### **Minerals Management Service To Hold DC Metro Area Public Meeting on Renewable Energy and Alternate Use on America's Outer Continental Shelf**

*Meeting to be Held in Herndon, Virginia*

**WASHINGTON** – The Interior Department's Minerals Management Service (MMS) will hold a public scoping meeting Thursday, May 18 in Herndon, Virginia to obtain comments from the public on renewable energy projects and alternate use of facilities in Federal waters. This is the first in a series of meetings scheduled across the country during the months of May and June. The meetings are the first step in the preparation of a Programmatic Environmental Impact Statement (EIS) for the nation's Outer Continental Shelf (OCS) Renewable Energy and Alternate Use Program.

The meeting will be held at the Crowne Plaza Hotel (formerly Days Hotel and Conference Center), 2200 Centreville Road in Herndon. The public will be required to sign in to speak at the meeting. Sign-in begins at 5:30 p.m., followed by an overview of the EIS at 6:30 p.m. and public comments at 7:30 p.m. MMS is also accepting written comments through July 5, 2006 electronically, using the online comment form available on the website [ocsenergy.anl.gov](http://ocsenergy.anl.gov), or by mail to:

MMS Renewable Energy and Alternate Use Programmatic EIS  
Argonne National Laboratory  
9700 S. Cass Avenue  
Argonne, IL 60439.

Comments should specifically address factors related to the scope of the draft EIS, particularly the significant issues, alternatives, and mitigation measures that should be considered in the draft EIS.

The Programmatic EIS will assess generic impacts from development, operations and decommissioning of renewable energy or alternate use facilities and identify key issues and mitigation measures that should be considered in subsequent site-specific reviews. Preparation of the Programmatic EIS is a multi-step process that will be completed in about 18 months and will include publication of a draft Programmatic EIS, a final Programmatic EIS and a Record of Decision. Once the draft programmatic EIS is published, MMS will hold additional public meetings and offer other opportunities to comment.

**(MORE)**

MMS received authority for the OCS Renewable Energy and Alternate Use Program [under Section 388 of the Energy Policy Act of 2005](#). Under this authority, MMS will regulate renewable energy projects and alternate use of existing oil and gas platforms on the OCS. Renewable energy includes wind, wave, solar, underwater current and the production of hydrogen. Alternate uses of existing facilities may include, but are not limited to aquaculture, research, education, recreation and support for offshore operations and facilities.
