

3. High-Cost Assistance

The Commission regulates the recovery by LECs of that portion of their total costs associated with the provision of interstate services. The states regulate the recovery of costs associated with intrastate services (local service and state long distance services). The Commission's high-cost assistance program relates to the allocation between the state and interstate jurisdictions of non-traffic sensitive (NTS) "local loop costs" -- a term that refers to the costs of outside telephone wires, poles, and other facilities that link each telephone customer's premises to the public switched telephone network. These costs are allocated between the state and interstate jurisdictions because all local loops can be used for making and receiving state and interstate telephone calls. The Universal Service Fund payments are made on a study area basis.¹

On a nationwide average basis, approximately 27 percent of local exchange carrier (LEC) local loop costs are allocated to the interstate (federal) jurisdiction,² and 73 percent are allocated to the state jurisdiction. The average cost per loop, however, varies significantly among LECs. The Commission's high-cost assistance program enables LECs with very high per loop costs to allocate more of their loop costs to the interstate jurisdiction, thus recovering these costs from interexchange carriers and leaving less costs to be recovered through state rates. In this manner, the high-cost assistance program operates to hold down local rates and thereby furthers one of the most important goals of federal and state regulation -- the preservation of universal telephone service. Consequently, the funding of this high-cost assistance is known as the Universal Service Fund (USF). This section of the report outlines the high-cost assistance program and provides and discusses data for this program.

Pursuant to the changes recommended by the Joint Board and adopted by the Commission, high-cost assistance was retargeted to increase benefits to small and medium sized LECs beginning in January 1988. This retargeting took the form of changes in the additional interstate cost allocation for such LECs. The old and new high-cost formulas are compared in Table 3.1.³

The Commission's high-cost assistance program was implemented during a period in which the basic interstate allocation of loop costs was shifted from a level based on the Subscriber Plant

1 A study area is an operating company's operations in one state.

2 Approximately 25 percent of LECs' loop costs are directly allocated by the subscriber plant factor, and approximately 2 percent are covered by the universal service fund.

3 The percentages shown in the table are in addition to the basic allocation of NTS costs to the interstate jurisdiction.

Factor (SPF)⁴ to a flat allocation factor of 25%. Both of these changes were phased in between 1985 and 1993.

Table 3.2 shows the actual payments that have been made through the USF since its inception. The first column indicates the year in which the NTS costs were incurred. The second column indicates the year in which the USF payments were made. The third column indicates the amount of those payments, based on the product of the transition factor shown in the fourth column and the full amounts (calculated from the formulas in Table 3.1) shown in the fifth column. The last two columns of the table show the annual growth rates in the actual payments and the full transition payments based on the payment formulas. Any deviations in the USF amounts shown in Table 3.2 from amounts reported elsewhere (including the amounts shown in Tables 3.3, 3.8, 3.9, and 3.14) are due to subsequent quarterly data revisions.⁵

In December 1993, the Commission, at the recommendation of the Joint Board, imposed a cap on Universal Service Fund payments for 1994 and 1995. The cap is indexed to the rate of growth in the national total of working exchange loops. It is being implemented by adjusting the national average cost per loop used to calculate each study area's high-cost assistance (using the current formula from Table 3.1) from the true average value to whatever base value is required to achieve the cap. For 1997 payments, the cap was achieved by adjusting the base value cost per loop from the national average of \$248.13 to \$249.52. The Commission extended the cap to cover payments for 1996 through 1998. The amount of the payments for 1996 was below the cap, but the payments for 1997 are again above the cap.⁶

On May 7, 1997, the Commission extended the current high cost support mechanisms for rural carriers at least until January 1, 2001, and for other carriers until January 1, 1999. After then the current support mechanisms will be replaced with new ones using forward looking costs instead of embedded costs.⁷

4 The Subscriber Plant Factor is defined in section 36.154 (e) of the Commission's rules. It was frozen in 1981 and then transitioned to 25% between 1985 and 1993, subject to the limitations in section 36.154 (f) of the Commission's rules.

5 The amounts shown in Tables 3.3 through 3.14 are based on year-end data. However, pursuant to section 36.612 of the Commission's rules, carriers have the option of updating their data on a rolling year basis at the end of any quarter.

6 The cap is in section 36.601(c) of the Commission's rules. It has been extended until January 1, 1999 for all carriers, and thereafter for rural carriers until the effective date of the new universal service support mechanisms, to be adopted in CC Docket No. 96-45.

7 Federal-State Joint Board on Universal Service, Report and Order, released May 8, 1997, para. 203-204.

The Commission's high-cost assistance program is administered by the National Exchange Carrier Association (NECA). As part of the administration of the program, NECA collects certain cost data from LECs that provide service to approximately 98% of the nation's subscribers.⁸ Each year NECA collects NTS cost and loop data from the previous year, and uses that information to distribute high-cost assistance in the following year. These reports are filed with the FCC in CC Docket 80-286. On October 1, 1996, NECA reported new data for 1995, and revised data for previous years. State totals based on that report, covering cost data for 1995, are presented in Table 3.3. This table shows unseparated NTS costs (Revenue Requirement), the number of loops, and costs per loop. It also shows the Universal Service Fund payments for 1997, based on 1995 data, using the current high-cost formula and the cap discussed above. The final column shows the percentage of the total USF that goes to companies in the state. Corresponding data for individual company study areas are presented in Table 3.9.⁹

Each year NECA submits detailed account data used to calculate the unseparated revenue requirement per loop for each study area which settles on a cost basis, and total attributed revenue requirements for study areas that settle on an average schedule basis. In their filings since 1993, in addition to submitting such information for the latest year, NECA also submitted revised information for the four preceding years. The detailed account data are not reported here, but the most recent revision of the data for each year since 1988 is available in electronic form on the FCC-State Link electronic bulletin board.¹⁰

Table 3.4 shows the changes, from the revised data for 1994 to the newly reported data for 1995, for state totals, of the unseparated NTS revenue requirement, the number of loops, the revenue requirement per loop, and the Universal Service Fund payments. The phrase, "payments in later year" in the last column refers to the fact that the payments are made two years after the costs are incurred; in this case, in the years 1996 and 1997. Table 3.10 shows comparable percentage changes for individual study areas. In the USF columns in this table, the entry "ERR" indicates that the USF was zero in the first year and positive in the second year.

Tables 3.5 through 3.8 present state summaries of the historical information filed for 1991 through 1995 in the 1996 filing. Table 3.5 shows the unseparated NTS revenue requirements for

8 These are the carriers that settle on a cost basis. Costs for the remaining LECs, which settle on an average schedule basis, are attributed by NECA on the basis of those carriers' average number of loops per exchange.

9 In the second column of Table 3.9, the types are cost (C) and average schedule (A). In the final column, the percentages are of the national total USF.

10 Filenames are usf93r88.zip, usf94r89.zip, usf95r90.zip, usf96r91.zip, usf96r92.zip, usf96r93.zip, usf96r94.zip, and usf96r95.zip. In each case, the first number in the filename indicates the year the data were filed and the second number indicates the year covered by the data. The file usfdef96.zip contains definitions of the data in the USF files.

each year. Table 3.6 shows the number of loops. Table 3.7 shows the unseparated NTS revenue requirement per loop. Table 3.8 shows the Universal Service Fund payments. Corresponding data for individual study areas are presented in Tables 3.11 through 3.14.

In compiling the historical data, it is necessary to account for changes that have occurred in the study areas over time. These changes are noted in Table 3.15.¹¹ In cases where study areas have merged, the pre-merger data for all of the merged study areas have been combined and reported as the data for the surviving study area. In cases where there has been an ownership change resulting in a code number change, the pre-change data is reported under the new code number and name. In the case of newly created study areas, pre-creation data is reported as 0. In Table 3.10, percentage changes in the case of mergers are comparisons of the surviving study area data with the consolidated pre-merger data, and percentage changes in the case of newly created study areas formerly served by another company are comparisons of a consolidation of the new data for both companies with the old data for the former company.

The Telecommunications Act of 1996 requires that all subsidies be made explicit. Consequently, the Commission and the universal service Joint Board in Docket No. 96-45 are reviewing all subsidy programs. In light of this, we note that there are currently three major subsidy programs of support payments for high-cost local exchange carriers. The first of these is the Universal Service Fund, described in detail above. It collects money from interexchange carriers based on their presubscribed lines and distributes it to local exchange carriers based on their non-traffic sensitive costs. The second program, which is also related to non-traffic sensitive costs, is Long Term Support. This collects money from local exchange carriers that are not part of NECA's common line pool, and is used to subsidize the carrier common line access charge of NECA's common line pool. This subsidy is described in greater detail in section 7 of this report. The third program is dial equipment minute (DEM) weighting, which is related to traffic sensitive local switching costs. The portion of these costs which are normally allocated to interstate is determined by the ratio of interstate to total dial equipment minutes, known as the DEM factor. However, local exchange carrier study areas with 50,000 access lines or fewer have that portion increased by a weighting factor, which is determined by the number of access lines in the study area. The current weighting factors (which became effective in 1993) are 3.0 for study areas with 10,000 or fewer lines, 2.5 for study areas with 10,001 to 20,000 lines, and 2.0 for study areas with 20,001 to 50,000 lines. The resulting weighted DEM factor allows these study areas to recover a greater portion of their local switching costs from interexchange carriers in the form of higher access charges. The weighted and unweighted DEM factors are shown in section 4 of this report. On October 10, 1995, NECA filed estimates of the amounts of these subsidies by study area for 1993. These were listed in Table 3.16

11 Because the study areas were matched between years by study area code number, changes in only the name of the company are not included in this list. Because of the two year difference between when the costs are incurred and when the USF payments are made, the timing of the changes does not always match the year in which the change appears in the NECA data files. The dates in Table 3.15 indicate the years when the changes actually occurred.

of the May 1996 Monitoring Report. Because those data have not been updated, they are not repeated here.

In the interest of identifying the ownership interest in each of the study areas, Table 3.16 of this report shows the holding company affiliation of each study area as of January 1, 1996. In recent years there have been many changes in holding company affiliations of study areas. While many of these have been reflected in changes of the names of the companies, not all of them have.¹² The introduction of this new table in the Monitoring Report will make it easier to keep track of such changes, and also make it clearer which study areas share common ownership.¹³

12 For example, the change in the study area codes for the Navajo Communications study areas reflected a change in the ownership from Alltel to Citizen Utilities.

13 For information on holding company affiliation in previous years, the column headed "common control" in the files listed in footnote 8 provide that information.

Table 3.1

High-Cost Formulas

Cost Range As % of National Average % Expense Adjustment Within Range

Old Formula, Study Areas with Over 50,000 Loops (Used in 1986 and 1987)

0% - 115%	0%
115% - 150%	25%

Table 3.2

Universal Service Fund Payment History

Data Year	Payment Year	Actual Payments	Transition Factor	Projected Payments at Full Transition	Annual Growth In Payments	Annual Growth In Full Transition
1984	1986	\$55,626,903	1/8	\$445,015,224		
1985	1987	\$125,691,874	1/4	\$502,767,496	125.96%	12.98%
1986	1988	\$183,268,189	3/8	\$488,715,171	45.81%	-2.79%
1987	1989	\$264,553,840	1/2	\$529,107,680	44.35%	8.27%
1988	1990	\$339,176,069	5/8	\$542,681,710	28.21%	2.57%
1989	1991	\$484,814,443	3/4	\$646,419,257	42.94%	19.12%
1990	1992	\$609,361,768	7/8	\$696,413,449	25.69%	7.73%
1991	1993	\$705,121,573	1	\$705,121,573	15.71%	1.25%
1992	1994	\$725,438,241	1	\$761,523,851	2.88%	8.00%
1993	1995	\$749,553,259	1	\$801,390,002	3.32%	5.24%
1994	1996	\$761,778,739	1	\$761,778,739	1.63%	-4.94%
1995	1997	\$792,988,052	1	\$808,801,119	4.10%	6.17%

Notes: Payments for 1986 though 1994 are final and not subject to further adjustment.

Payments for 1995, 1996 and 1997 are as of the April 1997 settlement cycle and subject to change due to the 24-month settlements adjustment window.

Payments for 1994, 1995 and 1997 are limited by the USF Cap. Amounts shown in the Projected Payments at Full Transition column are before application of the USF Cap.

Payments for 1996 are also limited by the USF Cap. However, since the USF Cap limit is \$776,592,643, there is no impact on actual payments. Amount in the Projected Payments at Full Transition column are actual payments.
