### **Minerals Management Service To Hold Public Meeting In San Francisco on Renewable Energy and Alternate Use on America's Outer Continental Shelf**

*Meeting to be Held in San Francisco, California*

**WASHINGTON** – The Interior Department's Minerals Management Service (MMS) will hold a public scoping meeting Thursday, June 8 in San Francisco, California to obtain comments from the public on renewable energy projects and alternate use of facilities in Federal waters. This meeting is part of a series of meetings scheduled across the country during the months of May and June. The meetings are the first step in the preparation of a Programmatic Environmental Impact Statement (EIS) for the nation's Outer Continental Shelf (OCS) Renewable Energy and Alternate Use Program.

The meeting will be held at:

Presidio Officer's Club  
50 Moraga Avenue  
San Francisco, California

The public will be required to sign in to speak at the meeting. Sign-in begins at 5:30 p.m., followed by an overview of the new program, EIS process, and renewable energy technologies at 6:30 p.m. and public comments at 7:30 p.m.

MMS is also accepting written comments through July 5, 2006 electronically, using the online comment form available on the project website at [ocsenergy.anl.gov](http://ocsenergy.anl.gov) or by mail to:

MMS Renewable Energy and Alternate Use Programmatic EIS  
Argonne National Laboratory  
9700 S. Cass Avenue, Argonne, IL 60439

Comments should specifically address factors related to the scope of the draft EIS, particularly the significant issues, alternatives, and mitigation measures that should be considered in the draft EIS.

**(MORE)**

The Programmatic EIS will assess generic impacts from development, operations and decommissioning of renewable energy or alternate use facilities and identify key issues and mitigation measures that should be considered by subsequent site-specific reviews. Preparation of the Programmatic EIS is a multi-step process that will be completed in about 18 months and will include publication of a draft Programmatic EIS, a final Programmatic EIS and a Record of Decision. The MMS will offer a second opportunity to comment during public hearings on the draft Programmatic EIS after it is published.

MMS received authority for the OCS Renewable Energy and Alternate Use Program [under Section 388 of the Energy Policy Act of 2005](#). Under this authority, MMS will regulate renewable energy projects and alternate use of existing oil and gas platforms on the OCS. Renewable energy includes wind, wave, current, and solar. Alternate uses of existing facilities may include, but are not limited to aquaculture, research, education, recreation and support for offshore operations and facilities.
