DRAFT GUIDANCE

This draft guidance document is being distributed for comment purposes only.

Comments and suggestions regarding this draft guidance must be submitted within 60 days of publication in the *Federal Register* of the notice announcing the availability of the draft guidance. Submit comments to the Division of Dockets Management (HFA-305), 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852. All comments must be identified with the docket number listed in the notice of availability that publishes in the *Federal Register*.

For questions regarding this draft document, contact Charlotte Christin at (301) 827-4067.

DRAFT GUIDANCE¹

Emergency Use Authorization of Medical Products

This draft guidance document represents the Food and Drug Administration's (FDA's) current thinking on this topic. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. You may use an alternative approach if the approach satisfies the requirements of the applicable statutes and regulations. If you want to discuss an alternative approach, please contact the appropriate FDA staff.

I. INTRODUCTION

This draft guidance, when final, will explain FDA's policies for authorizing the emergency use of medical products under section 564 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 360bbb-3), which was amended by the Project BioShield Act of 2004 (Public Law 108-276).² Section 564 permits the FDA Commissioner to authorize the use of an unapproved medical product or an unapproved use of an approved medical product during a declared emergency involving a heightened risk of attack on the public or U.S. military forces.

The Emergency Use Authorization (EUA) authority recently granted by Congress allows the FDA Commissioner to strengthen the public health protections against biological, chemical,

¹ This draft guidance was prepared by the Emergency Use Authorization (EUA) Principals Group and the EUA Working Group. The EUA Working Group (WG) is composed of members with expertise in public health, medical, regulatory, legal, ethical, and risk communication areas. The WG, on an ongoing basis, examines issues related to issuance and implementation of an EUA. This group provides expert advice to both the Commissioner of the Food and Drug Administration (FDA Commissioner) and the Secretary of Health and Human Services (the Secretary).

² Section 903 of the FD&C Act and existing delegations of authority, found in the FDA Staff Manual Guide 1410.10, permit the authority of the Secretary to issue an EUA under section 564 of the FD&C Act to be delegated to the FDA Commissioner. The Secretary has delegated his authority to issue an EUA under section 564 to the FDA Commissioner. Thus, in this document the FDA Commissioner is identified rather than the Secretary except where the Secretary retains the authority.

Contains Nonbinding Recommendations

Draft - Not for Implementation

22 radiological, and nuclear agents that may be used to attack the American people or the U.S.
23 armed forces. Under section 564, the FDA Commissioner may allow medical countermeasures
24 to be used in an emergency to diagnose, treat, or prevent serious or life-threatening diseases or
25 conditions caused by such agents, when there are no adequate, approved, and available
26 alternatives.

27

28 The document is intended to inform industry, government agencies, and FDA staff of the
29 Agency's general recommendations and procedures for issuance of EUAs.³ FDA expects that
30 requests for consideration for an EUA would be submitted by government agencies (e.g., the
31 Department of Health and Human Services or the Department of Defense (DoD)) or private
32 entities. FDA may seek additional data and information on a case-by-case basis to ensure that
33 the statutory criteria for issuance of an EUA are met.

34

35 Additionally, the Secretary of Health and Human Services (the Secretary) will establish a
36 permanent Emergency Use Authorization Working Group (EUA WG), headed by the Assistant
37 Secretary of Public Health Emergency Preparedness (ASPHEP), with representatives from FDA,
38 the Centers for Disease Control and Prevention (CDC), the National Institutes of Health (NIH),
39 the Department of Defense (DoD), the Department of Homeland Security (DHS), the
40 Department of Veterans Affairs and, as appropriate, participants from other Federal agencies, to
41 identify and provide expert consultation on potential EUA candidates prior to and during
42 declared emergencies.

43

³ FDA Centers may issue subsequent guidance providing greater detail on these recommendations and procedures.

Contains Nonbinding Recommendations

Draft - Not for Implementation

44 FDA's guidance documents, including this guidance, do not establish legally enforceable
45 responsibilities. Instead, guidances describe the Agency's current thinking on a topic and should
46 be viewed only as recommendations, unless specific regulatory or statutory requirements are
47 cited. The use of the word *should* in Agency guidances means that something is suggested or
48 recommended, but not required.

49

50 **II. DECLARATION OF EMERGENCY**

51

52 Section 564(b)(1) of the FD&C Act provides that, before an EUA may be issued, the Secretary
53 must declare an emergency based on one of the following grounds:

54 (1) a determination by the Secretary of Homeland Security that there is a domestic
55 emergency, or a significant potential for a domestic emergency, involving a heightened risk of
56 attack with a specified biological, chemical, radiological, or nuclear agent or agents;

57 (2) a determination by the Secretary of Defense that there is a military emergency, or a
58 significant potential for a military emergency, involving a heightened risk to United States
59 military forces of attack with a specified biological, chemical, radiological, or nuclear agent or
60 agents; or

61 (3) a determination by the Secretary of a public health emergency under section 319 of
62 the Public Health Service Act (PHS Act) that affects, or has the significant potential to affect,
63 national security, and that involves a specified biological, chemical, radiological, or nuclear
64 agent or agents, or a specified disease or condition that may be attributable to such agent or
65 agents.

66

Contains Nonbinding Recommendations

Draft - Not for Implementation

67 Once the Secretary has declared an emergency justifying an authorization under section 564 to
68 use an unapproved medical product or an approved product for an unapproved use, the ASPHEP
69 may convene the EUA Working Group to provide expert consultation to the FDA.⁴ Based on his
70 review of the information and data submitted to the Agency and input from the EUA WG (if
71 convened) and after consulting with the Director of NIH and the Director of CDC (to the extent
72 feasible and appropriate given the circumstances of the emergency), the FDA Commissioner
73 may authorize the emergency use of a particular product, assuming other statutory criteria and
74 conditions are met.⁵

75
76 Section 564(b)(2) states that a declaration of emergency will terminate one year after issuance or
77 earlier if the Secretary determines, in consultation (as appropriate) with the Secretary of
78 Homeland Security or the Secretary of Defense, that the circumstances that precipitated the
79 declaration have ceased. Before a declaration terminates, the Secretary must provide, under
80 section 564(b)(3), advance notice that is sufficient to allow for disposition of unapproved product
81 or any labeling or other information provided related to an unapproved use of an approved
82 product. Section 564(b)(2)(B) also authorizes the Secretary to renew a declaration.

83
84 **Publication:** The Secretary will promptly publish in the Federal Register notice of each
85 determination of actual or potential emergency, the Secretary's declaration of emergency,

⁴ The FDA Commissioner may issue one or more EUAs on the basis of a single declaration of emergency, under section 564(b)(1), provided that the EUAs are intended for use in the same emergency involving the same biological, chemical, radiological, or nuclear agent or agents.

⁵ For purposes of this document, an "unapproved" product refers to a product that is not approved, licensed, or cleared for commercial distribution under sections 505, 510(k), or 515 of the FD&C Act or section 351 of the Public Health Service Act (PHS Act); an "unapproved use of an approved product" refers to a product that is approved, licensed, or cleared under such provisions but which use is not an approved, licensed, or cleared use of the product (21 U.S.C. 360bbb-3).

Contains Nonbinding Recommendations

Draft - Not for Implementation

86 advance notice of termination, and renewal of a declaration issued under section 564(b).⁶ The
87 FDA Commissioner will promptly publish in the Federal Register a notice of each authorization,
88 including an explanation of the reasons for issuance, a description of the intended use of the
89 EUA product, and its indications and contraindications. The FDA Commissioner also will
90 promptly publish in the Federal Register each termination or revocation of an authorization and
91 an explanation of the reasons for the decision.⁷ In addition, FDA plans to provide notice of an
92 emergency use authorization on the Agency's website, at www.fda.gov, and through
93 announcements disseminated to the media.⁸

94

95 **III. ELIGIBILITY FOR AN EUA**

96

97 Section 564 permits the FDA Commissioner to authorize the introduction into interstate
98 commerce of a drug, device, or biological product intended for use in an actual or potential
99 emergency during the effective period of a declaration. EUA candidates include products and
100 uses that are not approved, cleared, or licensed under sections 505, 510(k), and 515 of the FD&C
101 Act or section 351 of the PHS Act. The FDA Commissioner may issue an EUA only if, after
102 consultation with the Director of NIH and the Director of CDC (to the extent feasible and
103 appropriate given the circumstances of the emergency), the FDA Commissioner concludes—

104 1) that the agent specified in the declaration of emergency can cause a serious or life-
105 threatening disease or condition;

⁶ To the maximum extent feasible given the circumstances, Federal Register publication of the notice will occur prior to the action that is the subject of the notice.

⁷ See *supra* note 6.

⁸ In publicly releasing information on an EUA, FDA will take necessary steps to protect classified information and information otherwise protected by law, as appropriate.

Contains Nonbinding Recommendations

Draft - Not for Implementation

- 106 2) that, based on the totality of scientific evidence available, including data from
107 adequate and well-controlled clinical trials, if available, it is reasonable to believe that the
108 product may be effective in diagnosing, treating, or preventing--(a) the serious or life-
109 threatening disease or condition referred to in paragraph (1); or (b) a serious or life-
110 threatening disease or condition caused by a product authorized under section 564, or
111 approved, cleared, or licensed under the FD&C Act or PHS Act, for diagnosing, treating,
112 or preventing the disease or condition referred to in paragraph (1) and caused by the
113 agent specified in the declaration of emergency;
- 114 3) that the known and potential benefits outweigh the known and potential risks of the
115 product when used to diagnose, prevent, or treat the serious or life-threatening disease or
116 condition that is the subject of the declaration; and
- 117 4) that there is no adequate, approved, and available alternative to the product for
118 diagnosing, preventing, or treating such serious or life-threatening disease or condition.

119

120 **Categories of Products:** The range of potential EUA products includes drugs, biological
121 products (e.g., vaccine, blood products, and biological therapeutics), and devices (e.g., *in vitro*
122 diagnostics). (Throughout this document, the term "drugs" includes biological products.)
123 Candidate products include those products that have not been approved or cleared under the
124 FD&C Act or the PHS Act ("unapproved products"), as well as unapproved uses of approved
125 drugs and approved or cleared devices ("unapproved uses of approved products"). Examples of
126 "unapproved uses of approved products" may include: 1) use of an approved antibiotic as
127 prophylaxis for exposure to a bacterium that is not included on the approved labeling for the
128 antibiotic; and 2) distribution of a prescription drug by a non-licensed provider (e.g., delivery of

Contains Nonbinding Recommendations

Draft - Not for Implementation

129 oral antibiotics by U.S. postal carriers). Section 564 does not require that an investigational new
130 drug application (IND) or investigational device exemption (IDE) be filed for EUA candidate
131 products, although FDA anticipates that many of the unapproved products already will have been
132 under evaluation through such mechanisms.

133

134 **Effectiveness:** Products and uses that are eligible for authorization are those that "may
135 be effective" to prevent, diagnose, or treat in humans serious or life-threatening diseases or
136 conditions that can be caused by the specified biological, chemical, radiological, or nuclear
137 agent(s) that led to or caused the declared emergency. Eligible products and uses also include
138 those that may be effective to mitigate a disease or condition caused by an FDA-regulated
139 product (including an EUA product, or an approved, cleared, or licensed product) used to
140 diagnose, treat, or prevent a disease or condition caused by such agent. The "may be effective"
141 standard for EUAs provides for a lower level of evidence than the "effectiveness" standard that
142 FDA uses for product approvals.⁹

143

144 FDA intends to assess the potential effectiveness of an EUA product on a case-by-case
145 basis. The Agency has significant experience assessing effectiveness where clinical information
146 is limited, including experience with treatment INDs and IDEs and humanitarian device
147 exemptions. However, the amount, kind, and quality of evidence available to support an EUA
148 may not always be the same as that required for treatment INDs, IDEs, and humanitarian device
149 exemptions under the FD&C Act and Agency regulations. If, based on the totality of the

⁹ The terminology "may be effective" also appears in 21 CFR 312.34(b)(3)(A), where it states that a request for a Treatment IND (tIND) for a drug intended to treat an immediately life-threatening disease may be denied due to a lack of evidence that the drug "may be effective for its intended use in its intended population." Nevertheless, the

Contains Nonbinding Recommendations

Draft - Not for Implementation

150 scientific evidence available, including adequate and well-controlled clinical trials, if they are
151 available, it is reasonable to believe that the product may be effective for the specified use, the
152 FDA Commissioner may authorize its emergency use--provided that other statutory criteria (e.g.,
153 relating to the risk-benefit analysis and alternatives) also are met.

154

155 **Risk-Benefit Analysis:** Products are eligible for emergency use authorization if FDA
156 determines that the known and potential benefits of the product, when used to diagnose, prevent,
157 or treat the identified disease or condition, outweigh the known and potential risks of the
158 product. In determining whether the known and potential benefits of the product outweigh the
159 known and potential risks, FDA intends to assess the quality and quantity of the evidence, given
160 the current state of scientific knowledge, of risks and benefits. The Agency intends to use this
161 information to make an overall risk-benefit determination. To accomplish this, FDA plans to
162 look at the totality of the scientific evidence, which could arise from a variety of sources. The
163 Agency intends to review and consider all evidence, including results of domestic and foreign
164 clinical trials, animal data, and *in vitro* data, available for Agency consideration. FDA
165 anticipates that, for some candidate products, data from controlled clinical trials will be
166 available. For others, the Agency expects to consider clinical experience from other than a
167 controlled trial if the circumstances warrant. The FDA Commissioner will consult with the
168 Director of NIH and the Director of CDC (to the extent feasible and appropriate given the
169 circumstances of the emergency) and will evaluate all the evidence in light of the specific

Agency's decisions on requests for EUAs and tINDs involve product-specific and circumstance-dependent determinations of risks and benefits.

Contains Nonbinding Recommendations

Draft - Not for Implementation

170 circumstances of the emergency, including potential risks of not receiving treatment with the
171 candidate product, in determining whether to issue an EUA.¹⁰

172

173 **Alternatives to the Product:** The FDA Commissioner may issue an EUA if he
174 determines that there is no adequate, approved, and available alternative to the candidate product.
175 A potential alternative product may be considered “unavailable” if there are insufficient supplies
176 to meet fully the emergency need. A potential alternative product may be considered
177 "inadequate" if there are contraindicating data for special circumstances or populations (e.g.,
178 immunocompromised individuals or individuals with a drug allergy).

179

180 **IV. REQUEST FOR CONSIDERATION FOR AN EUA**

181

182 Although an EUA may not be issued until after an emergency has been declared by the
183 Secretary, FDA recognizes that during such exigent circumstances, the time available for the
184 submission and review of an EUA request may be severely limited. Therefore, the Agency
185 strongly encourages an entity with a possible candidate product, particularly one at an advanced
186 stage of development, to contact the FDA Center responsible for the candidate product even
187 before a determination of actual or potential emergency. This draft guidance offers
188 recommendations for both "pre-emergency" activities to be conducted prior to the determination
189 of actual or potential emergency and "emergency" activities to be performed once the
190 determination has been issued. In addition, this section of the draft guidance sets out the types of

¹⁰ Such evidence includes the possible consequences of not taking or using the candidate product (e.g., possible health effects and the need for quarantine).

Contains Nonbinding Recommendations

Draft - Not for Implementation

191 information FDA believes are important to allow an assessment of safety and effectiveness and
192 to make an adequate risk-benefit determination to support issuance of an EUA.

193

194 **Pre-Emergency Activities:** Such activities may include discussions with FDA about a
195 prospective EUA product and the appropriate vehicle to use, such as an IND, IDE, or Master
196 File, when submitting data on the product prior to a determination of actual or potential
197 emergency.¹¹ The Agency strongly recommends that an entity submitting data during a "pre-
198 emergency" period follow the recommendations for data submission contained in "Submission of
199 a Request for Consideration," below. If, prior to the declaration of an emergency, FDA believes
200 that a candidate product may meet the criteria for an EUA, the Agency may share appropriate
201 information on such product with the Secretary's EUA WG.

202

203 **Emergency Activities:** Once a determination of actual or potential emergency has been
204 made under section 564(b)(1), the Secretary may declare an emergency justifying the
205 authorization to use an unapproved medical product or an approved medical product for an
206 unapproved use. The Secretary will consult with the EUA WG; other technical experts from
207 FDA, NIH, and CDC; and other agencies and private entities, where appropriate, to identify
208 products that may be eligible for an EUA in light of the circumstances of the emergency and to
209 facilitate timely submission of the EUA request by an appropriate entity.

210

211 **Submission of a Request for Consideration:** Section 564(c) requires that the data to
212 support authorization demonstrate that, based on the totality of scientific evidence available to

¹¹ FDA anticipates that the appropriate mechanism to use for submitting data on a candidate product during the pre-emergency period will vary depending on the circumstances.

Contains Nonbinding Recommendations

Draft - Not for Implementation

213 the FDA Commissioner (including data from adequate and well-controlled clinical trials, if
214 available), it is reasonable to believe that the product may be effective in diagnosing, treating, or
215 preventing the serious or life-threatening disease or condition. The exact type and amount of
216 data needed to support an EUA may vary depending on the nature of the declared emergency and
217 the nature of the candidate product. To facilitate FDA review of such data, the Agency
218 recommends that a request for consideration for an EUA include a well-organized summary of
219 the available scientific evidence that evaluates the product's safety and effectiveness, including
220 the adverse event profile when used for diagnosis, treatment, or prevention of the serious or life-
221 threatening disease or condition, as well as data and other information on safety, effectiveness,
222 risks and benefits, and (to the extent available) alternatives.

223

224 The chart below summarizes the types of data that FDA recommends be submitted to
225 support a request for consideration for an EUA.

226

Summary of Recommended Data to Support a Request for Consideration:

227

228

For FDA to evaluate a request for consideration for an EUA, the Agency recommends that the following information be submitted:

229

230

231

232

233

234

235

236

237

238

269

270

271

272

273

274

275

276

277

278

279

1. a description of the product and its intended use (e.g., identification of the serious or life-threatening disease or condition for which the product may be effective);
2. identification and an explanation of what unmet need(s) would be addressed by issuance of the EUA;
3. a description of the product's approval or clearance status, if any, under the FD&C Act or licensure status under the PHS Act, and whether the product is under an investigational application (e.g., whether the product is unapproved or whether it is approved but the EUA is for an unapproved use; whether an IND or IDE is in effect or has been submitted); whether the product is licensed for either the proposed or another use in a foreign country; information on the use of the medical product by either a foreign country or an international mutual defense organization such as NATO;
4. a list of each site where the product, if authorized, would be (or was) manufactured and the Good Manufacturing Practices (GMP) status of the manufacturer;
5. identification of any approved alternative products, including their availability and adequacy for the proposed use (if known);
6. available safety and effectiveness information for the product;
7. a discussion of risks and benefits;
8. a description of the information for health care providers or authorized dispensers and recipients of the product, (e.g., two separate "Fact Sheets"), and the feasibility of providing such information to health care providers or authorized dispensers and recipients in emergency situations;
9. information on chemistry, manufacturing, and controls;
10. instructions for use of the EUA product (e.g., if follow-up treatment is required); and
11. proposed labeling (if applicable).

We discuss these recommendations in more detail below.

Contains Nonbinding Recommendations

Draft - Not for Implementation

280 **Recommended Safety Data**

281

282 *In general:* The amount and type(s) of safety data that FDA recommends be submitted as
283 part of a request for consideration for an EUA will differ depending upon a number of factors,
284 including whether the product is approved for another indication and, in the case of an
285 unapproved product, the product's stage of development. FDA expects to interpret safety
286 information in light of the seriousness of the clinical condition, alternative therapies (if any), and
287 the specific circumstances of the emergency. FDA strongly encourages any person or entity with
288 a candidate product to discuss with the Agency at the earliest possible time (even before a
289 determination of actual or potential emergency) the nature and type of safety data that might be
290 appropriate to submit to FDA.

291

292 *Previously approved products:* If the new indication uses a similar dose, duration, route
293 of administration, and/or mechanism of action (as appropriate given the nature of the product),
294 and the intended patient population is similar to that for which the product is approved, FDA
295 recommends that the request for consideration for an EUA reference the approved application if
296 the requester submitted the approved application or has a right of reference. If the new use poses
297 a different risk to the patient population (e.g., suggesting the possibility of increased toxicity),
298 the Agency recommends that information from relevant *in vitro* studies, animal toxicology
299 studies, and (if available) human clinical data and experience be provided to support such a use.

300

301 *Products under development:* The range of available data for such products will differ
302 widely. FDA recommends that any request for consideration for an EUA include available

Contains Nonbinding Recommendations

Draft - Not for Implementation

303 preclinical testing data, such as *in vitro* and animal toxicology data. The Agency also strongly
304 encourages that safety information in humans from clinical trials and individual patient
305 experience be provided, if available. FDA further recommends that data submitted in the request
306 attempt to link the likely patient exposure to any relevant existing preclinical data. Similarly,
307 where animal data are used, sufficient information should be provided to link the results of these
308 data to expected exposures related to the proposed use in humans. Any information on safety
309 associated with use in humans of this or related compounds or devices of a similar design also
310 should be submitted.

311

312 **Recommended Effectiveness Data**

313

314 *In general:* FDA recognizes that comprehensive effectiveness data are unlikely to be
315 available for every EUA candidate product, and the information necessary to authorize
316 emergency use of a product will depend on the circumstances of the declared emergency, as well
317 as available knowledge about the product's safety profile. FDA plans to assess the sufficiency of
318 the effectiveness data and the risk-benefit profile of each candidate product on a case-by-case
319 basis.

320

321 FDA recommends that requests for consideration for EUAs include (or, for products that
322 are developed under IND or IDE or have Drug or Device Master Files, refer to the appropriate
323 document containing) any available relevant scientific evidence regarding the following:

- 324 (a) mechanism(s) of the product's action to diagnose, treat, or prevent the disease
325 or condition underlying the request;

Contains Nonbinding Recommendations

Draft - Not for Implementation

- 326 (b) preclinical testing data, such as *in vitro* evidence of effect of the product in
327 preventing or reducing the toxicity of the specified agent;
- 328 (c) for drugs, demonstration of effectiveness in diagnosing, treating, or preventing
329 the subject disease or condition in at least one animal species expected to react
330 with a response predictive for humans, where the animal study endpoint is clearly
331 related to the desired benefit in humans (e.g., enhancement of survival or
332 prevention of major morbidity);¹²
- 333 (d) evidence of effect in humans (e.g., in published case reports, uncontrolled
334 trials, controlled trials, if available, and any other relevant human use experience);
- 335 (e) for drugs, data to support the proposed dosage (including pharmacokinetics
336 and pharmacodynamics data, and for vaccines or antibody therapies,
337 immunogenicity and/or achievement of protective levels of relevant parameters of
338 immunity) for the intended use; and
- 339 (f) for devices, clinical testing data to support the proposed intended use, as
340 necessary and appropriate.

341

342 **Other Data Considerations**

343

344 *In general:* FDA recommends that the request for consideration include the following
345 types of data, as appropriate and to the extent feasible given the exigencies of the circumstances:
346

¹² See, e.g., Food and Drugs; Applications for FDA Approval to Market a New Drug; Approval Based on Evidence of Effectiveness from Studies in Animals, 21 CFR 314.610(a)(2) and (3).

Contains Nonbinding Recommendations

Draft - Not for Implementation

- 347 (a) Well-organized study reports that provide a complete assessment and analysis
348 of available safety and effectiveness data and an interpretation of the findings. If
349 final study reports are not yet available, any available interim study reports should
350 be provided and clearly identified as such;
- 351 (b) Any relevant statistical analyses; and
- 352 (c) Source data for clinical studies, nonclinical laboratory studies, and any animal
353 studies demonstrating activity or effectiveness of the product in the treatment of
354 the underlying disease or condition or a closely related disease or condition, such
355 as case report tabulations for key studies; case report forms for all patients who
356 died during the clinical studies and for all persons who did not complete the study
357 due to an adverse event, regardless of causality; relevant reports in the published
358 literature; and translations of source materials in a language other than English.

359

360 *Data quality:* The Agency recommends that requests for consideration for EUAs include
361 statements on whether the nonclinical laboratory studies were conducted in compliance with
362 applicable Good Laboratory Practice requirements in 21 CFR part 58 and whether the clinical
363 studies were conducted in compliance with applicable Good Clinical Practice standards.

364

365 *Data updates:* FDA recommends that any data from any ongoing testing (e.g., longer
366 term stability data) or other data or information that may change the Agency's evaluation of the
367 product's safety or effectiveness that become available during the period of review or the term of
368 the EUA (to the extent that such data are not required to be submitted under a condition of
369 authorization) be submitted to the Agency when such data become available.

Contains Nonbinding Recommendations

Draft - Not for Implementation

370

371 **Discussion of Risks and Benefits:** FDA recommends that a request for consideration for
372 an EUA include a discussion of the candidate product's known and potential risks and benefits,
373 which includes a synthesis of the data and information requested above, including:

374 (a) Measures taken to mitigate risk or optimize benefit;

375 (b) Limitations, uncertainty, and data gaps; and

376 (c) A description of circumstances, if any, under which the product should not be
377 used (e.g., contraindications).

378

379 **Format of Submissions:** Submissions may be provided in paper or electronic format.
380 Specific information for electronic format may be obtained by reviewing guidance from the
381 appropriate FDA Center (CBER--www.fda.gov/cber/esub/esubguid.htm; CDER--
382 www.fda.gov/cder/regulatory/ersr; and CDRH--www.fda.gov/cdrh/elecsub.html). Where a paper
383 submission is filed, FDA recommends that a minimum of three copies be provided.

384

385 The Agency recommends that each submission begin with a section that describes the
386 contents and organization of the included materials. The submitter of the original application or
387 anyone with a right of reference may refer to data or other information previously submitted to
388 the Agency in a marketing application, investigational application, or Master File.

389

390 FDA expects material to be provided in a reviewable form and sufficiently complete to
391 permit substantive review. Nevertheless, the Agency recognizes that, in rapidly developing or
392 unexpected emergency circumstances, or when previously unanticipated or unavailable medical

Contains Nonbinding Recommendations

Draft - Not for Implementation

393 countermeasures are being considered, it may not be possible for an entity to provide all of the
394 requested data or to provide it in the format suggested in a timely manner. In such
395 circumstances, the Agency will accept and evaluate the request for consideration for an EUA
396 based on data in the form an entity is able to submit. However, a request for consideration that is
397 missing data or that is otherwise incomplete or poorly documented will make determination of
398 whether the product's benefits outweigh its risks more difficult and may, for that reason, be more
399 likely to result in a request for additional information, the need for a longer time period for
400 review, or a decision not to authorize emergency use of the candidate product.

401

402 The addresses for submission of a request for consideration for an EUA are as follows:

403

404 For the Center for Biologics Evaluation and Research:

405 Food and Drug Administration
406 Center for Biologics Evaluation and Research
407 Document Control Center, HFM-99, Suite 200N
408 1401 Rockville Pike
409 Rockville, MD 20852-1448
410 ATTN: EUA

411

412 For the Center for Devices and Radiological Health:

413 Document Mail Center (HFZ-401)
414 Center for Device and Radiological Health
415 Food and Drug Administration
416 9200 Corporate Boulevard
417 Rockville, MD 20850
418 ATTN: EUA

419

Contains Nonbinding Recommendations

Draft - Not for Implementation

420 For the Center for Drug Evaluation and Research:

421 Food and Drug Administration
422 Center for Drug Evaluation and Research
423 Central Document Room
424 5901-B Ammendale Road
425 Beltsville, MD 20705-1266
426 ATTN: EUA

427

428 **V. PROCESSING OF AN EUA**

429

430 This section discusses FDA's role in pre-emergency activities for candidate EUA products, as
431 well as the procedures the Agency will follow in processing a request for consideration for an
432 EUA once the Secretary has issued a declaration of emergency.

433

434 **Prioritization of Pre-Emergency Activities:** The Agency intends to establish priorities
435 for the activities it undertakes, prior to a determination of actual or potential emergency, on
436 candidate products. Such prioritization may be based on the circumstances, such as:

- 437 (a) the seriousness of the clinical condition;
- 438 (b) the incidence of the clinical condition;
- 439 (c) the effect use of the product may have in ensuring national security;
- 440 (d) whether the product is included in U.S. government stockpiles or whether
441 there is a significant likelihood that the product will be included in U.S.
442 government stockpiles if an EUA is granted;
- 443 (e) whether the product could be used by a large population or is limited to
444 subpopulation(s);
- 445 (f) request of another government agency;

Contains Nonbinding Recommendations

Draft - Not for Implementation

- 446 (g) the extent to which the product would serve a significant unmet medical need
447 in a special population (e.g., pregnant women);
- 448 (h) the availability and, where known, safety and effectiveness of other
449 countermeasures;
- 450 (i) the urgency of the treatment need (i.e., the window of opportunity for
451 treatment can vary between different medical conditions);
- 452 (j) the available information concerning the likelihood that the product may be
453 safe and effective in treating the condition;
- 454 (k) the adequacy of the supporting nonclinical and clinical information; and
- 455 (l) the quantity of product available.

456

457 FDA intends to establish priorities for its pre-emergency activities at the Division level or
458 higher and, as appropriate and feasible, will consult with the Secretary's EUA WG and may
459 consult other agencies on its priority setting.

460

461 **Review of Pre-Emergency Submissions:** To allow FDA review to begin before a
462 determination of actual or potential emergency, the Agency recommends that a pre-emergency
463 submission be filed using existing processes (e.g., IND or IDE), to the extent feasible and
464 appropriate. The extent of, and timelines for, review of such submission will be determined on a
465 case-by-case basis and will depend on the nature of the submission (e.g., whether an IND or IDE
466 for the product already is on file) and the workload of the reviewing Center. Subject to those
467 considerations and other exigent circumstances beyond Agency control, FDA anticipates that
468 pre-emergency submissions for high priority activities may be reviewed in a matter of weeks.

489
490
491

Prioritization of Requests for Consideration for an EUA During a Declared

Emergency: Once the Secretary has declared an emergency justifying the authorization to use an unapproved product or an unapproved use of an approved product, the Agency intends to prioritize its review of requests for consideration for an EUA based on factors such as:

- (a) the seriousness of the clinical condition;
- (b) the incidence of the clinical condition;
- (c) the likelihood that the product may be effective in treating the condition;
- (d) the effect use of the product may have in ensuring national security;
- (e) whether the product is included in U.S. government strategic stockpiles;
- (f) whether the product could be used by a large population or is limited to subpopulation(s) (unless such use may be critical in managing a public health threat or in protecting a subpopulation with no other suitable measures available);
- (g) request of another government agency;
- (h) the extent to which the product would serve a significant unmet medical need in a special population (e.g., pregnant women);
- (i) the availability and, where known, safety and effectiveness of other countermeasures;
- (j) the urgency of the treatment need (i.e., the window of opportunity for treatment can vary between different medical conditions);
- (k) the adequacy of the supporting nonclinical and clinical information; and
- (l) the quantity of product available.

Contains Nonbinding Recommendations

Draft - Not for Implementation

492 FDA intends to establish priorities for its review of requests for consideration at the
493 Division level or higher and, as appropriate and feasible, will consult with the EUA WG and may
494 consult with other agencies on its priority setting.

495

496 **Review Process for a Request for Consideration for an EUA:** The relevant FDA
497 Center will be responsible for the overall coordination of the Agency's disposition of the request
498 and will interact directly with the entity submitting the request for consideration. The Office of
499 the Commissioner will arrange for the consultations with the Director of NIH and the Director of
500 CDC to occur, to the extent that such consultations are feasible and appropriate given the
501 circumstances of the emergency. The Commissioner's Office also will work with the ASPHEP
502 to coordinate interactions with the EUA Working Group, if convened, although technical input
503 from the EUA WG will be communicated directly to the appropriate FDA review division. The
504 review division also may consult with other countermeasures working groups and expert
505 technical groups within the Agency and, depending on the complexity of the issues presented
506 and the nature of the declared emergency, may seek additional scientific and technical input from
507 outside experts or advisory committees.

508

509 FDA recognizes that the exact type and amount of data needed to support an EUA may
510 vary depending on the nature of the declared emergency and the nature of the candidate product.
511 The Agency intends to evaluate each request in light of the circumstances and the statutory
512 criteria for issuance.

513

Contains Nonbinding Recommendations

Draft - Not for Implementation

514 FDA expects that the responsible FDA Center, in coordination with internal and external
515 technical experts (as appropriate and feasible), will perform its review of the information and
516 data included in the request for consideration and make recommendations to the Commissioner.
517 FDA anticipates that the letter authorizing, or not authorizing, a specific emergency use or uses
518 of the candidate product will be issued by the Office of the Commissioner. The letter
519 authorizing emergency use of a product will include a description of the intended use, as well as
520 the indications and contraindications of the product. FDA anticipates that when an EUA is
521 issued, the relevant Center will work with the Office of the Commissioner in drafting the Federal
522 Register notice of the EUA for publication by the Office of the Commissioner. In addition, FDA
523 plans to post information about the EUA on the Agency website (www.fda.gov).

524

525 **Timelines for Review:** The timelines for FDA review and action on a request for
526 consideration for an EUA will depend on the product profile; the existence, if any, of pending
527 applications for the product; the nature of the emergency; and other relevant factors. Although
528 the length of time required for FDA action will vary, the Agency recognizes that it is likely that,
529 in an emergency situation that is occurring or believed imminent, a request for consideration for
530 an EUA will be acted upon within a matter of hours or days.

531

532 **VI. CONDITIONS OF AUTHORIZATION**

533

534 Under section 564, the FDA Commissioner may establish conditions on an EUA. Section 564(e)
535 requires the FDA Commissioner (to the extent practicable given the circumstances of the
536 emergency) to establish certain conditions on an EUA authorization that the Commissioner finds

Contains Nonbinding Recommendations

Draft - Not for Implementation

537 necessary or appropriate to protect the public health, and permits the Commissioner to establish
538 other conditions that he finds necessary or appropriate to protect the public health. Conditions
539 authorized by section 564(e) include, for example: requirements for information dissemination
540 to health care providers or authorized dispensers and product recipients; adverse event
541 monitoring and reporting; data collection and analysis; recordkeeping and records access;
542 restrictions on product advertising, distribution, and administration; and limitations on GMP
543 requirements. Some conditions, the statute specifies, are mandatory to the extent practicable for
544 authorizations of unapproved products and discretionary for authorizations of unapproved uses
545 of approved products. Moreover, some conditions may apply to manufacturers of an EUA
546 product, while other conditions may apply to any person who carries out any activity for which
547 the authorization is issued. Section 564 also gives the FDA Commissioner authority to establish
548 other conditions on an authorization that he finds to be necessary or appropriate to protect the
549 public health.

550

551 **Conditions of Authorization for Emergency Use of an Unapproved Product:** Section
552 564(e)(1) describes certain requirements with respect to the emergency use of an unapproved
553 product. For example, requirements to disseminate certain information to health care providers
554 or authorized dispensers and recipients and to perform adverse event monitoring and reporting
555 are mandatory under section 564(e)(1)(A) on any person who carries out any activity for which
556 an authorization for an unapproved product is issued, unless the FDA Commissioner determines
557 that such conditions are not practicable given the circumstances of the emergency. Section
558 564(e)(1)(A) further provides that the FDA Commissioner shall establish appropriate conditions
559 with respect to manufacturers' recordkeeping, reporting, and records access, to the extent that

Contains Nonbinding Recommendations

Draft - Not for Implementation

560 such conditions are practicable. The FDA Commissioner also may, under section 564(e)(1)(B),
561 impose comparable records conditions on any person (other than a manufacturer) who carries out
562 any activity for which an authorization is issued. In addition, the Commissioner may impose,
563 under section 564(e)(1)(B), the following requirements on any person (including a manufacturer)
564 who carries out any activity for which the authorization of an unapproved product is issued:
565 restrictions on distribution of the EUA product and on who may administer it, as well as
566 requirements to collect and analyze safety and effectiveness data on the product. Additionally,
567 section 564(e)(3) authorizes the FDA Commissioner to waive or limit (as appropriate) existing
568 GMP requirements, and section 564(e)(4) permits the Commissioner to establish conditions for
569 advertising and other promotional descriptive printed matter relating to the unapproved product.
570 Each of the conditions described in section 564(e) is summarized below.

571

572 **Conditions of Authorization for Emergency Use of an Approved Product for an**
573 **Unapproved Use:** Section 564(e)(2) describes certain requirements with respect to the
574 emergency use of an unapproved use of an approved product. For example, the requirements of
575 section 564(e)(1)(A)(i) and (ii) -- to impose conditions with respect to the dissemination of
576 information to health care providers or authorized dispensers and recipients -- is mandatory
577 under section 564(e)(2)(A), to the extent practicable given the circumstances of the emergency,
578 if a manufacturer of an approved product authorized for an unapproved use carries out any
579 activity for which an EUA is authorized. The FDA Commissioner also may, if he chooses under
580 section 564(e)(2)(A), impose on such manufacturers requirements for adverse event monitoring
581 and reporting as well as recordkeeping, reporting, and records access.

Contains Nonbinding Recommendations

Draft - Not for Implementation

582 Under section 564(e)(2)(B), with respect to an EUA that authorizes a change in labeling
583 of an approved product, but for which the manufacturer chooses not to make such labeling
584 change, the EUA may not authorize the product's distributor or any other person to alter or
585 obscure the manufacturer's labeling. However, under such conditions, the FDA Commissioner
586 must authorize, to the extent practicable given the circumstances of the emergency, any person
587 (other than the manufacturer) acting pursuant to such EUA to provide appropriate information, in
588 addition to the manufacturer's labeling, with respect to the product.¹³

589

590 In addition, section 564(e)(2)(C) allows the FDA Commissioner to establish, with respect
591 to the distribution and administration of the product, conditions that are no more restrictive than
592 those established with respect to the distribution and administration of the product for the
593 approved use.

594

595 **Additional Conditions of Authorization:** Section 564 also permits the FDA
596 Commissioner to establish other conditions on an EUA. For example, section 564(e)(3)
597 authorizes the FDA Commissioner to waive or limit, as appropriate, existing GMP requirements,
598 and section 564(e)(4) permits the Commissioner to establish conditions for advertising and other
599 promotional descriptive printed matter relating to the unapproved use. These and other
600 conditions are described below.

601

602 *Information for Health Care Providers or Authorized Dispensers:* Under section
603 564(e)(1)(A)(i) (for an unapproved product) and section 564(e)(2)(A) (for a manufacturer

¹³ Additional information required under section 564(e)(2)(B)(ii) as a condition of authorization is not considered "labeling" for purposes of section 502 of the FD&C Act while the EUA for the product is effective.

Contains Nonbinding Recommendations

Draft - Not for Implementation

604 carrying out any activity concerning an unapproved use of an approved product), the FDA
605 Commissioner must establish conditions on an authorization (to the extent practicable given the
606 circumstances of the emergency) to ensure that health care providers or authorized dispensers
607 who administer the EUA product are informed that the FDA Commissioner has authorized the
608 emergency use of the product, of its significant known and potential benefits and risks and the
609 extent to which such benefits and risks are unknown, as well as the available alternatives and
610 their benefits and risks. FDA recommends that the request for consideration for an EUA include
611 a "Fact Sheet" for the health care provider or authorized dispenser that would include essential
612 information about the product. FDA plans to review submitted Fact Sheets for accuracy and
613 completeness. A sample "Fact Sheet for the Health Care Provider or Authorized Dispenser"
614 template is provided at the end of the guidance as Appendix A. FDA recommends that the Fact
615 Sheet include, at a minimum, the information listed on the first page of the sample template.
616 FDA further recommends that the Fact Sheet target the health care provider or authorized
617 dispenser who has the most basic level of training, recognizing that such individuals may have
618 different levels of training (nurse, doctor, other), could come from a variety of backgrounds
619 (state, local, military, civilian), and may have different types of experience. FDA recommends
620 that the Fact Sheet accompany the EUA product when the product is distributed, and be in a form
621 that is readily accessible to the health care provider or authorized dispenser. To the extent
622 consistent with other conditions of authorization, information on the EUA product also may be
623 disseminated to providers through media, videos/DVDs, the Internet, and direct communication
624 from public health agencies.

625

Contains Nonbinding Recommendations

Draft - Not for Implementation

626 *Information for Recipients:* Although informed consent under part 50 of FDA
627 regulations (21 CFR part 50) is not required for administration of an EUA product and the
628 information dissemination requirements of section 564 are mandatory only to the extent
629 conditions establishing such requirements are practicable, FDA recommends that recipients be
630 given as much appropriate information as possible given the nature of the emergency and the
631 conditions of the authorization. Under section 564(e)(1)(A)(ii)(III) (for an unapproved product)
632 and section 564(e)(2)(A) (for a manufacturer carrying out any activity concerning an unapproved
633 use of an approved product), recipients must be informed that the FDA Commissioner has
634 authorized emergency use of the product, of the significant known and potential benefits and
635 risks of the EUA product, and of the extent to which such benefits and risks are unknown.
636 Recipients must have an opportunity to accept or refuse the EUA product and must be informed
637 of any consequences of refusing administration of the product.¹⁴ Recipients also must be
638 informed of available alternatives to the product and of their risks and benefits under section
639 564(e)(1)(A)(ii)(III) (for an unapproved product) and section 564(e)(2)(A) (for a manufacturer
640 carrying out any activity concerning an approved product for an unapproved use).

641

642 Ordinarily, FDA expects that some form of written information will be given to
643 recipients, similar to the Fact Sheet for health care providers or authorized dispensers. To assure
644 that individuals of all educational levels comprehend the information provided, FDA
645 recommends that it be written in the simplest language possible. The Agency recommends that
646 the written information include the significant known and potential risks and benefits of the
647 product and the extent to which the potential risks and benefits are unknown, specific

¹⁴ However, Congress authorized the President to waive, under certain circumstances, the option for members of the armed forces to accept or refuse administration of an EUA product (10 U.S.C. 1107a).

Contains Nonbinding Recommendations

Draft - Not for Implementation

648 instructions for home use (if necessary), and adverse event information, including contact
649 information should adverse events occur. A sample “Fact Sheet for Recipients” template is
650 provided at the end of the guidance as Appendix B. FDA recommends that the Fact Sheet
651 include the information in the template and be submitted to the Agency as part of the request for
652 consideration for an EUA. Furthermore, the Agency recommends that the Fact Sheet or other
653 written information for recipients be tested (e.g., by focus groups) for clarity, particularly
654 regarding messages on uncertainty and relative risks. FDA acknowledges, however, that exigent
655 circumstances may dictate the use of other, more appropriate, dissemination methods. Therefore,
656 FDA expects that recipient information would be disseminated in the most effective and
657 expeditious way possible to reach the intended audience. Methods of dissemination may include
658 media, videos/DVDs, the Internet, and direct communication from health care providers and
659 public health agencies. Section 564(e)(1)(A)(ii) (for an unapproved product) and section
660 564(e)(2)(A) (for a manufacturer carrying out any activity concerning an unapproved use of an
661 approved product) contemplates that the Fact Sheet or other recipient information will be
662 provided to recipients before administration of an EUA product. If, however, taking the time
663 needed to provide such information would diminish or negate the effectiveness of the product for
664 the recipient, the FDA Commissioner may include as part of the condition that the information
665 be provided to the recipient as soon as practicable afterward.

666

667 *Monitoring and Reporting of Adverse Events:* Section 564(e)(1)(A)(iii) (for an
668 unapproved product) and section 564(e)(2)(A) (for a manufacturer carrying out any activity
669 concerning an unapproved use of an approved product) provide for adverse event monitoring and
670 reporting for EUA products. FDA expects that the primary focus of such conditions will be on

Contains Nonbinding Recommendations

Draft - Not for Implementation

671 capturing serious adverse events and identifying the appropriate mechanism(s) to be used for the
672 collection of follow-up clinical information, the size of the safety database, and the types of data
673 needed. Predefined mechanisms to capture adverse event data are preferred, where feasible (e.g.,
674 MEDWATCH and VAERS). In certain circumstances, other mechanisms also may be
675 considered, such as using postage-paid postcards or stickers added to the product, labeling, and
676 any other information that refers the health care provider or authorized dispenser and recipient to
677 a toll-free number and Internet site to report adverse events (such information could be included
678 as part of a Fact Sheet, as described above).

679

680 *Records:* Section 564(e)(1)(A)(iv) requires (to the extent practicable given the
681 circumstances of the emergency) that manufacturers of an unapproved product be required to
682 maintain records and to grant to the Agency access to records concerning the EUA product. The
683 FDA Commissioner may impose comparable records requirements on any person other than a
684 manufacturer who carries out any activity for an unapproved product under section
685 564(e)(1)(B)(iv) and on the manufacturer of an approved product for an unapproved use under
686 section 564(e)(2)(A). The Agency anticipates that such records requirements may, for
687 manufacturers, relate to the number of doses, devices, etc. (including lot number identification)
688 that have been shipped or sold under an EUA; the name and addresses of the facilities where the
689 EUA product was shipped; and may, for persons other than manufacturers, relate to the
690 monitoring of patients who have been administered a product under an EUA. The FDA
691 Commissioner also may impose conditions regarding other matters the Agency determines are
692 appropriate and practicable given the circumstances of the emergency.

693

Contains Nonbinding Recommendations

Draft - Not for Implementation

694 *Additional Conditions for Unapproved Products:* To the extent feasible given the
695 circumstances of the emergency, the FDA Commissioner may establish additional conditions for
696 unapproved products, such as the following:

697 *Restricted distribution under the EUA*--conditions may be placed on which
698 entities may distribute the product and how distribution is to be performed.¹⁵

699 *Personnel*--conditions may be placed on who may administer the product, and on
700 the categories of individuals to whom, and the circumstances under which, the
701 product may be administered.

702 *Information*--conditions may be placed on the collection and analysis of
703 information on the safety and effectiveness of the EUA product.

704 The FDA Commissioner will establish these conditions on a case-by-case basis.

705

706 *Additional Conditions for an Unapproved Use of an Approved Product:* Under section
707 564(e)(2)(B), with respect to an EUA that authorizes a change in labeling of an approved
708 product, but for which the manufacturer chooses not to make such labeling change, the EUA
709 may not authorize a product distributor or any other person to alter or obscure the manufacturer's
710 labeling. However, under such conditions, the FDA Commissioner must authorize, to the extent
711 practicable under the circumstances of the emergency, any person (other than the manufacturer)
712 acting pursuant to such EUA to provide appropriate information, in addition to the
713 manufacturer's labeling, with respect to the product.¹⁶

714

¹⁵ FDA anticipates that distribution of EUA products will be performed according to existing response plans, as practicable and appropriate.

¹⁶ See *supra* note 13.

Contains Nonbinding Recommendations

Draft - Not for Implementation

715 The FDA Commissioner may, under section 564(e)(2)(C), establish conditions for
716 distribution and administration of an approved product for an unapproved use that are no more
717 restrictive than those established by the Agency for the distribution and administration of the
718 product for an approved use. Any such additional conditions will be established by the
719 Commissioner on a case-by-case basis, depending on the circumstances of the emergency and
720 the nature of the approved product authorized for an unapproved use.

721

722 *Compliance with GMPs or Alternative Approaches:* The Agency expects that EUA
723 products will be produced in compliance with GMP; however, limits or waivers may be granted
724 under section 564(e)(3), on a case-by-case basis, after consideration of the circumstances and of
725 any alternative proposed approach.

726

727 *Advertising:* Section 564(e)(4) allows the FDA Commissioner to establish conditions on
728 advertisements and other promotional descriptive printed matter relating to the use of an EUA
729 product, such as, for drugs (including biologics), requirements applicable to prescription drugs
730 under section 502(n) of the FD&C Act and, for devices, requirements applicable to restricted
731 devices under section 502(r) of the FD&C Act.

732

733 **Summary of Conditions Described in Section 564(e):** The following chart sets out
734 conditions described in section 564(e) that may be imposed on an EUA for unapproved products
735 and for unapproved uses of approved products, respectively. A condition is identified as
736 "mandatory" in the chart below if section 564(e) requires the FDA Commissioner, to the extent
737 practicable given the circumstances of the emergency, to establish such condition when it is

Contains Nonbinding Recommendations

Draft - Not for Implementation

738 necessary or appropriate to protect the public health. A condition identified as "discretionary" in
739 the chart below is one that the FDA Commissioner may, under section 564(e), impose as he finds
740 necessary or appropriate to protect the public health. In addition to the conditions described as
741 "mandatory" and "discretionary" in the chart below, section 564 allows the FDA Commissioner
742 to establish other conditions on an authorization that he finds to be necessary or appropriate to
743 protect the public health.

745 * Others may include, for example, the U.S. government.

746

747 **Option To Carry Out Authorized Activities:** Section 564(l) requires the manufacturer

748 of a sole-source unapproved product authorized for emergency use to inform the FDA

¹⁷ Under section 564(e)(2)(B), with respect to an EUA that authorizes a change in labeling of an approved product, but for which the manufacturer chooses not to make such labeling change, the EUA may not authorize a product distributor or any other person to alter or obscure the manufacturer's labeling. However, under such conditions, the FDA Commissioner must authorize, to the extent practicable under the circumstances of the emergency, any person (other than the manufacturer) acting pursuant to such EUA to provide appropriate information, in addition to the manufacturer's labeling, with respect to the product.

Contains Nonbinding Recommendations

Draft - Not for Implementation

749 Commissioner, within a reasonable time after authorization, that the manufacturer does not
750 intend to carry out any activity under the EUA. Although the Commissioner does not have the
751 authority under section 564 to require a person to carry out any activity for which an EUA is
752 issued, section 564(l) does not limit the Commissioner's authority to impose conditions on
753 persons who choose to carry out any activity pursuant to an EUA.

754

755 **Rules of Statutory Construction:** Section 564(j) provides that nothing in section 564
756 impairs the authority of the President as Commander in Chief of the Armed Forces under the
757 Constitution. In addition, section 564(j) indicates that nothing in section 564 impairs the
758 authority of the Secretary of Defense with respect to the Department of Defense (including the
759 armed forces), under other provisions of Federal law. Section 564(j) also provides that nothing
760 in section 564, including any action by a manufacturer with respect to an unapproved use of an
761 approved product, impairs the authority of the United States to use or manage quantities of a
762 product that are owned or controlled by the United States (including products maintained in the
763 stockpile managed under section 319F-2 of the PHS Act).

764

765 **VII. REVIEW, REVOCATION, OR TERMINATION OF AN EUA**

766

767 Section 564(f) provides that an EUA will be in effect for the duration of the declaration under
768 which it was issued (see Section II, "Declaration of Emergency," above), unless the EUA is
769 revoked because the criteria of issuance (see Section III, "Eligibility for an Emergency Use
770 Authorization," above) are no longer met or revocation is appropriate to protect public health or
771 safety.

794

Revocation: The FDA Commissioner will periodically to review the circumstances and appropriateness of an EUA, including circumstances that might warrant revocation of the EUA. Such circumstances may include significant adverse inspectional findings (e.g., where an inspection of the manufacturing site and processes have raised significant questions regarding the purity, potency, or safety of the EUA product that materially affect the risk/benefit assessment upon which the EUA was based); reports of adverse events (number or severity) linked to, or suspected of being caused by, the EUA product; product failure; product ineffectiveness (such as newly emerging data that undermine the Agency's conclusion that the product "may be effective" against a particular agent); and availability of a preferred product.

Termination: Upon termination of the declaration, unapproved product or labeling and product information for an unapproved use must be disposed of pursuant to section 564(b)(2)(C) and (b)(3). A manufacturer may choose to have unapproved product returned after termination. Notwithstanding any such termination, under section 564(f)(2) an authorization shall continue to be effective to provide for continued use in any patient who began treatment before termination (to the extent found necessary by the patient's attending physician).

Continued Use: Any use of an EUA product beyond the term of a declaration is subject to investigational product regulations (e.g., IND regulations), except for use by patients who began treatment when the declaration was in effect, to the extent found necessary by such patient's attending physician.

795 **VIII. PREEMPTION**

796
797 FDA anticipates that preemption issues may arise when an EUA is issued to the extent that states
798 have existing requirements governing the dispensing and administration of unapproved medical
799 products or approved medical products for unapproved uses. The Supremacy Clause can operate
800 to nullify both state legislative requirements and state common-law duties. *Medtronic v. Lohr*,
801 518 U.S. 470, 503 (1996) (Breyer, J., concurring in part and concurring in the judgment); *id.* at
802 510 (O'Connor, J., joined by Rehnquist, C.J., Scalia, J., and Thomas, J., concurring in part and
803 dissenting in part); *Cipollone v. Liggett Group, Inc.*, 505 U.S. 504, 521 (1992) (plurality
804 opinion); *id.* at 548-49 (Scalia, J., joined by Thomas, J., concurring in judgment in part and
805 dissenting in part). Under the principles of implied conflict preemption, courts have found state
806 law preempted where it is impossible to comply with both federal and state law or where the
807 state law "stands as an obstacle to the accomplishment and execution of the full purposes and
808 objectives of Congress." See *English v. General Electric Co.*, 496 U.S. 72, 79 (1990); *Florida*
809 *Lime & Avocado Growers, Inc.*, 373 U.S. 132, 142-43 (1963); *Hines v. Davidowitz*, 312 U.S. 52,
810 67 (1941). Consistent with this case law, section 4(a) of Executive Order 13132 states that
811 "[a]gencies shall construe . . . a Federal statute to preempt State law only where the statute
812 contains an express preemption provision or there is some other clear evidence that the Congress
813 intended preemption of State law, or where the exercise of State authority conflicts with the
814 exercise of Federal authority under the Federal statute."

815

816 FDA believes that the terms and conditions of an EUA issued under section 564 preempt state
817 law--legislative requirements and common-law duties--imposing different or additional

Contains Nonbinding Recommendations

Draft - Not for Implementation

818 requirements on the dispensing or administration of the medical product for which the EUA was
819 issued in the context of the emergency declared under section 564. To the extent state law may
820 impose requirements different from or in addition to those imposed by the EUA for a particular
821 medical product within the scope of a declared emergency, such state law "stands as an obstacle
822 to the accomplishment and execution of the full purposes and objectives of Congress," *See*
823 *Hines*, 312 U.S. at 67, and "conflicts with the exercise of Federal authority under [§ 564]."
824 Executive Order 13132. Affected state laws may include, but are not limited to, laws governing
825 the administration of investigational medical products, such as informed consent laws and laws
826 requiring Institutional Review Board approval, and laws governing the dispensing of medical
827 products, such as laws limiting who may dispense medical products and under what
828 circumstances. FDA anticipates consulting state officials when the terms and conditions of an
829 EUA may preempt state law.

830

831 In an emergency, it is critical that the conditions that are part of the EUA--those that the
832 Commissioner has determined to be necessary or appropriate to protect the public health--be
833 strictly followed, and that no additional conditions be imposed. To the extent there may be
834 circumstances in which FDA would like people carrying out activities under an EUA also to
835 comply with requirements contained in preempted state law, FDA anticipates that the
836 Commissioner will incorporate such requirements into the terms and conditions of the EUA.

837

838 **IX. LIABILITY PROTECTION UNDER OTHER STATUTES**

839

840 Section 564 of the FD&C Act does not offer liability protection to manufacturers or others who
841 carry out any activity for which an EUA is issued, and liability protection is beyond the mission
842 and authority of the FDA. However, certain persons or certain products may be eligible for
843 liability protection under other statutes and programs, such as the Federal Employee
844 Compensation Act (5 U.S.C. 8101 *et seq.*); the Federal Tort Claims Act (28 U.S.C. 1346(b)); the
845 Smallpox Vaccine Injury Compensation Program and the liability protections of section 304 of
846 the Homeland Security Act, as amended by Smallpox Emergency Personnel Protection Act of
847 2003 (42 U.S.C. 233(p)); and the National Vaccine Injury Compensation Program (42 U.S.C.
848 300aa-10 *et seq.*).

849

850 The Final Guidance on the Emergency Use of Medical Products will contain a list of contacts for
851 the liability statutes and programs listed above.

852

853

APPENDIX A

854

FACT SHEET for the Health Care Provider or Authorized Dispenser

855

856

[PRODUCT for INTENDED USE]

857

858 1. An emergency has been declared by the Secretary of Health and Human Services.

859

860 2. [INCLUDE A BRIEF DESCRIPTION (1-2 sentences) OF THE EMERGENCY].

861

862 3. The FDA Commissioner has authorized the emergency use of [PRODUCT] for a use

863 [IDENTIFY THE INTENDED USE] that has not yet obtained FDA approval by usual FDA

864 processes. This authorization will terminate on [DATE 1 YEAR FROM THE DATE OF

865 DECLARATION], or when the emergency has ceased to exist, whichever is earlier.

866

867 4. The information in this Fact Sheet is the minimum necessary to inform you of the

868 significant known and potential risks and benefits of emergency use of [PRODUCT].

869

870 5. The significant known and potential risks and benefits of emergency use of [PRODUCT]

871 are: [LIST]. The extent to which such risks and benefits are unknown is [EXPLAIN].

872

873 6. The available alternatives to [PRODUCT] are: [LIST]. The risks and benefits of

874 [ALTERNATIVES] are: [LIST]. [If there is no alternative, provide an explanation of outcomes

Contains Nonbinding Recommendations

Draft - Not for Implementation

875 of exposure or of any special public health measures (e.g., quarantine or monitoring) that an
876 individual who does not receive the EUA product may face.]

877

878 7. [INCLUDE NAME, ADDRESS, AND TELEPHONE NUMBER FOR
879 MANUFACTURER.]

880

881 As the health care provider or authorized dispenser administering [PRODUCT], please
882 communicate the significant known and potential risks and benefits, and the extent to which such
883 risks and benefits are unknown, to the recipient of [PRODUCT].

884

885 Please inform the recipient that he or she has the option to accept or refuse administration of
886 [PRODUCT], and of the consequences of refusing administration. Please inform the recipient of
887 any available alternatives to [PRODUCT], and of their risks and benefits. Please provide the
888 "Fact Sheet for Recipients" to the recipient of [PRODUCT].

889

890 If providing this information before administration would delay the administration [PRODUCT]
891 to a degree that would endanger the lives of exposed or affected individuals, the information
892 must be provided to the recipient as soon as practicable after [PRODUCT] is administered.

893

894 If you follow these instructions when administering or using [PRODUCT], you do not need to
895 comply with state laws--legislative requirements and common-law duties--imposing different or
896 additional requirements on the dispensing or administration of the product in this emergency
897 situation.

Contains Nonbinding Recommendations

Draft - Not for Implementation

898 FDA also recommends that EUA applicants include the following additional information in the
899 Fact Sheet for Health Care Providers or Authorized Dispensers, if it is available:

900

901 • **Instructions for use.**

902 • How to administer the product (including dose, route of intake or infusion, how long to
903 use the product, how to take care of the infusion site), how to store the product, how it is
904 supplied/forms that it comes in, how to constitute;

905

906 • If it is an *in vitro* diagnostic (IVD): what type of specimens should be collected for
907 testing with the product, how to store the specimens, how the laboratory should use the
908 product (procedure), how to interpret the results; and

909

910 • Instructions for use for special populations (e.g., pregnant women and
911 immunocompromised individuals), including special dosing instructions (e.g., weight-
912 based dosing), special precautions.

913

914 • **Known major interactions** with other products or substances, including drug interactions,
915 cross reactivity for IVDs.

916

917 • **Known efficacy information or performance characteristics** (for IVDs)

918

919 • **Adverse events.** Significant known adverse event information (e.g., what are the significant
920 known side effects? Under what conditions should the recipient stop taking product?),

Contains Nonbinding Recommendations

Draft - Not for Implementation

921 instructions for follow up in case of an adverse event, how to report an adverse event, what
922 to do in case of an adverse event (stop using the product? seek treatment?), whom to contact
923 for professional advice if an adverse event occurs or if the product does not work. Health
924 care providers or authorized dispensers also may report adverse events to MEDWATCH at
925 www.fda.gov/medwatch/report/hcp.htm or 1-800-FDA-1088, or to VAERS (for vaccines) at
926 www.vaers.org or 1-800-822-7967.

927

928 • **Alternatives.** If other agents (approved/licensed/cleared products or EUA products) may
929 treat or prevent the same or closely related condition for [INTENDED USE], this
930 information should be stated. If available, the relative or expected safety and effectiveness of
931 the alternative should be provided, particularly for use in different populations or settings.

932 Such information may include:

933

934 ➤ When an alternative product may be more appropriate, e.g., in the treatment of the
935 pregnant women, immunocompromised individuals, or other special populations.

936

937 ➤ For preventive treatments, the time needed for [PRODUCT] to be administered in
938 advance of the exposure to be effective, and alternatives that may be more effective if
939 that time is exceeded.

940

941 • **Significant known and potential risks and benefits** may include relevant information about
942 the manufacturer (e.g., a waiver of Good Manufacturing Practices compliance), if known.

943

Contains Nonbinding Recommendations

Draft - Not for Implementation

- 944 • **Consequences** of not taking/using [PRODUCT], including possible health effects and
945 quarantine, and of stopping the use of [PRODUCT] against the recommendation of the
946 health care provider.
- 947
- 948 • **New findings.** A statement about the fact that any significant new findings observed during
949 or after the course of widespread use will be made available.
- 950
- 951 • **Approved products.** For approved products being used for unapproved indications, the Fact
952 Sheet also may include critical elements from the package insert.
- 953
- 954 • **Contacts.** Whom to contact if you have any questions or concerns (other than an adverse
955 event report) about the product.
- 956
