Notes

The figures in the table are based on tabulations of all individual income tax returns filed and processed through the IRS Individual Master File (IMF) during calendar year 2007.

The proposal extends tax benefits to significant numbers of tax units that did not file during calendar year 2007. The estimates for these units are based on the characteristics of filing units and are therefore subject to greater standard errors and bias.

Classification by state was based on the address used on the return. Usually this address is the taxpayer's home address. However, some taxpayers may have used the address of a tax attorney or accountant, or a place of business, and that address could be in a different state than the taxpayer's home.
