Re: Regional Medical Programs

Having looked through the minutes of the meetings of the Board of Regents for the library, I found the following, photocopied references to Regional Medical Programs. These were all of the references to RMPs that I could locate from meetings held during those years in which RMPs were in existence.

On another matter, the old RMP files have arrived from the Washington National Record Center, and have proved to be a rich source of information. I am making an inventory of the contents of these files, and following leads on individuals who played a significant role, particularly in the later years of RMPs.
