U.S. DEPARTMENT OF AGRICULTURE  
NATIONAL AGRICULTURAL STATISTICS SERVICE  
KANSAS FIELD OFFICE

IN COOPERATION WITH  
KANSAS DEPARTMENT OF AGRICULTURE

# KANSAS AGRICULTURAL STATISTICS PROCEDURES AND STAFF

Information is collected in many ways: mail surveys, telephone contacts, personal interviews, and in-the-field observations.

Most estimates are based on probability sample surveys. That is, information collected from a scientifically selected sample of all producers is used to estimate the activities of the entire group. Sampling is not only less costly in time and money than a complete count, but can be more accurate because reporting errors and data-handling errors are minimal compared to those in a complete count or census.

Program content is planned to provide a comparable series of data over time--for example, Kansas wheat and corn production estimates date back to 1866--but also to meet current needs to the extent permitted by available resources. Data user meetings and close contact with farm and industry groups are utilized to maintain the relevance of the data provided.

Kansas Agricultural Statistics staff includes highly trained agricultural statisticians with farm backgrounds and extensive experience in Kansas and other states, a support staff of statistical assistants, computer personnel, and printing-mailing specialists. Eddie Wells is the Deputy Director. Lead Statistician for Estimates is Joel Golz. Estimate Statisticians include Quentin Wearne, Dan Kolterman, Darin Twete, and Arcus Pierce. The Lead Statistician for Surveys is Matt Gregg. Survey Statisticians include Sherri Hand, Akilah Nicks, Nick Pallotta, and Stephen Habets, assisted by Research Analyst Dona Ratliff. Candace S. Thomas provides research and editorial assistance while Rita Keane is our designer and Desktop Publisher. In addition, field and telephone staffs of part-time National Association of State Department of Agriculture (NASDA) interviewers, working under the direction of NASDA supervisors, collect data by personal and telephone interview. The office staff and crew of enumerators join me in thanking the many farmers and agri-business firms who provide the data and assist in planning our program of statistics.

Eldon J. Thiessen  
Director

## 2006 KANSAS AGRICULTURAL HIGHLIGHTS

In 2006, the December 1 hog inventory was at its highest level since 1980, with cash receipts becoming the fourth highest on record. Cash receipts for all cattle and calves set another new record in 2006, while cattle inventory on January 1 was at its lowest level since 2003. Soybeans set a new record in acres planted and harvested, thus producing the third largest crop on record. Wheat, corn, and sorghum acreage and production were below last year's levels. Prices for wheat and sorghum were above year-ago levels, corn was above year-ago levels except for January, while soybean prices took a downward swing March through October. Hay prices stayed above year-ago levels throughout 2006. The value of all farmland and buildings continued their upward trend and was 11 percent above 2005.

Seeding of wheat acres began the first week of September. Fifty-five percent was seeded and 25 percent was emerged by the 2<sup>nd</sup> of October, ahead of the 5-year averages of 50 percent and 21 percent, respectively. Widespread showers during September and October helped improve soil moisture for germination. Wheat seeding was 96 percent complete and emergence was at 84 percent by the 30<sup>th</sup> of October. Wheat condition was above 60 percent good to excellent all fall. Ninety-eight percent of the crop was emerged by the 20<sup>th</sup> of November. Wheat condition declined over the winter due to dry conditions. On March 5<sup>th</sup>, only 27 percent of the crop was rated as good to excellent. Mostly dry conditions and mild temperatures during January and February contributed to the depletion of topsoil moisture. By March 5<sup>th</sup>, 95 percent of topsoil moisture was rated short to very short. By mid-March, estimates indicated that 4 percent of the crop had been lost to winterkill. On April 30<sup>th</sup>, 37 percent of the crop was judged to be in poor to very poor condition, compared to 6 percent last year. Crop progress was ahead of normal during the spring with 98 percent jointed on April 30<sup>th</sup>, compared with 93 percent the previous year and 83 percent for the 5-year average. The crop began to head by mid-April and developed ahead of normal during late April and May. Sporadic rain showers did little to improve soil moisture condition during the spring. Throughout March and April, the best subsoil moisture supply rating was 57 percent short to very short. The crop continued to mature ahead of normal, with 44 percent of the wheat turning by May 28<sup>th</sup>, compared with 24 percent for the 5-year average. Harvest of the 2006 crop began well ahead of normal. By June 11<sup>th</sup>, the crop was 15 percent harvested, compared to 1 percent the previous year and 3 percent for the 5-year average. Harvest continued ahead of average throughout June despite some scattered showers. Harvest was 99 percent complete by the 9<sup>th</sup> of July

Wheat production in 2006 was 291.2 million bushels, 23 percent below 2005's crop of 380.0 million bushels. The yield, at 32 bushels per acre, was down 8 bushels from a year earlier. The acreage harvested for grain, at 9.10 million acres, was down 4 percent from 2005. Prices for wheat were at their highest level since 1996. The preliminary marketing year average price, at \$4.60 per bushel, was up \$1.29 from 2005 and generated a value of production of \$1.340 billion, 6 percent above the previous year. Kansas still retained its first place status as the number one wheat state in the Nation.

Seeding of the 2007 wheat acres began early in September and progressed mostly on schedule to completion. Soil moisture was mostly adequate during September but by October, shortages were prevalent. Rains about mid-October brought soil moisture supplies back to mostly adequate, but lack of precipitation resulted in shortages again occurring by the end of November. Wheat emergence was mostly ahead of normal throughout the season thanks to mostly favorable moisture conditions. Wheat condition was rated 7 percent excellent, 44 percent good, 41 percent fair, 6 percent poor, and 2 percent very poor at the end of November

During the 2006 growing season, dry conditions in mid-April allowed corn planting to progress well ahead of average. Precipitation in late April and early May slowed progress and planting was completed at the end of May, about even with the average. Crop development was about even or slightly ahead of the average through much of the growing season. Soil moisture conditions were mostly short to very short throughout July and August. Corn harvest began the third week of August in southeast Kansas. On August 20<sup>th</sup>, the crop was rated 36 percent very poor to poor, 33 percent fair, and 31 percent good to excellent. Harvest progressed steadily throughout the fall reaching completion by mid-November

Corn production was 345.0 million bushels, down 26 percent from last year's record crop of 465.8 million bushels. The 2006 yield was 115 bushels per acre, 20 bushels below the previous year. Acreage harvested for grain, at 3.00 million, was down 13 percent from 2005. This was the sixteenth year in a row that corn production exceeded sorghum production. Prices for corn remained above 2005 levels except for January. Based on the preliminary 2006 marketing year average price of \$3.20 per bushel, the value of production for the 2006 corn crop was \$1.104 billion, 15 percent above the 2005 value. Corn acres harvested for silage was 300,000 acres, up 150,000 acres from last year.

Sorghum planting progress was behind normal nearly all spring. By July 3, planting was nearly complete and 93 percent of the crop had emerged. Sixty-eight percent of the crop was rated in good to excellent condition at that time. The State received very light showers throughout July and August. Temperatures were hot, remaining in excess of 100 degrees the last part of July through mid-August. Dry weather and high temperatures stressed the crop, causing its condition to decline. By August 28, only 30 percent of the crop remained in good to excellent condition. Harvest began in September but remained behind average most of the fall. However, by November 20, 92 percent of the crop had been harvested, compared to 90 percent for the 5-year average.

Sorghum grain production was 145.0 million bushels in 2006, down 26 percent from 2005's crop of 195.0 million bushels. The yield averaged 58 bushels per acre, down 17 bushel from the previous year. Harvested acreage for grain, at 2.5 million acres, was down 100,000 acres from 2006. Sorghum prices were at their highest level since June 2004. The preliminary 2006 marketing year average price (\$3.36 per bushel) indicated a value of production of \$487.2 million, 47 percent above 2005. Kansas retained its position the number one sorghum grain producing State in the U.S. Sorghum acres harvested for silage were 60,000, unchanged from 2005.

Soybean planting progress was slightly ahead of both the previous year and 5-year average for most of the spring. The State received widespread showers over Memorial Day weekend and then the weather turned hot and dry. Temperatures remained hot during July causing both crop and topsoil moisture conditions to decline below last year by the end of the month. The eastern third of the State, where most of the soybeans are grown, received much needed scattered showers throughout August with some areas receiving over 4 inches. Soybean harvest began in September and by the end of October, 74 percent of the soybeans had been harvested compared to 78 percent for the five year average. Soybean harvest picked up during November and moved ahead of the 5 year average but was still behind last year. On November 19, 98 percent of the soybeans had been harvested compared to 90 percent for the five year average.

Soybean production was 98.6 million bushels, down 7 percent from the last year's crop of 105.5 million bushels, and the third largest production recorded for Kansas. Yield, at 32 bushels per acre, was down 5 bushels from last year. Harvested acreage set a new record at 3.08 million acres, surpassing the previous record set last year by 230,000 acres. Planted acreage also set a new record at 3.15 million acres, surpassing the previous record of 2.95 million acres set in 2000. Soybean prices for year 2006 were above the previous year for the first two months but then took a downward swing from March through October and then rose again for the remainder of the year. Based on the preliminary marketing year average price of \$6.10 per bushel, the value of production for the 2006 crop was \$601.2 million, 5 percent above 2005.

All hay production totaled 6.55 million tons, down 2 percent from 2005. Area harvested, at 3.05 million acres, was up 150,000 acres from the previous year. The preliminary marketing year average price of \$102.00 per ton indicated a value of production for the 2006 crop of \$614.7 million, up 43 percent from 2005. Grazing and stock water supplies were generally adequate across the State for 2006. Monthly prices for all hay were at their highest level since April 2003.

All cattle and calves on farms and ranches on January 1, 2007, totaled 6.40 million head, down 250,000 head from January 1, 2006. The 5.61 million head of cattle marketed during 2006 was up 3 percent from the year earlier. Fed cattle marketings in 2006 were 5.40 million head, up 2 percent from the previous year. Cash receipts from the sale of cattle set a new record high \$6.25 billion, up 3 percent from last year's record of \$6.09 billion. Monthly cattle prices in 2006 were mixed throughout the year. The 2006 calf crop, at 1.45 million head, was down 3 percent from last year.

The December 1, 2006 hog inventory in Kansas was 1.84 million head, 3 percent above the previous year. This was the largest December 1 hog inventory since 1980. Total cash receipts from hogs were \$374.3 million, down 6 percent from 2005 and down 10 percent from the record set in 1997 of \$414.8 million. Monthly hog prices in 2006 were also mixed throughout the year.

<sup>1/</sup> Beginning with 1975, a farm is defined as any place with at least \$1,000 in annual sales of agricultural products. Between 1959 and 1975, a farm was defined as a place of 10 or more acres that had \$50 or more in annual sales of agricultural products or a place with fewer than 10 acres and annual sales of \$250 or more. Prior to 1959, a farm was defined as three acres or more with a value of farm products amounting to \$150 or more or fewer than three acres with sales of at least \$250. <sup>2/</sup> Land in farms estimates not available on an annual basis until 1950. NOTE: Complete data series available by request.

Low.....	1,140	217	172	3.0	894	0.18	867
Year.....	1983	1866	1934	1913	1934	1889/1896	1866

<sup>1/</sup> Prior to 1926, no records kept on acres planted. <sup>2/</sup> Beginning in 1986, acres harvested for all purposes no longer included acres harvested as forage. <sup>3/</sup> Beginning in 1985, price per bushel is marketing year average price, which does not include an allowance for loans outstanding and government purchases. NOTE: Complete data series available by request.

KANSAS FARM FACTS

INDEX

TABLE of CONTENTS..... i

2006 AGRICULTURAL HIGHLIGHTS.....ii-iii

GENERAL STATISTICS..... 2-9

Agribusiness..... 5

Agricultural export shares..... 3

Agricultural statistics districts.....Inside Back Cover

Commercial Grain Storage Capacity..... 4

Crops: acreage harvested and value, by county..... 6-7

Farms: number, by county..... 6-7

Feed: commercial, sales of..... 5

    mill feed produced..... 5

Fertilizer: sales..... 5

Flour production and value..... 5

Off-Farm Number of Grain Storage Facilities..... 4

Rank of Kansas agriculture..... 2

Stocks of Grain by Quarter..... 4

Value of livestock produced, by county..... 6-7

Weather data, by district and county..... 8-9

Weights and Measures..... 103

CROP STATISTICS..... 10-73

Corn: all, acres planted and harvested, by county..... 36-39

    grain: acreage, yield, production and value, by county..... 36-39

        irrigated and dryland grain production, by county.... 40-43

    silage: acreage, yield, production and value, by county... 44-47

Cotton: acreage, yield, production and value, by county ..... 72

Dry Beans: acreage, yield, production and value, by county..... 73

Hay: Alfalfa: acreage, yield, production and value, by county..... 60-63

    Other Hay: acreage, yield, production and value, by county..... 64-67

    All Hay: acreage, yield, production and value, by county..... 68-71

Oats: acreage, yield, production and value, by district..... 72

Pasture: acres, by county, 2002 Census..... 70-71

Sorghum: all: acres planted and harvested, by county..... 24-27

    grain: acreage, yield, production and value, by county..... 24-27

        irrigated and dryland grain production, by county..... 28-31

    silage: acreage, yield, production and value, by county..... 32-35

Soybeans: acreage, yield, production and value, by county..... 48-51

    irrigated and dryland production, by county..... 52-55

State Summary: Acreage, yield, production, value, and number of farms..... 11

Sunflowers: all: acreage, yield, production, and value by county..... 56-57

    oil & non oil: acreage, yield, production, and value, by district.58-59

Wheat: acreage, yield, production and value, by county..... 12-15

    summer fallow and continuous cropped grain production, by county 18-19, 22-23

    irrigated and dryland grain production, by county..... 16-17, 20-21

**KANSAS FARM FACTS**

<u>LIVESTOCK STATISTICS</u> .....	74-89
Cattle: calves born, by county.....	80-83
all cattle and calves, inventory and inventory value by county.....	80-83
beef cows, inventory, by county.....	80-83
commercial slaughter, by month.....	76
milk cows, inventory, by county.....	80-83
milk cows and production, by month.....	86
milk cows, production and value, by county.....	88-89
inventory, by classes.....	75
number of cattle operations.....	75
production, disposition, income.....	77
value of production, by county.....	84-85
Cattle on feed: classification and weight groups, by quarter.....	78
marketings and placements, by month.....	78
marketings - grain fed and other.....	77
marketings, by size group.....	77
inventory, by county.....	80-83
number of feedlots, by size group.....	77
Dairy: milk production and value.....	86
Hog: inventory and value, by district.....	87
inventory, by class.....	75
number of hog operations.....	75
pig crop, by district.....	87
production, disposition, income.....	79
value of production, by district.....	84-85
Honey: number of colonies, yield, production, stocks, price, and value.....	87
Sheep: inventory, by classes.....	75
number of sheep operations.....	75
lamb crop.....	75
production, disposition, income.....	79
Wool: production, price and value.....	79
 <u>ECONOMIC STATISTICS</u> .....	 90-93
Farm income.....	91
Farmland values and rents.....	93
Income from farming, cash receipts, gross and net farm income.....	91
Production expenses.....	92
 <u>HISTORICAL STATISTICS</u> .....	 94-100
Historical tables.....	95-100
corn: acreage, yield, production, price and value, 1866-2006.....	100
livestock, inventories and value, 1870-2007.....	96
number of farms and land in farms, 1900-2006.....	95
sorghum: acreage, yield, production, price and value, 1929-2006.....	98
soybeans: acreage, yield, production, price and value, 1924-2006.....	99
wheat: acreage, yield, production, price and value, 1880-2006.....	97

**KANSAS FARM FACTS**

Weights and Measures

Bushel weights:  
 Wheat & soybeans = 60 lbs.  
 Corn, sorghum & rye = 56 lbs.  
 Barley (grain) = 48 lbs  
 Oats = 32 lbs.
