OCE Print On Demand User Driver install instructions

The following instructions explain how to download the OCE client configuration file and client software for installation on your computer. These two programs will facilitate printing your large high volume documents to the USDA print shop from within any standard office applications. The instructions are available for online viewing or printing at http://www.usda.gov/oo/printondemand.htm

PREREQUISITES:

- We make an assumption that you are currently familiar with Microsoft Windows printing and various office application print functions. Therefore we start our instructions with how to install our print on demand driver.
- Plan how you want your document to look before you access the print shop web server. Setup your physical page and document attributes by selecting appropriate features in the application layout, page setup, and other associated dialog boxes.
- The Xerox DocuTech systems in the USDA print shop can print documents created as Postscript or PDF files.
- Standard office applications can support creating a document in postscript format.

OO/MRMD Internet Print On Demand Evaluation Project Client Download and Installation Instructions: 1. Using your web browser visit the following url: http://www.usda.gov/oo/printondemand.htm

2. At the bottom of this web page click on the "to download client configuration file and client software, please click here" option

 сопрієте на пазаїацон аз пас 	noted by the installation program
