

Residence in Cane Valley – Most men in this community worked at local Uranium mines and have passed away, leaving a community with no men. The reclamation next to this residence was previously a radioactive waste pile.

Cove-3 Reclamation Project after reclamation. Prior to reclamation this was a very steep and treacherous area.

Monument Valley-4 Project, Rock Door Mine: Poly Urathane Foam Portal Closure. This Portal is several hundred feet high. Monument Valley is directly east of this vertical rock face. Workers were tied to safety ropes, for safety, while completing this closure.

Monument Valley-4 Project: Reclamation berm to control drainage leaving reclaimed area. Monument Valley Scenic Park is in the background which surrounds the project to the north.

Shima Mine: Excavator performing backfill closure of uranium portal.

EY-2002, Summer Interns with the Navajo AML Program

Natural Bridge provided a narrow access road to Sweetwater-2 AML Reclamation Project.  
Note trucks in the background for scale.
