----------	-----------	-------------------	---------------------	------------------------

TEXAS, Mid - South

NUECES COUNTY --- 2.7 NNE GARDENDALE [27.74, -97.37]

10/19/07 03:30 CST	5K	Thunderstorm Wind (EG 48 kt)
10/19/07 03:30 CST	0	Source: NWS Storm Survey

A thunderstorm produced wind damage near the intersection of Ocean Drive and Robert in Corpus Christi. A section of styrofoam roof at the high rise Catalina Condominiums was blown off. As a result, rain water seeped into several of the units. A small air conditioning unit was also blown off the roof. Debris from the roof closed Ocean Drive for several hours. Two large tree limbs were also blown down at the Seaside Cemetary. A NWS storm survey was inconclusive as to whether the damage was caused by a small microburst or elevated funnel cloud. Wind speeds were estimated around 55 mph. No other damage was found around this developed intersection.
