3. You must enter a number. Enter the number "1" if your return covers only one location. If you have multiple locations with the same EIN, we encourage you to file one return that covers these locations.

SECTION II - CALCULATION OF TAXES

Calculate tax only on cigarettes held for sale on January 1, 2002. Do not include unmerchantable cigarettes. For complete instructions about taking an inventory, refer to regulations.

- 5-7. **Cigarettes marked for export.** Your inventory must count separately cigarettes that have been labeled for export from the United States. Refer to 27 CFR 296.203 on how to identify these cigarettes.
7. **Large Cigarettes More Than 6½ Inches In Length.** If you have large cigarettes that are more than 6½ inches in length, use the following worksheet to calculate the floor stocks tax rate for each length of cigarette.

- (a) Length of the cigarette. _____
- (b) Divide (a) by 2¼ _____
- (c) Round up (b) to whole number _____
- (d) Multiply (c) by \$.0025 _____

The amount calculated in (d) is the floor stocks tax rate for that length of cigarette. [For example, you have 10,000 cigarettes of a length of 9 inches. The floor stocks tax rate is \$.01 per cigarette (4 multiplied by \$.0025). Using this rate of tax, the tax on these 10,000 cigarettes is \$100 (10,000 cigarettes multiplied by \$.01).]
