### I. INTRODUCTION

These guidelines are intended for use by researchers in the Minerals Management Service (MMS) Environmental Studies Program for the Gulf of Mexico in preparing the National Oceanographic Data Center (NODC) "Report of Observations/Samples Collected by Oceanographic Programs (ROSCOP) Second Edition" (NOAA Form 24-23 (1-76)). They will also be of interest to others participating in similar programs.

The MMS Environmental Studies Program utilizes the ROSCOP as a first level of data inventory. It is, therefore, desirable to standardize the reporting of this information, and this paper attempts to develop guidelines for that standardization. In the course of this development, approximately 160 ROSCOP forms covering studies over the past decade were reviewed and recoded. This review provides the basis for the recommendations in these guidelines.

This document considers each field of the ROSCOP form individually and establishes its definition, purpose, and content. The content is further defined in terms of input format, style, abbreviations, punctuation, and special conventions. Finally, illustrative examples and common usages based on actual reports are provided where appropriate.

### II. GENERAL GUIDELINES

In most cases, the completion of a ROSCOP will be a contractual requirement. Following the few simple general rules listed below will greatly simplify the fulfillment of this obligation.

- Make sure you have NOAA Form 24-23 (1-76). Older versions should be discarded. Forms are available from NOAA in bound booklets of about 20 sets of forms with two pages of instructions inside the front cover.
- 2. Forms should be completed by the chief scientist <u>immediately</u> following the cruise! This is a very important debriefing.
- 3. Be thorough when completing forms but avoid excessive detail. Remember, this is a first level data inventory.
- 4. Mandatory entries must be completed. Optional entries are conditional on their pertinence to the cruise.
- 5. Completed forms should be submitted to your Contracting Officer's Technical Representative (COTR) for review, approval, and forwarding to NOAA.

### III. ROSCOP ENTRIES

The ROSCOP form consists of four pages (see Appendix A for sample forms). The first page contains information of a general nature and also localization information. The next three pages contain information regarding the type of observations or samples collected.

The form should be completed in the following order. Note that entries may be required in A25 Remarks during the completion of any one of the three parts; however, the guidelines for A25 are given at the end of Section III-A.

- 1. The upper one-half (through A15) of the first page. The guidelines are given in Section III-A.
- The second through fourth pages. The guidelines are given in Section III-B.
- The lower one-fourth of the first page. The guidelines are given in Section III-C.

In the guidelines that follow, the attributes and their definitions listed below are used. Obviously, all attributes are not pertinent to every entry.

Attribute name Attribute

Label of an entry
Name Name of an entry

Purpose Intended purpose for an entry Content Logical content of an entry Input format Logical format of an entry Style Physical format of an entry Abbreviations Abbreviations used in an entry

Acronyms used in an entry

Punctuation Punctuation required in an entry
Capitalization Capitalization required in an entry
Special conventions Special considerations for the entry
Code Set of codes to select from for an entry

Examples Typical examples of an entry

Common usage Commonly used entry based upon actual reports

Use Conditions of use (mandatory or optional)

### A. General Information

Following are guidelines for the completion of the upper three-fourths of the first page (through A25) of the ROSCOP. The entries are described in the general order that they appear on the form. The pertinent attributes of each entry are described and typical examples are given. See also "Information for Completing ROSCOP Entries" in Appendix A.

Label: A00

Name: Data Center

Use: Reserved for NOAA use

Label: A40 Name: Reference Number Reserved for NOAA use Use: Label: A01 Expedition/Project Name: This entry identifies the program, expedition, or Purpose: project under which the cruise was conducted. Content: A unambiguous name or acronym assigned by the organization conducting the cruise. In FY 1984 MMS began assigning a code consisting of five alphanumeric characters to each project. These should be placed in parentheses after the project name. Input format: Variable length, alphanumeric. Style: Free format. Define in Remarks [A25]. Abbreviations: Acronyms: Define in Remarks [A25]. Punctuation: Acronyms have no imbedded or terminating periods. Abbreviations are terminated with a period. Capitalization: Initial capitals except for acronyms which are all uppercase. Examples: MAFLA Baseline Study (0070A) STOCS Monitoring Study (0083A) Mandatory Use: Label: A11 Cruise Number or Name Name: This entry identifies the specific cruise conducted Purpose: under the Expedition/Project [A01]. Content: A number and/or unambiguous name or acronym assigned by the organization conducting the cruise. (For projects with a single cruise, this entry may be identical to [A01]). Input format: Variable length, alphanumeric. Free format. Style: Define in Remarks [A25]. Abbreviations: Define in Remarks [A25]. Acronyms: Acronyms have no imbedded or terminating periods. Punctuation:

Abbreviations are terminated with a period.

Examples: MMS-12

Cruise I, spring MMS-Benthos I

Use: Mandatory

A02 Label: Ship or Platform Name: This entry identifies the name and international Purpose: radio call sign of the ship or platform from which the measurements were made. Content: The official ship or platform name and radio call sign including the vessel type, if applicable, as a prefix. Variable length, alphanumeric. Input format: Style: Free format. Punctuation: Enclose radio call letters in parentheses. Capitalization: Initial capitals for names. All upper case for call letters. Use R/V prefix for research vessels. Special conventions: Use M/V prefix for merchant vessels. Use F/V prefix for fishing vessels. Describe other similar conventions in Remarks [AZ5]. R/V Kana Keoki (WYZ2003) Example: Use: Mandatory Label: A12 Name: Platform Type This entry identifies the platform type from which Purpose: the measurements were made. Content: A two-digit numeric code. Input format: Fixed length, numeric. Style: Enter code with leading zero. Code: Select appropriate code from: 01 research ship 02 non-specialized ship 03 satellite 04 balloon 05 aircraft **0**5 anchored buoy 07 drifting buoy submerged float (anchored) 08 **0**9 submerged float (drifting) fixed platform 10 11 fixed coastal station 12 drifting ice 13 submersible 14 other Example: 01 Use: Mandatory 

Label: A03 Name: Country Content: The name of a country.

Input format: Variable length, alphanumeric.

Style: Free format.

Abbreviations: None except USA unless defined in Remarks (A25).

Example: USA Use: Mandatory

Label: A04

Name: Organization

Purpose: This entry identifies the organization actually

conducting the operation.

Content: The name or acronym of an organization.

Free format.

Input format: Variable length, alphanumeric.

Style:

Abbreviations: Define in Remarks [A25]. Acronyms: Define in Remarks [A25].

Punctuation: Acronyms have no imbedded or terminating periods.

Abbreviations are terminated with a period.

Capitalization: Initial capitals except for acronyms which are all

uppercase.

Examples: Texas A&M University

SUSIO

NOAA-AOML and MMS

Use: Mandatory

Label: A05

Name: Chief Scientist(s)

Purpose: This entry identifies the person in charge of the

scientific work during the period covered by this

report.

Content: Name(s)

Input format: Variable length, alphanumeric.

Style: The format is first name (or initial), space, middle

initial (or name), space, surname, comma, title.

Punctuation: Initials and titles have no periods following them.

Multiple names are separated by a semicolon and a

space.

Special conventions: Avoid the use of the prefix titles if possible (e.g.

Mr. Dr. Ms. etc).

Examples: C A Bedinger, Jr; Ralph E Childers

E George Myers

Use: Mandatory

Label: A9:

Name: Declared national program?

Purpose: This entry indicates whether the project has been

declared as a national program.

Content: Check mark under "yes", "no", or "part".

Input format: Check mark. Use: Mandatory

Label: A81

Name: Exchange restricted?

Purpose: This entry indicates whether there is any restriction

on the exchange of information from the project.

Content: Check mark under "yes", "no", or "part".

Input format: Check mark. Use: Mandatory

Label: A92

Name: Cooperative program?

Purpose: This entry indicates whether the project is part of a

cooperative program.

Content: Check mark under "yes" or "no".

Input format: Check mark. Use: Mandatory

Label: A72

Name: Name of cooperative program

Purpose: If the project is part of a cooperative program, this

entry identifies the name of the cooperative program.

Content: A program name or acronym.

Input format: Variable length, alphanumeric.

Style: Enter the name if space allows, otherwise include in

Remarks [A25].

Abbreviations: Define in Remarks [A25].
Acronyms: Define in Remarks [A25].

Examples: CICAR

USGS/IOS Optional

Label: A82

Use:

Name: Coordinated internationally?

Purpose: This entry indicates whether the program was

coordinated internationally.

Content: Check mark under "yes" or "no".

Input format: Check mark. Use: Mandatory

Label: A62

Name: Coordinator of international program

Purpose: If the program was coordinated internationally, this

entry identifies the body providing coordination.

Content: A name or an acronym.

Input format: Variable length, alphanumeric.

Style: Enter the name if space permits, otherwise include in

Remarks [A25].

Abbreviations: Define in Remarks [A25].
Acronyms: Define in Remarks [A25].

R L Molinari Examples:

IOS

Use: Optional

**A06** Label:

Acconyms:

Name and Addresses of Organizations and Persons Name:

This entry identifies the names and addresses of Purpose: organizations or individuals responsible for the original measurements and for the resulting data.

Names and addresses of organizations or individuals.

Content:

Input format: Variable length, alphanumeric.

The format for individuals is first name (or Style: initial), space, middle initial (or name), space,

surname, comma, title.

The format for organizations is generally no more than two hierarchical levels of an organization, in

descending order.

The format for addresses is a complete mailing

address, including ZIP code.

Each name or address line ends with a period.

USA. Two-letter state designations set forth by the Abbreviations:

US Post Office. Common street and avenue

abbreviations. PO Box. Define in Remarks [A25].

Initials, titles, acronyms, and abbreviations have no Punctuation:

periods imbedded or following.

Use separate sheet clearly labeled for more space. Special conventions:

> Put names and addresses for those responsible for original measurements in the column entitled "Whom to Query" and assign an appropriate and unique (letter)1

to each.

Put names and addresses for those responsible for final data in the column entitled "Final Disposition"

of Data" and assign an appropriate and unique

(letter)2 to each.

Example: A1 T Pyle.

> University of South Florida. St Petersburg, FL 33701.

Francis Mitchell. NOAA. Data Acquisition and A2 Management Branch, Code D-713. Page Bldg No 1,

Room 276. 2001 Wisconsin Ave, NW. Washington,

DC 20235.

Mandatory Use:

<del></del>

Label: A07

Beginning Date Name:

This entry defines the beginning date of the period Purpose:

covered by the report. (Normally the time of setting

sail).

The day, numeric month, and the last two digits of Content:

the year.

Input format: Fixed length, numeric. Purpose: This entry defines the beginning date of the period

covered by the report. (Normally the time of setting

sail).

Content: The day, numeric month, and the last two digits of

the year.

Input format: Fixed length, numeric.

Style: Enter the correct numbers in each box.

Use: Mandatory

Label: A17

Name: Ending Date

Purpose: This entry defines the ending date of the period

covered by the report. (Normally the time of

returning to port).

Content: The day, numeric month, and the last two digits of

the year.

Input format: Fixed length, numeric.

Style: Enter the correct numbers in each box.

Use: Mandatory

Label: A08

Name: General Ocean Areas

Purpose: This entry identifies the names of the oceans and

seas in which the ship operated or the measurements

took place.

Content: A two-digit numeric code plus an optional

one-character alphanumeric code.

Input format: Fixed length, alphanumeric.

Style: Enter codes with a leading zero if necessary and

separate codes with a semicolon and a space.

Code: Select appropriate code(s) from "Limits of Oceans and

Seas" (IHB Special Publication No. 23) available in

Appendix A. For example:

26 Gulf of Mexico

Punctuation: Separate multiple codes with a semicolon and a space.

Example: 26; 27 Use: Mandatory

Label: A09

Name: Type(s) of Marine Zone(s)

Purpose: This entry describes the type(s) of marine zone(s)

covered during the period for which the report

applies.

Content: A two-digit numeric code.
Input format: Fixed length, numeric.

Style: Enter codes with leading zero if required and

separate codes with a semicolon and a space.

Code: Select appropriate code(s) from:

01 river mouth, estuary

02 zone connected with the sea (harbors, lagoons,

salt-water pools)

offshore zone in inland sea **0**5 **6**6 open sea (ocean) 07 continental shelf 08 continental margin **0**9 major ridges, fractures 10 seamounts, guyots and atolls 11 abyssal plain 12 troughs 13 Great Lakes (US, Canada) 14 lakes (other) Punctuation: Separate multiple codes with a semicolon and a space. 07; 08 Example: Use: Mandatory A10 Label: Name: This entry defines the latitude of the geographic Purpose: area. Used only if data were collected at a fixed station. Content: Degrees, minutes, seconds and hemisphere. Input format: Fixed length, numeric. Enter the correct numbers in each box and circle Style: either "N" or "S" to indicate the proper hemisphere. **Optional** Use: Label: AZØ Name: Longitude This entry defines the longitude of the geographic Purpose: area. Used only if data were collected at a fixed station. Content: Degrees, minutes, seconds and hemisphere. Fixed length, numeric. Input format: Enter the correct numbers in each box and circle Style: either "E" or "W" to indicate the proper hemisphere. Optional Use: Label: A15 Federal Support Name: This entry identifies Federal agency support, if any. Purpose: Content: The name or acronym of the Federal agency and the contract number, or "none". Input format: Variable length, alphanumeric. Free format. Style: Define in Remarks [A25]. Abbreviations: Define in Remarks [A25]. Acronyms: The name or acronym is separated from the contract Punctuation: number by a semicolon and a space. Enter "none" if no Federal support. Special conventions:

intertidal or nearshore zone

coastal zone

03

04

Full contract numbers are preferred; however, so-called "short numbers" (the last segment of the contract number) may be used (e.g. CT8-17, IA5-19,

MU5-40, 30027).

Examples: Minerals Management Service; 14-12-0001-30027

MMS; 30027

BLM; AA550-CT7-15

Use: Mandatory

Label: A25 Name: Remarks

Purpose: This entry provides for remarks, definitions, and

other supporting information as required.

Content: Anything.

Input format: Variable length, alphanumeric. Style: Each remark begins a new line.

Each remark is numbered with a unique arabic number. The text of the remark is indented so that its number

stands out.

For citing names, organizations, and addresses follow

guidelines in A06.

Abbreviations: Define at first use.

Acronyms: Define at first use.

Numbers: 1-10 spell out, except when number is a unit of

measure (e.g., 1 meter).

10+ use number.

Punctuation: Remark numbers are separated from remark text by a

period and at least one space.

Labels (or other unambiguous references to other parts of the report) cited in the text of a remark

are enclosed in square brackets.

Special conventions: If the remark pertains to a particular part of the

report, include the respective label in the text of

the remark.

Examples: 1. Minerals Management Service (MMS).

2. State University System of Florida, Institute of

Oceanography (SUSIO) [A04].

 This could be any remark to clarify any portion of the report. There may be more than one

sentence in a remark.

Use: Optional

# B. Measurements, Observations, and Types of Studies

This section pertains to the second through fourth pages of the ROSCOP form. The ROSCOP form instructions identify this section of the report with the ambiguous title "Information to be Supplied for Each Heading in the Various Categories". The pertinent attributes of each entry are described and typical examples are given. See also "Information for Completing ROSCOP Entries" in Appendix A.

### 1. Column Descriptions

Following are guidelines for the entry of information in the columns designated as "Number", "i", "I", and "Format" on pages two through four of the ROSCOP form.

Column name:

Number

Purpose:

The purpose of this entry is to indicate the number of stations at which measurements, observations, or

samples of the respective type were taken.

Content:

A number (in the appropriate units) or an "X".

Input format:

Free format.

Style:

Dependent upon the type of data collected.

Special conventions:

Enter an "X" if the number of stations is unknown but

information of the type was known to have been

obtained during the cruise.

Examples:

123

X

Use:

Required if, measurements, observations, or samples

of the type were collected.

Column name:

i

Purpose:

This entry identifies the individual or organization

who was responsible for the original measurements,

observations, or samples.

Content:

A two-character code.

Input format:

Fixed length, alphanumeric.

Style:

Enter an uppercase letter followed immediately by the

numeral "1".

Special conventions:

The (letter)1 code references the entry "Name and Addresses of Organizations and Persons" [A06], and, specifically, the column "Whom to Query" of that

entry on the first page of the ROSCOP form.

Examples:

A1 X1

Use:

Required if, measurements, observations, or samples

of the type were collected.

Column name:

I

Purpose:

This entry identifies the individual or organization who is responsible for and in possession of the results of the original measurements, observations,

or samples.

Content:

A two-character code.

Input format:

Fixed length, alphanumeric.

Style:

Enter an uppercase letter followed immediately by the

numeral "2".

Special conventions:

The (letter)2 code references the entry "Name and Addresses of Organizations and Persons" [A06], and, specifically, the column "Final Disposition of Data" of that entry on the first page of the ROSCOP form.

specifically, the column "Final Disposition of Data" of that entry on the first page of the ROSCOP form.

Examples:

A2 X2

Use:

Required if, measurements, observations, or samples

of the type were collected.

Column name: Forma

Purpose: This entry indicates the form(s) of the original

measurements, observations, or samples.

Content: One or more single digit codes.

Input format: Free format.

Style: Code: Enter one or more codes. Select appropriate code from:

1 manuscript or publication

2 automatic printing
3 graph recording
4 punched card
5 punched tape

analog recording on magnetic tapedigital recording on magnetic tape

8 photograph9 samples

0 other or unspecified

Punctuation: Separate codes with a semicolon and (optionally) a

space.

Examples: 9

1;8 8; 9

Use: Require

Required if, measurements, observations, or samples

of the type were collected.

### 2. Category Descriptions

Following are guidelines for the selection and use of the various measurement, observation, or sample categories in pages two through four of the ROSCOP form. The pertinent attributes of each entry are described and typical examples are given. See also "Information for Completing ROSCOP Entries" in Appendix A.

It is indeed difficult to maintain consistency in this portion of the ROSCOP. This is due to the rather broad range of studies conducted under the MMS Environmental Studies Program, and also due to inherent vagueness and inadequacies in the ROSCOP form itself. Sometimes more than one category seems applicable and sometimes it is impossible to find an appropriate category. In an endeavor to remedy this situation, an attribute called "common usage" was introduced in this section. The categories listed under this attribute reflect the more common entries during the past decade of MMS Gulf of Mexico studies.

Examination of existing ROSCOPs indicates that it is common to ignore the distinction between "types of studies" and "types of measurements". In general, an entry in GL (Measurements Made at a Specific Location) or GU (Measurements Made Underway) should have a counterpart entry in GS (Types of Studies). Similarly, an entry in B (Biology) should have a counterpart entry in BS (Types of Studies). Consider the following examples:

Cate	GOLA	<u>Number</u>	<u>i</u>	I	<u>Format</u>
602	Grab	96	A1	A2	9
G31	Physical anal	. <b>9</b> 6	A1	A2	0
B11	Nekton	29	A1	A2	9
<b>B</b> 62	Pathology,	29	A1	AZ	8

Do not create new category codes. While they might seem desirable, they serve no purpose for standardization. Also, resist the temptation to lump things into the "other measurements" categories. A little more effort in determining the most appropriate existing category is a better approach. If you still cant find an appropriate category, minimize the detail and try again. If all else fails, use one of the appropriate "other measurements" lines with annotation (include a comment in A25 Remarks if necessary).

Finally, it is permissible, and often desirable, to make more than one entry for a given category. The purpose would be to show that more than one person was responsible for collection of (or in possession of data from) a given measurement category. Consider the following example:

Cate	gory	Number	<u>i</u>	<u>I</u>	<u>Format</u>	
B11	Nekton	9	A1	AZ	9	(taxonony)
B11	Nekton	5	B1	B2	9	(histopathology)
<b>B</b> 59	Taxonomy,	9	A1	AZ	9	
B62	Pathology	5	<b>B</b> 1	BZ	9	

See the following for details.

Section: 6 Geology/Geophysics

Subsection: GL Measurements Made at a Specific Location

Line labels: 601-614 & 670

Purpose: This group of entries provides detail for geological

and geophysical measurements, observations, or

samples taken while vessel is stationary at specific

fixed location(s). It normally supplements

information entered under GS.

Special Conventions:

Common usage: 602 Gral

602 Grab

None.

604 Core-soft bottom 605 Sampling by divers 608 Bottom photography

Section: 6 Geology/Geophysics

Subsection: 6U Measurements Underway

Line labels: 621-G29

This group of entries provides detail for geological Purpose:

and geophysical measurements, observations, or

samples taken while vessel is underway. It normally

supplements information entered under GS.

None. Special Conventions:

G24 Side scan sonar Common usage:

625 Seismic reflection

6 Geology/Geophysics Section: Types of Studies Subsection: GS

631-639 & G90 Line labels:

This group of entries provides detail regarding the Purpose:

types of geological or geophysical studies conducted. It normally supplements information entered under GL

or GU.

None. Special Conventions:

G31 Physical analysis of sediments Common usage:

632 Chemical analysis of sediments

Dynamics Section:

Subsection:

DØ1-D90 Line labels:

This group of entries provides detail for Purpose:

hydrodynamic measurements or observations.

None. Special Conventions:

D01 Current meters Common usage:

D02 Current meters

D03 Currents measured from ship drift

DØ5 Drifters

Meteorology Section: M

Subsection:

M01-M90 Line labels:

This group of entries provides detail for Purpose:

meteorological measurements or observations.

None. Special Conventions:

MØ5 Occasional standard measurements Common usage:

MOS Systematic standard measurements

н Hydrography Section: Surface Subsection: HS

Line labels: H01-H04

This group of entries provides detail for temperature Purpose:

and/or salinity measurements made at the ocean

surface.

Special Conventions: None.

H03 Discrete temperature measurements Common usage:

H04 Discrete salinity measurements

Section: Hydrography HB Near Sea Floor (<u>(</u> 10 meters) Subsection: H05-H08 Line labels: This group of entries provides detail for temperature Purpose: and/or salinity measurements made within ten meters of the ocean floor. None. Special Conventions: H07 Discrete temperature measurements Common usage: H08 Discrete salinity measurements Hydrography Section: Physical Subsection: H09-H18 & H80 Line labels: This group of entries provides detail for physical Purpose: oceanographic measurements. None. Special Conventions: H10 Vertical profiles (STD/CTD) Common usage: H13 Bathythermograph-expendable Transparency H16 H17 Optics Hydrography Н Section: Chemical Subsection: HC Line labels: H21-H33 & H90 This group of entries provides detail for chemical Purpose: oceanographic measurements. None. Special Conventions: H21 Oxygen Common usage: H22 Phosphates H24 Nitrates H29 Chlorinity H30 Trace elements H33 Dissolved gasses (eg LMW<sup>1</sup> hydrocarbons)
H34 Hydrocarbon concentrations<sup>2</sup> (HMW<sup>3</sup> hydrocarbons) 1 Low molecular weight 2 Supplemental code High molecular weight <del></del> Pollution Section: Subsection: P01-P90 Line labels: This group of entries provides detail for ocean Purpose: pollution measurements, observations, or samples. Special Conventions: None.

Section:

B Biology

Subsection: Line labels:

B01-B37 & B80

Purpose:

This group of entries provides detail for biological measurements, observations, or samples. It normally

supplements information entered under BS.

Special Conventions:

None.

Common usage:

B01 Primary productivity
B02 Phytoplankton pigments

B07 Bacterial and pelagic microorganisms

B08 Phytoplankton B09 Zooplankton B10 Neuston B11 Nekton

B16 Benthic bacteria and microorganisms

B17 PhytobenthosB18 ZoobenthosB30 Bioluminescence

B38 Foraminifera<sup>1</sup>
B39 Nanoplankton<sup>1</sup>

B40 Trace metal concentrations1

1 Supplemental code

Section:

B Biology

Subsection:

BS Types of Studies

Line labels:

B51-B67 & B90

Purpose:

This group of entries provides detail regarding the types of biological studies conducted. It normally

supplements information entered under B.

Special Conventions:

Common usage:

None.

B51 Identification

B52 Spatial and temporal distribution

B53 Monitoring and surveillance

B54 Biomass determination

B59 Taxonomy, systematics, classification

B62 Pathology, parasitology

### Localization С.

### Level One 1.

Level one localization is satisfied by the completion of "General Ocean Areas" [A08] in the upper half of the first page of the ROSCOP form.

### Level Two 7.

The guidelines in this section pertain to the location information in the bottom quarter of the first page of the ROSCOP form. They deal specifically with the 10° latitude x 10° longitude squares.

Following are the details for the completion of this section of the ROSCOP. The pertinent attributes of each entry are described and typical examples are given. See also "Information for Completing ROSCOP Entries" in Appendix A.

Column heading:

Discipline and Type of Measurements

Purpose:

This entry identifies the discipline for which

localization is being provided.

Content:

One or more one to three character abbreviations from the measurement, observation, or sample categories in the second through the fourth pages of the ROSCOP

form.

Input format:

Variable length, alphanumeric.

Style:

Free format.

Punctuation:

Separate discipline codes with a semicolon and

(optionally) a space.

Special conventions:

Each of the categories from pages two through four of the ROSCOP form should be represented in this section

by at least its major heading.

If measurements of several parameters have been made in the same square, enter these on the same line. If not, record them on separate lines.

Major category abbreviations (G, GL, GU, GS, D, M, H, HS, HB, HP, HC, P, B, BS) are preferred but specific category abbreviations (e.g. H09, B59) may be used if

it is necessary to be that specific.

Examples:

GU; GS

604;631

Use:

Mandatory

Column heading:

Index 10° x 10°

Column sub-heading:

Qc

Purpose:

This entry identifies the quadrant of the globe for the particular discipline and type of measurement.

Content:

A single digit numeric code.

Input format:

Fixed length, numeric.

Style:

Enter correct number in box.

South

Code:

Select the appropriate code from:

Latitude Qс Longitude North East 1 3 South East

5

North West

See the ROSCOP instructions in Appendix A for

West

additional information and examples.

Example:

(for a Gulf of Mexico location)

Use:

Mandatory

Column heading:

Index 10° x 10°

Column sub-heading:

This entry identifies the latitude of the 10° x 10° Purpose:

square for the particular discipline and type of

measurement.

The latitude in tens of degrees of the edge of the Content:

10° square whose latitude is the smallest.

Input format:

Fixed length, numeric.

Style: Example: Enter the correct digit in the box. (for a latitude of 28°30')

Mandatory Use:

Column heading: Column sub-heading: Index 10° x 10° 6 (left column)

Purpose:

This entry partially identifies the longitude of the

10° x 10° square for the particular discipline and

type of measurement.

Content:

The longitude in hundreds of degrees of the edge of

the 10° square whose longitude is the smallest.

Input format:

Fixed length, numeric.

Style: Example: Enter the correct digit in the box. (for a longitude of 89°30')

Use:

Mandatory

Column heading:

Index 10° x 10°

Column sub-heading:

6 (right column)

Purpose:

This entry partially identifies the longitude of the

10° x 10° square for the particular discipline and

type of measurement.

Content:

The tens digit of the longitude of the edge of the

10° square whose longitude is the smallest.

Input format:

Fixed length, numeric.

Style: Example: Enter the correct digit in the box. (for a longitude of 89°30')

Use:

Mandatory

### 3. Level Three

The guidelines in this section pertain to the location information in the bottom quarter of the first page of the ROSCOP form. They deal specifically with the  $1^{\circ}$  latitude x  $1^{\circ}$  longitude squares.

Level three supplies further details relating to level two localization. Therefore all level two entries should be completed before beginning level three entries.

Following are the details for the completion of this section of the ROSCOP. The pertinent attributes of each entry are described and typical examples are given. See also "Information for Completing ROSCOP Entries" in Appendix A.

Column heading:

Purpose:

Index 1° x 1°

This entry partially identifies the latitude and longitude of the 1° x 1° square for the particular discipline and type of measurement. It is used in

conjunction with the 10° x 10° squares.

Content:

Input format:

Style:

Punctuation:

Special conventions:

One or more two-digit numbers.

Variable length, numeric.

Free format.

Separate the two-digit numbers with a semicolon. The first digit of a pair represents the units portion of the latitude of a  $1^{\circ}$  x  $1^{\circ}$  square within the  $10^{\circ}$  x  $10^{\circ}$  square specified on the same line.

The second digit of a pair represents the units portion of the longitude of the  $1^{\circ}$  x  $1^{\circ}$  square within the  $10^{\circ}$  x  $10^{\circ}$  square specified on the same line.

A latitude/longitude pair applies to the corner of the square with the smallest latitude and longitude.

See the ROSCOP instructions in Appendix A for more

information and examples.

Examples:

Assume a 10  $^{\circ}$  x 10  $^{\circ}$  square at: 20 N latitude and 90  $^{\circ}$  W longitude

and two 1° x 1° squares at:

28°N latitude and 91°W longitude and

27°N latitude and 96°W longitude. The resulting

entries should be:

81;76

Use:

Recommended

# APPENDIX A. SUPPORTING DATA

# INTRODUCTION

The Report of Observations/Samples Collected by Oceanographic Programs (ROSCOP) is intended as an important new mechanism in support of the international oceanographic data exchange system. Compilation of ROSCOP forms will provide the basis for timely inventories of data and samples resulting from on-going programs available for international exchange. ROSCOP is thus intended to fill the gap between the first announcement of an oceanographic program to the Intergovernmental Oceanographic Commission (IOC) and the eventual cataloging of data actually received by the World Data Centers (WDC's) or National Data Centers. Further, the ROSCOP inventory could be used by the international scientific community to provide a referral service to data which may not be routinely exchanged through the WDC system.

The ROSCOP form has been recommended for immediate use and will be kept under constant review by the Intergovernmental Oceanographic Commission's Working Group on International Oceanographic Data Exchange.

All U.S. activities should send the form as soon as practicable after completion of a cruise or observational program to:

National Oceanographic Data Center National Oceanic and Atmospheric Administration Department of Commerce Rockville, Maryland 20852

### LIMITS OF OCEANS AND SEAS

	(IHB Special Publication No. 23)	
1 Baltic Sea	28C Strait of Gibraltar	48G Banda Sea
1A Gulf of Bothnia	28D Alboran Sea	48H Arafura Sea
1B Gulf of Finland	28E Balearic Sea (or Iberian Sea)	481 Timor Sea

28B Eastern Basin

Indicated subdivisions do not appear in publication IHB No. 23.

### INSTRUCTIONS FOR COMPLETING ROSCOP ENTRIES

(Please use black ink or black pencil to facilitate reproduction)

### A - GENERAL INFORMATION

- A00 This section is reserved for the "Responsible" Data Center, which will enter therein its own reference to be used in future exchanges of data between centers.
- A01/ Enter the name, acronym and cruise number which the
- All body in charge uses to designate the expedition or project.
- A02/ Enter the full name and international radio call sign of
- A12 the ship or platform from which the measurements were made. Specify the type of ship or platform using table 1:

### TABLE 1

- 01 research ship
- 02 non-specialized ship
- 03 satellite
- 04 balloon
- 05 aircraft
- 06 anchored buoy
- 07 drifting buoy
- 08 submerged float (anchored)
- 09 submerged float (drifting)
- 10 fixed platform
- 11 fixed coastal station
- 12 drifting ice
- 13 submersible
- 14 other
- A03 Enter the name of the country to which the body financing or in charge of the operation belongs.
- A04 Enter the name of the organization financing or in charge of the operation.
- A05 Enter the name of the person in charge of the scientific work (chief scientist) during the period covered by the report.
- A06 Enter the names and addresses of the bodies or individuals responsible for the measurements (A1, B1, ... Z1) and the bodies or individuals who may be requested to supply the original measurements (A2, B2, ... Z2). In columns i and I on the following pages enter respectively the letters/numbers designating those responsible for and those in possession of the measurements indicated.
- A07/ Enter the dates (day, month, year) of the beginning and A17 end of the period covered by the report (generally from the time of setting sail to the return to a port).
- A08 Enter the codes for the names of the oceans and seas in which the ship operates, using the definition of their limits supplied by the International Hydrographic Organization, Monaco special publication No. 23 (see above).
- A09 Enter the codes(s) for the type of marine zone(s) covered during the period to which the report applies.

  All cases encountered for all disciplines should be entered using table 2:

### TABLE 2

- 01 river mouth, estuary
- 02 zone connected with the sea (harbors, lagoons, salt-water pools)
- 03 intertidal or nearshore zone
- 04 coastal zone
- 05 offshore zone in inland sea
- 06 open sea (ocean)
- 07 continental shelf
- 08 continental margin
- 09 major ridges, fractures
- 10 seamounts, guyots and atolls
- 11 abyssal plain
- 12 troughs
- 13 Great Lakes (U.S., Canada)
- 14 Lakes (other)
- 99 other
- A15 Enter the Federal supporting agency (NSF, ONR, ERDA, NOAA Sea Grant, etc.).
- A25 The "remarks" space should be used to supplement or clarify the information provided. A separate sheet to be submitted with this report, may be used for additional notes.
- A91 Check box "yes" or box "no" according to whether the operation is or is not a part of a "Declared National Program" (DNP). If only parts of it are DNP, check box "part" in this section. In the latter case further details should be given for each type of data in the form of a note in REMARKS. No entry should be made in this section if DNP status has not been determined at the time of preparation of the form.
- A81 If the exchange of all or of certain data is subject to conditions, indicate this by checking box "yes" or box "no."
- A92 Check box "yes" or box "no" according to whether the operation is or is not part of a co-operative program.
- A72 If "yes," give its name in the space provided.
- A82 Check box "yes" or box "no" according to whether the operation is or is not part of an internationally co-ordinated program.
- A62 If "yes," give the name of the co-ordinator in the space provided.

# B - INFORMATION TO BE SUPPLIED FOR EACH HEADING IN THE VARIOUS CATEGORIES

Number of stations: the manner in which the quantity of observations obtained is to be shown depends on the type of data collected. Enter the following as appropriate, in the "number" column corresponding to each type of data:

1. Number of stations: the number of stations at which one or more measurements or samples of the type have been obtained. Do not report the total number of discrete measurements or samples obtained unless only one measurement was made at each station.

- 2. A number (in the appropriate units) for certain types of data to indicate such information as the nautical miles steamed while the particular measurement was being made or the number of samples. The number of stations involved in the measurement may, however, also be shown, if necessary, indicating this by "station."
- 3. An "X", if the number of stations cannot be given and if it is desired to indicate that information of this type has been obtained at some time during the cruise.

### i - I: see explanations under A06.

FORMAT: specify, in the "format" column, the form of the original raw data by entering the appropriate code(s) from table 3:

### TABLE 3

- 1 manuscript or publication
- 2 automatic printing
- 3 graph recording
- 4 punched card
- 5 punched tape
- 6 analogue recording on magnetic tape
- 7 digital recording on magnetic tape
- 8 photograph
- 9 samples
- 0 other or unspecified

### C-LOCALIZATION

Information concerning the localization of the areas in which observations have been collected may be given on the form in three different levels of details, of which one is compulsory.

- (a) Level one (optional) is shown under heading A08 concerning general information on the cruise. It is a matter of merely indicating the name or names of the oceans and seas frequented (using the nomenclature of the International Hydrographic Organization see table 2);
- (b) Level two (compulsory) corresponds to the marking, in respect of each category of measurement, of the 10° latitude x 10° longitude squares in which these measurements have been carried out (10° x 10° index);
- (c) Level three (recommended) supplies further details relating to level two information. Information is given, in respect to each category of data or measurement, and in each 10° x 10° square, as to the 1° x 1° squares to which the measurements (1° x 1° index) in fact apply.

The 10° x 10° and 1° x 1° indices ((b) (c)) are determined in the following manner:

### Index 10° x 10°

1. Discipline and type of measurements: Enter in this column the name or abbreviation (HC for chemistry, for example) of the discipline concerned. If measurements of several parameters have been taken within the same square, enter these on the same line. If not, record them separately (in the example shown, table 4, HC appears twice).

### Remarks

In certain cases an annotated chart showing the route followed and the points where measurements were obtained may replace the 1° x 1° index.

TABLE 4

Discipline and type of	Inde	Index 1° x 1°			
measurements	Qc	L	G	G	•
Р, М, НС	3	3	1	4	
	3	3	1	5	
	3	3	1	6	
НС	3	3	1	7	
D	3	3	0	7	

2. 10° squares: In the Qc column, give the quadrant of the globe (Qc) according to World Meteorological Organization Code 3333 reproduced schematically in table 5. In column L indicate the latitude in tens of degrees of the 10° square concerned, and in the G G columns the hundreds and the tens digits for the longitude in degrees of the same square; e.g. the 10° square from 30°N to 40°N and 40°W to 50°W would be coded 7304.

TABLE 5

	Qc - Qu	adrant of	the	globe	N	lian	
Code figure 1	Lati- tude North	Longi- tude East	W'	<i>Qc = 7</i> Equ	ator	ch merid	Qc = 1 E
3	South	East				`₹	
5	South	West		Qc = 5		een	Qc = 3
7	North	West			S	Š	

### Index 1° x 1° (optional)

- 1. Discipline and type of measurements: Give either discipline concerned or a specific type of data of that discipline (represented by its abbreviated reference).
- 2. I \* squares: In this column indicate, on the line corresponding to the appropriate discipline (or specific type of data) and after the entry for the 10° x 10° square concerned, the two-figure numbers made up of the unit figures of the latitude and longitude relating to the 1° x 1° squares in which observations have been made (see table 6).

TABLE 6

Discipline and type of	Inde	Index 1° x 1°				
measurements	Qc	L	G	G		
D, HP	1	2	0	6	23;32:42	
M03	7	3	0	4	27;28;29	
M03	7	3	0	5	42;53	

### This shows:

Dynamics and Physical Oceanography in squares

22° (to 23°) N, 063° (to 064°) E

23° (to 24°) N, 062° (to 063°) E

and 24° (to 25°) N, 062° (to 063°) E

### Meteorology (air-sea interface) in squares

32° (to 33°) N, 047° (to 048°) W

32° (to 33°) N, 048° (to 049°) W

etc.

### The Department of the Interior Mission

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering sound use of our land and water resources; protecting our fish, wildlife, and biological diversity; preserving the environmental and cultural values of our national parks and historical places; and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to ensure that their development is in the best interests of all our people by encouraging stewardship and citizen participation in their care. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.

### The Minerals Management Service Mission

As a bureau of the Department of the Interior, the Minerals Management Service's (MMS) primary responsibilities are to manage the mineral resources located on the Nation's Outer Continental Shelf (OCS), collect revenue from the Federal OCS and onshore Federal and Indian lands, and distribute those revenues.

Moreover, in working to meet its responsibilities, the **Offshore Minerals Management Program** administers the OCS competitive leasing program and oversees the safe and environmentally sound exploration and production of our Nation's offshore natural gas, oil and other mineral resources. The MMS **Minerals Revenue Management** meets its responsibilities by ensuring the efficient, timely and accurate collection and disbursement of revenue from mineral leasing and production due to Indian tribes and allottees, States and the U.S. Treasury.

The MMS strives to fulfill its responsibilities through the general guiding principles of: (1) being responsive to the public's concerns and interests by maintaining a dialogue with all potentially affected parties and (2) carrying out its programs with an emphasis on working to enhance the quality of life for all Americans by lending MMS assistance and expertise to economic development and environmental protection.
