

Dr. Lindberg,

I thought you would be interested in seeing the attached materials on the clinical research oral history conference to be held in Pittsburgh next month. We have been cooperating with the Acadia Institute on this, and Peter Hittle and I will represent NLM.

As you can see, there is a distinguished roster of participants. You may also find interesting the discussion questions, some of which may be adaptable to our RMP interviews. The Pittsburgh conference is sort of a group oral history.

John Pansardi
