1/ Utilized production - The sum of fresh market and processed do not equal the utilized production for 1934-1958 because home use is not included in the breakdown.

2/ Prices - Season average price estimates were started in 1909 and represent an "as sold" price. The basis for price changed in 1959 to an equivalent PHD price.

3/ Prices - Separate price estimates started in 1938 for fresh market and processed.

4/ Utilization not published after 1958 to avoid disclosure of individual operations.

(D) Not published to avoid disclosure of individual operation(s).
