Donald A. B. Lindberg, M.D.  
Director Nat'l Lib of Medicine  
National Institutes of Health  
Bethesda, MD. 20894

Dear Don:

My brief exposure to the life in Washington left me quite impressed with how temporary 'permanent' plans can be. I detected some slight budgetary problems in the invitation to participate in the Regional Medical Programs meeting. This would be enjoyable but not to the extent that we would spend money to attend. Not a sour note just the inevitable competition between priorities, with which you are well acquainted. It is a great idea and budgetary problems aside, anything which I can do will be contributed promptly. Don't be concerned if money is too short for travel.

We are about to make our annual trek to Longmont Colorado and spend time 'spoiling' our grandson there. This year, he'll soon be six. It's T-Ball so-o--o grandpa will have to learn a few new tricks. He's is quite patient as a teacher. Ha! Take care.

Best personal regards:
