U.S. Government Standard General Ledger Chart of Accounts

The Chart of Accounts provides the basic structure for the U.S. Government Standard General Ledger (USSGL). It incorporates both proprietary and budgetary accounts. The proprietary and budgetary sets of general ledger accounts are self-balancing (the total debits equal total credits). It is important to note that central agency reporting requires a lower level of detail than the 4-digit USSGL account numbers provided. Therefore, the USSGL Board developed attributes containing various domain values that, when added to a basic 4-digit USSGL account, provide the appropriate level of detail needed for central agency reporting and, in effect, create new USSGL accounts. See Section IV for attribute definitions and domain values. It is this lower level of detail, the basic 4-digit USSGL account plus applicable attribute domain values, that agencies must capture at the transaction level to (1) comply with USSGL policy contained herein, and (2) achieve the desired result for proper reporting.

The basic 4-digit USSGL accounts are classified as follows:

- **1000 Assets**
- **2000 Liabilities**
- **3000 Net Position**
- **4000 Budgetary**
- **5000 Revenue and other Financing Sources**
- **6000 Expenses**
- **7000 Gains/Losses/Miscellaneous Items**
- **8000 Memorandum**

Agencies may expand this numbering system to as many digits as necessary to accommodate agency-specific requirements. However, subsidiary accounts must summarize or "roll-up" to the 4-digit USSGL accounts plus any related attributes as defined herein. The 9000 series of accounts are available for agencies to record and maintain agency-specific statistical and/or memorandum data.

In February 1999, the USSGL Board voted to delete summary accounts. However, agencies may summarize accounts as they find useful. Section headings replace many of the deleted summary accounts to maintain the integrity of the account structure.

USSGL accounts appearing in bold are new or indicate a change from the prior year TFM release (changes to the title, normal balance, and/or definition).

U.S. Government Standard General Ledger Account Transactions

This section provides accounting transactions for events occurring throughout the Federal Government. The transactions illustrate both proprietary and budgetary entries for each accounting event. Transactions are grouped under the following categories:

➢	**A 100-799**	Funding Sources
➢	**B 100-699**	Disbursements and Payables
➢	**C 100-799**	Collections and Receivables
➢	**D 100-799**	Adjustments/Writeoffs/Reclassifications
➢	**E 100-799**	Accruals/Non-Budgetary Transfers Other Than Disbursements and Collections
➢	**F 100-499**	Yearend
➢	**G 100-299**	Memorandum Entries

The above categories provide a basic framework for organizing the transactions. Also included, as a quick reference, is a listing of transaction descriptions. These accounting transactions document basic standard posting logic for financial events across the Federal Government.

The following notes explain conventions to follow when using the USSGL and the limitations of this compilation of USSGL transactions:

- There are valid accounting events/postings not yet documented. Agencies may engage in financial activity that the USSGL Board has not yet addressed. If so, submit an issue to the USSGL Board through the agency's USSGL representative. To illustrate the issue, document accounting events specific to the activity in a simple accounting scenario. Include references to specific legislation, accounting standards, or central agency requirements that make the activity unique from those currently documented. This documentation may be useful for explaining variances from the USSGL standard to auditors.

- For nonexpenditure transfers of budget authority between Treasury Appropriation Fund Symbols (TAFS), the "Transfer From" entity will determine the source of funds being transferred and record a proprietary USSGL account that designates the funding as being derived from either:

  - Unexpended appropriations from general fund resources not earmarked by law for a specific purpose - USSGL account 3103, "Unexpended Appropriations - Transfers-Out," or

  - Financing sources that impact cumulative results of operations - USSGL account 5765, "Nonexpenditure Financing Sources – Transfers-Out."

  The "Transfer To" entity must use a propriety USSGL account that corresponds to the proprietary USSGL account used by the "Transfer From" entity. USSGL account 3102, "Unexpended Appropriations - Transfers-In" corresponds to USSGL account 3103. USSGL account 5755, "Nonexpenditure Financing Sources – Transfers-In" corresponds to USSGL account 5765. Failure of both entities to record the matching proprietary USSGL account category (3102/3103 or 5755/5765) will result in agency-wide and/or Government-wide elimination discrepancies.

- There may be mixed funding in a single TAFS. The net position of a TAFS may be a mix of:
    - Unexpended appropriations derived from general fund resources not earmarked by law for a specific purpose, and
    - Financing sources, such as Economy Act revenue, that impact cumulative results of operations.
- To facilitate reconciliation of interagency expenses and revenues, agencies may no longer post costs directly to "in-process type" asset accounts. Agencies must first record costs, such as direct labor (payroll and benefits) and direct materials under the capitalization thresholds, in the appropriate USSGL account 6000 series account. Then use USSGL account 6610, "Cost Capitalization Offset" to apply the cost to the desired "in-process type" asset account. Do not record to USSGL 88XX series accounts amounts applied to asset accounts under this method.
- The transactions illustrate USSGL accounts without applicable attribute values. Therefore, a single transaction listed here may translate to several similar transactions in the agency's accounting system depending on how many combinations of USSGL accounts and attribute values are valid to record the agency's activities. Agencies must post transactions using the 4-digit USSGL account plus valid attribute values to fully comply with implementation of the USSGL at the transaction level and to facilitate necessary central agency reporting. Additionally, since the 4-digit base account combined with valid attributes is itself a USSGL account, agencies must post debit and credit entries to reclassify balances even when the 4-digit base account is the same.
- Transactions affecting budgetary status may contain debit or credit postings to multiple USSGL status accounts that may be valid for a particular transaction. Choose a USSGL account appropriate to the status of authority in the affected TAFS and the accounting event recorded.
- All transactions apply to activity with Federal and non-Federal entities unless limited by account definition or otherwise noted in the transaction description.
- In the yearend closing entries, USSGL accounts that may contain a balance (remain open) after closing appear in boldface.
- A USSGL transaction crosswalk (beginning with inception date 8/86), can be obtained at the USSGL Web site. This is particularly important for the large amount of revisions to the transaction categories that caused the transactions to be renumbered (T/L S2 06-02).
- The transaction reference provides an example of where this transaction appears. It does not provide all possible USSGL implementation guidance that may contain this transaction.

C430 To record an old motor vehicle that was traded in for a new motor vehicle using the direct method.
Comment: This entry is to show a trade-in only. An entry for indirect cost is not included. This is the way the Department of Defense accounts for repairable items involving trade-ins. Accounts receivable represents the cash amount the vehicle procurer will receive from the customer. Inventory held for repair represents the value of an asset after it is repaired (value of a similar new asset). Other financing source represents fair market value of the old vehicle. Other financing source was used instead of revenue from goods sold due to a trade-in, which is not a budgetary resource. Inventory allowance represents the estimated repair cost of the damaged vehicle.

USSGL Account Attributes

To meet external reporting requirements, agencies need data at a level below the 4-digit USSGL account. Agencies' systems must capture this information at the transaction level by recording transactions using USSGL 4-digit accounts plus attributes. This section provides USSGL attribute tables for the FMS-administered FACTS I and FACTS II "trial-balance" reporting systems.

Attributes are like adjectives that further describe a USSGL account in order to meet a specific reporting requirement. Domain values are all of the possible valid choices within an attribute. For example, if there is a red chair and a blue chair in a room, then you only need one attribute to describe them: color. The valid domain values within the attribute "color" would be "red" or "blue." If you wanted the red chair, there would be no need to use additional adjectives such as weight, height, or size to describe it. This is because, in this example, color is enough to uniquely identify the chair. Therefore, only those attributes and those domain values that are necessary to uniquely identify the reporting requirement appear on the crosswalks.

Note: Some USSGL accounts do not have certain attributes in this document for reporting purposes, but do require these attributes for accounting purposes. An example is downward adjustments of prior-year obligations. For FACTS II reporting, USSGL accounts 4871, "Downward Adjustments of Prior-Year Unpaid Undelivered Orders – Obligations, Recoveries," 4872, "Downward Adjustments of Prior-Year Prepaid/Advanced Undelivered Orders – Obligations, Refunds Collected," 4971, "Downward Adjustments of Prior-Year Unpaid Delivered Orders – Obligations, Recoveries," and 4972, "Downward Adjustments of Prior-Year Paid Delivered Orders – Obligations, Refunds Collected," do not need the reimbursable flag attribute with the domain values of direct and reimbursable. However, at yearend these accounts close to USSGL accounts 4801, "Undelivered Orders – Obligations, Unpaid," 4802, "Undelivered Orders – Obligations, Prepaid/Advanced," 4901, "Delivered Orders – Obligations, Unpaid," and 4902, "Delivered Orders – Obligations, Paid," that do require the reimbursable flag attribute for FACTS II reporting. Therefore, an agency must similarly identify the adjustment accounts to close these accounts properly.

The attributes in the FACTS I data table are used to prepare the *Financial Report of the United States Government* and do not include all of the attributes used to prepare agency financial statements required by Office of Management and Budget (OMB) Circular No. A-136, "Financial Reporting Requirements."

Attributes Used To Prepare the Financial Report of the United States Government

USSGL attributes are one component of detailed data in agencies' financial systems related to the external reporting of financial statements. The FACTS I data table shows the USSGL account balances and the related attribute information captured at the transaction level that support production of the *Financial Report of the United States Government*. The USSGL crosswalks for the financial statements reference these attributes as a requirement for proper reporting on the particular financial statement line items.

Office of Management and Budget (OMB) Form and Content Agency Financial Reports

The FACTS I data table does not show all the USSGL account attributes necessary to produce agency financial statements required by OMB. Refer to Section V: Crosswalks to Standard External Reports.

Attribute Definition Report

This report provides definitions for the attributes associated with each proprietary USSGL account for FACTS I reporting. Agencies are required to report their adjusted trial balances and selected NOTES amounts in FACTS I with attributes described in the detailed financial information.

FACTS I USSGL Accounts and Attributes

The USSGL account and related attribute tables show USSGL accounts, account titles, and normal balance indicators for USSGL accounts that agencies will use for FACTS I reporting. The tables also show the related attributes agencies must provide for each USSGL account reported in FACTS I; these columns contain one of three values:

Space	This attribute is **not reported** in FACTS I for the USSGL account.
Y	The attribute domain value is required in FACTS I when this USSGL account is submitted. A list of the valid values for each attribute is on the last page of the attribute table.
Other	In some cases, attributes are filled in with a value other than "Y" or space. For example, Federal/non-Federal attribute domain values often appear with an "F" (Federal) in a shaded cell. Shaded attributes indicate the domain value that FACTS I defines as appropriate for a specific USSGL accounts. The FACTS I system will supply shaded attribute values for the designated USSGL accounts.

The FACTS I team may update the table periodically between USSGL TFM releases. For the latest information, access the GFRS/FACTS I Web site at **www.fms.treas.gov/factsi/index.html.**

Fiscal 2007 Attributes Used To Prepare Budgetary Reports

USSGL attributes are one component of a data model that describes how detailed data in agencies' financial systems (for example, USSGL account balances with related attributes captured at the transaction level) relate to external requirements. The data model also shows the relationships between the budget accounts published in the President's Budget and the Treasury appropriation/fund symbols collected in FACTS II, which are published in the Treasury Annual Report/Appendix. The data model includes:

- FACTS II Entity Relationship Diagram;
- FACTS II Entity Definition Report;
- FACTS II Attribute Definition Report;
- FACTS II USSGL Account Attributes Table.

FACTS II Entity Relationship Diagram

This diagram shows the relationship between entities or groups of data. It includes budget formulation accounts, Treasury appropriation/fund symbols, USSGL accounts and related attributes as well as financial data reported by Federal agencies to OMB and Treasury. The diagram shows the relationships between (1) information published in the President's Budget and the Treasury Annual Report/Appendix, and (2) detailed data captured in agencies' financial systems and summaries of these data presented in OMB and Treasury publications.

FACTS II Entity Definition Report

This report provides definitions and business rules for relationships between all entities.

FACTS II Attribute Definition Report

This report provides definitions and related information for all attributes associated with each entry. Agencies will report on those attributes described in the detailed financial information entity.

FACTS II USSGL Account Attribute Tables

The FACTS II attribute tables for fiscal 2007 show USSGL accounts, account titles, and normal balance indicators for USSGL accounts that agencies will use for FACTS II reporting. Also, the tables show related attributes agencies must provide for each USSGL account reported in FACTS II; these columns contain one of three values:

Space	This attribute is **not reported** in FACTS II for the USSGL account.
Y	Yes, report this attribute in FACTS II when this USSGL account is submitted. To determine valid domain values, refer to the Detailed Financial Information portion of the "FACTS II - Attribute Definition Report" in this section.
Other	In some cases, attributes are filled in with a value other than "Y" or space. For example, Begin_End often appears with an "E" (end balance) in a shaded cell. Shaded attributes show the only valid value that FACTS II will accept for a specific USSGL account.

SECTION V. USSGL Crosswalks to Standard External Reports

This section includes crosswalks for use in fiscal 2007. These crosswalks map USSGL accounts to external reports in accordance with current reporting guidance from Office of Management and Budget (OMB), Federal Accounting Standards Advisory Board (FASAB), and Financial Management Service (FMS).

FOOTNOTES AND ADDITIONAL INFORMATION:

1/ Use USSGL account attribute domains as provided in USSGL Section IV, page 4.

2/ This is a crosswalk from the USSGL to the Report on Budget Execution and Budgetary Resources (SF 133). The SF 133 crosswalk is in compliance with the Office of Management and Budget (OMB) Circular No. A-11, Preparing, Submitting, and Executing the Budget. The crosswalk from the USSGL to the Statement of Budgetary Resources (SBR) is in compliance with OMB Circular No. A-136, Financial Reporting Requirements. Information on the SBR should be consistent with budget execution information on the SF 133. The SBR should include a separate column for nonbudgetary Credit Program financing accounts.

3/ The shaded portion indicates that the attribute is supplied by FACTS II.

4/ When the SF 133 line numbers use both a beginning (B) and ending (E) balance for the same USSGL account, the beginning balance is subtracted from the ending balance in FACTS II.

5/ Anticipated amounts should be zero for the yearend preclosing trial balance.

6/ These USSGL accounts should equal the beginning balances of USSGL accounts 4450, 4650, and 4620.

7/ For yearend reporting of expiring Treasury Appropriation Fund Symbol accounts, obligations incurred must equal unfilled customer orders.

8/ Use USSGL account 1010 when no USSGL revenue or other financing source account can be used. For example, clearing account symbols do not report revenue activity but instead record liabilities. Since no liabilities are crosswalked to this line, clearing account symbols should use the change in USSGL account 1010 to complete this line.

9/ The SBR is an agency-wide report. Distributed offsetting receipt accounts are included to reconcile to information in the Budget of the United States Government and the Combined Statement of Receipts, Outlays, and Balances of the United States Government. This line must agree with line 4 on the Statement of Financing and must equal cash deposits to Treasury that are reported on SF 224, FMS 1219, and FMS 1220. In certain unique circumstances, other USSGL accounts may be approved to crosswalk to this line. In all cases, include only amounts collected, deposited, and distributed in offsetting receipt accounts.

10/ Reporting on this attribute is required beginning in fiscal 2007.

11/ SF 133 line number 1A is presented as line 1 of the SBR.

12/ SF 133 line numbers 2A and 2B are rolled up to line 2 of the SBR.

13/ SF 133 line numbers 3A1 and 3A2 are rolled up to line 3A of the SBR.

14/ SF 133 line numbers 3D5a, 3D5b, and 3D5c are rolled up to line 3D5 of the SBR.

15/ SF 133 line numbers 4A, 4B, 4C, and 4D are rolled up to line 4 of the SBR.

16/ SF 133 line numbers 6A, 6B, 6C, 6D, 6E, and 6F are rolled up to line 6 of the SBR.

17/ SF 133 line numbers 8A1, 8A2, and 8A3 are rolled up to line 8A of the SBR.

18/ SF 133 line numbers 8B1, 8B2, and 8B3 are rolled up to line 8B of the SBR.

19/ SF 133 line numbers 9A1, 9A2, and 9A3 are rolled up to line 9A of the SBR.

20/ SF 133 line numbers 9B1 and 9B2 are rolled up to line 9B of the SBR.

21/ SF 133 line numbers 10A, 10B, and 10C are rolled up to line 10 of the SBR.

22/ SBR lines 3E, 8C, 9C, 12C, 15C, 18C, 19C, and 19D are not part of the SF 133 and are only on the SBR.

Comment: If collecting entities recognize virtually no cost in connection with earning revenue, that revenue is reported on the Statement of Custodial Activity. (See amendments to OMB Circular No. A-136 "Financial Reporting Requirements," and " FASAB SFFAS No. 7 "Accounting for Revenue and Other Financing Sources," paragraph 45). If collecting entities have custodial collections that are nonmaterial and incidental to their primary mission, then sources and disposition of the collections may be disclosed in accompanying footnotes. (See amendments to OMB Circular No. A-136.)

SECTION VI. USSGL Crosswalks - Reclassified Statements

This section includes crosswalks for use in fiscal 2007. These crosswalks map USSGL accounts to external reports in accordance with TFM Volume I, Part 2, Chapter 4700, Agency Reporting Requirements for the *Financial Report of the United States Government,* Transmittal Letter 630, dated May 30, 2007.

Each report crosswalk lists the proper USSGL accounts and applicable attributes for each line and/or column on the reports. Attributes identify information subsidiary to the basic 4-digit USSGL accounts. This subsidiary information is necessary to meet external reporting requirements. See Section IV for additional information on attributes.

Lines appearing in boldface type indicate early implemented USSGL accounts.

The following are crosswalks from the USSGL Chart of Accounts to standard external reports required by FMS:

U.S. Government Standard General Ledger Chart of Accounts

The Chart of Accounts provides the basic structure for the U.S. Government Standard General Ledger (USSGL). It incorporates both proprietary and budgetary accounts. The proprietary and budgetary sets of general ledger accounts are self-balancing (the total debits equal total credits). It is important to note that central agency reporting requires a lower level of detail than the 4-digit USSGL account numbers provided. Therefore, the USSGL Board developed attributes containing various domain values that, when added to a basic 4-digit USSGL account, provide the appropriate level of detail needed for central agency reporting and, in effect, create new USSGL accounts. See Section IV for attribute definitions and domain values. It is this lower level of detail, the basic 4-digit USSGL account plus applicable attribute domain values, that agencies must capture at the transaction level to (1) comply with USSGL policy contained herein, and (2) achieve the desired result for proper reporting.

The basic 4-digit USSGL accounts are classified as follows:

- **1000 Assets**
- **2000 Liabilities**
- **3000 Net Position**
- **4000 Budgetary**
- **5000 Revenue and other Financing Sources**
- **6000 Expenses**
- **7000 Gains/Losses/Miscellaneous Items**
- **8000 Memorandum**

Agencies may expand this numbering system to as many digits as necessary to accommodate agency-specific requirements. However, subsidiary accounts must summarize or "roll-up" to the 4-digit USSGL accounts plus any related attributes as defined herein. The 9000 series of accounts are available for agencies to record and maintain agency-specific statistical and/or memorandum data.

In February 1999, the USSGL Board voted to delete summary accounts. However, agencies may summarize accounts as they find useful. Section headings replace many of the deleted summary accounts to maintain the integrity of the account structure.

USSGL accounts appearing in bold are new or indicate a change from the prior year TFM release (changes to the title, normal balance, and/or definition).

Account Number: 5795
Normal Balance: Credit

Definition: This amount represents the increase in the net position of the Federal Government for the face value of newly minted coins less the cost of production, which includes the cost of metal, manufacturing, and transportation. It is not demanded, earned, or donated; therefore, it is recognized as a financing source rather than revenue. An example is coins delivered to a Federal Reserve Bank in return for deposits. The account is used only by the United States Mint.

U.S. Government Standard General Ledger Account Transactions

This section provides accounting transactions for events occurring throughout the Federal Government. The transactions illustrate both proprietary and budgetary entries for each accounting event. Transactions are grouped under the following categories:

➢	**A 100-799**	Funding Sources
➢	**B 100-699**	Disbursements and Payables
➢	**C 100-799**	Collections and Receivables
➢	**D 100-799**	Adjustments/Writeoffs/Reclassifications
➢	**E 100-799**	Accruals/Non-Budgetary Transfers Other Than Disbursements and Collections
➢	**F 100-499**	Yearend
➢	**G 100-299**	Memorandum Entries

The above categories provide a basic framework for organizing the transactions. Also included, as a quick reference, is a listing of transaction descriptions. These accounting transactions document basic standard posting logic for financial events across the Federal Government.

The following notes explain conventions to follow when using the USSGL and the limitations of this compilation of USSGL transactions:

- There are valid accounting events/postings not yet documented. Agencies may engage in financial activity that the USSGL Board has not yet addressed. If so, submit an issue to the USSGL Board through the agency's USSGL representative. To illustrate the issue, document accounting events specific to the activity in a simple accounting scenario. Include references to specific legislation, accounting standards, or central agency requirements that make the activity unique from those currently documented. This documentation may be useful for explaining variances from the USSGL standard to auditors.

- For nonexpenditure transfers of budget authority between Treasury Appropriation Fund Symbols (TAFS), the "Transfer From" entity will determine the source of funds being transferred and record a proprietary USSGL account that designates the funding as being derived from either:

  - Unexpended appropriations from general fund resources not earmarked by law for a specific purpose - USSGL account 3103, "Unexpended Appropriations - Transfers-Out," or

  - Financing sources that impact cumulative results of operations - USSGL account 5765, "Nonexpenditure Financing Sources – Transfers-Out."

  The "Transfer To" entity must use a propriety USSGL account that corresponds to the proprietary USSGL account used by the "Transfer From" entity. USSGL account 3102, "Unexpended Appropriations - Transfers-In" corresponds to USSGL account 3103. USSGL account 5755, "Nonexpenditure Financing Sources – Transfers-In" corresponds to USSGL account 5765. Failure of both entities to record the matching proprietary USSGL account category (3102/3103 or 5755/5765) will result in agency-wide and/or Government-wide elimination discrepancies.

- There may be mixed funding in a single TAFS. The net position of a TAFS may be a mix of:
    - Unexpended appropriations derived from general fund resources not earmarked by law for a specific purpose, and
    - Financing sources, such as Economy Act revenue, that impact cumulative results of operations.
- To facilitate reconciliation of interagency expenses and revenues, agencies may no longer post costs directly to "in-process type" asset accounts. Agencies must first record costs, such as direct labor (payroll and benefits) and direct materials under the capitalization thresholds, in the appropriate USSGL account 6000 series account. Then use USSGL account 6610, "Cost Capitalization Offset" to apply the cost to the desired "in-process type" asset account. Do not record to USSGL 88XX series accounts amounts applied to asset accounts under this method.
- The transactions illustrate USSGL accounts without applicable attribute values. Therefore, a single transaction listed here may translate to several similar transactions in the agency's accounting system depending on how many combinations of USSGL accounts and attribute values are valid to record the agency's activities. Agencies must post transactions using the 4-digit USSGL account plus valid attribute values to fully comply with implementation of the USSGL at the transaction level and to facilitate necessary central agency reporting. Additionally, since the 4-digit base account combined with valid attributes is itself a USSGL account, agencies must post debit and credit entries to reclassify balances even when the 4-digit base account is the same.
- Transactions affecting budgetary status may contain debit or credit postings to multiple USSGL status accounts that may be valid for a particular transaction. Choose a USSGL account appropriate to the status of authority in the affected TAFS and the accounting event recorded.
- All transactions apply to activity with Federal and non-Federal entities unless limited by account definition or otherwise noted in the transaction description.
- In the yearend closing entries, USSGL accounts that may contain a balance (remain open) after closing appear in boldface.
- A USSGL transaction crosswalk (beginning with inception date 8/86), can be obtained at the USSGL Web site. This is particularly important for the large amount of revisions to the transaction categories that caused the transactions to be renumbered (T/L S2 06-02).
- The transaction reference provides an example of where this transaction appears. It does not provide all possible USSGL implementation guidance that may contain this transaction.

Accounts receivable represents the cash amount the vehicle procurer will receive from the customer. Inventory held for repair represents the value of an asset after it is repaired (value of a similar new asset). Other financing source represents fair market value of the old vehicle. Other financing source was used instead of revenue from goods sold due to a trade-in, which is not a budgetary resource. Inventory allowance represents the estimated repair cost of the damaged vehicle.

C610 To record the sale or disposition of personal property collected for replacement property.
Comment: Sales proceeds on disposed personal property collected for a replacement property will have no budgetary entry until the obligation is subsequently incurred for the replacement property. In most cases, the proceeds will only be available for acquisition of the replacement property in the fiscal year that the old property was sold, then for 1 fiscal year thereafter. This entry may not be applicable to some agencies that have specific language in their legislation that allows them to keep the proceeds beyond 2 years. See USSGL implementation guidance, "Disposition of Personal Property" on the USSGL Web site. Also review CFR 41, chapter 101 and GAO's Policy and Procedure Manual, dated May 1993, pages 7.5-8.9.

USSGL Account Attributes

To meet external reporting requirements, agencies need data at a level below the 4-digit USSGL account. Agencies' systems must capture this information at the transaction level by recording transactions using USSGL 4-digit accounts plus attributes. This section provides USSGL attribute tables for the FMS-administered FACTS I and FACTS II "trial-balance" reporting systems.

Attributes are like adjectives that further describe a USSGL account in order to meet a specific reporting requirement. Domain values are all of the possible valid choices within an attribute. For example, if there is a red chair and a blue chair in a room, then you only need one attribute to describe them: color. The valid domain values within the attribute "color" would be "red" or "blue." If you wanted the red chair, there would be no need to use additional adjectives such as weight, height, or size to describe it. This is because, in this example, color is enough to uniquely identify the chair. Therefore, only those attributes and those domain values that are necessary to uniquely identify the reporting requirement appear on the crosswalks.

Note: Some USSGL accounts do not have certain attributes in this document for reporting purposes, but do require these attributes for accounting purposes. An example is downward adjustments of prior-year obligations. For FACTS II reporting, USSGL accounts 4871, "Downward Adjustments of Prior-Year Unpaid Undelivered Orders – Obligations, Recoveries," 4872, "Downward Adjustments of Prior-Year Prepaid/Advanced Undelivered Orders – Obligations, Refunds Collected," 4971, "Downward Adjustments of Prior-Year Unpaid Delivered Orders – Obligations, Recoveries," and 4972, "Downward Adjustments of Prior-Year Paid Delivered Orders – Obligations, Refunds Collected," do not need the reimbursable flag attribute with the domain values of direct and reimbursable. However, at yearend these accounts close to USSGL accounts 4801, "Undelivered Orders – Obligations, Unpaid," 4802, "Undelivered Orders – Obligations, Prepaid/Advanced," 4901, "Delivered Orders – Obligations, Unpaid," and 4902, "Delivered Orders – Obligations, Paid," that do require the reimbursable flag attribute for FACTS II reporting. Therefore, an agency must similarly identify the adjustment accounts to close these accounts properly.

The attributes in the FACTS I data table are used to prepare the *Financial Report of the United States Government* and do not include all of the attributes used to prepare agency financial statements required by Office of Management and Budget (OMB) Circular No. A-136, "Financial Reporting Requirements."

Attributes Used To Prepare the Financial Report of the United States Government

USSGL attributes are one component of detailed data in agencies' financial systems related to the external reporting of financial statements. The FACTS I data table shows the USSGL account balances and the related attribute information captured at the transaction level that support production of the *Financial Report of the United States Government*. The USSGL crosswalks for the financial statements reference these attributes as a requirement for proper reporting on the particular financial statement line items.

Office of Management and Budget (OMB) Form and Content Agency Financial Reports

The FACTS I data table does not show all the USSGL account attributes necessary to produce agency financial statements required by OMB. Refer to Section V: Crosswalks to Standard External Reports.

Attribute Definition Report

This report provides definitions for the attributes associated with each proprietary USSGL account for FACTS I reporting. Agencies are required to report their adjusted trial balances and selected NOTES amounts in FACTS I with attributes described in the detailed financial information.

FACTS I USSGL Accounts and Attributes

The USSGL account and related attribute tables show USSGL accounts, account titles, and normal balance indicators for USSGL accounts that agencies will use for FACTS I reporting. The tables also show the related attributes agencies must provide for each USSGL account reported in FACTS I; these columns contain one of three values:

Space	This attribute is **not reported** in FACTS I for the USSGL account.
Y	The attribute domain value is required in FACTS I when this USSGL account is submitted. A list of the valid values for each attribute is on the last page of the attribute table.
Other	In some cases, attributes are filled in with a value other than "Y" or space. For example, Federal/non-Federal attribute domain values often appear with an "F" (Federal) in a shaded cell. Shaded attributes indicate the domain value that FACTS I defines as appropriate for a specific USSGL accounts. The FACTS I system will supply shaded attribute values for the designated USSGL accounts.

Fiscal 2008 Attributes Used To Prepare Budgetary Reports

USSGL attributes are one component of a data model that describes how detailed data in agencies' financial systems (for example, USSGL account balances with related attributes captured at the transaction level) relate to external requirements. The data model also shows the relationships between the budget accounts published in the President's Budget and the Treasury appropriation/fund symbols collected in FACTS II, which are published in the Treasury Annual Report/Appendix. The data model includes:

- FACTS II Entity Relationship Diagram;
- FACTS II Entity Definition Report;
- FACTS II Attribute Definition Report;
- FACTS II USSGL Account Attributes Table.

FACTS II Entity Relationship Diagram

This diagram shows the relationship between entities or groups of data. It includes budget formulation accounts, Treasury appropriation/fund symbols, USSGL accounts and related attributes as well as financial data reported by Federal agencies to OMB and Treasury. The diagram shows the relationships between (1) information published in the President's Budget and the Treasury Annual Report/Appendix, and (2) detailed data captured in agencies' financial systems and summaries of these data presented in OMB and Treasury publications.

FACTS II Entity Definition Report

This report provides definitions and business rules for relationships between all entities.

FACTS II Attribute Definition Report

This report provides definitions and related information for all attributes associated with each entry. Agencies will report on those attributes described in the detailed financial information entity.

FACTS II USSGL Account Attribute Tables

The FACTS II attribute tables for fiscal 2008 show USSGL accounts, account titles, and normal balance indicators for USSGL accounts that agencies will use for FACTS II reporting. Also, the tables show related attributes agencies must provide for each USSGL account reported in FACTS II; these columns contain one of three values:

Space	This attribute is **not reported** in FACTS II for the USSGL account.
Y	Yes, report this attribute in FACTS II when this USSGL account is submitted. To determine valid domain values, refer to the Detailed Financial Information portion of the "FACTS II - Attribute Definition Report" in this section.
Other	In some cases, attributes are filled in with a value other than "Y" or space. For example, Begin_End often appears with an "E" (end balance) in a shaded cell. Shaded attributes show the only valid value that FACTS II will accept for a specific USSGL account.

For the latest information, access the FACTS II Web site at **www.fms.treas.gov/factsii/index.html.**

Fiscal 2008 Footnotes and Additional Information for FACTS II Reporting of Detailed Financial Information

FOOTNOTES AND ADDITIONAL INFORMATION:

1/ For a description of USSGL attributes, see the "FACTS II - Attribute Definition Report - Detailed Financial Information" in this section.

2/ The shaded attributes are supplied by FACTS II.

3/ In the first quarter of FY 2008, agencies must separately report adjustments in their FACTSII trial balance submissions. During the first two quarters of FY 2008, agencies will continue with past practice and show adjustments as though they are current year activity on the SF 133 reports. Starting in the third quarter of FY 2008, plan to show adjustments on the SF 133 lines 1B, 12A2, and 12B2. The FY 2008 third quarter FACTS II generated FMS 2108 will display the Prior_Year_Adjustment attribute. An updated FY 2008 SF 133 and FMS 2108 crosswalk will be published prior to the planned third quarter implementation. A DRAFT of the third quarter FY 2008 SF 133 and FMS 2108 crosswalk is available on the USSGL website for review.

FOOTNOTES AND ADDITIONAL INFORMATION:

1/ Use USSGL account attribute domains as provided in USSGL Section IV, page 4.

2/ This is a crosswalk from the USSGL to the Report on Budget Execution and Budgetary Resources (SF 133). The SF 133 crosswalk is in compliance with the Office of Management and Budget (OMB) Circular No. A-11, Preparing, Submitting, and Executing the Budget. The crosswalk from the USSGL to the Statement of Budgetary Resources is in compliance with OMB Circular No. A-136, Financial Reporting Requirements. Information on the SBR should be consistent with budget execution information on the SF 133. The SBR should include a separate column for nonbudgetary Credit Program financing accounts.

3/ The shaded portion indicates that the attribute is supplied by FACTS II.

4/ When the SF 133 line numbers use both a beginning (B) and ending (E) balance for the same USSGL account, the beginning balance is subtracted from the ending balance in FACTS II.

5/ Anticipated amounts should be zero for the yearend preclosing trial balance.

6/ These USSGL accounts should equal the beginning balances of USSGL accounts 4450, 4650, and 4620.

7/ For yearend reporting of expiring Treasury Appropriation Fund Symbol accounts, obligations incurred must equal unfilled customer orders.

8/ Use USSGL account 1010 when no USSGL revenue or other financing source account can be used. For example, clearing account symbols do not report revenue activity but instead record liabilities. Since no liabilities are crosswalked to this line, clearing account symbols should use the change in USSGL account 1010 to complete this line.

9/ The SBR is an agency-wide report. Distributed offsetting receipt accounts are included to reconcile to information in the Budget of the United States Government and the Combined Statement of Receipts, Outlays, and Balances of the United States Government. This line must agree with line 4 on the Statement of Financing and must equal cash deposits to Treasury that are reported on SF 224, FMS 1219, an FMS 1220. In certain unique circumstances, other USSGL accounts may be approved to crosswalk to this line. In all cases, include only amounts collected, deposited, and distributed in offsetting receipt accounts.

10/ Refer to OMB Circular No. A-11 for detailed information on reporting Apport. Cat. B information.

11/ SF 133 line numbers 1A and 1B are presented as line 1 of the SBR.

12/ SF 133 line numbers 2A and 2B are rolled up to line 2 of the SBR.

13/ SF 133 line numbers 3A1 and 3A2 are rolled up to line 3A of the SBR.

14/ SF 133 line numbers 3D5a, 3D5b, and 3D5c are rolled up to line 3D5 of the SBR.

15/ SF 133 line numbers 4A, 4B, 4C, and 4D are rolled up to line 4 of the SBR.

16/ SF 133 line numbers 6A, 6B, 6C, 6D, 6E, and 6F are rolled up to line 6 of the SBR.

17/ SF 133 line numbers 8A1, 8A2, and 8A3 are rolled up to line 8A of the SBR.

18/ SF 133 line numbers 8B1, 8B2, and 8B3 are rolled up to line 8B of the SBR.

19/ SF 133 line numbers 9A1, 9A2, and 9A3 are rolled up to line 9A of the SBR.

20/ SF 133 line numbers 9B1 and 9B2 are rolled up to line 9B of the SBR.

21/ SF 133 line numbers 10A, 10B, and 10C are rolled up to line 10 of the SBR.

22/ SF 133 lines 12A1 and 12A2 are rolled up to line 12A of the SBR.

23/ SF 133 lines 12B1 and 12B2 are rolled up to line 12B of the SBR.

24/The Prior-Year Adjustment attribute is not applicable to the SBR.

25/ SBR lines 3E, 8C, 9C , 12C, 15C, 18C, 19C, and 19D are not included in the SF 133.

26/ In the first quarter of fiscal 2008, agencies must separately report adjustments in their FACTS II trial balance submissions. During the first two quarters of fiscal 2008, agencies will continue with past practice and show adjustments as though they are current-year activity on the SF 133 reports. Starting in the third quarter of fiscal 2008, plan to show adjustments on SF 133 lines 1B, 12A2, and 12B2. An updated fiscal 2008 SF 133 crosswalk will be published prior to the planned third-quarter implementation. A DRAFT of the third-quarter fiscal 2008 SF 133 crosswalk is available on the USSGL Web site for review.

Comment: If collecting entities recognize virtually no cost in connection with earning revenue, that revenue is reported on the Statement of Custodial Activity. (See amendments to OMB Circular No. A-136 "Financial Reporting Requirements," and " FASAB SFFAS No. 7 "Accounting for Revenue and Other Financing Sources," paragraph 45). If collecting entities have custodial collections that are nonmaterial and incidental to their primary mission, then sources and disposition of the collections may be disclosed in accompanying footnotes. (See amendments to OMB Circular No. A-136.)
