my legislative proposals to overhaul the Cabinet departments. Secondly, I have appointed three Cabinet Secretaries as Counsellors to the President with coordinating responsibilities in the broad areas of human resources, natural resources, and community development, and five Assistants to the President with special responsibilities in the areas of domestic affairs, economic affairs, foreign affairs, executive management, and operations of the White House.

The third part of this program is a sharp reduction in the overall size of the Executive Office of the President and a reorientation of that office back to its original mission as a staff for top-level policy formation and monitoring of policy execution in broad functional areas. The Executive Office of the President should no longer be encumbered with the task of managing or administering programs which can be run more effectively by the departments and agencies. I have therefore concluded that a number of specialized operational and program functions should be shifted out of the Executive Office into the line departments and agencies of the Government. Reorganization Plan No. 1 of 1973, transmitted herewith, would effect such changes with respect to emergency preparedness functions and scientific and technological affairs.

STREAMLINING THE FEDERAL SCIENCE ESTABLISHMENT

When the National Science Foundation was established by an act of the Congress in 1950, its statutory responsibilities included evaluation of the Government's scientific research programs and development of basic science policy. In the late 1950's, however, with the effectiveness of the U.S. science effort under serious scrutiny as a result of sputnik, the post of Science Advisor to the President was established. The White House became increasingly involved in the evaluation and coordination of research and development programs and in science policy matters, and that involvement was institutionalized in 1962 when a reorganization plan established the Office of Science and Technology within the Executive Office of the President, through transfer of authorities formerly vested in the National Science Foundation.

With advice and assistance from OST during the past decade; the scientific and technological capability of the Government has been markedly strengthened. This administration is firmly committed to a sustained, broadbased national effort in science and technology, as I made plain last year in the first special message on the subject ever sent by a President to the Congress. The research and development capability of the various executive departments and agencies, civilian as well as defense, has been upgraded. The National Science Foundation has broadened from its earlier concentration on basic research support to take on a significant role in applied research as well. It has matured in its ability to play a coordinating and evaluative role within the Government and between the public and private sectors.

I have therefore concluded that it is timely and appropriate to transfer to the Director of the National Science Foundation all functions presently vested in the Office of Science and Technology, and to abolish that office. Reorganization Plan No. 1 would effect these changes.

The multi-disciplinary staff resources of the Foundation will provide analytic capabilities for performance of the transferred functions. In addition, the Director of the Foundation will be able to draw on expertise from all of the Federal agencies, as well as from outside the Government, for assistance in carrying out his new responsibilities.

It is also my intention, after the transfer of responsibilities is effected, to ask Dr. H. Guyford Stever, the current Director of the Foundation, to take on the additional post of Science Adviser. In this capacity, he would advise and assist the White House, Office of Management and Budget, Domestic Council, and other entities within the Executive Office of the President on matters where scientific and technological expertise is called for, and would act as the President's representative in selected cooperative programs in international scientific affairs, including chairing such joint bodies as the U.S.—U.S.S.R. Joint Commission on Scientific and Technical Cooperation.

In the case of national security, the Department of Defense has strong capabilities for assessing weapons needs and for undertaking new weapons development, and the President will continue to draw primarily on this source for advice regarding military technology. The President in special situations also may seek independent studies or assessments concerning military technology from within or outside the Federal establishment, using the machinery of the National Security Council for this purpose, as well as the Science Adviser when appropriate.

In one special area of technology—space and aeronautics—a coordinating council has existed within the Executive Office of the President since 1958. This body, the National Aeronautics and Space Council, met a major need during the evolution of our nation's space program. Vice President Agnew has served with distinction as its chairman for the past four years. At my request, beginning in 1969, the Vice President also chaired a special Space Task Group charged with developing strategy alternatives for a balanced U.S. space program in the coming years.

As a result of this work, basic policy issues in the United States space effort have been resolved, and the necessary interagency relationships have been established. I have therefore concluded, with the Vice President's concurrence, that the Council can be discontinued. Needed policy coordination can now be achieved through the resources of the executive departments and agencies, such as the National Aeronautics and Space Administration, augmented by some of the former Council staff. Accordingly, my reorganization plan proposes the abolition of the National Aeronautics and Space Council.

A NEW APPROACH TO EMERGENCY PREPAREDNESS

The organization within the Executive Office of the President which has been known in recent years as the Office of Emergency Preparedness dates back, through its numerous predecessor agencies, more than 20 years. It has performed valuable functions in developing plans for emergency preparedness, in administering Federal disaster relief, and in overseeing and assisting the agencies in this area.

OEP's work as a coordinating and supervisory authority in this field has in fact been so effective—particularly under the leadership of General George A. Lincoln, its director for the past four years, who retired earlier this month after an exceptional military and public service career—that the line departments and agencies which in the past have shared in the performance of the various preparedness functions now possess the capability to assume full responsibility for those functions. In the interest of efficiency and economy, we can now further streamline the Executive Office of the President by formally relocating those responsibilities and closing the Office of Emergency Preparedness.

I propose to accomplish this reform in two steps. First, Reorganization Plan No. 1 would transfer to the President all functions previously vested by law in the Office or its Director, except the Director's role as a member of the National Security Council, which would be abolished; and it would abolish the Office of Emergency Preparedness.

The functions to be transferred to the President from OEP are largely incidental to emergency authorities already vested in him. They include functions under the Disaster Relief Act of 1970 [42 U.S.C. 4401 et seq.]; the function of determining whether a major disaster has occurred within the meaning of (1) Section 7 of the Act of September 30, 1950, as amended, 20 U.S.C. 241–1, or (2) Section 762(a) of the Higher Education Act of 1965, as added by Section 161(a) of the Education Amendments of 1972, Public Law 92–318, 86 Stat. 288 at 299 (relating to the furnishing by the Commissioner of Education of disaster relief assistance for educational purposes) [20 U.S.C. 1132d–1]; and functions under Section 232 of the Trade Expansion Act of 1962, as amended (19 U.S.C. 1862), with respect to the conduct of investigations to determine the effects on national security of the importation of certain articles.

The Civil Defense Advisory Council within OEP would also be abolished by this plan, as changes in domestic and international conditions since its establishment in 1950 have now obviated the need for a standing council of this type. Should advice of the kind the Council has provided be required again in the future, State and local officials and experts in the field can be consulted on an ad hoc basis.

Second, as soon as the plan became effective, I would delegate OEP's former functions as follows:

All OEP responsibilities having to do with preparedness for and relief of civil emergencies and disasters would be transferred to the Department of Housing and Urban Development. This would provide greater field capabilities for coordination of Federal disaster assistance with that provided by States and local communities, and would be in keeping with the objective of creating a broad, new Department of Community Development.

OEP's responsibilities for measures to ensure the continuity of civil government operations in the event of major military attack would be reassigned to the General Services Administration, as would responsibility for resource mobilization including the management of national security stockpiles, with policy guidance in both cases to be provided by the National Security Council, and with economic considerations relating to changes in stockpile levels to be coordinated by the Council on Economic Policy.

Investigations of imports which might threaten the national security—assigned to OEP by Section 232 of the Trade Expansion Act of 1962 [19 U.S.C. 1862]—would be reassigned to the Treasury Department, whose other trade studies give it a readymade capability in this field; the National Security Council would maintain its supervisory role over strategic imports.

Those disaster relief authorities which have been reserved to the President in the past, such as the authority to declare major disasters, will continue to be exercised by him under these new arrangements. In emergency situations calling for rapid interagency coordination, the Federal response will be coordinated by the Executive Office of the President under the general supervision of the Assistant to the President in charge of executive management.

The Oil Policy Committee will continue to function as in the past, unaffected by this reorganization, except that I will designate the Deputy Secretary of the Treasury as chairman in place of the Director of OEP. The committee will operate under the general supervision of the Assistant to the President in charge of economic affairs.

DECLARATIONS

After investigation, I have found that each action included in the accompanying plan is necessary to accomplish one or more of the purposes set forth in Section 901(a) of title 5 of the United States Code. In particular, the plan is responsive to the intention of the Congress as expressed in Section 901(a)(1), ''to promote better execution of the laws, more effective management of the executive branch and of its agencies and functions, and expeditious administration of the public business;'' and in Section 901(a)(3), ''to increase the efficiency of the operations of the Government to the fullest extent practicable;'' and in Section 901(a)(5), ''to reduce the number of agencies by consolidating those having similar functions under a single head, and to abolish such agencies or functions as may not be necessary for the efficient conduct of the Government.''

While it is not practicable to specify all of the expenditure reductions and other economies which will result from the actions proposed, personnel and budget savings from abolition of the National Aeronautics and Space Council and the Office of Science and Technology alone will exceed $2 million annually, and additional savings should result from a reduction of Executive Pay Schedule positions now associated with other transferred and delegated functions.

The plan has as its one logically consistent subject matter the streamlining of the Executive Office of the President and the disposition of major responsibilities currently conducted in the Executive Office of the President, which can better be performed elsewhere or abolished.

The functions which would be abolished by this plan, and the statutory authorities for each, are:

(1) the functions of the Director of the Office of Emergency Preparedness with respect to being a member of the National Security Council (Sec. 101, National Security Act of 1947, as amended, 50 U.S.C. 402; and Sec. 4, Reorganization Plan No. 1 of 1958);

(2) the functions of the Civil Defense Advisory Council (Sec. 102(a) Federal Civil Defense Act of 1950; 50 U.S.C. App. 2272(a)); and

(3) the functions of the National Aeronautics and Space Council (Sec. 201, National Aeronautics and Space Act of 1958; 42 U.S.C. 2471).

The proposed reorganization is a necessary part of the restructuring of the Executive Office of the President. It would provide through the Director of the National Science Foundation a strong focus for Federal efforts to encourage the development and application of science and technology to meet national needs. It would mean better preparedness for and swifter response to civil emergencies, and more reliable precautions against threats to the national security. The leaner and less diffuse Presidential staff structure which would result would enhance the President's ability to do his job and would advance the interests of the Congress as well.

I am confident that this reorganization plan would significantly increase the overall efficiency and effectiveness of the Federal Government. I urge the Congress to allow it to become effective.

RICHARD NIXON.

THE WHITE HOUSE, January 26, 1973.

DHS shall also coordinate with State and local governmental authorities and turn over response functions as appropriate when State and local governments do exercise their authority.

(c) DHS shall assume any necessary command-and-control function, or delegate such function to another Federal agency, in the event that no competent State and local authority is available to perform such function.

(d) In any instance in which Federal personnel may be called upon to fill a command-and-control function during a radiological emergency, in addition to any other powers it may have, DHS or its designee is authorized to accept volunteer assistance from utility employees and other nongovernmental personnel for any purpose necessary to implement the emergency response plan and facilitate off-site emergency response.

(c) Immediately upon the effective date of this Order, DHS shall review, and initiate necessary renegotiations of, all interagency agreements to which DHS is a party, so as to conform them to the terms and policies of this Order. This directive shall include, but not be limited to, the Federal Radiological Emergency Response Plan (50 *Fed. Reg.* 46542 (November 8, 1985)).

(d) To the extent permitted by law, DHS is directed to obtain full reimbursement, either jointly or severally, for services performed by DHS or other Federal agencies pursuant to this Order from any affected licensee and from any affected nonparticipating or inadequately participating State or local government.

SEC. 7. *Amendments*. This Executive Order amends Executive Order Nos. 11490 (34 *Fed. Reg.* 17567 (October 28, 1969)) [see note above], 12148 (44 *Fed. EX. ORD. NO. 13010. CRITICAL INFRASTRUCTURE PROTECTION

Ex. Ord. No. 13010, July 15, 1996, 61 F.R. 37347, as amended by Ex. Ord. No. 13025, Nov. 13, 1996, 61 F.R. 58623; Ex. Ord. No. 13041, Apr. 3, 1997, 62 F.R. 17039; Ex. Ord. No. 13064, Oct. 11, 1997, 62 F.R. 53711; Ex. Ord. No. 13077, Mar. 10, 1998, 63 F.R. 12381; Ex. Ord. No. 13138, §3(c), Sept. 30, 1999, 64 F.R. 53880, provided:

Certain national infrastructures are so vital that their incapacity or destruction would have a debilitating impact on the defense or economic security of the United States. These critical infrastructures include telecommunications, electrical power systems, gas and oil storage and transportation, banking and finance, transportation, water supply systems, emergency services (including medical, police, fire, and rescue), and continuity of government. Threats to these critical infrastructures fall into two categories: physical threats to tangible property (''physical threats''), and threats of electronic, radio-frequency, or computer-based attacks on the information or communications components that control critical infrastructures (''cyber threats''). Because many of these critical infrastructures are owned and operated by the private sector, it is essential that the government and private sector work together to develop a strategy for protecting them and assuring their continued operation.

NOW, THEREFORE, by the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered as follows:

SECTION 1. *Establishment*. There is hereby established the President's Commission on Critical Infrastructure Protection (''Commission'').

(a) *Chair*. A qualified individual from outside the Federal Government shall be designated by the President from among the members to serve as Chair of the Commission. The Commission Chair shall be employed on a full-time basis.

(b) *Members*. The head of each of the following executive branch departments and agencies shall nominate not more than two full-time members of the Commission:

(i) Department of the Treasury;
(ii) Department of Justice;
(iii) Department of Defense;
(iv) Department of Commerce;
(v) Department of Transportation;
(vi) Department of Energy;
(vii) Central Intelligence Agency;
(viii) Federal Emergency Management Agency;
(ix) Federal Bureau of Investigation;
(x) National Security Agency.

One of the nominees of each agency may be an individual from outside the Federal Government who shall be employed by the agency on a full-time basis. Each nominee must be approved by the Steering Committee.

SEC. 2. *The Principals Committee*. The Commission shall report to the President through a Principals Committee (''Principals Committee''), which shall review any reports or recommendations before submission to the President. The Principals Committee shall comprise the:

(i) Secretary of the Treasury;
(ii) Secretary of Defense;
(iii) Attorney General;
(iv) Secretary of Commerce;
(v) Secretary of Transportation;
(vi) Secretary of Energy;
(vii) Director of Central Intelligence;
(viii) Director of the Office of Management and Budget;
(ix) Director of the Federal Emergency Management Agency;
(x) Assistant to the President for National Security Affairs;
(xi) Assistant to the Vice President for National Security Affairs.[;]
(xii) Assistant to the President for Economic Policy and Director of the National Economic Council; and
(xiii) Assistant to the President and Director of the Office of Science and Technology Policy.

SEC. 3. *The Steering Committee of the President's Commission on Critical Infrastructure Protection*. A Steering Committee (''Steering Committee'') shall oversee the work of the Commission on behalf of the Principals Committee. The Steering Committee shall comprise [sic] five members. Four of the members shall be appointed by the President, and the fifth member shall be the Chair of the Commission. Two of the members of the Committee shall be employees of the Executive Office of the President. The Steering Committee will receive regular reports on the progress of the Commission's work and approve the submission of reports to the Principals Committee.

SEC. 4. *Mission*. The Commission shall: (a) within 30 days of this order, produce a statement of its mission objectives, which will elaborate the general objectives set forth in this order, and a detailed schedule for addressing each mission objective, for approval by the Steering Committee;

(b) identify and consult with: (i) elements of the public and private sectors that conduct, support, or contribute to infrastructure assurance; (ii) owners and operators of the critical infrastructures; and (iii) other elements of the public and private sectors, including the Congress, that have an interest in critical infrastructure assurance issues and that may have differing perspectives on these issues;

(c) assess the scope and nature of the vulnerabilities of, and threats to, critical infrastructures;

(d) determine what legal and policy issues are raised by efforts to protect critical infrastructures and assess how these issues should be addressed;

(e) recommend a comprehensive national policy and implementation strategy for protecting critical infrastructures from physical and cyber threats and assuring their continued operation;

(f) propose any statutory or regulatory changes necessary to effect its recommendations; and

(g) produce reports and recommendations to the Steering Committee as they become available; it shall not limit itself to producing one final report.

SEC. 5. [Revoked by Ex. Ord. No. 13138, §3(c), Sept. 30, 1999, 64 F.R. 53880.]

SEC. 6. *Administration*. (a) All executive departments and agencies shall cooperate with the Commission and provide such assistance, information, and advice to the Commission as it may request, to the extent permitted by law.

(b) The Commission and the Advisory Committee may hold open and closed hearings, conduct inquiries, and establish subcommittees, as necessary.

(c) Members of the Advisory Committee shall serve without compensation for their work on the Advisory Committee. While engaged in the work of the Advisory Committee, members may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by law for persons serving intermittently in the government service.

(d) To the extent permitted by law, and subject to the availability of appropriations, the Department of Defense shall provide the Commission and the Advisory Committee with administrative services, staff, other support services, and such funds as may be necessary for the performance of its functions and shall reimburse the executive branch components that provide representatives to the Commission for the compensation of those representatives.

(e) In order to augment the expertise of the Commission, the Department of Defense may, at the Commission's request, contract for the services of nongovernmental consultants who may prepare analyses, reports, background papers, and other materials for consideration by the Commission. In addition, at the Commission's request, executive departments and agencies shall request that existing Federal advisory committees consider and provide advice on issues of critical infrastructure protection, to the extent permitted by law.

(f) The Commission shall terminate 1 year and 90 days from the date of this order, unless extended by the President prior to that date. The Principals Committee, the Steering Committee, and the Advisory Committee shall terminate no later than September 30, 1998, and, upon submission of the Commission's report, shall review the report and prepare appropriate recommendations to the President.

(g) The person who served as Chair of the Commission may continue to be a member of the Steering Committee after termination of the Commission.

SEC. 7. *Review of Commission's Report.* (a) Upon the termination of the Commission as set out in section 6(f) of this order, certain of the Commission's staff may be retained no later than September 30, 1998, solely to assist the Principals, Steering, and Advisory Committees in reviewing the Commission's report and preparing recommendations to the President. They shall act under the direction of the Steering Committee or its designated agent. The Department of Defense shall continue to provide funding and administrative support for the retained Commission staff.

(b) Pursuant to Executive Order 12958 [50 U.S.C. 435 note], I hereby designate the Executive Secretary of the National Security Council to exercise the authority to classify information originally as ''Top Secret'' with respect to the work of the Commission staff, the Principals Committee, the Steering Committee, the Advisory Committee, and the Infrastructure Protection Task Force.

SEC. 8. *Interim Coordinating Mission.* (a) While the Commission is conducting its analysis and until the President has an opportunity to consider and act on its recommendations, there is a need to increase coordination of existing infrastructure protection efforts in order to better address, and prevent, crises that would have a debilitating regional or national impact. There is hereby established an Infrastructure Protection Task Force (''IPTF'') within the Department of Justice, chaired by the Federal Bureau of Investigation, to undertake this interim coordinating mission.

(b) The IPTF will not supplant any existing programs or organizations.

(c) The Steering Committee shall oversee the work of the IPTF.

(d) The IPTF shall include at least one full-time member each from the Federal Bureau of Investigation, the Department of Defense, and the National Security Agency. It shall also receive part-time assistance from other executive branch departments and agencies. Members shall be designated by their departments or agencies on the basis of their expertise in the protection of critical infrastructures. IPTF members' compensation shall be paid by their parent agency or department.

(e) The IPTF's function is to identify and coordinate existing expertise, inside and outside of the Federal Government, to:

(i) provide, or facilitate and coordinate the provision of, expert guidance to critical infrastructures to detect, prevent, halt, or confine an attack and to recover and restore service;

(ii) issue threat and warning notices in the event advance information is obtained about a threat;

(iii) provide training and education on methods of reducing vulnerabilities and responding to attacks on critical infrastructures;

(iv) conduct after-action analysis to determine possible future threats, targets, or methods of attack; and

(v) coordinate with the pertinent law enforcement authorities during or after an attack to facilitate any resulting criminal investigation.

(f) All executive departments and agencies shall cooperate with the IPTF and provide such assistance, information, and advice as the IPTF may request, to the extent permitted by law.

(g) All executive departments and agencies shall share with the IPTF information about threats and warning of attacks, and about actual attacks on critical infrastructures, to the extent permitted by law.

(h) The IPTF shall terminate no later than 180 days after the termination of the Commission, unless extended by the President prior to that date.

SEC. 9. *General.* (a) This order is not intended to change any existing statutes or Executive orders.

(b) This order is not intended to create any right, benefit, trust, or responsibility, substantive or procedural, enforceable at law or equity by a party against the United States, its agencies, its officers, or any person.

WILLIAM J. CLINTON.

No. 13138, §3(c), Sept. 30, 1999, 64 F.R. 53880, formerly set out as a note under section 14 of the Federal Advisory Committee Act in the Appendix to Title 5, Government Organization and Employees, revoked ''Section 5 and that part of section 6(f) of Executive Order 13010, as amended by section 3 of Executive Order 13025, Executive Order 13041, sections 1, 2, and that part of section 3 of Executive Order 13064, and Executive Order 13077, establishing the Advisory Committee to the President's Commission on Critical Infrastructure Protection''.]

EXECUTIVE ORDER NO. 13130

Ex. Ord. No. 13130, July 14, 1999, 64 F.R. 38535, which established the National Infrastructure Assurance Council, was revoked by Ex. Ord. No. 13231, §10(e)(iii), Oct. 16, 2001, 66 F.R. 53070, set out as a note under section 121 of Title 6, Domestic Security.

EX. ORD. NO. 13151. GLOBAL DISASTER INFORMATION NETWORK

Ex. Ord. No. 13151, Apr. 27, 2000, 65 F.R. 25619, as amended by Ex. Ord. No. 13284, §5, Jan. 23, 2003, 68 F.R. 4075, provided:

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in order to establish a Global Disaster Information Network to use information technology more effectively to reduce loss of life and property from natural and man-made disasters, it is hereby ordered as follows:

SECTION 1. *Policy.* (a) It is the policy of this Administration to use information technology more effectively to coordinate the Federal Government's collection and dissemination of information to appropriate response agencies and State governments to prepare for and respond to natural and man-made disasters (disasters). As a result of changing population demographics in our

coastal, rural, and urban areas over the past decades, the loss of life and property (losses) from disasters has nearly doubled. One of the ways the Federal Government can reduce these losses is to use technology more effectively to coordinate its collection and dissemination (hereafter referred to collectively as ''provision'') of information which can be used in both planning for and recovering from disasters. While many agencies provide disaster-related information, they may not always provide it in a coordinated manner. To improve the provision of disaster-related information, the agencies shall, as set out in this order, use information technology to coordinate the Federal Government's provision of information to prepare for, respond to, and recover from domestic disasters.

(b) It is also the policy of this Administration to use information technology and existing channels of disaster assistance to improve the Federal Government's provision of information that could be helpful to foreign governments preparing for or responding to foreign disasters. Currently, the United States Government provides disaster-related information to foreign governments and relief organizations on humanitarian grounds at the request of foreign governments and where appropriate. This information is supplied by Federal agencies on an ad hoc basis. To increase the effectiveness of our response to foreign disasters, agencies shall, where appropriate, use information technology to coordinate the Federal Government's provision of disaster-related information to foreign governments.

(c) To carry out the policies in this order, there is established the Global Disaster Information Network (Network). The Network is defined as the coordinated effort by Federal agencies to develop a strategy and to use existing technical infrastructure, to the extent permitted by law and subject to the availability of appropriations and under the guidance of the Interagency Coordinating Committee and the Committee Support Office, to make more effective use of information technology to assist our Government, and foreign governments where appropriate, by providing disaster-related information to prepare for and respond to disasters.

SEC. 2. *Establishment*. (a) There is established an Interagency Coordinating Committee (Committee) to provide leadership and oversight for the development of the Network. The Office of the Vice President, the Department of Commerce through the National Oceanic and Atmospheric Administration, and the Department of State, respectively, shall designate a representative to serve as Co-chairpersons of the Committee. The Committee membership shall comprise representatives from the following departments and agencies:

(1) Department of State;
(2) Department of Defense;
(3) Department of the Interior;
(4) Department of Agriculture;
(5) Department of Commerce;
(6) Department of Transportation;
(7) Department of Energy;
(8) Department of Homeland Security;
(9) Office of Management and Budget;
(10) Environmental Protection Agency;
(11) National Aeronautics and Space Administration;
(12) United States Agency for International Development;
(13) Federal Emergency Management Agency; and
(14) Central Intelligence Agency.

At the discretion of the Co-chairpersons of the Committee, other agencies may be added to the Committee membership. The Committee shall include an Executive Secretary to effect coordination between the Co-chairpersons of the Committee and the Committee Support Office.

(b) There is established a Committee Support Office (Support Office) to assist the Committee by developing plans and projects that would further the creation of the Network. The Support Office shall, at the request of the Co-chairpersons of the Committee, carry out tasks taken on by the Committee.

(c) The National Oceanic and Atmospheric Administration shall provide funding and administrative support for the Committee and the Support Office. To the extent permitted by law, agencies may provide support to the Committee and the Support Office to assist them in their work.

SEC. 3. *Responsibilities*. (a) The Committee shall:

(1) serve as the United States Government's single entity for all matters, both national and international, pertaining to the development and establishment of the Network;
(2) provide leadership and high-level coordination of Network activities;
(3) provide guidance for the development of Network strategies, goals, objectives, policies, and legislation;
(4) represent and advocate Network goals, objectives, and processes to their respective agencies and departments;
(5) provide manpower and material support for Network development activities;
(6) develop, delegate, and monitor interagency opportunities and ideas supporting the development of the Network; and
(7) provide reports, through the Co-chairpersons of the Committee, to the President as requested or at least annually.

(b) The Support Office shall:

(1) provide management and administrative support for the Committee;
(2) develop Network strategies, goals, objectives, policies, plans, and legislation in accordance with guidance provided by the Committee;
(3) consult with agencies, States, nongovernment organizations, and international counterparts in developing Network development tasks;
(4) develop and make recommendations concerning Network activities to the agencies as approved by the Committee; and
(5) participate in projects that promote the goals and objectives of the Network.

SEC. 4. *Implementation*. (a) The Committee, with the assistance of the Support Office, shall address national and international issues associated with the development of the Network within the context of:

(1) promoting the United States as an example and leader in the development and dissemination of disaster information, both domestically and abroad, and, to this end, seeking cooperation with foreign governments and international organizations;
(2) striving to include all appropriate stakeholders in the development of the Network; and
(3) facilitating the creation of a framework that involves public and private stakeholders in a partnership for sustained operations of the Network.

(b) Intelligence activities, as determined by the Director of the Central Intelligence Agency, as well as national security-related activities of the Department of Defense and of the Department of Energy, are exempt from compliance with this order.

SEC. 5. *Tribal Governments*. This order does not impose any requirements on tribal governments.

SEC. 6. *Judicial Review*. This order does not create any right or benefit, substantive or procedural, enforceable by law, by a party against the United States, its officers, its employees, or any other person.

§ 5195c. Critical infrastructures protection

(a) Short title

This section may be cited as the ''Critical Infrastructures Protection Act of 2001''.

(b) Findings

Congress makes the following findings:

(1) The information revolution has transformed the conduct of business and the operations of government as well as the infrastructure relied upon for the defense and national security of the United States.

(2) Private business, government, and the national security apparatus increasingly depend on an interdependent network of critical physical and information infrastructures, including telecommunications, energy, financial services, water, and transportation sectors.

(3) A continuous national effort is required to ensure the reliable provision of cyber and physical infrastructure services critical to maintaining the national defense, continuity of government, economic prosperity, and quality of life in the United States.

(4) This national effort requires extensive modeling and analytic capabilities for purposes of evaluating appropriate mechanisms to ensure the stability of these complex and interdependent systems, and to underpin policy recommendations, so as to achieve the continuous viability and adequate protection of the critical infrastructure of the Nation.

(c) Policy of the United States

It is the policy of the United States—

(1) that any physical or virtual disruption of the operation of the critical infrastructures of the United States be rare, brief, geographically limited in effect, manageable, and minimally detrimental to the economy, human and government services, and national security of the United States;

(2) that actions necessary to achieve the policy stated in paragraph (1) be carried out in a public-private partnership involving corporate and non-governmental organizations; and

(3) to have in place a comprehensive and effective program to ensure the continuity of essential Federal Government functions under all circumstances.

(d) Establishment of national competence for critical infrastructure protection

(1) Support of critical infrastructure protection and continuity by National Infrastructure Simulation and Analysis Center

There shall be established the National Infrastructure Simulation and Analysis Center (NISAC) to serve as a source of national competence to address critical infrastructure protection and continuity through support for activities related to counterterrorism, threat assessment, and risk mitigation.

(2) Particular support

The support provided under paragraph (1) shall include the following:

(A) Modeling, simulation, and analysis of the systems comprising critical infrastructures, including cyber infrastructure, telecommunications infrastructure, and physical infrastructure, in order to enhance understanding of the large-scale complexity of such systems and to facilitate modification of such systems to mitigate the threats to such systems and to critical infrastructures generally.

(B) Acquisition from State and local governments and the private sector of data necessary to create and maintain models of such systems and of critical infrastructures generally.

(C) Utilization of modeling, simulation, and analysis under subparagraph (A) to provide education and training to policymakers on matters relating to—

(i) the analysis conducted under that subparagraph;

(ii) the implications of unintended or unintentional disturbances to critical infrastructures; and

(iii) responses to incidents or crises involving critical infrastructures, including the continuity of government and private sector activities through and after such incidents or crises.

(D) Utilization of modeling, simulation, and analysis under subparagraph (A) to provide recommendations to policymakers, and to departments and agencies of the Federal Government and private sector persons and entities upon request, regarding means of enhancing the stability of, and preserving, critical infrastructures.

(3) Recipient of certain support

§ 5301. Congressional findings and declaration of purpose

(a) Critical social, economic, and environmental problems facing Nation's urban communities

The Congress finds and declares that the Nation's cities, towns, and smaller urban commu-

nities face critical social, economic, and environmental problems arising in significant measure from—

(1) the growth of population in metropolitan and other urban areas, and the concentration of persons of lower income in central cities;

(2) inadequate public and private investment and reinvestment in housing and other physical facilities, and related public and social services, resulting in the growth and persistence of urban slums and blight and the marked deterioration of the quality of the urban environment; and

(3) increasing energy costs which have seriously undermined the quality and overall effectiveness of local community and housing development activities.

(b) Establishment and maintenance of viable urban communities; systematic and sustained action by Federal, State, and local governments; expansion of and continuity in Federal assistance; increased private investment; streamlining programs and improvement of functioning of agencies; action to address consequences of scarce fuel supplies

The Congress further finds and declares that the future welfare of the Nation and the well-being of its citizens depend on the establishment and maintenance of viable urban communities as social, economic, and political entities, and require—

(1) systematic and sustained action by Federal, State, and local governments to eliminate blight, to conserve and renew older urban areas, to improve the living environment of low- and moderate-income families, and to develop new centers of population growth and economic activity;

(2) substantial expansion of and greater continuity in the scope and level of Federal assistance, together with increased private investment in support of community development activities;

(3) continuing effort at all levels of government to streamline programs and improve the functioning of agencies responsible for planning, implementing, and evaluating community development efforts; and

(4) concerted action by Federal, State, and local governments to address the economic and social hardships borne by communities as a consequence of scarce fuel supplies.

(c) Decent housing, suitable living environment, and economic opportunities for persons of low and moderate income; community development activities which may be supported by Federal assistance

The primary objective of this chapter and of the community development program of each grantee under this chapter is the development of viable urban communities, by providing decent housing and a suitable living environment and expanding economic opportunities, principally for persons of low and moderate income. Consistent with this primary objective, not less than 70 percent of the aggregate of the Federal assistance provided to States and units of general local government under section 5306 of this title and, if applicable, the funds received as a result of a guarantee or a grant under section 5308 of this title, shall be used for the support of activities that benefit persons of low and moderate income, and the Federal assistance provided in this chapter is for the support of community development activities which are directed toward the following specific objectives—

(1) the elimination of slums and blight and the prevention of blighting influences and the deterioration of property and neighborhood and community facilities of importance to the welfare of the community, principally persons of low and moderate income;

(2) the elimination of conditions which are detrimental to health, safety, and public welfare, through code enforcement, demolition, interim rehabilitation assistance, and related activities;

(3) the conservation and expansion of the Nation's housing stock in order to provide a decent home and a suitable living environment for all persons, but principally those of low and moderate income;

(4) the expansion and improvement of the quantity and quality of community services, principally for persons of low and moderate income, which are essential for sound community development and for the development of viable urban communities;

(5) a more rational utilization of land and other natural resources and the better arrangement of residential, commercial, industrial, recreational, and other needed activity centers;

(6) the reduction of the isolation of income groups within communities and geographical areas and the promotion of an increase in the diversity and vitality of neighborhoods through the spatial deconcentration of housing opportunities for persons of lower income and the revitalization of deteriorating or deteriorated neighborhoods;

(7) the restoration and preservation of properties of special value for historic, architectural, or esthetic reasons;

(8) the alleviation of physical and economic distress through the stimulation of private investment and community revitalization in areas with population outmigration or a stagnating or declining tax base; and

(9) the conservation of the Nation's scarce energy resources, improvement of energy efficiency, and the provision of alternative and renewable energy sources of supply.

It is the intent of Congress that the Federal assistance made available under this chapter not be utilized to reduce substantially the amount of local financial support for community development activities below the level of such support prior to the availability of such assistance.

(d) Consolidation of complex and overlapping Federal assistance programs into consistent system of Federal aid

It is also the purpose of this chapter to further the development of a national urban growth policy by consolidating a number of complex and overlapping programs of financial assistance to communities of varying sizes and needs into a consistent system of Federal aid which—

(1) provides assistance on an annual basis, with maximum certainty and minimum delay,

upon which communities can rely in their planning;

(2) encourages community development activities which are consistent with comprehensive local and areawide development planning;

(3) furthers achievement of the national housing goal of a decent home and a suitable living environment for every American family; and

(4) fosters the undertaking of housing and community development activities in a coordinated and mutually supportive manner by Federal agencies and programs, as well as by communities.

INCOME ELIGIBILITY FOR HOME AND CDBG PROGRAMS

Pub. L. 105–276, title V, § 590, Oct. 21, 1998, 112 Stat. 2651, provided that:

''(a) IN GENERAL.—The Secretary of Housing and Urban Development shall, for not less than 10 jurisdictions that are metropolitan cities or urban counties for purposes of title I of the Housing and Community Development Act of 1974 [42 U.S.C. 5301 et seq.], grant exceptions not later than 90 days after the date of the enactment of this Act [Oct. 21, 1998] for such jurisdictions that provide that—

''(1) for purposes of the HOME investment partnerships program under title II of the Cranston-Gonzalez National Affordable Housing Act [42 U.S.C. 12721 et seq.], the limitation based on percentage of median income that is applicable under section 104(10), 214(1)(A), or 215(a)(1)(A) [42 U.S.C. 12704(10), 12744(1)(A), 12745(a)(1)(A)] for any area of the jurisdiction shall be the numerical percentage that is specified in such section; and

''(2) for purposes of the community development block grant program under title I of the Housing and Community Development Act of 1974 [42 U.S.C. 5301 et seq.], the limitation based on percentage of median income that is applicable pursuant to section 102(a)(20) [42 U.S.C. 5302(a)(20)] for any area within the State or unit of general local government shall be the numerical percentage that is specified in subparagraph (A) of such section.

''(b) EFFECTIVE DATE.—This section shall take effect on the date of the enactment of this Act [Oct. 21, 1998].''

FINDINGS AND PURPOSE

Section 2 of Pub. L. 100–242 provided that:

''(a) FINDINGS.—The Congress finds that—

''(1) for the past 50 years, the Federal Government has taken the leading role in enabling the people of the Nation to be the best housed in the world, and recent reductions in Federal assistance have contributed to a deepening housing crisis for low- and moderate-income families;

''(2) the efforts of the Federal Government have included a system of specialized lending institutions, favorable tax policies, construction assistance, mortgage insurance, loan guarantees, secondary markets, and interest and rental subsidies, that have enabled people to rent or buy affordable, decent, safe, and sanitary housing; and

''(3) the tragedy of homelessness in urban and suburban communities across the Nation, involving a record number of people, dramatically demonstrates the lack of affordable residential shelter, and people living on the economic margins of our society (lower income families, the elderly, the working poor, and the deinstitutionalized) have few available alternatives for shelter.

''(b) PURPOSE.—The purpose of this Act [see Short Title of 1988 Amendment note above], therefore, is—

''(1) to reaffirm the principle that decent and affordable shelter is a basic necessity, and the general welfare of the Nation and the health and living standards of its people require the addition of new housing units to remedy a serious shortage of housing units for all Americans, particularly for persons of low and moderate income;

''(2) to make the distribution of direct and indirect housing assistance more equitable by providing Federal assistance for the less affluent people of the Nation;

''(3) to provide needed housing assistance for homeless people and for persons of low and moderate income who lack affordable, decent, safe, and sanitary housing; and

''(4) to reform existing programs to ensure that such assistance is delivered in the most efficient manner possible.''

BUDGET COMPLIANCE

Section 3 of Pub. L. 100–242 provided that:

''(a) IN GENERAL.—This Act and the amendments made by this Act [see Short Title of 1988 Amendment note above] may not be construed to provide for new budget authority, budget outlays, or new entitlement authority, for fiscal year 1988 in excess of the appropriate aggregate levels established by the concurrent resolution on the budget for such fiscal year for the programs authorized by this Act and the amendments made by this Act.

''(b) DEFINITIONS.—For purposes of this section, the terms 'budget authority', 'budget outlays', 'concurrent resolution on the budget', and 'entitlement authority' have the meanings given such terms in section 3 of the Congressional Budget Act of 1974 (2 U.S.C. 622).''

CREDIT LIMITATION

Section 4 of Pub. L. 100–242 provided that: ''Any new credit authority (as defined in section 3 of the Congressional Budget Act of 1974 [2 U.S.C. 622]) which is provided by this Act [see Short Title of 1988 Amendment note above], or by an amendment made by this Act, shall be effective only to such extent or in such amounts as are provided in appropriation Acts.''

LIMITATION ON SPENDING AUTHORITY

Section 5 of Pub. L. 100–242 provided that: ''Any new spending authority (as defined in section 401(c) of the Congressional Budget Act of 1974 [2 U.S.C. 651(c)]) which is provided by this Act, or by an amendment made by this Act [see Short Title of 1988 Amendment note above], shall be effective only to such extent or in such amounts as are provided in appropriation Acts.''

LIMITATION ON WITHHOLDING OR CONDITIONING OF ASSISTANCE

Section 817 of Pub. L. 93–383, as amended by Pub. L. 98–181, title III, § 302(c), Nov. 30, 1983, 97 Stat. 1206, provided that: ''Assistance provided for in this Act [see Short Title note above] the National Housing Act, [12 U.S.C. 1701 et seq.], the United States Housing Act of 1937 [42 U.S.C. 1437 et seq.], the Housing Act of 1949 [42 U.S.C. 1441 et seq.], the Demonstration Cities and Metropolitan Development Act of 1966 [see Short Title note set out under section 3331 of this title], the Housing and Urban Development Acts of 1965, 1968, 1969, and 1970 [see Short Title notes set out under section 1701 of Title 12, Banks and Banking], and section 17 of the United States Housing Act of 1937 [42 U.S.C. 1437*o*] shall not be withheld or made subject to conditions or preference by reason of the tax-exempt status of bonds or other obligations issued or to be issued to provide financing for use in connection with such assistance, except where otherwise expressly provided or authorized by law.''

Such term also includes a State or a local public body or agency (as defined in section 4512[1] of this title), community association, or other entity, which is approved by the Secretary for the purpose of providing public facilities or services to a new community as part of a program meeting the eligibility standards of section 4513[1] of this title or title IV of the Housing and Urban Development Act of 1968 [42 U.S.C. 3901 et seq.].

Any unit of general local government that becomes eligible to be classified as a metropolitan city, and was not classified as a metropolitan city in the immediately preceding fiscal year, may, upon submission of written notification to the Secretary, defer its classification as a metropolitan city for all purposes under this chapter, if it elects to have its population included in an urban county under subsection (d) of this section. Notwithstanding the second sentence of this paragraph, a city may elect not to retain its classification as a metropolitan city. Any city classified as a metropolitan city pursuant to this paragraph, and that no longer qualifies as a metropolitan city in a fiscal year beginning after fiscal year 1989, shall retain its classification as a metropolitan city for such fiscal year and the succeeding fiscal year, except that in such succeeding fiscal year (A) the amount of the grant to such city shall be 50 percent of the amount calculated under section 5306(b) of this title; and (B) the remaining 50 percent shall be added to the amount allocated under section 5306(d) of this title to the State in which the city is located and the city shall be eligible in such succeeding fiscal year to receive a distribution from the State allocation under section 5306(d) of this title as increased by this sentence. Any metropolitan city that elects to relinquish its classification under the preceding sentence and whose port authority shipped at least 35,000,000 tons of cargo in 1988, of which iron ore made up at least half, shall not receive, in any fiscal year, a total amount of assistance under section 5306 of this title from the urban county recipient that is less than the city would have received if it had not relinquished the classification under the preceding sentence.

In the case of States receiving grants pursuant to section 5306(d) of this title, the statement of projected use of funds shall consist of the method by which the States will distribute funds to units of general local government.

(2) In order to permit public examination and appraisal of such statements, to enhance the public accountability of grantees, and to facilitate coordination of activities with different levels of government, the grantee shall in a timely manner—

(A) furnish citizens or, as appropriate, units of general local government information concerning the amount of funds available for proposed community development and housing activities and the range of activities that may be undertaken, including the estimated amount proposed to be used for activities that will benefit persons of low and moderate income and the plans of the grantee for minimizing displacement of persons as a result of activities assisted with such funds and to assist persons actually displaced as a result of such activities;

(C) hold one or more public hearings to obtain the views of citizens on community development and housing needs;

(D) provide citizens or, as appropriate, units of general local government with reasonable access to records regarding the past use of funds received under section 5306 of this title by the grantee; and

(C) provides for technical assistance to groups representative of persons of low and moderate income that request such assistance in developing proposals with the level and type of assistance to be determined by the grantee;

(5) the grantee will not attempt to recover any capital costs of public improvements assisted in whole or part under section 5306 of this title or with amounts resulting from a guarantee under section 5308 of this title by assessing any amount against properties owned and occupied by persons of low and moderate income, including any fee charged or assessment made as a condition of obtaining access to such public improvements, unless (A) funds received under section 5306 of this title are used to pay the proportion of such fee or assessment that relates to the capital costs of such public improvements that are financed from revenue sources other than under this chapter; or (B) for purposes of assessing any amount against properties owned and occupied by persons of moderate income, the grantee certifies to the Secretary that it lacks sufficient funds received under section 5306 of this

title to comply with the requirements of subparagraph (A); and

Such report shall also be made available to the citizens in each grantee's jurisdiction in sufficient time to permit such citizens to comment on such report prior to its submission, and in such manner and at such times as the grantee may determine. The grantee's report shall indicate its programmatic accomplishments, the nature of and reasons for changes in the grantee's program objectives, indications of how the grantee would change its programs as a result of its experiences, and an evaluation of the extent to which its funds were used for activities that benefited low- and moderate-income persons. The report shall include a summary of any com-

ments received by the grantee from citizens in its jurisdiction respecting its program. The Secretary shall encourage and assist national associations of grantees eligible under section 5306(d)(2)(B) of this title, national associations of States, and national associations of units of general local government in nonentitlement areas to develop and recommend to the Secretary, within one year after November 30, 1983, uniform recordkeeping, performance reporting, and evaluation reporting, and auditing requirements for such grantees, States, and units of general local government, respectively. Based on the Secretary's approval of these recommendations, the Secretary shall establish such requirements for use by such grantees, States, and units of general local government. The Secretary shall, at least on an annual basis, make such reviews and audits as may be necessary or appropriate to determine—

(1) in the case of grants made under section 5306(b) or section 5306(d)(2)(B) of this title, whether the grantee has carried out its activities and, where applicable, its housing assistance plan in a timely manner, whether the grantee has carried out those activities and its certifications in accordance with the requirements and the primary objectives of this chapter and with other applicable laws, and whether the grantee has a continuing capacity to carry out those activities in a timely manner; and

(2) in the case of grants to States made under section 5306(d) of this title, whether the State has distributed funds to units of general local government in a timely manner and in conformance to the method of distribution described in its statement, whether the State has carried out its certifications in compliance with the requirements of this chapter and other applicable laws, and whether the State has made such reviews and audits of the units of general local government as may be necessary or appropriate to determine whether they have satisfied the applicable performance criteria described in paragraph (1) of this subsection.

The Secretary may make appropriate adjustments in the amount of the annual grants in accordance with the Secretary's findings under this subsection. With respect to assistance made available to units of general local government under section 5306(d) of this title, the Secretary may adjust, reduce, or withdraw such assistance, or take other action as appropriate in accordance with the Secretary's reviews and audits under this subsection, except that funds already expended on eligible activities under this chapter shall not be recaptured or deducted from future assistance to such units of general local government.

(f) Audit of grantees by General Accounting Office; access to books, accounts, records, etc., by representatives of General Accounting Office

Insofar as they relate to funds provided under this chapter, the financial transactions of recipients of such funds may be audited by the General Accounting Office under such rules and regulations as may be prescribed by the Comptroller General of the United States. The representatives of the General Accounting Office shall have access to all books, accounts, records, reports, files, and other papers, things, or property belonging to or in use by such recipients pertaining to such financial transactions and necessary to facilitate the audit.

(g) Environmental protection measures applicable for release of funds to applicants for projects; issuance of regulations by Secretary subsequent to consultation with Council on Environmental Quality; request and certification to Secretary for approval of release of funds; form, contents and effect of certification

The Secretary shall issue regulations to carry out this subsection only after consultation with the Council on Environmental Quality.

(2) The Secretary shall approve the release of funds for projects subject to the procedures authorized by this subsection only if, at least fifteen days prior to such approval and prior to any commitment of funds to such projects other than for purposes authorized by section 5305(a)(12) of this title or for environmental studies, the recipient of assistance under this chapter has submitted to the Secretary a request for such release accompanied by a certification which meets the requirements of paragraph (3). The Secretary's approval of any such certification shall be deemed to satisfy his responsibilities under the National Environmental Policy Act of 1969 [42 U.S.C. 4321 et seq.] and such other provisions of law as the regulations of the Secretary specify insofar as those responsibilities relate to the releases of funds for projects to be carried out pursuant thereto which are covered by such certification.

(3) A certification under the procedures authorized by this subsection shall—

(A) be in a form acceptable to the Secretary,

(B) be executed by the chief executive officer or other officer of the recipient of assistance under this chapter qualified under regulations of the Secretary,

(4) In the case of grants made to States pursuant to section 5306(d) of this title, the State shall perform those actions of the Secretary described in paragraph (2) and the performance of such actions shall be deemed to satisfy the Secretary's responsibilities referred to in the second sentence of such paragraph.

(1) Units of general local government receiving assistance under this chapter may receive funds, in one payment, in an amount not to exceed the total amount designated in the grant (or, in the case of a unit of general local government receiving a distribution from a State pursuant to section 5306(d) of this title, not to exceed the total amount of such distribution) for use in establishing a revolving loan fund which is to be established in a private financial institution and which is to be used to finance rehabilitation activities assisted under this chapter. Rehabilitation activities authorized under this section shall begin within 45 days after receipt of such payment and substantial disbursements from such fund must begin within 180 days after receipt of such payment.

(2) The Secretary shall establish standards for such cash payments which will insure that the deposits result in appropriate benefits in support of the recipient's rehabilitation program. These standards shall be designed to assure that the benefits to be derived from the local program include, at a minimum, one or more of the following elements, or such other criteria as determined by the Secretary—

(A) leverage of community development block grant funds so that participating financial institutions commit private funds for loans in the rehabilitation program in amounts substantially in excess of deposit of community development funds;

(B) commitment of private funds for rehabilitation loans at below-market interest rates or with repayment periods lengthened or at higher risk than would normally be taken;

(j) Retention of program income; condition of distribution

Notwithstanding any other provision of law, any unit of general local government may retain any program income that is realized from any grant made by the Secretary, or any amount distributed by a State, under section 5306 of this title if (1) such income was realized after the initial disbursement of the funds received by such unit of general local government under such section; and (2) such unit of general local government has agreed that it will utilize the program income for eligible community development activities in accordance with the provisions of this chapter; except that the Secretary may, by regulation, exclude from consideration as program income any amounts determined to be so small that compliance with this subsection creates an unreasonable administrative burden on the unit of general local government. A State may require as a condition of any amount distributed by such State under section 5306(d) of this title that a unit of general local government shall pay to such State any such income to be used by such State to fund additional eligible community development activities, except that such State shall waive such condition to the extent such income is applied to continue the activity from which such income was derived.

(k) Provision of benefits to displaced persons

Each grantee shall provide for reasonable benefits to any person involuntarily and permanently displaced as a result of the use of assistance received under this chapter to acquire or substantially rehabilitate property.

***(l)* Protection of individuals engaging in nonviolent civil rights demonstrations**

SECTION REFERRED TO IN OTHER SECTIONS

This section is referred to in sections 5304, 5306, 5307, 5308, 5318 of this title; title 12 sections 4707, 4712.

§ 5306. Allocation and distribution of funds

(a) Amounts allocated to Indian tribes, discretionary fund, and metropolitan cities and urban counties; limitations on amount of annual grants

(1) For each fiscal year, of the amount approved in an appropriation Act under section 5303 of this title for grants in any year (excluding the amounts provided for use in accordance with section 5307 of this title), the Secretary shall reserve for grants to Indian tribes 1 percent of the amount appropriated under such section. The Secretary shall provide for distribution of amounts under this paragraph to Indian tribes on the basis of a competition conducted pursuant to specific criteria for the selection of Indian tribes to receive such amounts. The criteria shall be contained in a regulation promulgated by the Secretary after notice and public comment. Notwithstanding any other provision of this Act, such grants to Indian tribes shall not be subject to the requirements of section 5304 of this title, except subsections (f), (g), and (k) of such section.

(2) After reserving such amounts for Indian tribes, the Secretary shall allocate amounts provided for use under section 5307 of this title.

(3) Of the amount remaining after allocations pursuant to paragraphs (1) and (2), 70 percent shall be allocated by the Secretary to metropolitan cities and urban counties. Except as otherwise specifically authorized, each metropolitan city and urban county shall be entitled to an annual grant from such allocation in an amount not exceeding its basic amount computed pursuant to paragraph (1) or (2) of subsection (b) of this section.

(b) Computation of amount allocated to metropolitan cities and urban counties

(1) The Secretary shall determine the amount to be allocated to each metropolitan city which shall be the greater of an amount that bears the same ratio to the allocation for all metropolitan areas as either—

(A) the average of the ratios between—

(i) the population of that city and the population of all metropolitan areas;

(ii) the extent of poverty in that city and the extent of poverty in all metropolitan areas; and

(iii) the extent of housing overcrowding in that city and the extent of housing overcrowding in all metropolitan areas; or

(B) the average of the ratios between—

(i) the extent of growth lag in that city and the extent of growth lag in all metropolitan cities;

(ii) the extent of poverty in that city and the extent of poverty in all metropolitan areas; and

(iii) the age of housing in that city and the age of housing in all metropolitan areas.

(2) The Secretary shall determine the amount to be allocated to each urban county, which shall be the greater of an amount that bears the same ratio to the allocation for all metropolitan areas as either—

(A) the average of the ratios between—

(i) the population of that urban county and the population of all metropolitan areas;

(ii) the extent of poverty in that urban county and the extent of poverty in all metropolitan areas; and

(iii) the extent of housing overcrowding in that urban county and the extent of housing overcrowding in all metropolitan areas; or

(B) the average of the ratios between—

(i) the extent of growth lag in that urban county and the extent of growth lag in all metropolitan cities and urban counties;

(ii) the extent of poverty in that urban county and the extent of poverty in all metropolitan areas; and

(iii) the age of housing in that urban county and the age of housing in all metropolitan areas.

(3) In determining the average of ratios under paragraphs (1)(A) and (2)(A), the ratio involving the extent of poverty shall be counted twice, and each of the other ratios shall be counted once; and in determining the average of ratios under paragraphs (1)(B) and (2)(B), the ratio involving the extent of growth lag shall be counted once, the ratio involving the extent of poverty shall be counted one and one-half times, and the ratio involving the age of housing shall be counted two and one-half times.

(4) In computing amounts or exclusions under this section with respect to any urban county, there shall be excluded units of general local government located in the county the populations of which are not counted in determining the eligibility of the urban county to receive a grant under this subsection, except that there shall be included any independent city (as defined by the Bureau of the Census) which—

(A) is not part of any county;

(B) is not eligible for a grant pursuant to subsection (b)(1) of this section;

(C) is contiguous to the urban county;

(D) has entered into cooperation agreements with the urban county which provide that the urban county is to undertake or to assist in the undertaking of essential community development and housing assistance activities with respect to such independent city; and

(E) is not included as a part of any other unit of general local government for purposes of this section.

Any independent city which is included in any fiscal year for purposes of computing amounts pursuant to the preceding sentence shall not be eligible to receive assistance under subsection (d) of this section with respect to such fiscal year.

(5) In computing amounts under this section with respect to any urban county, there shall be included all of the area of any unit of local government which is part of, but is not located entirely within the boundaries of, such urban county if the part of such unit of local government which is within the boundaries of such urban county would otherwise be included in computing the amount for such urban county under this section, and if the part of such unit of local government which is not within the boundaries of such urban county is not included as a part of any other unit of local government for the purpose of this section. Any amount received by such urban county under this section may be used with respect to the part of such unit of local government which is outside the boundaries of such urban county.

(6)(A) Where data are available, the amount determined under paragraph (1) for a metropolitan city that has been formed by the consolidation of one or more metropolitan cities with an urban county shall be equal to the sum of the amounts that would have been determined under paragraph (1) for the metropolitan city or cities and the balance of the consolidated government, if such consolidation had not occurred. This paragraph shall apply only to any consolidation that—

(i) included all metropolitan cities that received grants under this section for the fiscal year preceding such consolidation and that were located within the urban county;

(ii) included the entire urban county that received a grant under this section for the fiscal year preceding such consolidation; and

(iii) took place on or after January 1, 1983.

(B) The population growth rate of all metropolitan cities referred to in section 5302(a)(12) of this title shall be based on the population of (i) metropolitan cities other than consolidated governments the grant for which is determined under this paragraph; and (ii) cities that were metropolitan cities before their incorporation into consolidated governments. For purposes of calculating the entitlement share for the balance of the consolidated government under this paragraph, the entire balance shall be considered to have been an urban county.

(c) Reallocation of undistributed funds within same metropolitan area as original allocation; amount and calculation of reallocation grant; disaster relief

(1) Except as provided in paragraphs (2) and (4), any amounts allocated to a metropolitan city or an urban county pursuant to the preceding provisions of this section which are not received by the city or county for a fiscal year because of failure to meet the requirements of subsection (a), (b), (c), or (d) of section 5304 of this title, or which become available as a result of actions under section 5304(e) or 5311 of this title, shall be reallocated in the succeeding fiscal year to the other metropolitan cities and urban counties in the same metropolitan area which certify to the satisfaction of the Secretary that they would be adversely affected by the loss of such amounts from the metropolitan area. The amount of the share of funds reallocated under this paragraph for any metropolitan city or urban county shall bear the same ratio to the total of such reallocated funds in the metropolitan area as the amount of funds awarded to the city or county for the fiscal year in which the reallocated funds become available bears to the total amount of funds awarded to all metropolitan cities and urban counties in the same metropolitan area for that fiscal year, except that—

(A) in determining the amounts awarded to cities or counties for purposes of calculating shares pursuant to this sentence, there shall be excluded from the award of any city or county any amounts which become available as a result of actions against such city or county under section 5311 of this title;

(B) in reallocating amounts resulting from an action under section 5304(e) of this title or section 5311 of this title, a city or county against whom any such action was taken in a fiscal year shall be excluded from a calcula-

tion of share for purposes of reallocating, in the succeeding year, the amounts becoming available as a result of such action; and

(C) in no event may the share of reallocated funds for any metropolitan city or urban county exceed 25 per centum of the amount awarded to the city or county under subsection (b) of this section for the fiscal year in which the reallocated funds under this paragraph become available.

Any amounts allocated under subsection (b) of this section which become available for reallocation and for which no metropolitan city or urban county qualifies under this paragraph shall be added to amounts available for allocation under such subsection (b) of this section in the succeeding fiscal year.

(2) Notwithstanding any other provision of this chapter, the Secretary shall make grants from amounts authorized for use under subsection (b) of this section by the Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1981, in accordance with the provisions of this chapter which governed grants with respect to such amounts, as such provisions existed prior to October 1, 1981, except that any such amounts which are not obligated before January 1, 1982, shall be reallocated in accordance with paragraph (1).

(3) Notwithstanding the provisions of paragraph (1), the Secretary may upon request transfer responsibility to any metropolitan city for the administration of any amounts received, but not obligated, by the urban county in which such city is located if (A) such city was an included unit of general local government in such county prior to the qualification of such city as a metropolitan city; (B) such amounts were designated and received by such county for use in such city prior to the qualification of such city as a metropolitan city; and (C) such city and county agree to such transfer of responsibility for the administration of such amounts.

(4)(A) Notwithstanding paragraph (1), in the event of a major disaster declared by the President under the Robert T. Stafford Disaster Relief and Emergency Assistance Act [42 U.S.C. 5121 et seq.], the Secretary shall make available, to metropolitan cities and urban counties located or partially located in the areas affected by the disaster, any amounts that become available as a result of actions under section 5304(e) or 5311 of this title.

(B) In using any amounts that become available as a result of actions under section 5304(e) or 5311 of this title, the Secretary shall give priority to providing emergency assistance under this paragraph.

(C) The Secretary may provide assistance to any metropolitan city or urban county under this paragraph only to the extent necessary to meet emergency community development needs, as the Secretary shall determine (subject to subparagraph (D)), of the city or county resulting from the disaster that are not met with amounts otherwise provided under this chapter, the Robert T. Stafford Disaster Relief and Emergency Assistance Act [42 U.S.C. 5121 et seq.], and other sources of assistance.

(D) Amounts provided to metropolitan cities and urban counties under this paragraph may be used only for eligible activities under section 5305 of this title, and in implementing this section, the Secretary shall evaluate the natural hazards to which any permanent replacement housing is exposed and shall take appropriate action to mitigate such hazards.

(E) The Secretary shall provide for applications (or amended applications and statements under section 5304 of this title) for assistance under this paragraph.

(F) A metropolitan city or urban county eligible for assistance under this paragraph may receive such assistance only in each of the fiscal years ending during the 3-year period beginning on the date of the declaration of the disaster by the President.

(G) This paragraph may not be construed to require the Secretary to reserve any amounts that become available as a result of actions under section 5304(e) or 5311 of this title for assistance under this paragraph if, when such amounts are to be reallocated under paragraph (1), no metropolitan city or urban county qualifies for assistance under this paragraph.

(d) Allocation among States for nonentitlement areas; amount and calculation of grants; distributions by State or Secretary; certain distributions made pursuant to prior provisions; certifications required by Governor enumerated; responsibility for administration and administrative expenses; reallocation; certifications required of units of general local government in nonentitlement areas; applicability of this chapter and other law

(1) Of the amount approved in an appropriation Act under section 5303 of this title that remains after allocations pursuant to paragraphs (1) and (2) of subsection (a) of this section, 30 per centum shall be allocated among the States for use in nonentitlement areas. The allocation for each State shall be the greater of an amount that bears the same ratio to the allocation for such areas of all States available under this subparagraph as either—

(A) the average of the ratios between—

(i) the population of the nonentitlement areas in that State and the population of the nonentitlement areas of all States;

(ii) the extent of poverty in the nonentitlement areas in that State and the extent of poverty in the nonentitlement areas of all States; and

(iii) the extent of housing overcrowding in the nonentitlement areas in that State and the extent of housing overcrowding in the nonentitlement areas of all States; or

(B) the average of the ratios between—

(i) the age of housing in the nonentitlement areas in that State and the age of housing in the nonentitlement areas of all States;

(ii) the extent of poverty in the nonentitlement areas in that States and the extent of poverty in the nonentitlement areas of all States; and

(iii) the population of the nonentitlement areas in that State and the population of the nonentitlement areas of all States.

In determining the average of the ratios under subparagraph (A) the ratio involving the extent

of poverty shall be counted twice and each of the other ratios shall be counted once; and in determining the average of the ratios under subparagraph (B), the ratio involving the age of housing shall be counted two and one-half times, the ratio involving the extent of poverty shall be counted one and one-half times, and the ratio involving population shall be counted once. The Secretary shall, in order to compensate for the discrepancy between the total of the amounts to be allocated under this paragraph and the total of the amounts available under such paragraph, make a pro rata reduction of each amount allocated to the nonentitlement areas in each State under such paragraph so that the nonentitlement areas in each State will receive an amount which represents the same percentage of the total amount available under such paragraph as the percentage which the nonentitlement areas of the same State would have received under such paragraph if the total amount available under such paragraph had equaled the total amount which was allocated under such paragraph.

(2)(A) Amounts allocated under paragraph (1) shall be distributed to units of general local government located in nonentitlement areas of the State to carry out activities in accordance with the provisions of this chapter—

(i) by a State that has elected, in such manner and at such time as the Secretary shall prescribe, to distribute such amounts, consistent with the statement submitted under section 5304(a) of this title; or

(ii) by the Secretary, in any case described in subparagraph (B), for use by units of general local government in accordance with paragraph (3)(B).

Any election to distribute funds made after the close of fiscal year 1984 is permanent and final. Notwithstanding any provision of this chapter, the Secretary shall make grants from amounts authorized for use in nonentitlement areas by the Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1981, in accordance with the provisions of this chapter which governed grants with respect to such amounts, as such provisions existed prior to October 1, 1981. Any amounts under the preceding sentence (except amounts for which preapplications have been approved by the Secretary prior to October 1, 1981, and which have been obligated by January 1, 1982) which are or become available for obligation after fiscal year 1981 shall be available for distribution in the State in which the grants from such amounts were made, by the State or by the Secretary, whichever is distributing the State allocation in the fiscal year in which such amounts are or become available.

(B) The Secretary shall distribute amounts allocated under paragraph (1) if the State has not elected to distribute such amounts.

(C) To receive and distribute amounts allocated under paragraph (1), the State must certify that it, with respect to units of general local government in nonentitlement areas—

(i) engages or will engage in planning for community development activities;

(ii) provides or will provide technical assistance to units of general local government in connection with community development programs;

(iii) will not refuse to distribute such amounts to any unit of general local government on the basis of the particular eligible activity selected by such unit of general local government to meet its community development needs, except that this clause may not be considered to prevent a State from establishing priorities in distributing such amounts on the basis of the activities selected; and

(iv) has consulted with local elected officials from among units of general local government located in nonentitlement areas of that State in determining the method of distribution of funds required by subparagraph (A).

(D) To receive and distribute amounts allocated under paragraph (1), the State shall certify that each unit of general local government to be distributed funds will be required to identify its community development and housing needs, including the needs of low and moderate income persons, and the activities to be undertaken to meet such needs.

(3)(A) If the State receives and distributes such amounts, it shall be responsible for the administration of funds so distributed. The State shall pay from its own resources all administrative expenses incurred by the State in carrying out its responsibilities under this chapter or section 1437*o*(e)(1)[1] of this title, except that from the amounts received for distribution in nonentitlement areas, the State may deduct an amount to cover such expenses and its administrative expenses under section 1706e[1] of title 12 not to exceed the sum of $100,000 plus 50 percent of any such expenses under this chapter in excess of $100,000. Amounts deducted in excess of $100,000 shall not exceed 2 percent of the amount so received.

(B) If the Secretary distributes such amounts, the distribution shall be made in accordance with determinations of the Secretary pursuant to statements submitted and the other requirements of section 5304 of this title (other than subsection (c)) and in accordance with regulations and procedures prescribed by the Secretary.

(C) Any amounts allocated for use in a State under paragraph (1) that are not received by the State for any fiscal year because of failure to meet the requirements of subsection (a), (b), or (d) of section 5304 of this title or to make the certifications required in subparagraphs (C) and (D) of paragraph (2), or that become available as a result of actions against the State under section 5304(e) or 5311 of this title, shall be added to amounts allocated to all States under paragraph (1) for the succeeding fiscal year.

(D) Any amounts allocated for use in a State under paragraph (1) that become available as a result of actions under section 5304(e) or 5311 of this title against units of general local government in nonentitlement areas of the State or as a result of the closeout of a grant made by the Secretary under this section in nonentitlement areas of the State shall be added to amounts allocated to the State under paragraph (1) for the

fiscal year in which the amounts become so available.

(4) Any combination of units of general local governments may not be required to obtain recognition by the Secretary pursuant to section 5302(a)(1) of this title to be treated as a single unit of general local government for purposes of this subsection.

(5)[2] From the amounts received under paragraph (1) for distribution in nonentitlement areas, the State may deduct an amount, not to exceed 1 percent of the amount so received, to provide technical assistance to local governments and nonprofit program recipients.

(5)[2] No amount may be distributed by any State or the Secretary under this subsection to any unit of general local government located in a nonentitlement area unless such unit of general local government certifies that—

(A) it will minimize displacement of persons as a result of activities assisted with such amounts;

(B) its program will be conducted and administered in conformity with the Civil Rights Act of 1964 [42 U.S.C. 2000a et seq.] and the Fair Housing Act [42 U.S.C. 3601 et seq.], and that it will affirmatively further fair housing;

(C) it will provide for opportunities for citizen participation, hearings, and access to information with respect to its community development program that are comparable to those required of grantees under section 5304(a)(2) of this title; and

(D) it will not attempt to recover any capital costs of public improvements assisted in whole or part under this section or with amounts resulting from a guarantee under section 5308 of this title by assessing any amount against properties owned and occupied by persons of low and moderate income, including any fee charged or assessment made as a condition of obtaining access to such public improvements, unless (i) funds received under this section are used to pay the proportion of such fee or assessment that relates to the capital costs of such public improvements that are financed from revenue sources other than under this chapter; or (ii) for purposes of assessing any amount against properties owned and occupied by persons of moderate income, the grantee certifies to the Secretary or such State, as the case may be, that it lacks sufficient funds received under this section to comply with the requirements of clause (i).

(6) Any activities conducted with amounts received by a unit of general local government under this subsection shall be subject to the applicable provisions of this chapter and other Federal law in the same manner and to the same extent as activities conducted with amounts received by a unit of general local government under subsection (a) of this section.

(e) Qualification or submission dates, and finality and conclusiveness of computations and determinations

The Secretary may fix such qualification or submission dates as he determines are necessary to permit the computations and determinations required by this section to be made in a timely manner, and all such computations and determinations shall be final and conclusive.

(f) Pro rata adjustment of entitlement amounts

If the total amount available for distribution in any fiscal year to metropolitan cities and urban counties under this section is insufficient to provide the amounts to which metropolitan cities and urban counties would be entitled under subsection (b) of this section, and funds are not otherwise appropriated to meet the deficiency, the Secretary shall meet the deficiency through a pro rata reduction of all amounts determined under subsection (b) of this section. If the total amount available for distribution in any fiscal year to metropolitan cities and urban counties under this section exceeds the amounts to which metropolitan cities and urban counties would be entitled under subsection (b) of this section, the Secretary shall distribute the excess through a pro rata increase of all amounts determined under subsection (b) of this section.

§ 5308. Guarantee and commitment to guarantee loans for acquisition of property

(a) Authority of Secretary; issuance of obligations by eligible public entities or designated public agencies; form, denomination, maturity, and conditions of notes or other obligations; percentage allocation requirements

The Secretary is authorized, upon such terms and conditions as the Secretary may prescribe, to guarantee and make commitments to guarantee, only to such extent or in such amounts as provided in appropriation Acts, the notes or other obligations issued by eligible public entities, or by public agencies designated by such eligible public entities, for the purposes of financing (1) acquisition of real property or the rehabilitation of real property owned by the eligible public entity (including such related expenses as the Secretary may permit by regulation); (2) housing rehabilitation; (3) economic development activities permitted under paragraphs (14), (15), and (17) of section 5305(a) of this title; (4) construction of housing by nonprofit organizations for homeownership under section 1437*o*(d)[1] of this title or title VI of the Housing and Community Development Act of 1987; (5) the acquisition, construction, reconstruction, or installation of public facilities (except for buildings for the general conduct of government); or (6) in the case of colonias (as such term is defined in section 916 of the Cranston-Gonzalez National Affordable Housing Act), public works and site or other improvements. A guarantee under this section may be used to assist a grantee in obtaining financing only if the grantee has made efforts to obtain such financing without the use of such guarantee and cannot complete such financing consistent with the timely execution of the program plans without such guarantee. Notes or other obligations guaranteed pursuant to this section shall be in such form and denominations, have such maturities, and be subject to such conditions as may be prescribed by regulations issued by the Secretary. The Secretary may not deny a guarantee under this section on the basis of the proposed repayment period for the note or other obligation, unless the period is more than 20 years or the Secretary determines that the period causes the guarantee to constitute an unacceptable financial risk. Notwithstanding any other provision of law and subject only to the absence of qualified applicants or proposed activities and to the authority provided in this section, to the extent approved or provided in appropriation Acts, the Secretary shall enter into commitments to guarantee notes and obligations under this section with an aggregate principal amount of $2,000,000,000 for fiscal year 1993 and $2,000,000,000 for fiscal year 1994. Of the amount approved in any appropriation Act for guarantees under this section in any fiscal year, the Secretary shall allocate 70 percent for guarantees for metropolitan cities, urban counties, and Indian tribes and 30 percent for guarantees for units of general local government in nonentitlement areas. The Secretary may waive the percentage requirements of the preceding sentence in any fiscal year only to the extent that there is an absence of qualified applicants or proposed activities from metropolitan cities, urban counties, and Indian tribes or units of general local government in nonentitlement areas.

[1] See References in Text note below.

(c) Payment of principal, interest and costs

Notwithstanding any other provision of this chapter, grants allocated to an issuer pursuant to this chapter (including program income derived therefrom) are authorized for use in the payment of principal and interest due (including such servicing, underwriting, or other costs as may be specified in regulations of the Secretary) on the notes or other obligations guaranteed pursuant to this section.

The obligations issued under this subsection shall have such maturities and bear such rate or rates of interest as shall be determined by the Secretary of the Treasury. The Secretary may also, to the extent approved in appropriation Acts, assist the issuer of a note or other obligation guaranteed under this section in the payment of all or a portion of the principal and interest amount due under the note or other obligation, if the Secretary determines that the issuer is unable to pay the amount because of circumstances of extreme hardship beyond the control of the issuer.
