SCHOOLS GET CASH FOR CONTAINERS

HONOLULU - Students across the state can earn money for their school just by recycling. The Hawaii State Department of Health is looking for every public school to participate in the 2004 School Recycling Challenge by taking empty metal, glass and plastic beverage containers to participating recyclers (list attached). Three schools will win \$10,000!

"This is a great way to teach children the value of recycling and also serve to familiarize participants with the location of recycling centers in their area," said Larry Lau, Deputy Director of Environmental Health. "Since the contest runs from November 1st through December 15th it will also help clear a large number of unlabeled beverage containers out of the waste stream before the beverage container law goes into effect January 1st."

Students and their parents take beverage containers directly to sites run by participating recyclers and tell the staff to credit their bottles and cans to the school of their choice. Grand prizes of \$10,000 will be awarded to one large, medium and small school that recycle the most containers. Prizes will be awarded for the top six finishers in each category.

The 2004 School Recycling Challenge is being used to help implement the State's new Beverage Container Deposit Bottle Law which becomes effective January 1, 2005. During the transition period beginning Nov. 1, 2004, as stores begin to bring in labeled containers for sale, the School Recycling Challenge encourages people to turn in their unlabeled beverage containers now to help schools and get into the habit of recycling.

Schools must sign-up with the Department of Health to participate. Registration forms and more information are available at www.hawaii.gov/health.
