

United States Department of Agriculture

Animal and Plant Health Inspection Service

Plant Protection and Quarantine

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

Mention of companies or commercial products does not imply recommendation or endorsement by the U.S. Department of Agriculture over others not mentioned. USDA neither guarantees nor warrants the standard of any product mentioned. Product names are mentioned solely to report factually on available data and to provide specific information.

This publication reports research involving pesticides. All uses of pesticides must be registered by appropriate State and/or Federal agencies before they can be recommended.

CAUTION: Pesticides can be injurious to humans, domestic animals, desirable plants, fish, or other wildlife—if they are not handled or applied properly. Use all pesticides selectively and carefully. Follow recommended practices for the disposal of surplus pesticides and pesticide containers.

New Edition

Introduction

How to Use This Manual

This manual supersedes the second edition issued October 1991 and all updates. Destroy the 1991 edition and any earlier obsolete editions!

Users

This manual is for those Federal officers of (U. S. Customs and Border Protection, Food and Drug Administration, U. S. Citizenship and Immigration Services, and Fish and Wildlife Service) authorized to act for Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture (PPQ, APHIS, USDA) at ports of entry along the Canadian border.

Purposes

One purpose of this manual is to enable Federal officers to regulate (determine admissibility of) agricultural articles in the absence of U. S. Customs and Border Protection Agriculture Inspection (CBP AI). Regulate means to:

- **Prohibit entry** to those articles that pose a threat to the agriculture of the United States.
- **Release** those articles that this manual authorizes you to release.
- **Contact CBP AI** on those articles that require extensive inspection, testing, or treatment—or where the cooperator is uncertain as to the likelihood that an article might be carrying pests and/or diseases.

A second purpose of this manual is to provide directions for taking limited action in the absence of CBP AI. U. S. Customs and Border Protection along the Canadian border has agreed to:

- **Sample** certain agricultural and vegetable seed
- **Board** aircraft and ships in specified instances
- **Inspect** horsemeat to make sure it is unfit for human consumption

Authorized Actions Defined

PROHIBIT ENTRY means don't let the article into the United States. You may:

- Allow the article to be returned to Canada—if this is practicable.
- Refer the article to CBP AI for a decision if you are uncomfortable about prohibiting entry.
- Seize the article for destruction if there is immediate likelihood that an article might spread pests. If you decide to seize an article—give the importer or traveler a copy of "Notice to Arriving Traveler."

Use your best professional judgement in selecting the appropriate action to prevent the entry of plant pests and animal diseases.

RELEASE means to admit those articles that pose no pest risk to American agriculture.

CONTACT CBP AI means to consult with a Customs and Border Protection Agriculture Specialist on those articles you're unsure of or where the article requires extensive inspection, testing, or treatment. **Appendix C** is a directory of CBP AI contacts along the Canadian border. Use this directory to contact the appropriate office.

AUTHORIZE MOVEMENT means to allow to go forward under a Custom's bond or a USDA seal.

Where to Go for Help After Hours

If your local CBP AI is unavailable because it's after hours, then contact an officer at John F. Kennedy International Airport, New York:

Passenger (24/7)

Telephone: 718-553-1659, 1660 Fax: 718-553-0294, 0183

Cargo (0800 - 0000, 7 days/week)

Telephone: 718-487-5281 Fax: 718-487-5287

What to Do If You Disagree with Policy

If you disagree with policy in this manual, then contact your local CBP AI port. Your contact may decide to refer the issue to CBP AI Headquarters.

How to Report Errors or Suggest Enhancements

If you want to report an error in this manual, or want to make a suggestion for its improvement, then contact your local CBP AI port or send them the comment sheet in the back of this manual. Your contact will forward your comments or suggestions to the appropriate office for action.

How to Use this Manual to Determine Admissibility

- **1.** Look up the article in the Index. After you locate the article in the Index, go to the appropriate .
- **2.** If the article cannot be found in the Index, then locate its category using the pink, green, or brown tab. Articles are broadly divided into three categories:
 - Animal and animal products (pink)
 - Plant and plant products (green)
 - Miscellaneous (brown)

Note that each article may be further divided into subcategories (product categories). The products may then be divided into "origin" categories:

- Canadian origin
- Foreign origin other than Canada
- ✤ U.S. products returned

For example, if a Canadian houseplant were presented for entry, you'd go to the section behind the green **Plant** tab. There you'd find the section for **Live Plants**. Finally you'd go to the page that specifies **Canadian Origin**.

- **3.** Use the decision table referred to; either releasing, prohibiting entry to, or referring the article to CBP AI.
- **4.** If you can't locate the article by using the Index or tabs, then contact CBP AI for assistance.

A Caution in Determining Origin

Agricultural products that were grown and harvested in other countries can enter Canadian commerce and be identified to you as Canadian in origin. Obviously, tropical fruits and vegetables like citrus, mangoes, and avocados, cannot have a Canadian origin. Likewise, if fruits like apples, grapes, nectarines, peaches, pears, plums, and sand pears are presented for entry in the dead of winter—their origin is probably somewhere like Chile, not Canada.

If at anytime you are suspicious of origin or hesitant about an agricultural product's origin, contact CBP AI.

Permits, Certificates, and Other Forms

You can find examples of all forms cited in the manual in Appendix A.

Procedures

Refer to **Table 1-1** for examples of where to find information in this manual.

TABLE 1-1: Examples of Where to Find Information

If you need to:	Then:
Clear a commercial shipment of beef from Canada	GO to "Meat, Eggs, Milk, and Other Animal Products" on page 2-7 of Chapter 2 behind the pink ANIMAL tab
Clear a commercial shipment of apples from British Columbia	GO to "Fruits, Vegetables, and Herbs" on page 3-17 of Chapter 3 behind the green PLANT tab
Clear a commercial shipment of sand from Ontario	GO to "Quarry Products" on page 4-5 of Chapter 4 behind the brown MISCELLANEOUS tab
Sample agricultural or vegetable seed	GO to "Sampling Seed" on page 5-41 of Chapter 5 behind the white PROCEDURES tab
Board an aircraft or ship	GO to "Boarding Aircraft" on page 5-49 or "Boarding Ships" on page 5-51 of Chapter 5 behind the white PROCEDURES tab

Keeping Your Manual Current

To maintain a manual, a systematic procedure is a must. Here then is a description of how this manual will be supported and maintained:

Transmittals

This manual and its subsequent revisions will be accompanied by transmittal memos. These will be numbered consecutively—allowing you to know if you've missed something.

Knowing What's Revised

Except for changes to the Index, revisions will be marked with arrows or change bars (vertical lines). Deleted material will be marked with angle brackets.

Your Responsibilities

- **1.** Read all revisions when you receive them.
- **2.** Add or replace the revisions to your manual the day you receive them.
- **3.** File the transmittals in the pocket behind the front cover—this is so you'll know if you've missed something.
- **4.** If you've missed a transmittal, let your CBP AI contact know. This contact will send you what you need.
- **5.** Use the comment sheet to let us know if something is wrong or unworkable.

TABLE 2-1: Earthworms, Insects (Including Bees), and Similar Organisms

1 Areas in Canada infested with potato cyst nematodes are as follows:

- British Columbia: That portion of the Municipality of Central Saanich on Vancouver Island, east of the West Saanich Road
- Newfoundland and Labrador: The entire island of Newfoundland
- Quebec: The Municipality of Saint-Amable

2 Because live specimens are perishable, expedite shipments that you are authorized to release.

- 3 http://www.aphis.usda.gov/ppq/manuals/pdf_files/APM_Chapters.htm
- 4 This permit may be in the form of a tag or label. If the permit has expired or if the package is torn or open, CONTACT CBP Agriculture Specialist (CBP AS). Because live specimens are perishable, expedite shipments that you are authorized to release.

If from:	And:	Then:
Canada	Accompanied by an export certificate from CFIA dated no more than 10 days prior to shipping and declaring the bees ^{1, 2} to be of Canadian origin from parental livestock produced in Canada	 Verify the export certificate from CFIA. Verify that the packaging is sufficient to prevent the escape of any bee. Verify that the species manifested is one of the six species listed in footnote 1 below. For species other than honey bees, verify that contaminants are not present. For honey bees, the whole hive is not allowed—only packages of bees or queens with attendant workers. Notify APHIS-PPQ Headquarters of the clearance of these regulated organisms³ RELEASE
	Lack an export certificate	PROHIBIT ENTRY
Australia or New Zealand (must be direct flight unless through Honolulu, HI)	Accompanied by an export certificate from AQIS or MAF dated no more than 10 days prior to shipping	 Verify the export certificate from AQIS or MAF. Verify that the packaging is sufficient to prevent the escape of any bee or bee pest (mesh opening must not exceed 1 mm for New Zealand and 2 mm for Australia). Verify that the species manifested is <i>Apis</i> <i>mellifera mellifera</i>. For honey bees, the whole hive is not allowed —only packages of bees or queens with attendant workers. No wax, comb, or honey. Notify APHIS-PPQ Headquarters of the clearance of these regulated organisms³ RELEASE
	Lack an export certificate	PROHIBIT ENTRY
A country other than Canada, Australia, or New Zealand	Accompanied by national government export documents and a valid PPQ Form 526 (Plant Pest Permit)	FORWARD to address on PPQ Form 599 (Red and White Label) for Inspection Station clearance
	Lack export documents and Plant Pest Permit	PROHIBIT ENTRY

TABLE 2-2: Bees from All Origins

1 The following bee species can be imported from Canada without a PPQ Form 526, Plant Pest Permit:

- Apis mellifera (Honey bee)
- *Bombus impatiens* (Bumble bee)
- Bombus occidentalis (Bumble bee)
- *Megachile rotundata* (Alfalfa leafcutter bee)
- Osmia lignaria (Blue orchard bee)
- Osmia cornifrons (Horn-faced bee)

All other species require a PPQ Form 526, Plant Pest Permit.

- 2 New and used bee boards of Canadian origin imported with bee species other than *Apis mellifera* must meet the entry requirements for wood products.
- 3 Use any one of the following three methods for notification:

By mail to this address: Bee Imports PPQ, APHIS 4700 River Road, Unit 133 Riverdale, MD 20737-1236 By fax at 301-734-8700 By e-mail to Notification@usda.gov

Cut Flowers and Greenery

lf:	Then:
Conifer ¹ Christmas trees or branches	GO to Table 3-6
Commercially produced wreaths or garlands	RELEASE
Other than a commodity listed in the three cells above	GO to Table 3-13

1 The term *conifer* refers to cone-bearing trees. Common examples include pine, fir, spruce, hemlock, and Douglas fir.

TABLE 3-6: Cut Christmas Trees or Branches

lf:	Then:
A pine species (for example, white pine, Scotch or Scots pine)	GO to Table 3-7
Not a pine species (for example, fir, spruce, hemlock, Douglas fir) ¹	GO to Table 3-12

1 Conifer branches from species **other than pine** and less than 15 mm(1/2 inch) in diameter are **exempt** from gypsy moth certification requirements and may be released.

If from:	And:	Then:
New Brunswick or Nova Scotia	>	GO to Table 3-8
Ontario or Quebec	>	GO to Table 3-10
A province other than those listed above	 All of the following requirements are met: 1. The trees are accompanied by a certification of origin² stating that they were produced in an area of Canada where gypsy moth is not known to occur³ 2. The trees are accompanied by a statement of origin and movement⁴ that specifies the Canadian province where the trees originated and, if applicable, the province or provinces they were moved through, if different from the province of origin, and also states that: a. The trees originated in and were moved only through areas of Canada not considered to be infested with pine shoot beetle, as determined by the CFIA³, or b. The trees originated from a province not quarantined for pine shoot beetle and are moved through a province that is infested with pine shoot beetle and are moved through a province that is infested with pine shoot beetle during October, November, or December, or when ambient air temperature is below 10°C (50°F) (the shipment does not have to be covered or in an enclosed container). 3. The U.S. destination (including county and State) is plainly indicated on the trees or on the outer covering or container 	RELEASE ⁵
	Lacks the documents and indication of destination described above	CONTACT CBP AS

TABLE 3-7: Cut Pine Christmas Trees or Branches¹

- 1 Cut pine Christmas trees or branches of Canadian origin are subject to requirements for both gypsy moth and pine shoot beetle. Because the entry requirements are complex and are based on place of origin in Canada as well as place of destination in the U.S., determine the requirements for gypsy moth first, then determine the requirements for pine shoot beetle.
- 2 The certification of origin for gypsy moth is a signed, accurate statement certifying the area in which the trees were grown. The statement may be provided directly on the documents accompanying the tree shipment, or may be provided on a separate certificate. The certification does **not** require the signature of a CFIA inspector; exporters may sign the statement.
- 3 See Appendix G.
- 4 The statement of origin and movement for pine shoot beetle may be printed directly on the documentation accompanying the shipment, or may be provided on a separate document. The certification does **not** require the signature of a CFIA inspector; exporters may sign the document.
- 5 If the trees are to be moved through an area of the U.S. quarantined for pine shoot beetle (Appendix G), en route to an area or areas in the U.S. not quarantined for pine shoot beetle during the period of January through September when the temperature is 10°C (50°F) or higher, then the trees must be shipped in an enclosed vehicle or completely covered (such as with plastic canvas, or other closely woven cloth) so as to prevent access by pine shoot beetle.

If from:	And destined to:	And:	Then:

TABLE 3-13: Cut Flowers and Greenery of Canadian Origin OTHER THAN Conifer Christmas Trees, Branches, Commercially Produced Wreaths, or Garlands

- 1 Cut flowers grown in Canada may enter the United States during all CBP hours of coverage.
- 2 Flower shipments selected for the required 5% inspection rate (the 5% inspection rate translates to approximately every 20th shipment) must be inspected and released by a CBP AS.
- 3 Outside of CBP AS hours of coverage the following criteria **must** be met:
 - **On a yearly basis,** provide CBP AS personnel, in each port of entry utilized, **one** of the following: a current copy of the NAFTA certificate of origin **or** a signed affidavit certifying cut flower shipments are of Canadian origin. Any updates/changes in the supplier list must be provided to CBP ASs as the changes occur.
 - For each shipment, provide CBP AS personnel advance notification. This advance notice must be provided on company fax letterhead and during the regular staffed hours of CBP AS. The advance notification must also provide the following information: estimated time of arrival, origin, and description of cut flower varieties (the description can be attached and may be in the form of an invoice).

Note: These requirements will allow the CBP AS to select shipments, entering outside of CBP AS regular staffed hours, in advance for inspection as needed. The CBP AS will also provide access to this information to local CBP officers so that CBP officers can determine if the importer has met the conditions listed above.

Foreign Origin Other than Canada

Fruits, Vegetables, and Herbs

Verified Canadian Origin

TABLE 3-15: Verified Canadian Origin Fruits, Vegetables, or Herbs

lf:	Then:
Fresh fruits, vegetables, or herbs ¹	GO to Table 3-16
Frozen or dried fruits, vegetables, or herbs ¹	GO to Table 3-22
Preserved or cooked fruits, vegetables, or herbs ¹	GO to Table 3-24

1 Origin may be verified by thoroughly reviewing the documentation and the shipping containers of shipments presented for entry. It is important to note that fruits and vegetables, which were grown and harvested in other countries, may be identified as Canadian origin. Tropical fruits and vegetables, such as citrus, mangoes and avocados are not grown in Canada and are not Canadian origin. Also, fruits such as grapes, nectarines, peaches, plums, and sand pears presented for entry during winter months may not be of Canadian origin. The origin of these types of fruit is probably a country below the equator, for instance, Chile or South Africa.

Fruits and vegetables presented as from Canada may not necessarily have originated in Canada. Commodities entering Canadian commerce can be considered a product of Canada, however, this designation does not necessarily mean the product's origin is Canadian.

lf:	And:	Then:

		Lacking the above phytosanitary certificate	
	Processed bulb (peeled and chopped)		RELEASE

TABLE 3-17: Canadian Origin Fresh Alliaceous Vegetables

1 Dry bulb refers to alliums which are harvested and then left to cure in the field and placed in storage under controlled conditions to allow the bulbs to dry completely. Dry bulb alliums have a dry, papery outer skin as distinguished from fresh alliums, which are green and soft.

Sprout suppressants are sometimes used to avoid sprouting of dry bulbs in storage, but in some situations sprouting might happen. These sprouts originate from storage so green parts related to sprouted dry bulbs do not require a phytosanitary certificate and can be released after inspection.

Dry bulb onions (*Allium cepa* var *cepa*) come in a wide range of sizes and shapes, and bulbs might be red, white or yellow. Examples of other dry bulb alliums are dried garlic (*A. sativum*) and dried shallots (*A. cepa* var *aggregatum*).

2 Fresh bulb and other plant parts refer to alliums which are harvested fresh and green. They should be targeted by the Leek Moth requirements and be accompanied by a phytosanitary certificate and an additional declaration. Fresh bulb and other plant parts of alliums could be scallions or welsh onions (*Allium fistulosum*), leeks (*A. porrum*) and chives (*A. schoenoprasum*). Garlic (*A. sativum*), green bunching onions (*A. cepa* var *cepa*) and shallots (*A. cepa* var *aggregatum*) when harvested and marketed fresh and showing green parts are regulated and should be accompanied by a phytosanitary certificate and an additional declaration.

U. S. Produce Returned

In most instances you can release fruits and vegetables if you can verify that they are of U. S. origin. Use accompanying documents on fruit and labels on containers to establish origin. If at any time you are in doubt of the produce's origin, regulate as if the produce were of foreign origin.

Fresh produce of foreign origin is often permitted to transit the United States on its way to Canada. Since the transiting produce may be prohibited entry into the United States, **don't let it back into the United States without PPQ's concurrence.** Apples, citrus, grapes, mangoes, nectarines, peaches, pears, plums, and sandpears are examples of fruits prohibited entry into the United States that may be allowed to transit.

Evidence of Origin

Evidence of origin can come from labeling, sales receipts, and answers to your questions. Most often it will be the cumulative evidence that will confirm the origin of the produce.

In the case of citrus, **undeniable proof of origin** is an entry requirement. The only example of undeniable proof of origin is labeling declaring U.S. origin on a sealed, unopened bag of fruit.

Stickers on small quantities of non-commercial produce that provide evidence that the fruit originated in the U.S. suffices as adequate proof of origin, but only for U.S. traveler(s) returning to the U.S. after transiting Canada.

If you can verify that the produce originated in:	And:	Then:
Hawaii, Puerto Rico, or the U.S. Virgin Islands	Is in a sealed package bearing an official PPQ stamp impression "TREATED AND RELEASED" or "RELEASED"	RELEASE

	Lacks the documents and indication of destination described above	CONTACT CBP AS

TABLE 3-38: Canadian Origin Pine Logs¹

- 1 Canadian origin pine logs with bark attached are subject to requirements for both gypsy moth and pine shoot beetle. Because the entry requirements are complex and are based on place of origin in Canada as well as place of destination in the U.S., determine the requirements for gypsy moth first, then determine the requirements for pine shoot beetle.
- 2 The certification of origin for gypsy moth is a signed, accurate statement certifying the area in which the logs originated. The statement may be provided directly on the documents accompanying the log shipment, or may be provided on a separate certificate. The certification does **not** require the signature of a CFIA inspector; exporters may sign the statement.
- 3 See Appendix G.
- 4 The statement of origin and movement for pine shoot beetle may be printed directly on the documents accompanying the shipment, or may be provided on a separate document. The certification does **not** require the signature of a CFIA inspector; exporters may sign the statement.
- 5 If the logs are to be moved through an area of the U.S. quarantined for pine shoot beetle (Appendix G), en route to an area or areas in the U.S. not quarantined for pine shoot beetle during the period of January through September when the temperature is 10°C (50°F) or higher, then the logs must be shipped in an enclosed vehicle or completely covered (such as with plastic canvas, or other closely woven cloth) so as to prevent access by pine shoot beetle.

If from:	And destined to:	And:	Then:
A Canadian area infested with gypsy moth ¹	The States of CT, DE, DC, MA, MD, MI, NH, NJ, NY, PA, RI, VT, or other areas in the U.S. infested with gypsy moth ^{1, 2}		RELEASE
	An area in the U.S. not infested with gypsy moth	Accompanied by a Canadian phytosanitary certificate with one of the following additional declarations:	
		 "The logs have been inspected and found free of gypsy moth." or 	
		 "The logs have been treated for gypsy moth in accordance with the Plant Protection and Quarantine Treatment Manual." 	
		Without the above certification	PROHIBIT ENTRY
A Canadian area not infested with gypsy moth	The States of CT, DE, DC, MA, MD, MI, NH, NJ, NY, PA, RI, VT, or other areas in the U.S. infested with gypsy moth ^{1, 2}	>	RELEASE

A species of <i>Pelargonium</i> ⁵	Is accompanied by either a shipping invoice with a Canadian Food Inspection Agency label (Form CFIA/ACIA 4702) attached stating "Greenhouse-grown Plants from Canada," or a Canadian Phytosanitary Certificate ⁶ with the following additional declaration: " <i>Ralstonia</i> <i>solanacearum</i> race 3 biovar 2 is not known to occur in the country of origin."	GO to Table 3-61
	Lacks the documentation described above	PROHIBIT ENTRY
None of the plants listed in	Grown in soil but not greenhouse grown	GO to Table 3-61
the cells above	 Greenhouse grown in soil or Bare-rooted 	GO to Table 3-62

1 The most common genera of bamboo include *Arundinaria*, *Bambusa*, *Chimonobambusa*, *Dendrocalamus*, *Phyllostachys*, *Pseudosasa*, *Sasa*, *Semiarundinaria*, and *Shibataea*.

- 2 The term "citrus" refers to all genera, species, and varieties of the subfamilies Aurantioideae, Rutoideae, and Toddalioideae of the botanical family Rutaceae, and includes such plants as *Boronia*, XCitrofortunella mitis (calamondin), Calodendrum capense (cape chestnut), China flower, Citrus medica (citron), Fortunella (kumquat), Citrus X paradisi (grapefruit), Citrus limon (lemon), Citrus aurantiifolia (lime), Citrus sinensis (orange), Murraya paniculata (orange-jessamine), Ruta spp. (rue), Citrus X tangelo (tangelo), and Citrus reticulata (tangerine).
- 3 CITES is the Convention on International Trade in Endangered Species of Wild Fauna and Flora.
- 4 The palm family includes over 100 cultivated genera, some of which are prohibited entry into the United States. CFIA will not issue a phytosanitary certificate for prohibited plants.
- 5 The common bedding plant called a geranium is really in the genus *Pelargonium*. While plants of the genus *Geranium* are not host to *Ralstonia solanacearum* race 3 biovar 2, geraniums (*Pelargonium* sp.) plants are a separate species from *Geranium* spp. and are regulated differently due to disease risk.
- 6 The phytosanitary certificate may be CFIA Form 1327, CFIA Form 4743, or CFIA/ACIA 5378.

Scientific Name	Common Name
Armoracia rusticana	Horseradish
<i>Brassica napus</i> (all varieties)	Includes: Rape, Colza, Rutabaga, Swede, Swedish Turnip, Siberian Kale, Hanover Salad, etc.
<i>Brassica oleracea</i> (all varieties)	Includes: Wild Cabbage, Kale, Collards, Chinese Kale, Broccoli, Cauliflower, Head Cabbage, Brussels Sprouts, Kohlrabi, etc.
Brassica rapa (all varieties)	Chinese Cabbage, Rapini, Turnip
Lepidium sativum	Garden Cress
Nasturtium amphibium	Tall Nasturtium
Nasturtium officinale	Watercress
Nasturtium palustre	Marsh Watercress
Nasturtium silvestre	Creeping Watercress
Raphanus sativus (all varieties)	Chinese Radish

TABLE 3-55: Reported Hosts of Swede Midge

If from:	And:	Then:
An area of Canada infested with swede midge ¹	Produced under the Swede Midge Certification Program (SMCP) and accompanied by the SMCP sticker indicating it meets the USDA requirements for entry	GO to Table 3-61
	Lacks the above sticker	PROHIBIT ENTRY
All areas of Canada other than those listed above	Accompanied by a phytosanitary certificate that indicates origin from a non-infested area of Canada, or Produced under the Canadian Greenhouse Certification Program and accompanied by the appropriate sticker indicating the material meets USDA requirements in lieu of a phytosanitary certificate, or Produced under the SMCP and accompanied by the appropriate sticker indicating the material meets USDA requirements in lieu of a phytosanitary certificate	GO to Table 3-61
	Lacks a phytosanitary certificate or the above sticker	PROHIBIT ENTRY

TABLE 3-56: Canadian Origin Hosts of Swede Midge

1 The areas of Canada infested with swede midge are as follows:

- **Ontario**: The city of Toronto and the counties of Brant, Dufferin, Durham, Halton, Hamilton-Wentworth, Niagara, Norfolk, Oxford, Simcoe, Victoria, Waterloo, Wellington, or York.
- ◆ Quebec: The counties of Argenteuil, Communauté Urbaine de Montréal, Deux-Montagnes, Haut-Richelieu, Jardins-de- Napierville, Laval, La Vallée-du- Richelieu, Mirabel, Montcalm, Roussillon, Rouville, Therese-de- Blainville, or Vaudreuil- Soulanges.

lf:	And:	And:	Then:
Grown at a greenhouse participating in the Canadian greenhouse	CITES documents ² accompany the shipment	Entering a designated port ³	CONTACT PPQ or CBP AS
certification program ¹		Not entering a designated port	HAVE the importer reroute the plants to a designated port (if appropriate, safeguard under plant quarantines first). Shipping and handling charges are to be borne by the importer ⁴ .
	No CITES documents accompany the shipment		SEIZE the shipment and hold for PPQ
Grown at a greenhouse not participating in the Canadian greenhouse certification program, or grown in soil but not greenhouse grown		•	GO to Table 3-58

TABLE 3-57: Canadian Origin CITES Regulated Plants Grown Indoors

- 1 Must be accompanied by **either** a shipping invoice with a Canadian Food Inspection Agency label (Form CFIA/ACIA 4702) attached stating "Greenhouse-grown Plants from Canada," **or** a Canadian Phytosanitary Certificate.
- 2 CITES is the Convention on International Trade in Endangered Species of Wild Fauna and Flora. The documentation must be a CITES export permit issued by the Canadian Wildlife Service.
- 3 Designated ports for the importation of plants from Canada are the following: Detroit and Port Huron, MI; Buffalo and Rouses Point, NY; and Blaine, WA.
- 4 If movement to a designated port is unacceptable, contact a PPQ Regional Botanist or CITES Specialist to see whether re-export is an option.

lf:	And:	Then:
CITES documents ¹ accompany	Entering a designated port ²	GO to Table 3-59
the shipment	Not entering a designated port	GO to Table 3-60
No CITES documents accompany the shipment		SEIZE the shipment and hold for PPQ

TABLE 3-58: Canadian Origin CITES Regulated Plants Not Greenhouse Certified

1 CITES is the Convention on International Trade in Endangered Species of Wild Fauna and Flora. For CITES plants that are artificially propagated, the documentation must be a CFIA issued phytosanitary certificate that has a CITES Inventory Sheet attached. For CITES plants that were wild-collected, the documentation must be a CITES export permit issued by the Canadian Wildlife Service.

2 Designated ports for the importation of plants from Canada are the following: Detroit and Port Huron, MI; Buffalo and Rouses Point, NY; and Blaine, WA.

TABLE 3-59: Canadian Origin CITES Regulated Plants Not Greenhouse Certified; with CITES Documents; Entering at a Designated Port

lf:	Then:
Accompanied by a Canadian Phytosanitary Certificate ^{1, 2}	CONTACT CBP AS
Not accompanied by a Canadian PC	PROHIBIT ENTRY

1 If the article is from a Potato Cyst Nematode (PCN) regulated area, the Canadian Food Inspection Agency (CFIA) will provide an additional declaration "The articles in this shipment were grown iin a PCN-free place of production and in a manner to prevent infestation by Potato Cyst Nematodes (*Globodera rostochiensis* and/or *G. pallida*)."

The areas of Canada regulated for PCN by CFIA are the following:

- Alberta: A farm unit and associated land located near the municipality of Fort Saskatchewan; and a farm unit and associated land located near the municipality of Spruce Grove
- British Columbia: That portion of the Municipality of Central Saanich on Vancouver Island, east of the West Saanich Road
- Newfoundland and Labrador: The entire island of Newfoundland
- Quebec: The municipality of Saint-Amable
- 2 The phytosanitary certificate may be CFIA Form 1327, CFIA Form 4743, or CFIA/ACIA 5378.

Procedures

All Origins

Use the following decision tables to determine what action to take on seed regulated by the **Federal Seed Act (FSA)**.

Before following any directions on this page, make sure the shipment is for planting. If it is not, then refer to **Table 3-81** in the **Plant** section of this manual behind the green tab.

TABLE 5-1: Seed from All Origins

If the seed is:	And:	Then:
Moving under Departmental Permit (PPQ Form 588)	Conditions of the permit are met	RELEASE
	Conditions of the permit are not met	CONTACT a CBP Agriculture Specialist (CBP AS)
Agricultural or vegetable (refer to "A List of Agricultural and Vegetable Seed Regulated by the Federal Seed Act" on page 5-17)		GO to Table 5-2
Other than agricultural or vegetable		GO to Table 5-3

If origin is:	And:	And:	And:	Then:
Canada	Accompanied by a declaration of labeling ¹	Accompanied by the original or a copy of PPQ Form 925, Seed Analysis Certificate, for each lot, a Canadian Seed Analysis Certificate (CFIA Form 5289 ²), or a Seed Export Label (CFIA Form 5309 ³) (See Appendix A)		GO to Table 5-4 on page 5-6
		Lacks the above documentation		GO to Table 5-5 on page 5-7
	Lacks a declaration of labeling			PROHIBIT ENTRY
United States (returned)				GO to Table 3-90 on page 3-76
Other than Canada or United States	Accompanied by a declaration of labeling ¹	Accompanied by a Canadian Seed Analysis Certificate (CFIA Form 5289), or a Seed Export Label (CFIA Form 5309)		RELEASE
		Accompanied by a Phytosanitary Certificate	Port has a CBP AS	REFER to CBP AS for inspection
			Port does not have a CBP AS	USE the procedures for "Sampling Seed " on page 5-41
		Lacks the above documentation		PROHIBIT ENTRY
	Lacks a declaration of labeling			

TABLE 5-2: Agricultural and Vegetable Seed from All Origins

- 1 A declaration of labeling is defined as "a written statement of a grower, shipper, processor, dealer, or importer giving for any lot of seed the kind, variety (if vegetable), lot number, origin, and the use for which the seed is intended." This is usually the invoice and labeling on the containers. If any seed in the lot has been treated, the label must indicate that the seed has been treated, and the commonly accepted coined, chemical (generic), or abbreviated chemical name is shown. A statement must also be shown on labels of treated seed that the seed is not to be used for food, feed, or oil purposes.
- 2 See Appendix D for a list of laboratories authorized to issue Seed Analysis Certificates.
- 3 See Appendix D for a list of exporters authorized to use the seed export label.

If the origin is:	And:	Then:
Canada		GO to Table 3-88 on page 3-74
Other than Canada	Is accompanied by a Phytosanitary Certificate issued by the country of origin	REFER to CBP AS for inspection
	Is accompanied by a Canadian Seed Analysis Certificate (CFIA Form 5289 ¹) or a Seed Export Label (CFIA Form 5309 ²)	RELEASE
	Lacks the above documentation	PROHIBIT ENTRY

TABLE 5-3: Seed OTHER THAN Agricultural or Vegetable from All Origins

1 See Appendix D for a list of laboratories authorized to issue Seed Analysis Certificates.

2 See Appendix D for a list of exporters authorized to use the seed export label.

Canadian Origin With SAC

lf:	And:	And:	And:	Then:	
an on the declaratio laboratory of labeling (refer to matches t "Appendix D" on on the SA	information on the declaration	The SAC states in Block 18 that the seed meets FSA requirements		RELEASE; Send original SAC (if it is	
	of labeling matches the information ¹ on the SAC	natches the nformation ¹ does not meet	The seed is consigned to an approved facility (see "Appendix D" on page D-1)	with the shipment) and invoice to SEF	
page D-1)			The seed is not consigned to an approved facility	PROHIBIT ENTRY	
	The information on the declaration of labeling does not match the information on the SAC	The seed is a mixture of peas and a grain (oats, barley, triticale, etc.)	The seed is accompanied by copies of SACs issued on each of the components of the mixture, and the lot of the mixture is composed of, at least in part, the combined lot numbers of the components	RELEASE; Send the copies of the SACs of the components and the invoice to the SEF	
			The shipment does not meet the requirements specified in the cell above	PROHIBIT ENTRY	
		The seed is corn seed that is bagged rather than in bulk	The lot is accompanied by a copy of an SAC issued on the bulk lot of corn seed, and the lot number of the corn seed is composed of, at least in part, the lot number of the bulk seed shown on the SAC	RELEASE; Send the copy of the SAC and the invoice to the SEF	
			The shipment does not meet the requirements specified in the cell above	PROHIBIT ENTRY	
		The seed is neither a pea/ grain mixture nor corn that is bagged rather than in bulk	►		
The SAC is not issued by an accredited laboratory		·			

TABLE 5-4: Canadian Origin Seed Accompanied by a Seed Analysis Certificate (SAC)

1 With respect to kind, variety name, lot number, and treatment labeling.

Canadian Origin Without SAC

If shipment is:	And the seed is:	Then:	
Consigned to an approved facility (refer to Appendix D)		 FORWARD the shipment to the approved facility under CBP bond. SEND a copy of the invoice to the SEF. 	
Not consigned to an	Agricultural ¹	GO to Table 5-6	
approved facility	Vegetable ¹	GO to Table 5-7	

TABLE 5-5: Canadian Origin Seed Lacking a Seed Analysis Certificate (SAC)

1 To determine if the seed is agricultural or vegetable, see "A List of Agricultural and Vegetable Seed Regulated by the Federal Seed Act" on page 5-17

If the seed in Column A of Table 5-8 is for:	And the weight of the seed lot:	And the shipment:	Then:
Resale or planting by the importer ¹	Exceeds that listed in Column B of Table 5-8		PROHIBIT ENTRY
	Does not exceed	Is corn or wheat	RELEASE
	that listed in Column B of Table 5-8	Is other than corn or wheat, and is accompanied by a Phytosanitary Certificate, a Canadian Seed Analysis Certificate (CFIA Form 5289) ² , or a Seed Export Label (CFIA Form 5309) ³	
		Is other than corn or wheat, and lacks a Phytosanitary Certificate, CFIA Form 5289, or CFIA Form 5309	PROHIBIT ENTRY
Experimental or breeding purposes ¹	Exceeds that listed in Column C of Table 5-8		
	Does not exceed	Is corn or wheat	RELEASE
that listed in Column C of Table 5-8		Is other than corn or wheat, and is accompanied by a Phytosanitary Certificate, a Canadian Seed Analysis Certificate (CFIA Form 5289) ² , or a Seed Export Label (CFIA Form 5309) ³	
		Is other than corn or wheat, and lacks a Phytosanitary Certificate, CFIA Form 5289, or CFIA Form 5309	PROHIBIT ENTRY

TABLE 5-6: Canadian Origin Agricultural Seed for Planting, Lacking an SAC

1 The invoice or label should declare what the grower intends to use the seed for. Read the invoice and label to find out how the seed is to be used. If the invoice, label, or importer fails to declare how the seed is to be used, then regulate the seed as if it were intended for resale or planting by the importer.

- 2 See Appendix D for a list of laboratories authorized to issue Seed Analysis Certificates.
- 3 See Appendix D for a list of exporters authorized to use the seed export label.

If the seed in Column A of Table 5-9 is for:	And the weight of the seed lot:	And the shipment:	Then:
Resale or planting by the importer ¹	Exceeds that listed in Column B of Table 5-9		PROHIBIT ENTRY
	Does not exceed	Is sweet corn	RELEASE
	that listed in Column B of Table 5-9	Is other than sweet corn, and is accompanied by a Phytosanitary Certificate, a Canadian Seed Analysis Certificate (CFIA Form 5289) ² , or a Seed Export Label (CFIA Form 5309) ³	
		Is other than sweet corn, and lacks a Phytosanitary Certificate, CFIA Form 5289, or CFIA Form 5309	PROHIBIT ENTRY
Experimental or breeding purposes ¹	Exceeds that listed in Column C of Table 5-9		
	Does not exceed	Is sweet corn	RELEASE
	that listed in Column C of Table 5-9	Is other than sweet corn, and is accompanied by a Phytosanitary Certificate, a Canadian Seed Analysis Certificate (CFIA Form 5289) ² , or a Seed Export Label (CFIA Form 5309 ³)	
		Is other than sweet corn, and lacks a Phytosanitary Certificate, CFIA Form 5289, or CFIA Form 5309	PROHIBIT ENTRY

- 1 The invoice or label should declare what the grower intends to use the seed for. Read the invoice and label to find out how the seed is to be used. If the invoice, label, or importer fails to declare how the seed is to be used, then regulate the seed as if it were intended for resale or planting by the importer.
- 2 See Appendix D for a list of laboratories authorized to issue Seed Analysis Certificates.
- 3 See Appendix D for a list of exporters authorized to use the seed export label.

A List of Agricultural and Vegetable Seed Regulated by the Federal Seed Act

How to Use This List

Seed may be invoiced either by scientific or common name – or both. Agricultural and vegetable seed are entered into this list both by their scientific and common names. The scientific name will be italicized; the common name will not. Here are two ways you would find tomatoes listed:

TOMATO (V) (Lycopersicon esculentum

Lycopersicon esculentum

- Table 3-70 (Plant Section) for Canadianorigin seed. Here is an overview of the steps to take in sampling seed:

TABLE 5-10: Overview of Steps to Take in Sampling Seed

Equipment Needed to Sample Seed

To collect the seed samples, make sure you have the equipment listed in Figure 5-1 below.

trier						
cloth						
contaiı	ner					
	pen					
Гаре						
knife						
	gloves					
	dust mask					
PPQ Fori	m 237					
	cloth contair Гаре knife	cloth container pen Tape knife gloves	cloth container pen Tape knife gloves dust mask	cloth container pen Tape knife gloves dust mask	cloth container pen Tape knife gloves dust mask	cloth container pen Tape knife gloves dust mask

Collecting the Sample

Follow these steps to sample the seed:

Step 1—Determine how large a sample to collect.

Refer to **Table 5-11** as a guide.

TABLE 5-11: Amount of Seed to Collect from Each Lot¹

If the seed is in:	And the seed is categorized as:	Then:
		quart
		Step 2
		pint
		Step 2

Step 2—Compute how many subsamples to draw.

Once you know how much seed to collect for your sample, you must then calculate how many subsamples to draw to ensure a representative sample.

Consequences of failure to take a good sample:

CRUCIAL: Follow these directions scrupulously! When sampling seed, **return the excess seed to its original container** after you have completed your sampling. Never mix seed from different lots before returning your samples. Be careful not to spill seed.

TABLE 5-12: Computing Number of Subsamples Based on Seed Packaging

If the seed is in:	Then use Substep:
Bags or other nonhermetically sealed containers	2.A for your computation
Bulk	2.B for your computation

Substep 2.A (seed in bags or other nonhermetically sealed packages)—

not

Step 3.

Substep 2.B (bulk seed)—

1. 2. 3. **2.A**

Table 5-14.

TABLE 5-14: Example Computation of How Many Subsamples to Draw from Seed in a Bulk Shipment

Example computation:

How many subsamples would you draw from a 2,000 pound bulk shipment of oats?

Treat the shipment as a single lot:

- 1. The weight of the lot is 2,000 pounds.
- 2. 2,000 \div 100 = 20 (the equivalent number of bags).
- 3. Twenty falls between 15 and 24 on the matrix—which directs you to draw 7 subsamples.
 - **4.** Go to

Step 3—Sample with a trier.

If you know or believe the seed is treated, then take these precautions:

Use plastic gloves and a dust mask.

Wear protective coveralls.

Wear eye protection.

Avoid wiping your mouth or nose with your hands.

Treated

seeds are inspectable because you can see the seed through the chemical substance.

If the seed is:	And its origin is:	And:	Then:
Coated, pelleted, or	Canada	Has a seed analysis certificate (PPQ Form 925)	GO to Substep 3.C
preplanted - making it impossible to		Does not have a Seed Analysis Certificate	PROHIBIT ENTRY
examine the seed itself	A country other than Canada	Is accompanied by a Phytosanitary Certificate, a Canadian Seed Analysis Certificate (CFIA Form 5289), or a Seed Export Label (CFIA Form 5309 ¹) and an officially drawn and sealed sample taken before the seed was coated	Take a small random sample of coated seed; send the official sample and the sample of uncoated seed to the SEF. GO to Step 4.
		Is not accompanied by one of the above forms and an official sample of uncoated seed	PROHIBIT ENTRY
Naked or merely dusted or treated			GO to Substep 3.C

TABLE 5-15: Sampling Coated, Pelleted, or Preplanted Seed

1 See Appendix D for a list of exporters authorized to use the seed export label.

Step 1

Substep 3.M—

Forwarding the Sample

Step 1—Bag the	sample.	
lots	kinds	
Step 2—Tie the b	ag.	
STAPLES!		NEVER USE
Step 3—Double-b	ag the sample. separate	

Step 4—Refer to Table 5-16 for further instructions.

TABLE	5-16:	Forwarding	Seed Samples	
-------	-------	------------	---------------------	--

If the seed is of:	Then:
Non-Canadian origin	 Complete a PPQ Form 237, Record of Seed Offered for Importation Under the Federal Seed Act. Put the completed pink copy (Part 3) of PPQ Form 237, declaration of labeling (copy of the label and invoice), and Phytosanitary Certificate, Canadian Seed Analysis Certificate (CFIA Form 5289), or Seed Export Label (CFIA Form 5309¹) into the cloth bag.² Secure the outer cloth bag by tying the mailing tag. Send the sample by PRIORITY MAIL to: Seed Examination Facility PPQ-APHIS-USDA Building 580 BARC-E Beltsville, MD 20705 Give the completed yellow copy (Part 4) of PPQ Form 237 to the consignee or the consignee's agent. Mail the remaining white copies (Parts 1 and 2) of the completed PPQ For 237 to the SEF in a separate envelope. Mail these copies the same day as you send the sample-but separate from the sample. Go to Table 5-17. Request additional forms, bags, and tags (if needed) from the SEF at the above address.
Canadian origin for monitoring purposes	 Place a copy of the seed analysis certificate (PPQ Form 925) and declaration of labeling into the cloth bag. Secure the outer cloth bag by tying the mailing tag. Send the sample by PRIORITY MAIL to: Seed Examination Facility PPQ-APHIS-USDA Building 580 BARC-E Beltsville, MD 20705 Request additional forms, bags, and tags (if needed) from the SEF at the above address.
Canadian origin, lacking a seed analysis certificate (SAC), consigned to an approved facility	 Place the sample and a copy of the invoice into the shipping packaging supplied by the importer. Using an address label provided by the importer, send the sample to a Canadian seed testing laboratory designated by the importer (the importer is responsible for paying to send the sample to the Canadian laboratory). The laboratory must be authorized to issue Seed Analysis Certificates (see Appendix D). Request additional labels and shipping packaging (if needed) from the importer.

1 See Appendix D for a list of exporters authorized to use the seed export label.

2 When forwarding samples of treated seed, be sure to put the papers in the outer cloth bag.

WARNING! If the seed is treated, make sure that you put the paperwork in the cloth bag outside the plastic bag - never put the paperwork in the plastic bag containing the treated seed. If you put the paperwork in with the treated seed, you create a risk of exposing personnel at the seed examination facility to pesticides. Note that pesticide absorption through the skin is the most common cause of poisoning in agricultural workers.

Clearing the Seed Shipment

If the importer:	Then:
Has posted a performance bond	ALLOW the seed to go forward to the owner's premise pending release by the SEF
Has not posted a performance bond	HOLD the seed until released by the SEF

TABLE 5-17: Clearing Non-Canadian Origin Seed Shipments

Procedures

Boarding Aircraft

Procedures for Boarding Aircraft

Flight's Origin

Canadian Flights

"Evidence of Origin" on

page 3-25). Collect meats, fruits, and vegetables of other than Canadian or continental U.S. Origin.

Precleared Flights

If the flight originated in a foreign country other than Canada, Hawaii, or any U.S. offshore territory; check to see if the flight was precleared by PPQ. Assume that all scheduled flights (and some charters) from Nassau or Freeport, Bahamas or Bermuda are precleared. RELEASE precleared flights.

Foreign Arrivals not Precleared

If the foreign, Hawaiian, or U.S. territorial flight was not precleared, then board the aircraft, clear its passengers, cargo, and crew:

- 1. Examine stores (including box lunches), and storage for produce, meats, and other agricultural items. Use the references in this manual to decide the appropriate action to take on intercepted items. Collect all inadmissible material (where you are directed to prohibit entry) for later incineration or sterilization.
- **2.** Remove all garbage and food waste (including unused meals) for incineration or sterilization.

- **3.** Examine baggage and question passengers and crew to learn if they are carrying agricultural items. Use the references in this manual to decide the appropriate action to take on intercepted items. Collect all inadmissible material (where you are directed to prohibit entry) for later sterilization or incineration. If the owners of intercepted material object to the seizure and request action by CBP, then CONTACT a CBP Agriculture Specialist (CBP AS) for directions. Check the manifest to see if live animals and organisms are manifested. If the aircraft is carrying live animals or organisms, use the references in this manual to decide the appropriate action to take.
- **4.** Observe if there is infestation, soil, plant, or animal contamination (principally blood, manure, or straw). If you detect infestation or contamination, secure the aircraft and/or cargo, then immediately contact a CBP AS.
- **5.** Incinerate or sterilize all garbage, refuse, and those prohibited items you collected. Officers of the Canadian Food Inspection Agency (CFIA) have agreed to assist in this incineration.

Procedures

Boarding Ships

General Instructions

- 1. Determine if the ship is plying only between continental United States and Canadian ports or has visited other foreign ports.
- **2.** If the ship was plying only between continental United States and Canadian ports, no further action is necessary.
- **3.** If the ship visited other foreign ports besides Canada, verify whether or not a CBP Agriculture Specialist (CBP AS) has been notified. If a CBP AS was not notified, contact them.
- **4.** In the absence of a CBP AS, make sure that no meat, stores, or animals are discharged. Do not allow any garbage to be removed or dumped overboard.

Breaking Seals

Foreign meats in sea stores of vessels plying the Great Lakes/St. Lawrence Seaway are sealed in freezer compartments by the Canadian Food Inspection Agency (CFIA). Although these seals are to remain intact while the vessel is in the Seaway or Great Lakes, in an emergency (like a failure in the refrigeration system) the seals can be broken by Federal officers. If you are asked by CFIA to break seals in sea stores, and you judge that there is a real emergency, then supervise the breaking of the seals and resealing of the stores by following this procedure:

- 1. **Record** the serial numbers of the seals that are broken.
- 2. **Replace** the seals that were broken.
- 3. **Record** the serial numbers of the new seals.
- **4. Contact** a CBP AS immediately. The CBP AS will notify the Canadian Food Inspection Agency.

Procedures

Handling Foreign Products

Procedures for Handling Foreign (other than Canadian) Agricultural Products in Transit¹

CONTACT a CBP Agriculture Specialist (CBP AS).

¹ In transit includes products moving from Canada and passing through the United States on their way back into Canada; or passing through the United States to reach another foreign country.

Permits That May Accompany Animal Products, Organisms, and Specimens

PPQ Form 526: Application and Permit to Move Live Plant Pests or Noxious Weeds

 Purpose:
 To permit the controlled movement of plant pests into the United States.

- **Directions: 1.** See that the permit has not expired. If expired, CONTACT PPQ PERMIT SERVICES at 1-877-770-5990.
 - **2.** Make sure that conditions (if any) listed on the permit have been met (these will be listed in Section C). If any condition is unmet, CONTACT PPQ PERMIT SERVICES at 1-877-770-5990.
 - **3.** If all conditions have been met and the permit is current, RELEASE.

FIGURE A-1: PPQ Form 526—Application and Permit to Move Live Plant Pests or Noxious Weeds

VS Form 16-6: United States Veterinary Permit for Importation and Transportation of Controlled Materials and Organisms and Vectors

Purpose: To permit the importation and controlled movement of these commodities:

cultures and organisms or their derivatives which may introduce disease or disseminate any contagious or infectious disease of animals

animal derived products

Directions:

- Inspect for secure packaging. If not secure, CONTACT CBP AI.
 See that permit has not expired. If expired, CONTACT CBP AI.
 - **3.** See that the shipper and consignee are as specified on the permit. If they're not, CONTACT CBP AI.
 - **4.** See that the importation description matches the description of material on the shipping documents. If not, CONTACT CBP AI.
 - **5.** If package is secure, the permit is current, and the shipper and consignee are as specified on the permit, RELEASE.

FIGURE A-2: VS Form 16-6—United States Veterinary Permit for Importation and Transportation of Controlled Materials and Organisms and Vectors

APHIS Form 2006: United States Veterinary Biological Product Permit

Purpose:To permit the importation of veterinary diagnostics, viruses, bacteria,
toxins, and analogous products into the United States.

Directions:

- **1.** See that the permit has not expired. If expired, CONTACT CBP AI.
- **2.** See that the importation description matches the description of the material on the shipping documents. If not, CONTACT CBP AI.
- **3.** If the permit is current, and the description on the permit matches the description on the shipping documents, RELEASE.

	United States
	Department of Agriculture
UNITI	ED STATES VETERINARY BIOLOGICAL PRODUCT PERMIT
	NO.
	Tesued at Washington, D.C. on
	E Expiresi
This permit is i	ssued pursuant to the terms of the Act of Congress approved March 4, 1913 (37 Stat. 832
governing the p	reparation, sale, barter, exchange, shipment, and importation of veterinary biological product risdiction of the U.S. Department of Agriculture is concerned,
	FOUNDATION OF NENUFACTURE
is authorized to	import
prepared by	
into the United	States through the port of
Importation sha	ill be made subject to the following special conditions:
1	
This permit may	be revoked if the permittee violates or fails to comply with said Act, the regulations made
thereunder, or t	he conditions specified herein.
Date	Director, Biotechnology, Biologics, and Environmental Protection Animal and Plant Health Inspection Service

Certificates That May Accompany Meat and Animal Products (Reserved)

Certificates That May Accompany Plants and Plant Products

CFIA/ACIA Form 0108: Movement Certificate (Canadian)

- **Purpose:** A document issued by the Canadian Food Inspection Agency certifying that articles are permitted to move from quarantine areas. Since the United States and Canada have parallel regulations for the gypsy moth, this certificate is acceptable for the movement of bulk articles (like railroad crossties) and outdoor household effects from Canada into the United States.
- **Directions:** If this form declares that "the product is free from gypsy moth," then you may release bulk articles (like timber and quarry products) and outdoor household effects.

FIGURE A-4: CFIA/ACIA Form 0108—Movement Certificate (Canadian)

CFIA Form 1327: Phytosanitary Certificate (Canadian Origin)

- Purpose:A document issued by the Canadian Food Inspection Agency certifying
to the phytosanitary condition of plants and unprocessed or
unmanufactured plant products.
- **Directions:**
- **1.** Use this form to confirm Canadian origin for plants and produce.
 - **2.** Look at the "Additional Declaration" block for statements that are required for you to allow entry (like the importer holds a U.S. permit or the shipment has been treated for a particular pest).

If you detect an alteration on the phytosanitary certificate, **CONTACT CBP AS**. Look for erasures, information that was struck through and changed, and the use of white out.

FIGURE A-7: CFIA/ACIA Form 2401, E2 Certificate (Canadian)

CFIA/ACIA Form 4743: Phytosanitary Certificate (Canadian Origin)

Purpose:A document issued manually by the Canadian Food Inspection Agency
certifying to the phytosanitary condition of plants and unprocessed or
unmanufactured plant products.

Directions:

1. Use this form to confirm Canadian origin for plants and produce.

2. Look at the "Additional Declaration" block for statements that are required for you to allow entry (like the importer holds a U.S. permit or the shipment has been treated for a particular pest).

If you detect an alteration on the phytosanitary certificate, **CONTACT CBP AS**. Look for erasures, information that was struck through and changed, and the use of white out.

Forms to Use When Seizing Agricultural Products

Leaflet: Notice to Arriving Traveler

Purpose:	A leaflet that explains to the traveler why agricultural items must be seized.
Directions:	Give this leaflet to the traveler whenever you seize an article or have it returned to Canada.
Availability:	Order this leaflet from your local PPQ contact. The leaflet is available in several languages so be prepared to tell your contact what languages you need. The leaflet reproduced on the adjacent is in English and French. Feel free to photocopy this leaflet.

NOTICE TO ARRIVING TRAVELER

We regret that it is necessary to take agricultural items from your baggage. They cannot be brought into the United States because they sometimes carry plant and animal pests and diseases. Restricted items include fruits, vegetables, meats, plants, soil, and products made from plant or animal materials.

Agricultural pests and diseases are a threat to U.S. food crops and livestock. Some of these organisms are natural "polluters" capable of upsetting local ecological balances by destroying trees and other plant life. They also can affect property values by damaging lawns, ornamental plants, and (in the case of termites and other wood-eating insects) homes.

Confiscated items are carefully destroyed in special facilities of the U.S. Department of Agriculture. If you have any questions, write to: "Quarantines," U.S. Department of Agriculture, P. O. Box 96464, Washington, DC 20090-6464.

To file a complaint, write the Secretary of Agriculture, U. S. Department of Agriculture, Washington, DC 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.

Nous regrettons la necessite d'avoir a supprimer les produits agricoles de vos bagages. Ils ne peuvent pas etre introduits aux Etats-Unis parce qu'ils transportent parfois des insectes nuisibles aux plantes et aux animaux. Les articles sujets a ces restrictions comprennent fruits, legumes, viandes, plantes, terre, et produits fabriques avec des substances vegetales ou animales.

Les insectes et les maladies agricoles representent une menace pour les recoltes vivrieres, les plantes ornementales, et le cheptel des Etats-Unis. Certains de ces organismes bouleversent les balances naturelles en detruisant les arbres et autres flores. Ils peuvent aussi reduire la valeur des proprietes en endommageant les pelouses, les plantes ornementales, et meme les maisons—lorsque les termites et autres insectes detruisent le bois.

Les articles confisques sont soigneusement detruits dans des locaux speciaux du Ministere de l'agriculture des Etats-Usis. Si vous avez une question quelconque, ecrivez au bureaua "Quarantines," U.S. Department of Agriculture, P. O. Box 96464, Washington, DC 20090-6464.

Forms to Use When Seizing Agricultural Products

PPQ Form 216: Cooperators Agriculture Products Monthly Seizure Record

Purpose:	A form on which to record agricultural products seized and the number of flights boarded.
Directions:	1. Use this form to tally the number of articles seized for each of the five categories.
	2. For meats, enter the number of pounds seized.
	3. Tally your "scores" at the end of the month and send to your CBP AI contact.
Availability:	Request additional forms from your CBP AI contact.

Forms to Use When Sampling Agricultural Products

PPQ Form 237: Record of Seed Offered for Importation Under the Federal Seed Act

Purpose:A form that notifies consignees that their seed has been sampled and
forwarded to USDA for examination. The form warns the consignee
that the seed must be held intact subject to redelivery to Customs if
demanded.

Directions: 1. Complete Section 1 of this form for each lot of seed.

- **2.** Put the completed pink copy (Part 3) of the form and declaration of labeling (copy of the label and invoice) into the cloth bag.
- **3.** Secure the outer cloth bag by tying the mailing tag.
- 4. Send the sample with its completed form by **PRIORITY MAIL** to:

Seed Examination Facility PPQ-APHIS-USDA Building 580 BARC-E Beltsville, MD 20705

- **5.** Give the completed yellow copy (Part 4) of the form to the consignee or the consignee's agent.
- **6.** Mail the remaining white copies (Parts 1 and 2) of the completed form to the SEF in a separate envelope. Mail these copies the same day you send the sample—but separate from the sample.
- Availability: Request additional forms, bags, and tags from the address listed above.

Appendix B

Extracts from CBP Regulations that Pertain to Agricultural Products

General

19 CFR 145.57 Regulations of Other Agencies

Certain types of plants and plant products, food, drugs, cosmetics, hazardous or caustic and corrosive substances, viruses, serums, and various harmful articles are subject to examination and clearance by appropriate agencies before release to the addressee (see Part 12 of this chapter).

Plants and Plant Products

19 CFR 12.10 Regulations and Orders of the Department of Agriculture

The importation into the United States of plants and plant products is subject to regulations and orders of the Department of Agriculture restricting or prohibiting the importation of such plants and plant products. Customs officers and employees shall perform such functions as are necessary or proper on their part to carry out such regulations and orders of the Department of Agriculture and the provisions of law under which they are made.

19 CFR 12.11 Requirements for Entry and Release

A. The importer or his representative shall submit to the director of the port of first arrival, for each entry of plants or plant products requiring a plant quarantine permit, a notice of arrival for any type of entry except rewarehouse and informal mail entries. Such notice shall be on a form provided for the purpose by the Department of Agriculture. The director of the port of arrival shall compare the notice of arrival which he receives from the importer or his representative with the shipping documents, certify its agreement therewith, and transmit it, together with any accom panying certificates or other documents pertaining to the sanitary status of the shipment, to the Department of Agriculture. The merchandise may not be moved, stored, or otherwise disposed of until the notice of arrival has been submitted and release for the

intended purpose has been authorized by an inspector of the Animal and Plant Health Inspection Service, Plant Protection and Quarantine Programs.

B. Where plant or plant products are shipped from the port of first arrival to another port or place for inspection or other treatment by a representative of the Animal and Plant Health Inspection Service, Plant Protection and Quarantine Programs, and all Customs requirements for the release of the merchandise have been met, the merchandise shall be forwarded under a special manifest (Customs Form 7512) and in-bond labels or Customs seals to the representative of the Animal and Plant Health Inspection Service, Plant Protection and Quarantine Programs at the place at which the inspection or other treatment is to take place. No further release by the port director shall be required.

[28 FR 14710, Dec. 31, 1963, as amended by T.D. 78-99, 43 FR 13060, Mar. 29, 1978]

19 CFR 12.12 Release Under Bond

Plants or plant products which require fumigation, disinfection, sterilization, or other treatment as a condition of entry may be released to the permittee for treatment at a plant approved by the Department of Agriculture upon the giving of a bond on Customs Form 301, containing the bond conditions set forth in §113.62 of this chapter to insure that the merchandise is treated under the supervision and to the satisfaction of an inspector of the Department of Agriculture or returned to Customs custody when demanded by the port director.

[28 FR 14710, Dec. 31, 1963, as amended by T.D. 84-213, 49 FR 41167, Oct. 19, 1984]

19 CFR 12.13 Unclaimed Shipments

- **A.** If plants or plant products enterable into the United States under the rules and regulations promulgated by the Secretary of Agriculture are unclaimed, they may be sold subject to the provisions of Subparts C and D of Part 127 of this chapter to any person to whom a permit has been issued who can comply with the requirements of the regulations governing the material involved.
- **B.** Unclaimed plants and plant products not complying with the requirements mentioned in this section shall be destroyed, by burning or otherwise, under Customs supervision.

[28 FR 14710, Dec. 31, 1963, as amended by T.D. 74-114, 39 FR 12091, Apr. 3, 1974]

19 CFR 12.14 Detention

- **A.** Port directors shall refuse release of all plants or plant products with respect to which a notice of prohibition has been promulgated by the Secretary of Agriculture under any of the various quarantines. If an importer refuses to export a prohibited shipment immediately, the port director shall report the facts to the U.S. Department of Agriculture, Animal and Plant Health Inspection Service, Plant Protection and Quarantine Programs and the United States attorney and withhold delivery pending advice from that Department.
- **B.** In case of doubt as to whether any plant or plant product is prohibited, the port director shall detain it pending advice from the Department of Agriculture.

[28 FR 14710, Dec. 31, 1963, as amended by T.D. 78-99, 43 FR 13060, Mar. 29, 1978]

19 CFR 12.15 Disposition; Refund of Duty

Plants or plant products which are prohibited admission into the United States under Federal law or regulations and are exported or destroyed under proper supervision are exempt from duty and any duties collected thereon shall be refunded. (See 158.41 and 158.45(c) of this chapter.)

[28 FR 14710, Dec. 31, 1963, as amended by T.D. 72-258, 37 FR 20174, Sept. 17, 1972]

19 CFR 18.21 Restricted and Prohibited Merchandise

A. Merchandise subject upon importation to examination, disinfection, or further treatment under quarantines and Quarantine Division, Agricultural Research Service, Department of Agriculture, shall be released for transportation or exportation only upon written permission of, or under regulations issued by, that Bureau. (See §12.10 to §12.15 of this chapter.)

19 CFR 18.23 Change of Destination; Change of Entry

A. The foreign destination of such merchandise may be changed by the parties in interest upon notice to the district director at the port of exit from the United States. The district director at the port of exit, in his discretion, may report the application for a change of foreign destination to the district director at the port of entry. **B.** Such merchandise may be entered for consumption or warehouse or under any other form of entry. If the merchandise is subject on importation to quarantine and regulations administered by the Bureau of Entomology and Plant Quarantine, it shall be entered for consumption or warehouse only upon written permission of, or under regulations issued by, that Bureau. (See §12.10 to §12.15 of this chapter.)

Animals and Animal Products

19 CFR 12.24 Regulations of the Department of Agriculture

A. The importation into the United States of domestic animals, animal products, and animal feeding materials is subject to inspection and quarantine regulations of the Department of Agriculture, Customs officers and employees are authorized and directed to perform such functions as are necessary or proper on their part to carry out such regulations of the Department of Agriculture.

Meat and Meat-Food Products

19 CFR 12.8 Inspection; bond; release

A. All imported meat, meat-food products¹ horse meat and horse meat-food products offered for entry into the United States are subject to the regulations prescribed by the Secretary of Agriculture under section 306, Tariff Act of 1930. Such meat, meat-food products, horse meat and horse meat-food products shall not be released from Customs custody prior to inspection by an inspector of the Animal and Plant Health Inspection Service, except when authority is given by such inspector for inspection at the importer's premises or other place not under Customs supervision.

¹ The term "meat and meat-food products," for the purpose of this section, shall include any imported article of food or any imported article which enters or may enter into the composition of food for human consumption, which is derived or prepared in whole or in part from any portion of the carcass of any cattle, sheep, swine, or goat, is such portion is all or a considerable and definite portion of the article.

Bees, Insects, Earthworms, and Like Organisms

19 CFR 12.17 Importation Restricted

The importation into the United States of viruses, serums, toxins, and analogous products for use in the treatment of domestic animals is prohibited unless the importer holds a permit from the Department of Agriculture covering the specific product. The port director shall notify the Animal and Plant Health Inspection Service, Veterinary Services, Washington, DC, of the arrival of any such product, and detain it until he shall receive notice from that Department that a permit to import the shipment has been issued.

[28 FR 14710, Dec. 31, 1963, as amended by T.D. 78-99, 43 FR 13060, Mar. 29, 1978; T.D. 82-145, 47 FR 35476, Aug. 16, 1982]

19 CFR 12.18 Labels

Each separate container of such virus, serum, toxin, or analogous product imported is required by the regulations of the Department of Agriculture to bear the true name of the product and the permit number assigned by the Department of Agriculture in the following form: "U.S. Veterinary Permit No. -----," or an abbreviation thereof authorized by the Animal and Plant Health Inspection Service. Each separate container also shall bear a serial number affixed by the manufacturer for identification of the product with the records of preparation thereof, together with a return date.

[28 FR 14710, Dec. 31, 1963, as amended by T.D. 78-99, 43 FR 13060. Mar. 29, 1978]

19 CFR 12.19 Detention; Samples

- **A.** The port director shall detain all shipments of such products for which no permit to import has been issued pending instructions from the Department of Agriculture.
- **B.** Samples shall be furnished to the Department of Agriculture upon its request, and the port director shall immediately notify the consignee of any such request.

19 CFR 12.20 Disposition

Viruses, serums, or toxins rejected by the Department of Agriculture shall be released by the port director to that Department for destruction, or exported under Customs supervision at the expense of the importer if exportation is authorized by the Department of Agriculture.

19 CFR 12.31 Plant Pests

The importation in a live state of insects which are injurious to cultivated crops, including vegetables, field crops, bush fruits, and orchard, forest or shade trees, and of the eggs, pupae, or larvae of such insects, except for scientific purposes under regulations prescribed by the Secretary of Agriculture, is prohibited.² All packages containing live insects or their eggs, pupae, or larvae arriving from abroad, unless accompanied by a permit issued by the Department of Agriculture, shall be detained and submitted to the U.S. Department of Agriculture, Animal and Plant Health Inspection Service, Plant Protection and Quarantine Programs of that Department for inspection and determination of their admissibility into the United States.

[28 FR 14710. Dec. 31, 1963, as amended by T.D. 78-99, 43 FR 13060, Mar. 29, 1978; T.D. 82-145, 47 FR 35476, Aug. 16, 1982]

19 CFR 12.32 Honeybees and Honeybee Semen

A. Honeybees from any country may be imported into the U.S. by the Department of Agriculture for experimental or scientific purposes. All other importations of honeybees are prohibited except those from a country which the Secretary of Agriculture has determine to be free of diseases dangerous to honeybees.

(c) As used in this chapter, except where the context otherwise requires.

^{2 (}a) No person shall knowingly move any plant pest from a foreign country into or through the United States, or interstate, or knowingly accept delivery of any plant pest moving from any foreign country into or through the United States, or interstate, unless such movement is authorized under general or specific permit from the Secretary and is made in accordance with such conditions as the Secretary may prescribe in the permit and in such regulations as he may promulgate under this section to prevent the dissemination into the United States, or interstate, of plant pests. (7 U.S.C. I50bb(a)).

⁽b) The Secretary may refuse to issue a permit for the movement of any plant pest when, in his opinion, such movement would involve a danger of dissemination of such pests. The Secretary may permit the movement of host materials otherwise barred under the Plant Quarantine Act when they must necessarily accompany the plant pest to be moved. (7 U.S.C. I50bb(b)).

[&]quot;Plant pest" means any living stage of: Any insects, mites, nematodes, slugs, snails, protozoa, or other invertebrate animals, bacteria, fungi, other parasitic plants or reproductive parts thereof, viruses, or any organisms similar to or allied with any of the foregoing, or any infectious substances, which can directly or indirectly injure or cause disease or damage in any plants or parts thereof, or any processed, manufactured, or other products or plants. (7 U.S.C. 150aa).

Directory of CBP Contacts Along the Canadian Border

Introduction

Do not give cell phone numbers to brokers and the public; they end up distributed across the country. Forward Phytosanitary Certificates, copy invoices and other documents to the address listed for your state, unless other arrangements are made by your local CBP office.

If you have checked the manual and local policy and still need a decision, please call Blaine, WA or Buffalo, NY during the hours listed. Otherwise, don't let the article in question enter. As soon as we have a 24-hour border information number it will be listed here.

Gypsy Moth Infested Areas in the United States

Connecticut

The entire State.

Delaware The entire State.

District of Columbia

The entire district.

Illinois

Lake county.

Indiana

The counties of Allen, DeKalb, Elkhart, La Grange, Noble, Porter, St. Joseph, and Steuben.

Maine

Androscoggin County: the entire county; Aroostook County: the towns of Amity, Cary Plantation, Dyer Brook, Haynesville, Hodgdon, Linneus, Oakfield, Forkstown, the townships of Bancroft, Benedicta, Crystal, Glenwood Plantation, Houlton, Island Falls, Macwahoc Plantation, Molunkus, New Limerick, North Yarmouth Academy Grant, Orient, Reed Plantation, Sherman, Silver Ridge, Upper Molunkus, Weston, 1 R5 WELS, T2 R4 WELS, T3 R3 WELS, T3 R4 WELS, T4 R3 WELS, and TA R2 WELS; Cumberland County: the entire county; Franklin County: the town of Eustis, the townships of Avon, Carthage, Chesterville, Coplin Plantation, Crockertown, Dallas Plantation, Davis, Lang, Farmington, Freeman, Industry, Jay, Jerusalem, Kingfield, Madrid, Mount Abraham, New Sharon, New Vineyard, Perkins, Phillips, Rangeley, Rangeley Plantation, Redington, Salem, Sandy River Plantation, Strong, Temple, Washington, Weld, Wilton, Wyman, 6, D and E; Hancock County: the entire county; Kennebec County: the entire county; Knox County: the entire county; Lincoln County: the entire county; Oxford County: the townships of Adamstown, Albany, Andover, Andover North, Andover West, Batchelders Grant, Bethel, Brownfield, Buckfield, Byron, Canton, Denmark, Dixfield, Fryeburg, Gilead, Grafton, Greenwood, Hanover, Hartford, Hebron, Hiram, Lincoln Plantation, Lovell, Lower Cupsuptic, Magalloway Plantation, Mason Plantation, Mexico, Milton Plantation, Newry, Norway, Oxford, Paris, Parkerstown, Peru, Porter, Richardsontown, Riley, Roxbury, Rumford, Stoneham, Stow, Sumner, Sweden, Upton, Waterford, Woodstock, C, and C Surplus; Penobscot County: the town of Patten, the townships of Alton, Argyle, Bangor City, Bradford, Bradley, Brewer City, Burlington, Carmel, Carroll Plantation, Charleston, Chester, Clifton, Corinna, Corinth, Dexter, Dixmont, Drew Plantation, E. Millinocket, Eddington, Edinburg, Enfield, Etna, Exeter, Garland, Glenburn, Grand Falls Plantation, Greenbush, Greenfield, Grindstone, Hampden, Hermon, Hersey Town, Holden, Hopkins Academy Grant, Howland, Hudson, Indian Purchase, Kenduskeag, Kingman, Lagrange, Lakeville, Lee, Levant, Lincoln, Long A, Lowell, Mattamiscontis, Mattawamkeag, Maxfield, Medway, Milford, Millinocket, Newburgh, Newport, Old Town City, Orono, Orrington, Passadumkeag, Plymouth, Prentiss Plantation, Seboesis Plantation, Soldiertown, Springfield, Stacyville, Stetson, Summit, Veazie, Webster Plantation, Winn, Woodville, AR 7, AR 8, AR 9, 1 ND, 3 R1 NBPP, 1 R6 WELS, 1 R8 WELS, 2 R8 NWP, 2 R9 NWP, 3 R9 NWP, 5 R1 NBPP, and 2 R8 WELS; Piscataguis County: the town of Greenville. the townships of Abbott, Atkinson, Barnard, Blanchard Plantation, Bowerbank, Brownville, Dover-Foxcroft, Elliotsville, Guilford, Katahdin Iron Works, Kingsbury Plantation, Lakeview Plantation, Medford, Milo, Monson, Orneville, Parkman, Sangerville, Sebec, Shirley, Veazie Gore, Williamsburg, Willimantic, Willington, 1 R9, 2 R9 WELS, 4 R9 NWP, 5 R9 NWP, T7R9 NWP, T8R11 WELS, T8R10 WELS, TAR11 WELS, TAR 10 WELS, T1R11 WELS, T1R10 WELS, and T2R10 WELS; Sagadahoc County: the entire county; Somerset County: the townships of Anson, Athens, Bald Mountain, Bingham, Bowtown, Brighton Plantation, Cambridge, Canaan, Caratunk, Carrying Place, Carrying Place Town, Concord Plantation, Cornville, Dead River, Detroit, East Moxie, Embden, Fairfield, Harmony, Hartland, Highland Plantation, Lexington Plantation, Madison, Mayfield, Mercer, Moscow, Moxie Gore, New Portland, Norridgewock, Palmyra, Pierce Pond, Pittsfield, Pleasant Ridge Plantation, Ripley, Skowhegan, Smithfield, Solon, St. Albans, Starks, The Forks Plantation, West Forks Plantation, and T3 R4 BKP WKR; Waldo County: the entire county; Washington County: the entire county; York County: the entire county.

Maryland

The entire State.

Massachusetts

The entire State.

Michigan

The entire State.

New Hampshire

The entire State.

New Jersey The entire State.

New York The entire State.

North Carolina

Currituck County: the entire county; *Dare County:* the area bounded by a line beginning at the intersection of State Road 1208 and Roanoke Sound; then easterly along this road to its junction with State Road 1206; then southerly along this road to its intersection with U.S. Highway Business 158; then easterly along an imaginary line to its intersection with the Atlantic Ocean; then northwesterly along the coastline to its intersection with the Dare-Currituck County line; then westerly along this county line to its intersection with the Currituck Sound; then southeasterly along this sound to the point of beginning.

Ohio

The counties of Ashland, Ashtabula, Belmont, Carroll, Columbiana, Coshocton, Cuyahoga, Defiance, Delaware, Erie, Fairfield, Franklin, Fulton, Geauga, Guernsey, Harrison, Henry, Hocking, Holmes, Huron, Jefferson, Knox, Lake, Licking, Lorain, Lucas, Mahoning, Medina, Monroe, Morgan, Morrow, Muskingum, Noble, Ottawa, Perry, Portage, Richland, Sandusky, Seneca, Stark, Summit, Trumbull, Tuscarawas, Washington, Wayne, Williams, and Wood.

Pennsylvania

The entire State.

Rhode Island

The entire State.

Vermont

The entire State.

Virginia

The counties of Accomack, Albemarie, Allegheny, Amelia, Amherst, Appomatox, Arlington, Augusta, Bath, Bedford, Botetourt, Brunswick, Buckingham, Campbell, Caroline, Charles City, Charlotte, Chesterfield, Clarke, Craig, Culpeper, Cumberland, Dinwiddie, Essex, Fairfax, Fauquier, Floyd, Fluvanna, Franklin, Frederick, Giles, Gloucester, Goochland, Greene, Greensville, Halifax, Hanover, Henrico, Highland, Isle of Wight, James City, King and Queen, King George, King William, Lancaster, Loudon, Louisa, Ludenburg, Madison, Mathews, Mecklenburg, Middlesex, Nelson, New Kent, Northampton, Northumberland, Nottoway, Orange, Page, Pittsylvania, Powhatan, Prince Edward, Prince George, Prince William, Rappahannock, Richmond, Roanoke, Rockbridge, Rockingham, Shenandoah, Southampton, Spotsylvania, Stafford, Surry, Sussex, Warren, Westmoreland, and York.

The cities of Alexandria, Bedford, Buena Vista, Charlottesville, Chesapeake, Columial Heights, Danville, Emporia, Fairfax, Falls Church, Franklin, Fredericksburg, Hampton, Harrisonburg, Hopewell, Lexington, Lynchburg, Manassas, Manassas Park, Newport News, Norfolk, Petersburg, Poquoson, Portsmouth, Richmond, Roanoke, Salem, South Boston, Staunton, Suffolk, Virginia Beach, Waynesboro, Williamsburg, and Winchester.

West Virginia

The counties of Barbour, Berkely, Braxton, Brooke, Calhoun, Doddridge, Fayette, Gilmer, Grant, Greenbrier, Hampshire, Hancock, Hardy, Harrison, Jackson, Jefferson, Lewis, Marion, Marshall, Mineral, Monongalia, Monroe, Morgan, Nicholas, Ohio, Pendleton, Pleasants, Pocahontas, Preston, Randolph, Richie, Taylor, Tucker, Tyler, Upshur, Webster, Wetzel, Wirt, and Wood.

Wisconsin

The counties of Adams, Brown, Calumet, Columbia, Dane, Dodge, Door, Florence, Fond du Lac, Forest, Green Lake, Jefferson, Juneau, Kenosha, Kewaunee, Langlade, Lincoln, Manitowoc, Marathon, Marinette, Menominee, Milwaukee, Oconto, Oneida, Outagamie, Ozaukee, Portage, Racine, Rock, Sauk, Shawano, Sheboygan, Vilas, Walworth, Washington, Waukesha, Waupaca, Waushara, Winnebago, and Wood.

Gypsy Moth Infested Areas in Canada

New Brunswick

The entire counties of Albert, Carleton, Charlotte, Kings, Queens, Saint John, Sunbury, York, and Westmorland.

Kent County: The Municipality of Bouctouche.

Northumberland County: Miramichi City.

Nova Scotia

The entire counties of Annapolis, Colchester, Cumberland, Digby, Halifax, Hants, Kings, Lunenburg, Queens, Shelburne, and Yarmouth.

Ontario

The entire counties of Brant, Bruce, Dufferin, Elgin, Essex, Frontenac, Grey, Haliburton, Hastings, Huron, Lambton, Lanark, Leeds-Grenville, Lennox-Addington, Middlesex, Muskoka, Northumberland, Oxford, Parry Sound, Perth, Peterborough, Prescott-Russell, Prince Edward, Renfrew, Simcoe, Stormont-Dundas-Glengarry, Victoria, Wellington, and York.

The entire Municipality of Chatham-Kent.

The entire Regional Municipalities of Durham, Haldimand-Norfolk, Halton, Hamilton-Wentworth, Niagara, Ottawa-Carleton, Peel, and Waterloo.

Algoma District: All areas south of Highway 17 east of and including the city of Sault Ste. Marie, plus the entire geographic townships of: Denis; Prince; Parke; Korah; Tarentorus; Garden River First Nation; MacDonald; Laird; Tarbutt; Tarbutt Additional; Johnson; Plummer Aditional; Lefroy; Thessalon; Bright Additional; Bright; Thompson; Cobden; Striker; Long; Spragge; Lewis; Shedden; Indian Reserve #7.

Manitoulin District: All areas of St. Joseph Island, Cockburn Island, Manitoulin Island and Great Cloche Island, plus all Indian Reservations.

Nipissing District: All areas south of the Ottawa and Mattawa rivers up to and including the City of North Bay. All areas south of highway 17 west of the city of North Bay.

Sudbury District: All areas south of Highway 17 plus the city of Sudbury and the entire geographic townships of: Victoria; Salter; May; Hallam; Shakespeare; Dunlop; Porter; Baldwin; Nairn; Hymen; Lorne; Louise; Graham; Waters; McKim; Neelon; Dryden; Indian Reserves #4, #5 and #6.

Prince Edward Island

Queens County: The Municipality of Charlottetown.

Quebec

The entire regions of Acton, Argenteuil, Arthabaska, Asbestos, Beauce-Sartigan, Beauharnois-Salaberry, Bécancour, Bellechasse, Brome-Missisquoi, Champlain, Coaticook, Communauté Urbaine de L'Outaouais, Communauté Urbaine de Montréal, Communauté Urbaine de Québec, D'autray, Desjardins, Deux Montagnes, Drummond, Francheville, Joliette, La Haute-Yamaska, La Nouvelle-Beauce, La Rivière du Nord, La Vallée-du-Richelieu, Lajemmerais, L'amiante, L'assomption, Laval, Le Bas Richelieu, Le Granit, Le Haut Richelieu, Le Haut-Saint-François, Le Haut Saint-Laurent, Le Val-Saint-François, L'Érable, Les Chutes de la Chaudière, Les Collines-de-L'Outaouais, Les Etchemins, Les Jardins de Napierville, Les Laurentides, Les Maskoutains, Les Moulins, Les Pays d'en Haut, L'ile d'Orléans, L'Islet, Lotbinière, Memphrémagog, Mirabel, Montcalm, Montmagny, Nicolet-Yamaska, Papineau, Robert-Cliche, Roussillon, Rouville, La-Région-Sherbrookoise, Thérèse de Blainville, and Vaudreuil-Soulanges.

Municipalities of the following regions:

Antoine-Labelle: Notre-Dame-du-Laus, Notre-Dame-de-Pontmain, Lac-du-Cerf, Saint-Aimé-du-lac-des-Iles, Kiamika, Lac-Nominingue, L'Annonciation, Marchand, La Macaza, L'Ascension, Sainte-Véronique, Lac-Saguay, Chute-Saint-Philippe, Val-Barrette, Lac-des-Écorces, Beaux-Rivages, Mont-Laurier, Des Ruisseaux, Ferme-Neuve M, Lac-Saint-Paul, Mont-Saint-Michel, Sainte-Anne-du-Lac, Lac-Ernest.

Kamouraska: Mont-Carmel.

The entire counties of Brant, Bruce, Chatham-Kent, Dufferin, Elgin, Essex, Frontenac, Grey, Haldimand, Haliburton, Hastings, Huron, Kawartha Lakes, Lambton, Lennox-Addington, Middlesex, Muskoka, Norfolk, Northumberland, Oxford, Parry Sound, Perth, Peterborough, Prince Edward, Simcoe, Victoria, Wellington, and York.

The entire regional municipalities of Durham, Haldimand-Norfolk, Halton, Hamilton-Wentworth, Niagara, Peel, and Waterloo.

The entire metropolitan Toronto area.

The Geographical Townships of *Bridgeland, Montgomery, Parkinson, Patton, Rose,* and *Wells* in Algoma District.

The Geographical Township of *Nairn* in Sudbury District.

The Town of Blind River in Algoma District.

The Township of Huron Shores in Algoma District.

Quebec

The entire regions of Acton, Arbestos, Argenteuil, Arthabaska, Autray, Beauce-Sartigan, Brome-Missisquoi, Coaticook, Collinesde l'Outaouais, Des Laurentides, Drummond, L'Amiante, La Haute-Yamaska, Lajemmerais, La-Région-Sherbrookoise, Le-Granit, Le Haut St-Laurent, Le-Haut-Saint-François, Les Chutes de la Chaudière, Les Etchemins, Les Maskoutains, Les Nouvelles Beauce, Le-Val-Saint-François, Memphrémagog, Nicolet-Yamaska, Pontiac, and Robert-Cliche.

The municipality of Sorel in the region of Le-Bas-Richelieu.

Appendix H

Protocol for Inspection of Coated or Pelleted Seed, Seed Tape, Seed Mats or Seed Embedded in Any Other Substrate that Obscures Visibility

Introduction

This protocol is for the importation of commercial shipments of the articles listed above, except for Canadian origin seed (see 7CFR 361). Currently, the listed articles are not enterable because the seed can not be properly inspected. Under this protocol, authorized officials in the exporting country will draw official seed samples from lots of seed before processing in the country of origin. The unprocessed samples will accompany the shipment of processed seed, and will be presented for inspection by Customs and Border Protection-Agriculture Inspection (CBP-AI) at the port of entry. If the samples are free of quarantine significant species¹, plant pests, soil and Federal noxious weeds, CBP-AI will release the shipment. If CBP-AI inspectors find quarantine significant species, plant pests, soil, or Federal noxious weeds in the sample, they will refuse entry to the shipment.

Procedure

Importers wishing to participate in this program must comply with the following protocol:

- Only seed which is allowed entry to the United States without treatment or other restrictions may be considered under this program.
- Each shipment must be accompanied by a phytosanitary certificate issued by an authorized official of the foreign government of origin.
- An authorized official of the foreign government must sample each lot of seed before the seed is processed. Sampling methods must comply with the International Seed Testing Association (ISTA) requirements, which satisfy Federal Seed Act (FSA) procedures. The sample must be sealed or verified as sealed by

¹ A quarantine significant species is one regulated because it is a pathway for a plant pest that is difficult to detect. For example, corn and corn relative seeds are prohibited from certain countries because they may be associated with certain injurious insects and diseases.

the sampler and identified with the marks of the lot(s) sampled. Sealed means the container in which the seed is held is closed in such a way that it cannot be opened to gain access to the seed and closed again without either destroying the seal or leaving evidence of tampering.

- The sealed sample(s) must accompany the seed shipment in a package clearly marked for CPB-AI inspection and placed in a conspicuous location, such as the doors of the shipping container.
- The shipment must be accompanied by an importer document (such as an ISTA certificate) declaring the sample was taken by a government authorized official and the method of sampling complies with ISTA requirements. The seal number or other distinguishing marks of the sample must be on the documentation.
- CBP-AI inspectors will inspect the sample at the port of entry using the same inspection procedures, less sampling, currently used for imported seed shipments. CBP-AI inspectors will examine the sample for soil, Federal noxious weeds, quarantine significant species and plant pests. If they find quarantine significant species, Federal noxious weeds, plant pests, or soil beyond tolerance in the sample, they will refuse entry to the shipment. The inspectors will take a small (10-25 seeds) sample of processed seed, remove the covering (coating, tape, etc.), and compare the seed to the uncoated sample. The sample must match the shipment, same type and size of seed. If the inspectors detect obvious differences, they will refuse entry to the shipment. If the small coated sample matches the uncoated sample, and the samples are free of plant pests, soil, quarantine-significant species and Federal noxious weeds, the shipment will be released.

Importers interested in participating in this program should submit a permit application (PPQ form 587) including the name of the exporting country's plant protection organization and the individual who will sample the seed. Send the request to USDA, APHIS, PPQ, Permit Unit, 4700 River Road Unit 133, Riverdale, Maryland 20737.
