

PHYSICAL ENVIRONMENT

**Physical Environment
\$1.657 Billion**

Organization of the Pie Chart: The following agencies were combined to make the pie chart more readable.

Roads: Roads and Stormwater Decant

Parks & Recreation: Parks & Recreation, Youth Sports Facilities Grants, Expansion Levy

Solid Waste & Closure: DNR Admin., Solid Waste, Post-Closure Landfill Maintenance, DNR GIS Management.

Development: Development & Environmental Services and Tiger Mountain Lawsuit

Water Management: Intercounty River Improvement, River Improvement, Water & Land Resources (SWM), Wastewater Treatment, Noxious Weeds, Rural Drainage, and Flood Control Zone.

Fleet Administration: Motor Pool Equip Rental, Equipment Repair & Replacement, Transit Non-Revenue Vehicles, and Water Pollution Control Equipment.

Transit: Transit, DOT Administration, and Marine Division

Includes 2008/2009 Biennial Budget for Transit, DOT Administration and Transit Non-Revenue Vehicles.

Due to rounding, figures may not add to 100%.

Source: Program Plan Summary Page (Found at the end of the section).

PHYSICAL ENVIRONMENT PROGRAM PLAN

P R O G R A M E X P L A N A T I O N S

I N T R O D U C T I O N

The Physical Environment Program supports all services related to building and land use permitting, community and regional parks, various recreational programs, solid waste disposal, surface water management, wastewater treatment, roads and transit operations. These services are delivered by three County departments:

- Department of Development and Environmental Services (DDES),
- Department of Natural Resources and Parks (DNRP), and
- Department of Transportation (DOT).

These departments are supported by dedicated funding sources and, through the application of prudent financial management, provide services that enhance the quality of life and economic vitality of the Puget Sound region.

The Department of Development and Environmental Services (DDES): The core business of the Department of Development of Environmental Services (DDES) is the regulation and permitting of all building and land development activity in unincorporated King County. DDES regulates those areas of the county in transition from urban unincorporated to cities and those zoned to remain rural unincorporated. Contracts are occasionally entered into with cities to provide minor permitting services and this practice will continue in 2008.

Due to regular fluctuations in the economy, the Department's business model approach requires a regular adjustment of staffing, business practices, and customer service levels. The 2008 activity forecast for the building and land development industry, as developed by DDES in consultation with industry representatives, calls for a tapering off of business levels in 2008. The department will continue to take advantage of efficiency opportunities in the processing of permits and shift resources appropriately.

The Department of Natural Resources and Parks (DNRP) serves as the steward of the region's environment. DNRP protects the region's water and land and natural habitats by ensuring the safe disposing of and reusing wastewater and solid waste, and providing natural areas, parks, regional trails and recreation programs. It provides these services through six divisions: DNRP Administration, GIS Center, Wastewater Treatment Division, Water and Land Resources Division, Solid Waste Division, and the Parks and Recreation Division. The 2008 Executive Proposed Budget for the DNRP divisions highlights the County's commitment to provide efficient and effective services to the community. The highlights of the 2008 Executive Proposed Budget for DNRP are as follows:

- **DNRP Administration:** The 2008 Executive Proposed Budget for DNRP Administration proposes funding to continue to allow DNRP Administration to provide Department-wide leadership in support of the county's environmental and rural initiatives. The budget includes the creation of a Rural Services Manager to support the Executive's Rural Services Initiative. The Rural Services Initiative is designed to improve service to the county's rural residents through enhanced interdepartmental cooperation. The Rural Services Initiative will include a new Rural Services Manager housed in the Department of Natural Resources and Parks Administration, a team of geographically based Community Liaisons who will be selected from among existing FTEs working in the rural areas, and the creation of a new interagency Rural Planning Team.

PHYSICAL ENVIRONMENT PROGRAM PLAN

- **King County Geographic Information System (KCGIS) Center:** The KCGIS Center, organized as a separate internal service fund, provides all county users with a single point of accountability for equitable access to consistent and accurate GIS data and products. It also provides efficient GIS database management, and works to develop a regional GIS system. In addition to working on countywide GIS functions, the KCGIS Center provides matrix staff support to six divisions, and on demand GIS consulting and project services on a cost-reimbursable basis to county business units and to external agencies, businesses, and citizens.
- **Parks and Recreation Division:** The Parks and Recreation Division administer a system of regional parks, regional trails, and recreational facilities. The division will continue to administer existing local parks in unincorporated King County where the county is the only local service provider. Consistent with the division's business plan, the division also administers a limited number of facilities in the unincorporated urban growth area, until such time as these facilities are transferred to cities in the county.

In the 2008 Proposed Budget, the division is funded primarily by the recently approved 6-year Parks Levy, which will provide funding for operations and maintenance of King County parks commencing in 2008 and through 2013. The remaining funding for the Parks Division (approximately \$10.5 million) comes from various business revenues such as user fees and entrepreneurial efforts, Real Estate Excise Tax (REET) funding for Capital Improvement Program (CIP) planning and a CX Fund transfer of approximately \$3.3 million, which supports the remaining Parks facilities and programs located in the urban growth areas of the county. Included in the 2008 Executive Proposed budget and consistent with the requirements of the levy, are the resources to achieve maintenance levels for parks, consistent with those in place prior to 2002. The 2008 Executive Proposed Budget request also includes the transfer of management and stewardship responsibility for open space and natural lands from the Water and Lands Resource Division (WLR) to the Parks Division. As a result of voter approval of the Parks Expansion Levy in August 2007, a new fund will be created to collect levy proceeds.

- **Solid Waste Division (SWD):** SWD protects public health by administering the safe transfer and disposal of solid waste through a regional system of transfer stations and a regional landfill. The division's financing is generated through disposal fees. On July 9, 2007, the King County Council adopted an increase in the Tipping Fee from \$82.50 to \$95.00 per ton, effective January 1, 2008, to ensure the financial stability of the division.
- **Wastewater Treatment Division (WTD):** WTD improves water quality and protects public health by transporting and treating sewage and safely disposing of biosolids. The division's financing is generated through a regional sewer rate collected from the component sewer agencies and a capacity charge on new sewer hook-ups. King County adopted a 2008 monthly sewer rate of \$27.95 and reflects no change from the 2007 rate. The capacity charge will increase from \$42.00 in 2007 to \$46.25 in 2008. In 2008, \$17.65 million will be used from the rate stabilization reserve, leaving a reserve balance of \$6.4 million. The 2008 sewer rate and capacity charge were set to generate operating revenue sufficient to meet the minimum required debt service coverage ratios under WTD's adopted financial policies.
- **Water and Land Resources Division (WLR):** WLR improves water quality and protects the environment by administering the surface water drainage utility for unincorporated King County, regional flood control programs and facilities, and a variety of stewardship programs to protect watersheds, and rural and resource lands. Financing for the division is provided from a variety of sources, including a drainage fee in the unincorporated area, noxious weed assessment, interfund transfers from the Wastewater Treatment Division and the Local Hazardous Waste program, a Flood Control Zone District (FCZD) levy, contract payments from cities, and grants. The 2008 Executive Proposed Budget implements the King County Flood Control Zone District (FCZD)

PHYSICAL ENVIRONMENT PROGRAM PLAN

Advisory Committee's recommended work plan based on a recommended a property tax of 10 cents per \$1,000 of assessed valuation. The King County Council created the FCZD in April 2007 (Ordinance 15728) and its work plan, budget, and levy rate are subject to approval by the FCZD Board of Supervisors.

The Department of Transportation (DOT) is comprised of several divisions that provide services related to public transportation, community outreach on transportation issues, road construction and maintenance, regional aviation, and fleet management. The 2008 Executive Proposed Budget for DOT divisions highlights King County's commitment to providing efficient and effective services to the community through sound financial management practices. The highlights of the 2008 Executive Proposed Budget for DOT are as follows:

- **DOT Director's Office** provides leadership, advocacy, and support for divisions in the department. The Director's staff maintains good relations with DOT's customers and the community through inter-governmental, community, and media relations; transit-oriented development projects; and transportation planning.
- **The Transit Division** provides and coordinates countywide bus service, manages vanpool and rideshare systems, and provides paratransit services for elderly and disabled riders. Transit also works with Sound Transit to integrate and prepare for implementation of rail and bus services. The Transit Division budget is submitted as a biennial budget for the 2008/2009 timeframe. The 2008/2009 Executive Proposed Budget for Transit reflects assumptions for a substantial increase of over 113,000 annualized hours of bus service. The 2008/2009 Executive Proposed Budget also assumes increases in the cost of diesel fuel and gasoline.

Because revenues have not kept pace with inflation, especially costs associated with fuel and employees, the 2008 Executive Proposed Budget includes a fare increase for all categories of Transit riders. The fare increase will help preserve current service levels and help meet the need for increased scheduled maintenance hours to ensure continued high quality customer service

- **The Road Services Division** strives to increase mobility through arterial networks, bridge rehabilitation, and corridor system improvements, while ensuring the preservation of the existing transportation system. The 2008 Executive Proposed Budget for the Road Services Division focuses on improving safety on the roadways for travelers and division employees, as well as supporting the division's proactive and comprehensive approach to climate change. The 2008 Executive Proposed Budget also invests resources to allow the Road Services Division to comply with new federal permit requirements for increased water quality monitoring and reporting.
- **The King County International Airport (KCIA)** supports the economic vitality of the county, the National Air Transportation System, and provides safe and continuous general aviation airport services. The 2008 Executive Proposed Budget for the King County International Airport (KCIA) assumes that operations in 2008 will remain essentially the same as in 2007. The budget does not include any redevelopment proposals or major changes in operating structure. The 2008 Executive Proposed Budget emphasizes infrastructure management, maintenance of airport systems, and improved service. KCIA proposes an increase to airport use fees, including a landing fee increase of \$0.50 per 1,000 pounds of gross landed weight and a monthly tie-down fee increase of \$5.00.
- **Fleet Administration Division** manages the County's non-revenue vehicles in the Motor Pool Fund, the Wastewater Equipment Rental and Revolving Fund, and the Public Works Equipment Rental and Revolving Fund.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Investment in Information Technology Capital Projects: The 2008 Executive Proposed Budget for the Physical Environment Program includes two Information Technology Capital Projects, totaling \$600,434, that are not part of the normal Capital Improvement Program.

Physical Environment Information Technology Capital Projects

Agency	Project Name	2008 Executive Proposed	Existing Project
TECHNOLOGY			
DDES	Permit Integration	\$ 398,544	
DNRP	Replacement of R:Base for DOS Program	\$ 201,890	
TOTALS			
TOTAL	Technology	\$ 600,434	

Development and Environmental Services

DEVELOPMENT AND ENVIRONMENTAL SERVICES

Mission
Development and Environmental Services
To serve, educate and protect our community by shaping and implementing King County's development and environmental regulations.

ISSUES AND PRIORITIES

The Department of Development and Environmental Services (DDES) will complete its second consecutive year of minor losses following six years of consistent net gains. DDES maintains a significant positive fund balance in 2007. Most activities relating to permitting are

entirely self-supporting. Permitting-related activity declined in the years 2000 and 2001, but began to increase in 2002 through 2005. The 2006 levels remained at about 2005 levels as do 2007 levels to date. According to industry experts, permitting levels should continue to hold steady through 2007 as long-term interest rates remain at historically low levels. The Puget Sound region has remained relatively insulated from the housing and mortgage problems the rest of the country is experiencing. It is expected that King County will continue to remain mostly unscathed while the rest of the country attempts to recover. While the level of brisk home sales of past years has now slowed to a more normal level, the price of homes continues to increase in the Puget Sound area while the rest of the country suffers from price decreases. Another area in which Puget Sound has performed well is in foreclosure rates, which are at historically high levels in all areas of the country except the Puget Sound and Portland areas. Particularly troublesome are mortgages known as subprime. Subprime mortgages are those that were approved for people with questionable credit and ability to pay a mortgage. These subprime mortgages currently have such high default rates that many national mortgage companies are declaring bankruptcy. King County has one of the lowest rates of subprime loans in the country.

The department has experienced increased activity levels in some business areas as a result of the adoption of new code requirements. These occurred as contractors accelerated permit applications to qualify under the former code. Fluctuations from the new code provisions are not expected to be ongoing and the department has responded well to the workload requirements.

With a minor decrease of three percent in permit demand forecast for 2008, the department will be reducing the position count by one full time equivalent in permitting. The department will continue to regulate spending and staffing to the level required by customer demand and business activity.

The Current Expense (CX) Fund will support two areas in DDES in 2008: 1) Code Enforcement, Zoning, and Grading, and 2) Critical Areas Rural Support. The 2008 budget maintains funding for these services. The Fire Investigations Unit, which was previously part of the CX-funded DDES budget will be transferred to the Sheriff's Office budget in 2008.

The most significant influence on the DDES operations for 2008 is the activity of the building and land development industry along with the impacts of annexations and incorporations. The current economic trend in the micro economy that DDES regulates is one of turbulence and some degree of unpredictability. Each year King County surveys a cross-section of its customers to determine their business plans for the next 18 months. The current survey indicates that there is an expectation that the current trend will remain for the next couple of years as long as interest rates remain steady. The ability to respond to changes in business activity is a key requirement for DDES. To accomplish this, the agency continues to invest in system improvements. The 2008 budget provides a contingency of \$975,000 and five positions to address unanticipated increases in demand for services of up to 15 percent. The department is constantly reviewing its processes and procedures to enhance efficiencies and better customer service.

** This includes revised 2007 adopted, initial status quo, and proposed status quo increments. Under FTEs, annualization is included.

P1 PROVIDED THAT: Of this appropriation, \$1,000,000 shall not be encumbered or expended until the executive has transmitted a report to the council on the impact of changing the reimbursement methodology in the department of development and environmental services from an hourly basis to a flat rate fee structure. The report shall: (1) provide a discussion of the impact on the permit applicants; (2) provide a discussion of the impact on administration and overhead costs associated with a switch to flat fee; (3) consider and make a recommendation about the introduction of an on-line solution to basic permit application; and (4) compare the rate methodologies from peer jurisdictions to what is currently used by the department of development and environmental services. Furthermore, the executive shall seek the input of the development permit technical advisory committees created by Ordinance 15946, and include the committee's comments as part of the final report.

The report required to be submitted by this proviso must be filed in the form of 11 copies with the clerk of the council, who will retain the original and will forward copies to each councilmember and to the lead staff to the growth management and natural resources committee, or its successor.

P2 PROVIDED FURTHER THAT: Of this appropriation, \$400,000 shall not be expended or encumbered until council receives and approves by ordinance an action plan for streamlining the permitting process to protect historic structures and places. The plan shall, at a minimum, describe how the department of development and environmental service's policies and procedures, as well as county code and incentive programs, can be improved to encourage the preservation and restoration of historic privately-owned places- including buildings, homes, barns, sites of archaeological value and other places and structures that contribute to the historic character and sense of place of unincorporated King County - rather than demolition or alteration that negatively impacts their historic integrity.

By September 1, 2008, the department of development and environmental services, in collaboration with the historic preservation program staff and landmarks commission, shall submit to the council for its review and approval by ordinance, the detailed action plan described above, as well as any legislation necessary to further council intent of encouraging the viability, attractiveness and awareness on the part of property owners of preserving, rehabilitating and restoring their historic properties.

The report and legislation required to be submitted by this proviso must be filed in the form of 12 copies with the clerk of the council, who will retain the original and will forward copies to each councilmember and to the lead staff for the growth management and natural resources committee, or its successor, and to the lead staff for the capital budget committee, or its successor.

PHYSICAL ENVIRONMENT PROGRAM PLAN

PROGRAM HIGHLIGHTS

Annexation

Reduction in Staffing due to Annexation – (\$110,082) / (1.00 FTE). This request reduces one project manager position and \$11,419 in CX funding due to the annexation of West Hill and Lea Hill to Auburn.

Change in County Policy

Rural Services Initiative - \$47,950. This proposal represents DDES's contribution to the King County Executive's Rural Services Initiative. The Rural Services Initiative is designed to improve service to the county's rural residents through enhanced interdepartmental cooperation. The Rural Services Initiative will include a new Rural Services Manager housed in the Department of Natural Resources and Parks Administration, a team of geographically based Community Liaisons who will be selected from among existing FTEs working in the rural areas, and the creation of a new interagency Rural Planning Team. The costs associated with the Rural Services Initiative were allocated using a methodology based on departmental expenditures in the rural areas.

Improved Service Delivery

Built Green 0.5 FTE – \$61,649 / 0.50 FTE. This DNRP-funded position provides assistance to homebuyers to find and purchase homes that have a reduced impact on the environment.

Increase in Cost of Services

CX Salary Adjustments - \$7,582. This recommendation adjusts two Code Enforcement salaries to reflect accurate salary range and step levels.

Increased Efficiencies / Reduced Costs

CX Funding for External Case Support - \$30,000. This recommendation is for additional funding to support Grading, Critical Areas, and Zoning in processing of cases.

Infrastructure Improvement Needs

CX Funding for Zoning Code Rewrite - \$100,000. This recommendation funds a rewriting of the county's zoning code to ensure alignment with the Growth Management Act.

O&M Adjustments - \$138,700. This recommendation increases expenditure authority in repair and maintenance accounts in the IT section, printing and binding, and training, and includes budget adjustments required to facilitate the contribution to the Rural Services Office.

Maintenance of Investment in Technology

Permit Integration Project - \$198,544. This request provides expenditure authority to fund the DDES contribution to CIP for the Permit Integration (PI) project.

Technical Adjustments

CX Funding for Code Enforcement O&M - \$12,055. This request is for publications, training, and supplies in Code Enforcement, and accurately reflects spending in those accounts.

Conversion of TLTs to FTEs - \$0 / 2.00 FTEs, (2.00 TLTs). This request converts two critical areas environmental scientists with ongoing bodies of work from term limited positions to full time equivalent positions.

Central Rate Adjustments – (\$227,192). A net decrease in central rates is reflected in the 2008 proposed budget. The most significant reductions occurred in the Prosecuting Attorney Civil Division Charge, the Debt Service Adjustment, Insurance Charges, and Flex Benefits, while the largest increases were in Technology Services and the COLA adjustment.

Total Reserves & Designations	(3,512,039)	(3,829,533)	(3,829,533)	(9,380,405)	(7,688,620)	(5,329,546)
Ending Undesignated Fund Balance	14,209,924	7,267,952	10,456,494	2,822,816	2,308,122	5,027,897
Target Fund Balance ⁴	1,392,507	1,661,775	4,160,396	4,057,970	3,749,135	3,558,925

Financial Plan Notes:

¹ 2006 Actual Expenditures and Revenues based on 2006 CAFR or 14th month ARMS.

² 2009 Revenues are estimated to decrease due to dwindling inventory and reduction of DDES' hourly rates

³ 2009 and 2010 have a 5% reduction for salary and wages due to annexation expectations

⁴ Target fund balance is calculated as 5% of total expenditures for 2006 Actual and 2007 Adopted and 1/8th of total expenditures (12.5%) thereafter

⁵ Interest Earnings on cash balance to defer future rate increases

⁶ Assumes a 5% fee increase in 2010.

PHYSICAL ENVIRONMENT PROGRAM PLAN

PROGRAM HIGHLIGHTS

Lawsuit Settlement

Tiger Mountain Lawsuit Settlement - \$1,200,000. This request grants appropriation authority to complete required claim payments in 2008 resulting from the 2007 Tiger Mountain Lawsuit Settlement.

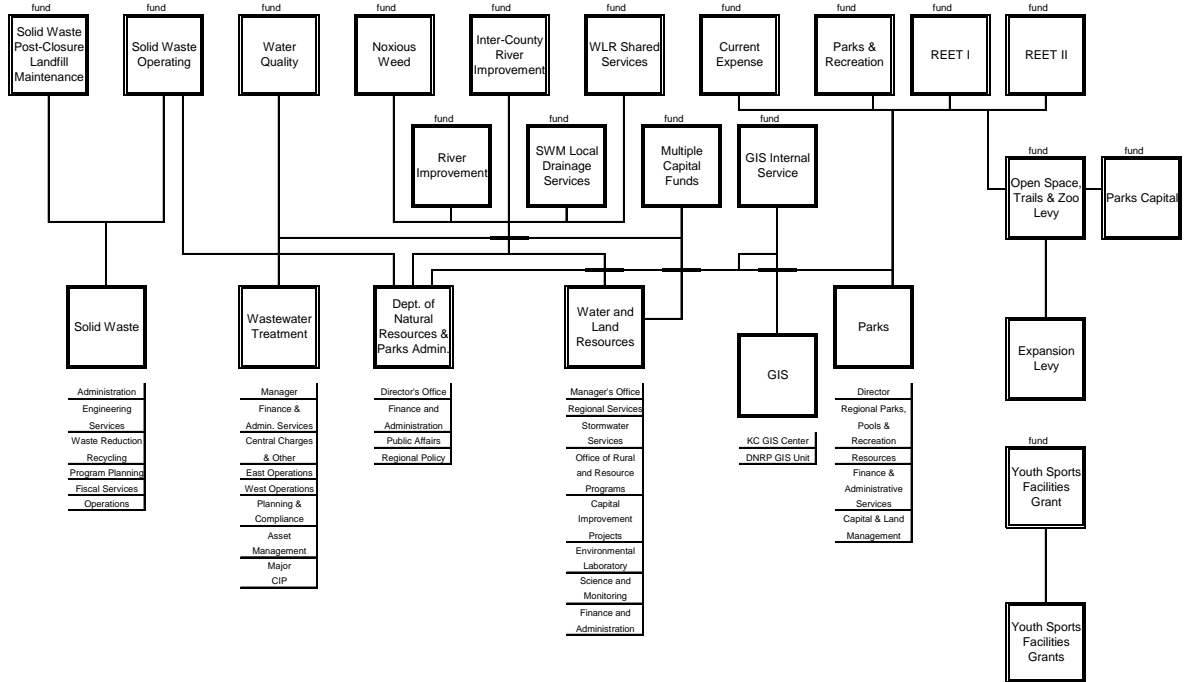

C O U N C I L A D O P T E D B U D G E T

Delete One Proposed TLT Conversion – (\$99,216) / (1.00) FTE. This change removes one critical areas scientist FTE that was converted from a TLT.

Fire Investigations Unit – Move from DDES to Sheriff (Ord. 15921) (\$949,245) / (7.00) FTEs. This change is dictated by ordinance 15921 and moves the Fire Investigation Unit from DDES to the Sheriff's Office.

Natural Resources and Parks

PHYSICAL ENVIRONMENT PROGRAM PLAN

NATURAL RESOURCES AND PARKS

Mission

Natural Resources & Parks

Foster environmental stewardship and strengthen communities by providing regional parks; protecting the region's water, air, land and natural habitats; and reducing, safely disposing of, and creating resources from wastewater and solid waste.

ISSUES AND PRIORITIES

The Department of Natural Resources and Parks (DNRP) includes the following organizational units: DNRP Administration, GIS Center, Wastewater Treatment Division, Water and Land Resources Division (multiple appropriation units), Solid Waste Division, and Parks and Recreation Division. The 2008 Executive Proposed Budget for DNRP highlights the Executive's continued commitment to preserving our natural resources.

The 2008 Executive Proposed Budget features the creation of a Rural Services Initiative, the restoration of pre-2002 Parks maintenance service levels as a result of the passage of the Parks Levy, and the inauguration of the

King County Flood Control Zone District. The 2008 Executive Proposed Budget also adds funding in the Solid Waste Division based on the King County Council approved increase to the Tipping Fee. The Tipping Fee increase enables Solid Waste to process an increased tonnage of waste annually and implement the Transfer and Waste Export System Plan. Finally, the 2008 Executive Proposed Budget underscores the county's commitment to comply with new National Pollution Elimination Discharge System (NPDES) permit requirements.

The successful passage of the 6-Year Parks levy enables the Parks and Recreation Division to increase its budget by almost \$2 million and restore Parks maintenance to its pre-2002 level. Parks will continue to emphasize maximizing business revenues, focusing on regional facilities and programs, and transferring local facilities.

In April 2007, the King County Council created the King County Flood Control Zone District to address the county's aging flood control facilities. The District Advisory Committee—composed of 14 elected officials and one Unincorporated Area Council representative—met over the summer and recommended a work plan and levy rate to be adopted by the District Board of Supervisors. The 2008 Executive Proposed Budget implements the Advisory Committee's recommendations, but is contingent upon the District Board of Supervisors approval of the recommended work plan and levy rate

Many DNRP divisions are facing significant financial pressures in 2008 and beyond. The 2008 Executive Proposed Budget includes proposals that are designed to respond to these financial constraints. The 2008 Executive Proposed Budget seeks a \$0.55 per parcel – or 37 percent – increase for the Noxious Weed Control Program. This is the first increase for the fee since 2002 and represents a two-year delay beyond when the Noxious Weed Control Program Board first proposed the fee increase. The increase will allow the program to undertake a survey of noxious weeds on county-owned land and to develop a strategy to better manage county lands, as well as maintain current levels of service.

The 2008 Executive Proposed Budget includes over \$2 million in expenditure reductions in the SWM Fund. While the 2007 fee increase compensated for inflation in the five years since the last fee increase, it is not sufficient to overcome future inflation, the costs of complying with NPDES permit requirements, and revenues losses due to annexation. The 2008 Executive Proposed Budget prioritizes legally mandated programs and core programs associated with surface water management. Other program areas will require some reduction in service levels, but will not eliminate any current service entirely. The 2008 Executive Proposed Budget includes \$50,000 for an Operational Master Plan to develop a strategy to address the financial challenges facing Water and Land Resources.

DNRP Administration

The 2008 Executive Proposed Budget for DNRP Administration provides funding to continue to allow

PHYSICAL ENVIRONMENT PROGRAM PLAN

DNR Administration to provide Department-wide leadership in support of the county's environmental and rural initiatives. The budget features the creation of a Rural Services Manager to support the Executive's Rural Services Initiative.

The mission of the Rural Initiative is *"To sustain vibrant rural communities while protecting rural lands, rural character and rural lifestyle."* As the rural portion of King County transitions from being firmly rooted in agriculture and forestry to an area with a diverse economy and population, the Rural Services Initiative is designed to enhance the county's ability to meet the goals of rural residents.

The Rural Services Initiative sets forth a new framework for serving rural King County based on enhanced interdepartmental cooperation and includes the following elements:

- A Rural Sub-Cabinet to serve as the leadership team for Executive rural programs and initiatives;
- A new Rural Services Manager who will be accountable for coordinating rural service delivery across departments;
- A team of geographically based Community Liaisons who are knowledgeable about and responsive to the interests and concerns of different parts of the rural area;
- The continuation of successful interagency teams, and the creation of a new interagency Rural Planning Team;
- Development and execution of a coordinated annual work program with clear and measurable objectives; and
- Ongoing performance measurement to evaluate the success of the Initiative.

The costs associated with the Rural Services Initiative (including support for the Rural Services Manager) will be shared by those departments currently providing services in the rural areas: the Department of Community and Human Services, the Department of Development and Environmental Services, the Department of Executive Services, the Parks and Recreation Division, Public Health Seattle and King County, the Road Services Division, and the Water and Land Resources Division.

King County Geographic Information System (KCGIS) Center

The KCGIS Center, organized as a separate internal service fund, provides all county users with a single point of accountability for equitable access to consistent and accurate GIS data and products. It also provides efficient GIS database management, and works to develop a regional GIS system. In addition to working on countywide GIS functions, the KCGIS Center provides matrix staff support to six divisions, and on demand GIS consulting and project services on a cost-reimbursable basis to county business units and to external agencies, businesses, and citizens. The 2008 Executive Proposed Budget makes technical adjustments to ensure the financial stability of the GIS fund.

Parks and Recreation Division

The 2008 Executive Proposed Budget implements the 6-year Parks Levy approved by voters in August 2007. The 2008-2013 Parks Levy will generate \$16 million in revenues in 2008, a 22 percent increase over 2007. The renewed levy enables the division to restore park maintenance to pre-2002 levels. As a result, the 2008 Executive Proposed Budget includes \$1.8 million to return to pre-2002 maintenance levels and \$150,000 for maintenance of additional passive natural area parks and trails, as identified in the 2008-2013 Parks Levy Ordinances.

Parks will continue its entrepreneurial efforts to maximize revenues to minimize the need for government or taxpayer subsidies. In addition, Parks works actively with the county's Regional Governance Group (RGG) to transfer properties within the unincorporated urban growth area to cities in an effort to reduce the CX Fund contribution to support services in the UGA.

As a result of voter approval of the Parks Expansion Levy in August 2007, a new fund will be created to collect levy proceeds. The six-year, 5 cent levy will be divided among a new King County Trails and Open Space CIP fund (3 cents or \$9.6 million in 2008), city trails and opens space (1 cent or \$3.2

PHYSICAL ENVIRONMENT PROGRAM PLAN

million in 2008), and the Woodland Park Zoo (1 cent or \$3.2 million in 2008).

The Youth Sports Facilities Grants (YSFG) program is a model for capital planning and development through partnerships, a major component of the Parks and Recreation Division Business Plan. Such partnership programs help the county leverage funding to improve facilities and retain services and programs.

Solid Waste Division

The Solid Waste Division continues its mission of maximizing ratepayer value by ensuring the citizens of King County have access to efficient and reliable regional solid waste handling and disposal services at rates as low as reasonably possible, consistent with sound environmental stewardship of regional resources.

An increase in the Solid Waste Tipping Fee will take effect January 1, 2008. The last fee increase was in 1999. Through sound fiscal management, the Solid Waste Division was able to delay a Tipping Fee increase during the past several years. In addition to meeting the division's operating financial requirements, additional revenue generated by the fee increase will help fund major capital projects necessary to prepare the county for the transition to waste export upon the closure of the Cedar Hills Regional Landfill, anticipated in 2016.

Wastewater Treatment Division

The Wastewater Treatment Division (WTD) protects water quality and prevents water pollution by providing wastewater treatment for 17 cities and 17 local sewer utilities. The county's Wastewater Treatment Division serves about 1.4 million people, including most urban areas of King County and parts of south Snohomish County and northeast Pierce County. The 2008 Executive Proposed Budget for WTD reflects the results of sound financial management practices.

The adopted monthly sewer rate for 2008 is unchanged from 2007 at \$27.95. The capacity charge, however, will increase from \$42.00 in 2007 to \$46.25 in 2008. King County was able to maintain the sewer rate through 2008 by using a rate stabilization reserve. In 2008, \$17.65 million of the rate stabilization reserve will be used, leaving a reserve balance of \$6.4 million. The 2008 sewer rate and capacity charge were set to generate operating revenue sufficient to meet the minimum required debt service coverage ratios under WTD's adopted financial policies.

Water and Land Resources Division

The Water and Land Resources Division (WLR) contains six funds: Water and Land Resources Shared Services (WLRSS), Surface Water Management Local Drainage (SWM), the new King County Flood Control Zone District (FCZD), River Improvement Fund (RIF), Inter-County River Improvement Fund (ICRIF), and the Noxious Weed Control Program.

Despite a 9 percent increase in the Surface Water Management (SWM) Fee in 2007, the 2008 Executive Proposed Budget for WLRSS and SWM contain combined expenditure reductions of nearly \$3 million. These expenditure reductions are necessary to mitigate the financial impact and demands of affects listed below:

- *Inflation:* The fundamental problem facing the SWM fund is that the growth in expenditures greatly out paces growth in revenues. The SWM fee is a per parcel fee that grows roughly 1 percent annually, while expenditures—including salaries, benefits, and internal county services—are projected to increase by more eight percent over the next three years.

PHYSICAL ENVIRONMENT PROGRAM PLAN

- *Regulatory Requirements:* WLR plays a lead role in the county's compliance with numerous environmental regulations, including the National Pollution Discharge Elimination System (NPDES) permit, which has a significant impact on the WLR budget. The 2008 Executive Proposed Budget includes approximately \$1.5 million in expenditures necessary to comply with the NPDES permit. WLR anticipates that an additional \$1.2 million will be needed in 2009 and \$175,000 in 2010 for NPDES compliance. The SWM fund is the only source of revenue currently available for these efforts.
- *Annexation:* Approximately 45 percent of current SWM revenues will be lost once all of the potential annexation areas (PAAs) identified in the Annexation Initiative are annexed or incorporated. Because the SWM program has components that provide service to the entire service area, the reduction in direct expenditures in the PAAs is only a fraction of the lost revenues, meaning WLR will have to make reductions over and above those associated with direct expenditures.

Because it is a reimbursable fund from which other funds purchase services, WLRSS experiences reductions related to the declining availability of SWM revenues. Further, decreased demand for services by the Wastewater Treatment Division (WTD) has also resulted in reductions in the 2008 Executive Proposed Budget for WLRSS.

The 2008 Executive Proposed Budget for SWM and WLRSS prioritizes funding for regulatory requirements (NPDES) and for services directly related to surface water management. Funding pressures necessitated reductions in some program areas. No program was entirely eliminated; however, there will be decreased levels of service in some programs. When possible, vacant positions were eliminated and staff reassigned to higher priority work.

The 2008 Executive Proposed Budget for WLR includes the new King County Flood Control Zone District. In April 2007, the King County Council created a new countywide Flood Control Zone District (Ordinance 15728) to implement the 2006 Adopted King County Flood Hazard Management Plan, which identifies and recommends projects, programs, and policies to address the county's aging flood protection system. The plan and district provide a regional approach to addressing infrastructure needs required to protect public health and safety, regional economic centers, public and private properties, and vital transportation corridors.

Over the course of the summer of 2007, the FCZD Advisory Committee—composed of 14 elected officials and one representative from the Unincorporated Area Councils—met and recommended a budget and work program based on a recommended countywide property tax levy of 10 cents per \$1,000 of assessed valuation. The 2008 Executive Proposed Budget for the FCZD implements the Advisory Committee's recommended work plan based on the recommended levy rate. The 2008 Executive Proposed budget is contingent upon approval of the District's work plan and recommended levy rate by the FCZD Board of Supervisors.

The 2008 Executive Proposed Budget includes a \$0.55 per parcel increase in the Noxious Weed Fee that would increase the fee from \$1.50 to \$2.05 per parcel. The Noxious Weeds Control Program Board recommends the increase to pay for inflation, to restore fund balance and to address a growing and emerging issue of noxious weeds along rivers. The 2008 Executive Proposed Budget includes a survey of county-owned lands, the development of a strategy to better manage noxious weeds on those lands funded by the fee increase and a new program to identify and eradicate noxious weeds in and on

PHYSICAL ENVIRONMENT PROGRAM PLAN

the banks of King County's rivers.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Natural Resources and Parks Administration 4040/0381

Code/Item #	Description	0381	Expenditure	FTEs*	TLPs
		2008 Adopted Budget	5,237,117	29.60	2.00

* FTEs do not include temporaries and overtime.

** This includes revised 2007 adopted, initial status quo, and proposed status quo increments. Under FTEs, annualization is included.

ER1 Expenditure Restriction: Of this appropriation, no funds shall be expended on the rural services initiative. The council finds that there is a need to: (1) establish a clear vision and policy framework regarding the county's delivery of services to the rural area; (2) improve customer service to rural and unincorporated area residents through effective and seamlessly delivered quality services; and (3) strengthen knowledge among county staff regarding the rural area and the rural way of life.

The council finds that it is essential to review a range of options that may exist to address these needs, such as the establishment of an office of rural and unincorporated affairs or the consolidation of many rural and unincorporated area services in one department. It is the council's intent, in 2008, to develop a comprehensive plan for rural and unincorporated area service delivery. The comprehensive rural and unincorporated services plan shall address the needs identified above and will be based upon a study of the options listed above as well as other options that might be identified through a review of similar jurisdictions. The council intends to establish an interbranch work team in order to develop this comprehensive rural unincorporated services plan. The interbranch work team shall include, at a minimum, staff from the county council, the rural ombudsman, the department of natural resources and parks, the department of transportation, the department of development and environmental services, the department of public health, the sheriff's office, the office of business relations and economic development and the office of management and budget.

PHYSICAL ENVIRONMENT PROGRAM PLAN

PROGRAM HIGHLIGHTS

DNRP Administration

The 2008 Executive Proposed Budget for DNRP Administration will continue to provide funding to allow for Department-wide leadership, advocacy and support for all DNRP divisions. DNRP Administration will also provide central coordination for the Executive's Rural Services Initiative through a Rural Services Manager, who is added in the 2008 Executive Proposed Budget.

Improved Service Delivery

To address the needs of rural areas, DNRP Administration will support the Executive's Rural Services Initiative through the creation of a Rural Services Coordination Manager.

Rural Services Coordination - \$157,849 and 1.00 FTE. This proposed budget adjustment reflects the creation of a Rural Services Manager to coordinate Rural Services Initiative participants across multiple county departments. This is accomplished by re-allocating one (1) existing FTE in DNRP Administration. This proposed adjustment also reflects the one time and ongoing operational costs (\$18,000) associated with this coordination.

Reduce Rural Department Development TLT and Transfer FTE - (\$226,922), (1.00) FTE and (0.60) TLT. This proposed budget adjustment reflects the re-allocation of a Government Relations FTE in DNRP Administration to the new Rural Services Manager and the elimination of a partial TLT whose work assisting in the development of the Executive's Rural Initiative has been completed.

Permit Integration Project Participation - \$50,000. This proposed budget adjustment provides a contribution to a multi-departmental effort to improve the efficiency and transparency of the county's various permit-processing functions.

Technical Adjustments

Personnel Cost Related Adjustments - (\$46,270). These proposed budget adjustments reflect salary and benefits related changes associated with the personnel movement within DNRP Administration.

Minor Adjustments to Operating Budget - \$71,775. These proposed budget adjustments include the additional need for web and graphics services to support KingStat and other new initiatives (\$50,000), staff time for grant assistance (\$11,775), and purchases to outfit a conference room for media events (\$10,000).

Photographer Contribution to DOT - \$27,720. This proposed budget adjustment supports the expenses of a photographer transitioning from the Print and Graphics Arts Division into the Department of Transportation.

Central Rate Adjustments - (\$177,503). The central rates applicable to DNRP Administration include reductions and increases that net to a decrease of \$177,503. Central rate adjustments include: Flexible Benefits, Current Expense Overhead Adjustment, Healthy Workplace Funding Initiative, Technology Services Infrastructure and O&M, GIS Systems, Office of Information Resources Management (OIRM), Telecom Services and O&M, Radio Equipment and Service, Prosecuting Attorney Civil Division, Long Term Leases, Copy Center Charge, Financial Services, Retirement Rate, Equipment Repair and Replacement, Property Services Management, COLA, Merit Pay, and OIRM CIP.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Council made no changes to the 2008 Executive Proposed Budget.

** This includes revised 2007 adopted, initial status quo, and proposed status quo increments. Under FTEs, annualization is included.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Geographic Information Systems (GIS)

The 2008 Proposed Budget makes technical adjustments to ensure the financial stability of the GIS fund.

Technical Adjustments

DNRP Overhead Adjustment -- \$18,044. This proposed budget adjustment is to support an increase in DNRP overhead allocated to the KCGIS Center. Of this rate, \$14,000 is to support the shared motor pool in King Street Center with a one-time cost equal to the cost of one-half of a vehicle and an ongoing cost for vehicle support.

Central Rates -- (\$7,535). The central rates applicable to GIS include reductions and increases that net to a decrease of \$7,535. Central rate adjustments include: Flexible Benefits, Current Expense Overhead Adjustment, Technology Services Infrastructure and O&M, Office of Information Resources Management (OIRM), Telecom Services and O&M, Motor Pool, Prosecuting Attorney Civil Division, Debt Service Adjustment, Long Term Leases, Copy Center Charge, Financial Services, Retirement Rate, Printing and Graphic Arts Interfund Loan Repayment, Property Services Management, and OIRM CIP.

Target Fund Balance ⁴	346,976	424,189	411,357	440,020	455,986	512,405

Financial Plan Notes:

¹ 2006 Actuals are based on Preliminary 2006 CAFR

² 2007 Estimated is projected from modified current actuals through June 2007.

³ 2009 projected based on detailed rate study for 2008-2009 biennial budget; 2010 Projected based on 3% annual growth in expenditures and revenue

⁴ Target fund balance is based on 10% minimum (15% maximum) of total budgeted expenditures.

⁵ Underexpenditure is based on 1.5% (2009-2010 0.75%) of Total Expenditures.

⁶ Equipment Reserve established to fund replacement of core GIS data servers to ensure effective on-going operation. Target reserve is annual five-

⁷ KSC training room rental revenue is held for DOT & DNRP as a training equipment replacement reserve.

⁸ Represents balance of prepaid client services revenue received, minus work completed on account.

⁹ Imagery fund reserve fluctuates based on best imagery acquisition commercial terms.

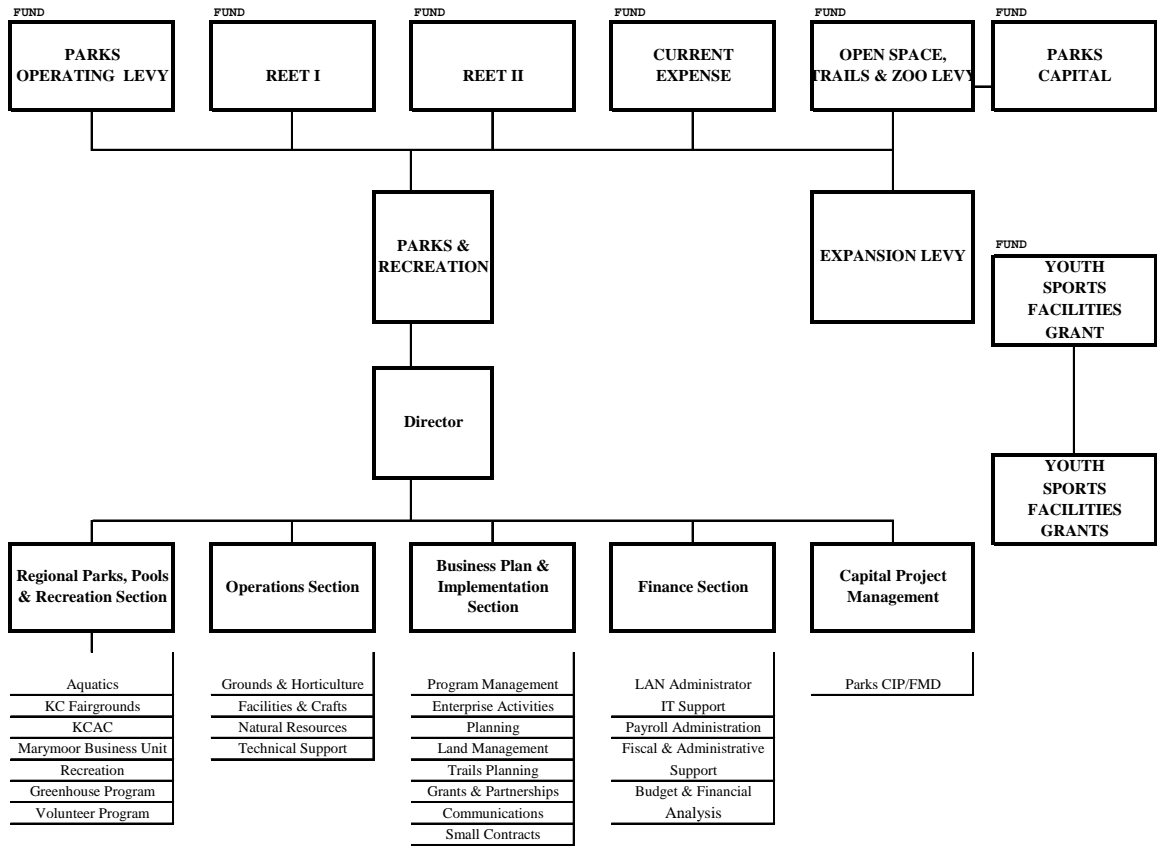

¹⁰ Utilization of Data Center Move reserve dependent on OIRM project schedule

¹¹ Rate stabilization reserve target is 10% of client services & matrix labor budgets.

* FTEs do not include temporaries and overtime.

** This includes revised 2007 adopted, initial status quo, and proposed status quo increments. Under FTEs, annualization is included.

P1 PROVIDED THAT: Of this appropriation, \$200,000 shall not be expended until the parks and recreation division submits to the council a plan for the transition of supported employees in the greenhouse program to other positions in King County departments or divisions. The plan will include information related to the impact of the potential transfer on the supported employees, an assessment of appropriate job placement and the availability of transportation to proposed job sites.

By February 28, 2008, the plan shall be filed in the form of 11 copies with the clerk of the council, who will retain the original and will forward copies to each councilmember and to the lead staff for the growth management and natural resources committee, or its successors.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Parks and Recreation Division

The Parks operating budget continues to be driven by the division's business plan and parks levy financial plan, which emphasizes maximizing business revenues, focusing on regional facilities and programs, and transferring local facilities. The 2008 Executive Proposed Budget reflects voter approval of the 2008-2013 Parks Levy.

Improved Service Delivery

Parks 2008 Levy – Restoration of Pre-2002 Level Maintenance - \$1,946,355 and 14.50 FTEs.

This proposal includes \$1.8M for restoration to pre-2002 levels of maintenance and \$150,000 for maintenance of additional passive natural area parks and trails, as identified in the 2008-2013 levy ordinance. Included in the 14.50 FTEs are 2.00 FTEs that will be transferred from the Water and Land Resources Division (WLR) to Parks along with stewardship responsibility for open space and natural lands.

Rural Services Initiative - \$6,816. This proposal represents Parks's contribution to the King County Executive's Rural Services Initiative. The Rural Services Initiative is designed to improve service to the county's rural residents through enhanced interdepartmental cooperation. The Rural Services Initiative will include a new Rural Services Manager housed in the Department of Natural Resources and Parks Administration, a team of geographically based Community Liaisons who will be selected from among existing FTEs working in the rural areas, and the creation of a new interagency Rural Planning Team. The costs associated with the Rural Services Initiative are allocated using a methodology based on departmental expenditures in the rural areas.

Increased Efficiencies/Reduced Costs

Greenhouse Program – (\$242,519) and (6.00) FTEs. The Greenhouse Program was identified by the Parks Futures Task Force as not fitting within Parks' core business and recommended not to be supported by levy funds. This proposal discontinues the Greenhouse program at the Parks Division. These positions have been redeployed to other agencies within the county. The Greenhouse program provides valuable social services by employing developmentally disabled employees.

Revenue-backed Grants Awards

Backcountry Trails Grant - \$75,000. The Parks and Recreation Division received a one-year grant from the Interagency Committee for Outdoor Recreation, recently renamed the Recreation and Conservation Office, to manage backcountry trails in 2008, which are non-motorized, multi-use trails in open space areas.

Technical Adjustment

Annual Technical Adjustments - (\$430,599). This proposal consists of annual technical adjustments to reflect actual expenditures and updated information on projected revenues. It also includes a shift of Community Partnerships and Grants (CPG) funds to a new, dedicated low org for better tracking. This proposal budgets CPG grant operating funds at \$100,000 for 2008.

Annual Entrepreneurial Adjustments - \$239,863 and .50 FTE. This proposal adjusts the Capital and Land Management Section and Marymoor Park budgets. It includes an additional 0.50 FTE for entrepreneurial activities, which is needed to continue generating 5 percent business revenue increases annually. In addition, it includes temporary help, overtime and supplies for Marymoor Park to host the Cirque du Soleil in 2008.

Utilities Adjustments - \$211,420. This proposal provides for annual adjustments of utilities based on

PHYSICAL ENVIRONMENT PROGRAM PLAN

actual expenditures.

Information Technology Initiatives - \$277,890. This request provides for two Information Technology Initiatives: \$76,000 for a one-time cost for the King County Web site migration, and a transfer of \$201,890 to the Office of Information Resource Management CIP fund to establish funding for the R:Base Database System Replacement project costs.

Body of Work and Other Staffing Issues - \$670,567 and 4.35 FTEs and (5.00) TLTs. This proposal addresses Body of Work issues, technical adjustments to 2008 Proposed Status Quo (PSQ) staffing, and pending King County human resource issues. It also includes 1.0 FTE that will be transferred from Water and Land Resources to Parks as WLR transfers stewardship responsibility for open space and natural lands to Parks. It includes \$152,420 in Real Estate Excise Tax (REET) revenue to support this additional open space and natural lands FTE and addresses Human Resource issues associated with employees supported by REET funds.

IT Equipment Replacement - (\$31,716). The 2007 budget for IT Equipment Replacement was \$71,716. The Equipment Replacement financial plan anticipates costs of \$40,000 in 2008, resulting in a reduction of \$31,716 in the 2008 Executive Proposed Budget.

Central Rates - \$189,327. Central rate adjustments were made for Flexible Benefits, Current Expense Overhead, Healthy Workplace Funding, Technology Services O&M, Technology Infrastructure, Geographic Information Services, Office of Information Resource Management, Telecommunications Services, Telecommunications Overhead, Motor Pool Usage, Insurance, Radio Access, Radio Maintenance, Radio Direct, Prosecuting Attorney Civil Division, Long-term Leases, FMD Copy Centers, Financial Services, Financial Services Rebate, Retirement, Equipment Repair & Replacement, Wastewater Vehicles, P&GA Loan Recovery, Property Services Lease Admin Fee, Countywide Strategic Technology Projects, COLA, and Merit.

Financial Plan Notes:

¹ The Parks and Recreation Fund was a new fund in 2004. The current voter-approved levy is for four years, ending in 2007. This financial plan reflects passage of the 2008-2013 Levy, approved by the voters August 21, 2007.

² 2006 Actuals based on 14th month ARMS reports and 2006 CAFR.

³ 2007 Levy Proceeds and Delinquent Levy Collections revised by OMB April 2007. Revenue growth assumed at 4.66% in 2009 (2.82% CPI plus 1.84% growth for new construction) and 4.8% in 2010 (3.00% CPI plus 1.80% growth for new construction).

⁴ Interest Earnings based on an interest rate of 5.15% in 2007 Estimated, 5.25% in 2008, 5.1% in 2009, and 5% in 2010, with a 20 basis point investment service fee deducted.

⁵ Regional/Rural Business Revenues in 2006 include \$423,002 of reimbursements for capital-backed expenditures.

⁶ Regional/Rural and UGA Business revenues assume 5% growth in 2008-2013. These categories are tracked by the Parks Division.

⁷ The CX Transfer for UGA, along with UGA business revenues, is used to cover costs in the Urban Growth Area (UGA). 2007 Adopted CX Transfer Revenue includes reduction due to anticipated East Renton Annexation. 2008 Proposed reflects CX revenues needed to cover 2008 proposed expenditures attributed to UGA. 2009 and 2010 reflect 5% growth.

⁹ The CX transfer for Regional/Rural is to cover expenditure growth exceeding that forecast in the 2008, 2009 and 2010, enabling Parks to achieve Executive commitments and meet Target Fund Balance.

¹⁰ CIP Revenues include transfers from Parks CIP Funds 3160, 3490 and 3581 to support Capital & Land Management/Business Planning. Note that some portion of CIP/Land Management/Business Planning Expenditures is associated with UGA facilities. This is not backed by CX funds or business revenues and is not included in the UGA Expenditures. 2009 and 2010 assume 5% growth.

PHYSICAL ENVIRONMENT PROGRAM PLAN

C O U N C I L A D O P T E D B U D G E T

Restore Greenhouse Program Funding – 4 months – \$119,969 / 6.00 FTEs.

Offsets Restoration of Greenhouse Funding over \$80,840 – (41,033).

COLA Adjustment – \$1,904.

Council reinstated 4 months of Greenhouse Program funding and 6 FTEs. This allows Parks time to provide Council with a plan for the transition of the supported employees in the Greenhouse Program to other positions in King County departments or division as directed in proviso P1.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Youth Sports Facilities Grants (YSFG)

The YSFG program is a model for capital planning and development through partnerships, a major component of the Parks and Recreation Division Business Plan. Such partnership programs help the county leverage funding to improve facilities and retain services and programs. The YSFG program provides matching grant funds to community and youth organizations that partner with a public agency, such as a school district or city parks department to develop, renovate, or repair sports facilities. Grants range from \$5,000 to \$75,000. Because the program is designed to leverage funds from other sources, to qualify for a grant applicants must provide \$1 for every \$2 requested. The YSFG program is funded and sustained through a one quarter of one percent Car Rental Sales and Use Tax. YSFG's 2008 Car Rental Sales and Use Tax revenues of \$809,573 will enable YSFG to award grants in the amount of approximately \$800,000, and to cover \$126,000 in operating costs, while maintaining the required target fund balance of \$65,000.

Technical Adjustment

Technical Adjustments - \$30,000. In 2007, Shoreline Public Schools was awarded a grant of \$30,000. They were unable to proceed with the project, freeing the funds to be awarded as part of the 2008 grant award process.

Revenue and Programmed Expenditure Adjustments - \$145,063. This proposal adjusts funds available for grant programming and revenues based on the most recent Car Rental Tax, fund balance and interest income projections.

Central Rates – (\$974). Central rate adjustments were made for Flexible Benefits, Current Expense Overhead, Technology Services Infrastructure, Office of Information Resource Management, Prosecuting Attorney Civil Division, Financial Services, Financial Management Services Rebate, Retirement, Countywide Strategic Technology Projects, COLA and Merit.

Financial Plan Notes:

¹ 2006 Actuals are based on the 14th Month ARMS Reports and the 2006 CAFR.

² 2007 Adopted is from the 2007 Adopted Financial Plan.

³ 2007 Auto Rental Tax forecast revised by OMB August 2007. 2007 Estimated assumes 5.8% growth; 2008, 2009 and 2010 assume 4% growth.

⁴ Net Investment Income is calculated at 5.15% in 2007, 5.25% in 2008, 5.1% in 2009 and 5% in 2010, with 20 basis point investment service fee deducted.

⁵ 2008, 2009 and 2010 Programmed Expenditures are funded at the level that allows YSFG to meet the Target Fund Balance.

⁶ Operating Expenditures consist of salaries, benefits and O&M costs. 2009 and 2010 are inflated at 5% each year.

⁷ Per proviso 13-2 in the 2002 Adopted Budget Ordinance #14265, \$646,257 was to be transferred into YSFG from the Stadium Fund (proceeds from the sale of Stadium property). However, per the 2003 2nd Quarter Omnibus #14279, \$1M was transferred into YSFG from the Stadium in 2003. According to the proviso, \$646,257 of these funds cannot be expended or encumbered, but may be used to establish an endowment. The income generated by the \$646,257, however, can be used to support ongoing grants programs. The \$353,743 difference between the anticipated \$646,257 Stadium Fund Balance expected to be transferred to YSFG and the \$1M actually transferred per the 2003 2nd Quarter Omnibus #14729 were available for programming in 2005. Proceeds (amount unknown at this time) from the sale of the Johnson Building and any other remaining Stadium property (after accounting for the set-aside to support housing provided for in Ordinance #13262 and for any negative fund balance remaining after termination of the stadium) will be transferred to YSFG as well, to supplement the YSFG endowment.

⁸ The Target Fund Balance is 8% of Total Revenues.

** This includes revised 2007 adopted, initial status quo, and proposed status quo increments. Under FTEs, annualization is included.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Expansion Levy

Parks' Expansion Levy was approved by voters for a six-year period, beginning in 2008. In 2008 3 cents of the 5-cent expansion levy will support a new capital fund for King County Trails and Open Space (\$9.6M). Cities will receive 1 cent of the 5-cent expansion levy for Trails and Open Space (\$3.2M). The Woodland Park Zoo will receive 1 cent of the 5-cent expansion levy for Trails and Open Space (\$3.2M).

Technical Adjustment

Open Space, Trails & Zoo Levy - \$16,054,433. This proposal creates appropriation authority to transfer the new levy proceeds to a designated capital fund in King County (60 percent), to cities (20 percent), and to the Woodland Park Zoo (20 percent).

Ending Fund Balance	0	0	0	(0)	0	0

Financial Plan Notes:

¹ Revenue growth assumed at 4.66% in 2009 (2.82% CPI plus 1.84% growth for new construction), 4.8% in 2010 (3.00% CPI plus 1.80% growth for new construction).

² Assumes 3 cents of 5 cent expansion levy will support new capital fund for King County Trails and Open Space. Expenditure growth assumed at same rate as revenue growth. Estimate does not account for King County collection or administrative fees.

³ Assumes Cities will receive 1 cent of 5 cent expansion levy for Trails and Open Space. Expenditure growth assumed at same rate as revenue growth. Estimate does not account for King County collection or administrative fees.

⁴ Assumes Woodland Park Zoo will receive 1 cent of 5 cent expansion levy for Trails and Open Space. Expenditure growth assumed at same rate as revenue growth. Estimate does not account for King County collection or administrative fees.

* FTEs do not include temporaries and overtime.

** This includes revised 2007 adopted, initial status quo, and proposed status quo increments. Under FTEs, annualization is included.

ER1 Expenditure Restriction: Of this appropriation, \$30,000 shall be expended solely to contract with the Share-house for the purpose of keeping furniture and other household goods out of the solid waste stream.

P1 PROVIDED THAT: The solid waste division is directed to prepare summary information demonstrating trends and projecting anticipated future volumes in waste tonnage, taking into account projections of local economic conditions, and impacts of the recent increase in the solid waste tipping fee, in support of a request for expenditure authority related to such anticipated future waste volumes. Twelve copies of this summary must be filed with the clerk of the council, who will retain the original and will forward copies to each councilmember and to the lead staff for the growth management and natural resources committee, or its successor, and the operating budget, fiscal management and mental health committee, or its successors.

P2 PROVIDED THAT: Of this appropriation, \$50,000 shall not be expended or encumbered unless by July 15, 2008, the solid waste division in conjunction with the water and land resources division of the department of natural resources and parks and the department of public health transmits to the council for review a report on proposed policies of these agencies regarding an update of the Local Hazardous Waste Management Plan ("the plan") that would govern their participation on the management coordinating committee. The report shall propose policy which will consider at a minimum, the quantities, types, generators, and fate of moderate-risk wastes in King County. The report shall also propose policy which will consider hazardous waste volumes entering the solid waste stream and other environmental exposure routes, and necessary actions to limit the entry of these wastes into these exposure routes. The department of public health, in conjunction with the solid waste division and the water and lands resources division, will consult with lead staff of the board of health and the growth management and natural resources committee in report preparation.

The report required by this proviso must be filed in the form of 12 copies with the clerk of the council, who will retain the original and will forward copies to each councilmember and to the lead staff for the growth management and natural resources committee and the board of health, or their successors. If the report is not filed by August 31, 2008, appropriation authority for the \$50,000 restricted by this proviso shall lapse.

P3 PROVIDED FURTHER THAT: The solid waste division shall work with the metropolitan solid waste management advisory committee, the solid waste advisory committee and Council staff to develop a decision process for contract negotiations with participant cities. The division and these persons shall address key recommendations from the third party review of the recent solid waste planning effort, and with the executive shall revise the solid waste financial plan regarding the host city mitigation funding designation.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Solid Waste Division (SWD)

The total 2008 Executive Proposed Budget for the Solid Waste Division is \$105,508,023 in revenues and \$104,439,779 in expenditures, with 434.35 FTEs and 4.00 TLTs. The proposal includes adjustments for higher tonnage, costs associated with reopening the newly renovated Shoreline Recycling and Transfer Station, implementation of the Transfer and Waste Export System Plan, and equipment purchases. A bond issuance with new debt service payments and a scheduled transfer to the Construction Fund (3901) will provide the necessary resources to continue solid waste facility upgrades. Transfer station projects will significantly improve current operations and facilities in an efficient transition to waste export.

Increased Efficiencies /Reduced Costs

Increase Graphics Staff Hours - \$37,467 and 0.50 FTE. This proposed budget adjustment allows for increased internal graphics project capacity that cannot be handled by the County's Print Shop. This increases an existing FTE from one-half to full time and is expected to result in a reduction of consultant costs.

Tipplers and Utility Workers - \$351,342 and 4.00 FTEs. This proposed budget adjustment will provide operating support for the conversion to tipplers. Tipplers are a more cost effective method for emptying solid waste trailers than the method currently employed at the Cedar Hills Regional Landfill. This change is expected to result in future cost savings.

Infrastructure Improvement Needs

Growth to Support Higher Tonnage - \$1,469,994 and 4.00 FTEs. This proposed budget adjustment allows for additional drivers, trucks, and trailers to support projected solid waste tonnage increases.

Capital Asset Maintenance Program - \$505,000. This proposed budget adjustment supports maintenance and safety improvements at transfer stations.

Construction Fund Transfer - (\$746,792). This proposed budget adjustment reflects a scheduled transfer to provide the Construction Fund with the necessary resources for capital improvements to transfer stations and to minimize future debt. Upgrades to the transfer system will significantly improve current operations and facilitate the efficient implementation of the Transfer Station and Waste Export Plan when it is approved.

Shoreline Recycling and Transfer Station - \$804,536 and 2.00 FTEs. This proposed budget adjustment is to enhance the newly renovated transfer station with equipment, staff, and resources to cover anticipated needs.

Engineer II for Facilities Maintenance - \$93,008 and 1.00 FTE. This proposed budget adjustment adds a position to manage the Capital Asset Maintenance Program to support maintenance needs.

Chipper for Woody Debris - \$180,000. This proposed budget adjustment is to purchase a commercial-grade chipper that will quickly grind wood down to a manageable and marketable product. This specialized equipment is portable and will be available for a variety of uses, including better response to emergency situations such as storm damage

PHYSICAL ENVIRONMENT PROGRAM PLAN

Transfer & Waste Export Plan Improvements - \$204,196 and 2.00 TLTs. This proposed budget adjustment is for two temporary positions for project management of large, complex, solid waste handling projects.

Harbor Island - \$435,500. This proposed budget adjustment allows for tenant improvements and the demolition of a dilapidated building on Harbor Island.

Technical Adjustments

Landfill Reserve Fund Transfer - \$99,078. This proposed budget adjustment reflects the internal transfer to the Landfill Reserve Fund.

Contribution to the Capital Equipment Replacement Fund - (\$262,618). This proposed budget adjustment reflects the scheduled transfer required to provide the capital fund with resources needed for the timely replacement of equipment.

Annual Zero-Based Budget Adjustments – (\$241,984). This proposal makes various routine annual adjustments to expenditures to reflect anticipated 2008 needs.

Central Rate Adjustments – (\$120,453). Central Rate Adjustments include: Flexible Benefits, Current Expense Overhead Adjustment, Healthy Workplace Funding Initiative, Technology Services Infrastructure and O&M, GIS Systems, OIRM, Telecom Services and O&M, Motor Pool, Insurance Charges, Radio Equipment and Service, Prosecuting Attorney Civil Division, Debt Service Adjustment, Long Term Leases, Copy Center Charge, Financial Services, Retirement Rate, P&GA Interfund Loan Repayment, Cell Phone and Pager Services, Limited Tax General Obligation Debt Service, Fixed Asset Data Management, Property Services Management, Major Maintenance Repair Fund, OIRM CIP, and COLA Adjustments.

C O U N C I L A D O P T E D B U D G E T

Council removed RB01 Growth to Support Higher Tonnage – (\$1,469,994) and (4.00) FTEs.

Target Fund Balance ¹²	8,007,618	9,199,240	9,199,240	9,504,515	10,172,677	10,681,311

Financial Plan Notes:

¹ 2006 Actuals are from the 2006 CAFR and the 14th Month ARMS report.

² 2007 Estimated is based on preliminary estimates from the Solid Waste Division made in June 2007.

³ 2009 and 2010 Projected are based on 3% inflation in most cases when better projections were not available.

⁴ 2007 Estimated assumes tonnage of 1,010,019 tons based on activity year-to-date and division projections.

⁵ Revenue is based on the Solid Waste Division's June 2007 long-term tonnage forecast. Forecast disposal is 1,048,800 tons in 2008, 1,080,800 tons in 2009, and 1,115,200 tons in 2010. Tonnage assumptions in 2006 and 2007 assume lost revenue during the construction of the First Northeast Transfer Station.

⁶ Other Revenue is comprised of intra-county contributions and other miscellaneous revenues.

⁷ 2006-2010 expenditures reflect savings developed for the Solid Waste Change Initiative. 2007-2010 expenditures also include costs to handle increased tonnage at transfer stations resulting from the increase in the regional direct fee to \$69.50 per ton. Disposal fees incorporate a rate increase to \$95.00 per ton effective January 1, 2008. This rate was adopted by Council in July 9, 2007.

⁸ Based on CERP policy to maintain sinking fund contribution for equipment replacement.

⁹ The new debt service expenditures are anticipated to cover bond issuances anticipated.

¹⁰ This is a scheduled transfer to provide the Construction Fund, 3901, with necessary resources to fund transfer station capital upgrades which will significantly improve current operations and facilitate an efficient transition to waste export.

PHYSICAL ENVIRONMENT PROGRAM PLAN

SWD – Landfill Post-Closure Maintenance

The Solid Waste Post-Closure Maintenance Fund continues to fulfill its mission to maintain closed landfills around King County in compliance with environmental and health regulations. In 2008, the division will continue its efforts to maintain environmental stewardship while making cost-effective expenditures.

Technical Adjustments

Hobart Construction – (\$200,000). This proposed budget adjustment reflects a reduction in a non-recurring request to install pumps and make repairs at the closed Hobart landfill.

Miscellaneous Annual Technical Adjustments - \$33,370. This proposal reflects routine annual technical adjustments in the post-closure maintenance budget.

Central Rate Adjustments – (\$5,511). Central rate adjustments include Flexible Benefits, CX Overhead, Technology Infrastructure and O&M, OIRM, Financial Services charge, Retirement Adjustment, COLA, and Merit Adjustments.

* FTEs do not include temporaries and overtime.

** This includes revised 2007 adopted, initial status quo, and proposed status quo increments. Under FTEs, annualization is included.

P1 PROVIDED THAT: Of this appropriation, \$300,000 shall not be expended or encumbered unless by March 1, 2008, the wastewater treatment division of the department of natural resources and parks, transmits to the council for review and approval by motion a report on (1) strategies to reduce its power consumption at existing facilities; (2) strategies and proposals for negotiating more favorable terms with the its current energy suppliers; and (3) a work plan and schedule to ensure the cogeneration of power at the West Point Treatment Plant has completed the design function by December, 2008, and the construction of new facilities is completed by June, 2009.

The report required by this proviso must be filed in the form of 12 copies with the clerk of the council, who will retain the original and will forward copies to each councilmember and to the lead staff for the growth management and natural resources committee and the regional water quality committee, or their successor.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Wastewater Treatment Division (WTD)

Changes were made to WTD's 2007 Adopted Budget during the PSQ process based on a proposed 2008 sewer rate of \$27.95 and capacity charge of \$46.25, which the King County Council adopted in May 2007. Because the WTD 2008 budget is based on these rates, adopted in May 2007, the 2008 Executive Proposed Budget contains only minor changes to the 2008 PSQ budget. The most significant adjustments were made for central rates and overhead, salaries and benefits, treatment plant chemicals, utilities, permits, grit hauling and disposal, general O&M costs, and the transfer to the Water and Land Resources Division.

WTD Operating

Technical Adjustment

Technical Adjustments - \$1,171,018 and 4.00 TLTs. This proposal makes technical adjustments to the WTD 2008 PSQ budget as a result of changes that have occurred since the 2008 sewer rate was developed. As in previous years, the PSQ phase of the budget was used to document the operating expenditure and revenue assumptions that support the sewer rate. The most significant of these technical adjustments are due to reductions to DNRP overhead and the WLR transfer, allocating two FTEs in Technical Publications to the capital program, and the June TLT reconciliation.

E-Commerce – Capacity Charge - \$40,000. This software program provides the option for capacity charge customers to pay online or via phone using a credit card or e-check. As a result of the IT Conceptual Review in March 2007, the project was recommended for implementation in 2007. The \$40,000 in this proposal is for the ongoing operating costs only (credit card fees).

Redeployment of Supported Positions - \$108,434 and 2.00 FTEs. The Greenhouse Program at the Parks Division is being redeployed to other county agencies. Two of the former Greenhouse positions, staffed by people with developmental disabilities, are going to the Wastewater Treatment Division.

Central Rates – (\$1,319,452). Central rate adjustments were made for Flexible Benefits, Current Expense Overhead, Healthy Workplace Funding, Technology Services O&M, Technology Services Infrastructure, Office of Information Resource Management, Telecommunications Services, Telecommunications Overhead, Insurance, Radio Access, Radio Maintenance, Radio Direct, Prosecuting Attorney Civil Division, Long-term Leases, Facilities Management Division Copy Centers, Financial Services, Financial Management Services Rebate, Retirement, Wastewater Vehicles, Printing and Graphic Arts Loan Repayment, Fixed Asset Data Management, Property Services Lease Admin Fee, and COLA.

C O U N C I L A D O P T E D B U D G E T

Council reduced Greenhouse Program funding in WTD (\$108,434) and (2.00) FTEs (see TA03Redeployment of Supported Positions).

WTD Debt Service

Technical Adjustment

Technical Adjustments - \$173,775. WTD sold \$250 million in sewer revenue bonds in June 2007 at an interest rate of 4.85 percent, which was slightly higher than the assumed 4.5 percent from the adopted sewer rate financial plan (adopted May 2007). The impact of the June borrowing on 2008 is \$248,000 in additional parity debt service, which is partially offset by a \$74,000 decline in subordinated debt service (net \$174,000) and a \$53,000 increase in interest revenue. The net result of all of these changes to debt service and revenues (an increase of \$121,000) produces a slightly lower debt service coverage ratio for 2008 (1.152 vs. 1.153), but does not impact the adopted sewer rate or the amounts placed in the rate stabilization reserve. All financial impacts of this bond sale have been incorporated into the financial plan.

* FTEs do not include temporaries and overtime.

** This includes revised 2007 adopted, initial status quo, and proposed status quo increments. Under FTEs, annualization is included.

ER1 Expenditure Restriction: Of this appropriation, \$792,751 and 7.74 FTEs shall be solely used for the implementation of the King County Flood Control Zone District capital program.

ER2 Expenditure Restriction: Of this appropriation, \$150,000 and 1.8 FTEs shall be used solely to support the programmatic and staffing needs of the Cedar River council.

ER3 Expenditure Restriction: Of this appropriation, \$403,000 shall be used solely for the implementation of the ambient water quality monitoring program.

ER4 Expenditure Restriction: Of this appropriation, \$1,507,500 from Category III funds shall be spent for water quality improvement activities, programs and projects within watersheds served by the county's regional wastewater system. Funds may also be used to reduce water pollution or to preserve or enhance fresh and marine water resources. From Category III funds (Culver program), the following amounts shall be spent solely on the following:

Cedar River Council	\$50,000
EarthCorps	\$168,500
Friends of Issaquah Salmon Hatchery	\$25,000
Friends of Hylebos	\$80,000
Friends of the Trail	\$50,000
Hylebos Stream Team	\$50,000
Salmon Homecoming Celebration	\$30,000
Waterworks Block Grant –local projects	\$550,000
Waterworks Block Grant program staff	\$130,000
WSU Co-op Extension	\$374,000

ER5 Expenditure Restriction: No portion of this appropriation shall be expended or encumbered for services relating to county implementation of the King County Flood Control Zone District flood protection work program and capital program, until an interlocal agreement between the county and the district has been executed.

ER6 Expenditure Restriction: Of this appropriation, \$112,442 and 1 FTE shall be used solely for the implementation of the groundwater protection program.

Water and Land Resources Shared Services 1210/0741

Code/Item #	Description	0741	Expenditure	FTEs*	TLPs
--------------------	--------------------	-------------	--------------------	--------------	-------------

P1 PROVIDED THAT: Of this appropriation, \$50,000 shall not be expended or encumbered unless by July 15, 2008, the water and land resources division of the department of natural resources and parks in conjunction with the solid waste division and the department of public health transmits to the council for review a report on proposed policies of these agencies regarding an update of the Local Hazardous Waste Management Plan ("the plan") that would govern their participation on the management coordinating committee. The report shall propose policy which will consider at a minimum, the quantities, types, generators, and fate of moderate-risk wastes in King County. The report shall also propose policy which will consider hazardous waste volumes entering the solid waste stream and other environmental exposure routes, and necessary actions to limit the entry of these wastes into these exposure routes. The department of public health, in conjunction with the solid waste division and the water and lands resources division, will consult with lead staff of the board of health and the growth management and natural resources committee in report preparation.

The report required by this proviso must be filed in the form of 12 copies with the clerk of the council, who will retain the original and will forward copies to each councilmember and to the lead staff for the growth management and natural resources committee and the board of health, or their successors. If the report is not filed by August 31, 2008, appropriation authority for the \$50,000 restricted by this proviso shall lapse.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Water and Land Resources Division – Water and Land Resources Shared Services (WLRSS)

The 2008 Executive Proposed Budget for Water and Land Resources Shared Services Fund 1210 (WLRSS) is \$29,479,910, with 206.02 FTEs and 1.00 TLT. This budget reflects a \$712,145 or 2.4 percent reduction from 2008 PSQ and 5.9 FTEs fewer than in PSQ and the 2007 Adopted Budget. The WLRSS is a fully reimbursable fund and makes additions and reductions to its staff commensurate with external funding sources. Reductions in the 2008 Executive Proposed Budget are driven by a decreased demand for science support from the Wastewater Treatment Division, declining availability of Surface Water Management (SWM) Fee revenues, and the completion of the grant funded Shoreline Master Plan.

Expanded Service

The Web Improvement Project and the creation of the King County Flood Control Zone District (FCZD) have resulted in new areas of demand for technology and sciences services provided by WLRSS.

Web Page Migration - \$83,447 and 1.00 TLT. Water and Land Resources will migrate its Web site to the new Web Content Management System. This migration will entail a complete review, tear-down, and rebuild of the Web site, which will be undertaken by a temporary position.

Science Support to Flood Control Zone District (FCZD) – (\$120,470) and 2.67 FTEs. The Science and Data Management Section will provide long-term, project specific water quality monitoring, permit support, and data management services for FCZD projects. This proposal provides 0.75 FTE water quality engineering support for project design; 0.50 FTE application development support for facility, flood and project data; and 1.42 FTE of environmental science and water quality scientist support for permitting and monitoring. The negative expenditure results from loaning out labor to FCZD.

IT Support to Flood Control Zone District – \$86,422 and 1.00 FTE. The technology requirements of new FCZD program staff—maintaining computers, software support, desktop maintenance and troubleshooting, server installations and operations, and back up of data—will be sufficient to warrant the addition of a new FTE in the WLRSS Technology section. This position will be supported by division wide overhead.

Inflationary Pressures

The 2007 Surface Water Management (SWM) Fee increase compensated for inflation since the previous fee increase in 2002; however, the increase does not overcome continued inflationary pressures and increasing demands on the SWM fund by federal and state regulatory requirements. As a result, the SWM fund will decrease its support to specific programs and positions in WLRSS in the 2008 Executive Proposed Budget.

Reduced Coordination with Army Corps of Engineers – (\$28,025) and (1.00) FTE. This proposal reduces the FTE who is the point person to coordinate projects with the U.S. Army Corps of Engineers (Corps). WLR will assign other staff to some of the responsibilities previously performed by this position but other pieces of the work program are expected to cease. A portion of this position was loaned out to CIP, which reduces the salary savings associated with the reduction.

Groundwater Program Reduction – (\$106,935) and (0.50) FTE. This proposal reduces the Groundwater Protection Program Manager to a 0.50 FTE and makes other reductions to the Groundwater Program. The result is the discontinuation of groundwater services to the Issaquah Creek Valley and Redmond Bear Creek areas. Only the Vashon-Maury Islands will continue to receive groundwater services in 2008. The reduction in the program will mean no countywide coordination and promotion of groundwater protection, no single division contact for groundwater

PHYSICAL ENVIRONMENT PROGRAM PLAN

issues on Critical Aquifer Recharge Areas, and limited ability to identify and document changes in countywide groundwater conditions.

Science Critical Areas (CAO) Support Reduction – (\$108,809) and (0.93) FTE. This proposal reduces support for Critical Areas Ordinance implementation by reassigning science staff to other projects. Six of the positions partially reduced in this change item are reinstated elsewhere in the budget. A 0.04 vacant FTE position is permanently eliminated—the complementary portion of the full 0.60 vacant FTE is reduced in a technical adjustment. Remaining support for CAO work in the Science Section will be provided by 1.40 FTEs.

Science Natural Lands Support Reduction – (\$29,953) and (0.27) FTE. This proposal eliminates support for the King County Natural Lands Program and discontinues ecological surveys that generate scientific information used to craft management plans for the natural lands in county ownership. The two positions partially reduced in this change item are reinstated in a technical adjustment.

Operational Master Plan (OMP) - \$50,000. To develop a comprehensive strategy for addressing the challenges facing the division—inflation, regulatory requirements, annexation, and other initiatives—WLR in conjunction with the Office of Management and Budget and the Executive’s Office will undertake an OMP in 2008. King County councilmember’s will be invited to participate in the OMP process.

Other Science Reductions – (\$381,037) and (5.74) FTEs. This proposal includes multiple reductions, increases, and reassignments of staff in the Science Section. Reductions are associated with reduced Wastewater Treatment Division funding in support of its capital projects and the elimination of Regional Groundwater interlocal agreements. Increases are associated with hydrologic monitoring at Cedar Hills Regional Landfill (funded by the Solid Waste Division), increased support for near real-time data collection, increased support for specialized consulting support to Wastewater operations, and increased extra help for summer monitoring programs.

Regulatory Requirements

WLR is responsible for ensuring King County’s compliance with numerous federal environmental regulations, including NPDES. The NPDES permit issued by the Washington Department of Ecology requires specific actions, programmatic elements, and performance measures in order to comply with the Clean Water Act. The division prioritizes work necessary to meet these mandatory requirements.

Community Outreach National Pollution Discharge Elimination System (NPDES) - \$154,621 and (0.05) FTEs. This proposal shifts SWM funding from 1.60 vacant FTEs to 1.55 existing FTEs, who will be reassigned to undertake work necessary to comply with the NPDES permit requirements. These positions will focus on public outreach and education regarding non-point source pollution, most of which originates from the actions of individuals. Activities from washing a car to fertilizing a lawn incrementally contribute to the pollution regulated under the NPDES permit.

Science Support for NPDES Permit - \$200,619 and 1.67 FTEs – This proposal reassigns existing WLR science staff to perform work necessary to address the NPDES permit requirement to develop an illicit discharge detection and elimination program for systematically inspecting the county’s drainage system, begin implementing a training program for all county field staff on pollution detection and prevention, catch up on complaint identified water quality site audits, determine the source of action for addressing required maintenance of 71 non-functioning Stormwater facilities, and finish and submit to the state for approval a Stormwater monitoring program to be implemented in 2009.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Technical Adjustment

Shoreline Master Plan Completed – (\$750,105) and (0.62) TLT. The grant supported update to the Shoreline Master Plan will be completed by the end of 2007. The remaining body of work associated with finalizing the Executive proposed version of the plan and council adoption of the plan will be absorbed by existing staff within WLR and the Department of Development and Environmental Services (DDES).

Miscellaneous Technical Adjustments – (\$459,838) and (2.75) FTEs. Miscellaneous adjustments to various accounts. This proposal includes salary increases associated with the bargaining unit 17A labor settlement and partial reduction of positions that are added back for NPDES and in the Culver allocation. One Project Manager II position is entirely eliminated.

Local Hazardous Waste Changes – \$14,387 and (0.20) FTEs. This proposal reduces WLR's Hazardous Waste Management Program by 0.20 FTE, for a total of 29.44 FTEs. The FTE reduction corrects for an error and does not change service levels. This proposal also includes adjustments to loan-in labor, supplies, services, and intra-governmental accounts to bring the division's budget in line with the 2008 Local Hazardous Waste Management Program budget approved by the Management Coordinating Committee.

King Conservation District (KCD) Grant Contingency – \$482,946. Every year WLR receives a number of KCD grants. In the past, these grants have not been included in the annual budget; as a result, WLR must request supplemental appropriations on multiple occasions throughout the year as the grants are awarded. Creating a grant contingency will reduce WLR's need for mid-year supplementals and allow for more efficient budget planning.

IT Equipment Replacement – \$213,215. In accordance with the WLR IT Equipment Replacement Plan, this proposal increases funding for the purchase of replacement desktops, services, printers and peripherals, as well as a number of out-dated switches. This proposal also includes software maintenance subscriptions. The cost of this increase is shared among the multiple funding sources in the WLRSS fund.

Culver Allocation – \$77,083 and 0.20 FTE. Due to an increase in the Wastewater Treatment Division's operating budget, \$77,083 more in Culver Category III funds is available in 2008. The 2008 Executive Proposed Budget allocates the \$1,507,500 in Culver funds as follows: \$50,000 for Cedar River Council, \$374,000 for Washington State University Extension, \$403,500 for Ambient Water Quality Monitoring, \$550,000 for WaterWorks Grants, and \$130,000 for WaterWorks Grants management. This last item increases Culver funding for grants management from 0.80 FTE to a full 1.00 FTE.

Central Rates – (\$89,713). Central rate adjustments include CX Overhead, ITS Infrastructure, Telecommunications Services and Overhead, GIS, Insurance, PAO, Long Term Lease and Lease Administration Fee, Finance, Wastewater Vehicles, Motor Pool, Radio charges, LTGO Debt Insurance, Equipment Repair and Replacement, Property Services Management, and COLA.

Financial Plan Notes:

1/ 2006 actuals based on 14th month ARMS and IBIS. Revenue in ARM/IBIS differed from CAFR by \$1,206. Used ARMS/IBIS because it shows revenue detail.

2/ As part of the WLR financial restructure, Fund 1211 was converted to record costs from the local SWM program. Fund balance from SWM in Fund 1210 was transferred to Fund 1211.

3/ The Shared Services fund operates on a reimbursement basis for all expenditures; no minimum fund balance is required.

4/ Outyear assumptions are as follows:

Revenues: WTD operating and capital increase by 3%; assumption provided by WTD.
SWM transfer assumes 3% annual cost increases.
Local Haz Waste & Other increase by 3.5% annually.

Expenditures: Expenditures projected to meet revenues

COUNCIL ADOPTED BUDGET

Council removed TA03 King Conservation District Grant Contingency – (\$482,946).

* FTEs do not include temporaries and overtime.

** This includes revised 2007 adopted, initial status quo, and proposed status quo increments. Under FTEs, annualization is included.

ER1 Expenditure Restriction: Of this appropriation, \$874,919 and 7.56 FTEs and 1 TLT shall be used solely for the implementation of the King County Flood Control Zone District capital program.

P1 PROVIDED THAT: No portion of this appropriation shall be expended or encumbered for services relating to county implementation of the King County Flood Control Zone District flood protection work program and capital program, until an interlocal agreement between the county and the district has been executed.

P2 PROVIDED FURTHER THAT: Of this expenditure \$474,386 and 4.5 FTEs shall be used solely for the implementation of the basin steward program.

PHYSICAL ENVIRONMENT PROGRAM PLAN

WLR – Surface Water Management Local Drainage Services

The total 2008 Executive Proposed Budget for the Surface Water Management Local Drainage Services Fund is \$22,769,924 for a \$2,033,379 or 8.2 percent reduction from 2008 PSQ amount of \$24,803,303. The 2008 Executive Proposed Budget includes 115.46 FTEs and 2.00 TLTs. The SWM fund continues to face significant pressures from inflation, unfunded regulatory requirements, and annexations. Those pressures are driving reductions in the SWM fund budget. Limited areas of budget increases are tied to the capital program or respond to Executive initiatives.

Annexations

In August 2007, residents of the Lea Hill and West Hill areas voted to annex to the city of Auburn. The Water and Land Resources Division has identified a loss of \$656,320 in SWM fee revenues due to the annexation of these areas.

Auburn Annexation Reductions – (\$640,401) and (0.69) FTEs. The 2008 Executive Proposed Budget makes reductions associated with direct service totaling \$120,000. The transfer to the WLR Capital Improvement Program (CIP) is reduced by \$520,999 to fully compensate for lost revenues.

Expanded Service

WLR capital programs are experiencing two changes that require additional staffing in the SWM fund: the shift toward more environmental restoration projects funded by non-SWM sources and the creation of the new Flood Control Zone District.

Capital Projects Staffing Changes – \$41,322 and 2.50 FTEs. This proposal adds one Environmental Scientist and 0.50 of an Engineer to provide technical support to WLR CIP projects. The 2008 CIP has an increased workload, particularly for projects requiring environmental restoration. One Business and Finance Officer is proposed to provide financial and analytical support to free up the time of engineers and environmental scientists to perform capital work. The majority of costs associated with these positions are loaned out to CIP.

Acquisitions Support to Flood Control Zone District (FCZD) – (\$54,237) and 1.00 TLT. This proposal supports one Real Property Agent who will acquire temporary and permanent easements for FCZD projects and will also acquire repetitive loss properties located in the flood plain. The position is a TLT because the majority of properties will be acquired within the first three years of the FCZD work plan. The negative expenditure is due to the position being loaned out to the FCZD capital program

Capital Support to Flood Control Zone District – (\$81,260) and 1.50 FTEs. This proposal provides 1.50 Engineers to support design and construction of FCZD projects. The negative expenditure is due to the positions being loaned out to the FCZD capital program

Rural Services Initiative – \$45,445. This proposal represents WLR's contribution to the King County Executive's Rural Services Initiative. The Rural Services Initiative is designed to improve service to the county's rural residents through enhanced interdepartmental cooperation. The Rural Services Initiative will include a new Rural Services Manager housed in the Department of Natural Resources and Parks Administration, a team of geographically based Community Liaisons who will be selected from among existing FTEs working in the rural areas, and the creation of a new interagency Rural Planning Team. The costs associated with the Rural Services Initiative were allocated using a methodology based on departmental expenditures in the rural areas.

Inflationary Pressures

PHYSICAL ENVIRONMENT PROGRAM PLAN

The 2007 Surface Water Management (SWM) Fee increase compensated for increases in inflation since the previous fee increase in 2002; however, the increase does not overcome continued inflationary pressures. The disparity between revenue collections and inflationary increases necessitates reductions in the 2008 Executive Proposed Budget for the SWM fund.

Basin Steward Reduction – (\$111,596) and (1.00) FTE. The reduction of a vacant Basin Steward position is necessary due to the pressures on the SWM fund. The remaining 3.5 Basin Stewards will be reallocated in line with Water Resource Inventory Area (WRIA) districts.

Groundwater Reduction – (\$123,359). Due to pressures on the SWM fund, the transfer to Water and Land Shared Services (WLRSS) to support the Groundwater Program will be reduced. See the Groundwater Reduction change item in the WLRSS for a description of the programmatic impact of this reduction.

Capital Improvement Transfers – (\$509,001). In order to balance the SWM fund, the transfer to capital will be reduced. This reduction will be partially offset by \$153,000 in residual bond proceeds available in the SWM CIP fund 3292. The 2008 Executive Proposed transfer to CIP is 25.5 percent of projected SWM fee revenues.

Natural Lands Transfer to Parks – (\$236,655) and (3.00) FTEs. This proposal transfers the three FTEs in the Natural Resource Lands Program to the Parks Division, which performs day-to-day maintenance on the lands. The Parks Division's budget includes an increase for these three FTEs.

Regulatory Requirement

WLR is responsible for ensuring King County's compliance with numerous federal environmental regulations, including the National Pollution Discharge Elimination System (NPDES). The NPDES permit issued by the Washington Department of Ecology requires specific actions, programmatic elements, and performance measures in order to comply with the Clean Water Act. The division prioritizes work necessary to meet these mandatory requirements.

NPDES Permit Requirements – \$670,144 and 3.40 FTEs. This proposal adds two new FTEs to provide science and technical support to the division's efforts to comply with the county's NPDES General Municipal Stormwater Permit, which went into effect in February 2007. This item also includes the reassignment of existing staff who will be involved in the effort to comply with the NPDES permit. The reassignments that appear as additions in this proposal are balanced by reductions in a technical adjustment. Because it includes staff reassignments, this proposal reflects the full cost of NPDES compliance in the SWM fund—other costs are reflected in WLRSS.

Technical Adjustment

Miscellaneous Technical Changes – (\$599,435) and (1.40) FTEs. Miscellaneous changes, including partial reductions to numerous positions that are added back in the NPDES and FCZD change items.

DDES Support Adjustment – (\$143,433). WLR transfers funds to the Department of Development and Environmental Services to support two FTE Code Enforcement Officers to respond to clearing and grading complaints not linked to a specific permit and one seventh of an administrative position. In light of the pressures on the SWM fund, DDES agreed to reduce the overhead it charges for these FTEs by \$143,433 as there would be no impact on DDES overhead if these services were discontinued.

Central Rate Adjustments – (\$290,923). Central rate adjustments include CX Overhead, ITS O&M and Infrastructure, OIRM, PAO, Finance, Motor Pool, Radio charges, LTGO Debt Insurance, Debt Service, Equipment Repair and Replacement, and COLA.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Local SWM Services Fund 1211

* FTEs do not include temporaries and overtime.

** This includes revised 2007 adopted, initial status quo, and proposed status quo increments. Under FTEs, annualization is included.

ER1 Expenditure Restriction: Of this appropriation, \$5,715,955 shall be expended solely for the implementation of the King County Flood Control Zone District capital program.

P1 PROVIDED THAT: No portion of this appropriation shall be expended or encumbered for services relating to county implementation of the King County Flood Control Zone District flood protection work program and capital program, until an interlocal agreement between the county and the district has been executed.

PHYSICAL ENVIRONMENT PROGRAM PLAN

WLR – King County Flood Control Zone District (FCZD)

In April 2007, the King County Council created a new countywide Flood Control Zone District (Ordinance 15728) to implement the 2006 King County Flood Hazard Management Plan, which identifies and recommends projects, programs and policies to address the county's aging flood protection system. Over the course of the summer of 2007, the FCZD Advisory Committee, composed of 14 elected officials and one representative from the Unincorporated Area Councils, met and recommended a budget and work program based on a recommended countywide property tax levy of 10 cents per \$1,000 of assessed valuation. The 2008 Executive Proposed Budget for the FCZD implements the Advisory Committee's recommended work plan based on the recommended levy rate.

Expanded Service

The flood protection work previously undertaken in the River Improvement Fund (with partial revenue support from the former Green River Flood Control Zone District) and the Inter-County River Improvement District are absorbed and greatly expanded by the new countywide FCZD. The 2008 Executive Proposed operating budget for the FCZD is \$5,715,955 with 33.00 FTEs (12 of which are existing and transferred from RIF). Sixty percent of the FTEs are loaned out to the FCZD capital program. The work of the FCZD is organized into five categories: the Snoqualmie/South Fork of the Skykomish River Basin, the Green River Basin, the White River Basin, the Cedar/Sammamish River Basin, and countywide projects.

Snoqualmie/South Fork Skykomish River Basin - \$210,541 and 7.00 FTEs. The Snoqualmie River/South Fork Skykomish River Basin Program will be responsible for implementing flood hazard management projects and programs, staffing the advisory and basin technical committees, and reporting progress to the FCZD's Board of Supervisors, Advisory Committee, and Basin Technical Committee. Specific projects include levee and revetment repairs and rehabilitation; repetitive property loss acquisitions; and home elevations. Specific programmatic elements for the Snoqualmie River/South Fork Skykomish River Basin Program include floodplain and channel migration zone mapping; flood protection facility and flood hazard assessments; and providing technical and engineering assistance to cities.

Green River Basin - \$765,919 and 5.00 FTEs. The Green River Basin Program will be responsible for implementing flood hazard management projects and programs, staffing the advisory and basin technical committees, and reporting progress to the FCZD's Board of Supervisors, Advisory Committee, and Basin Technical Committee. Specific projects include levee and revetment repairs and rehabilitation; repetitive property loss acquisitions; and home elevations. Specific programmatic elements for the Green River Basin Program include floodplain and channel migration zone mapping; flood protection facility and flood hazard assessments; and providing technical and engineering assistance to cities.

Cedar/Sammamish River Basin - \$181,836 and 5.00 FTEs. The Cedar/Sammamish River Basin Program will be responsible for implementing flood hazard management projects and programs, staffing the advisory and basin technical committees, and reporting progress to the FCZD's Board of Supervisors, Advisory Committee, and Basin Technical Committee. Specific projects include levee and revetment repairs and rehabilitation; repetitive property loss acquisitions; and home elevations. Specific programmatic elements for the Cedar/Sammamish River Basin Program include floodplain and channel migration zone mapping; flood protection facility and flood hazard assessments; and providing technical and engineering assistance to cities.

White River Basin - \$375,552 and 2.00 FTEs. The White River Basin Program will be responsible for implementing flood hazard management projects and programs, staffing the advisory and basin technical committees, and reporting progress to the FCZD's Board of Supervisors, Advisory Committee, and Basin Technical Committee. Specific projects include levee and revetment repairs and rehabilitation; repetitive property loss acquisitions; and home elevations. Specific programmatic elements

PHYSICAL ENVIRONMENT PROGRAM PLAN

for the White River Basin Program include floodplain and channel migration zone mapping; flood protection facility and flood hazard assessments; and providing technical and engineering assistance to cities.

Countywide Program - \$3,871,968 and 14.00 FTEs. This proposal includes the following programs: Flood Preparedness, Regional Flood Warning Center, and Post Flood Recovery; Flood Hazard Assessments, Mapping, and Technical Studies; Planning, Grants, Mitigation, and Public Outreach; Resource Management, Annual Maintenance, and Facility Monitoring; Management, Finance, Budget and General Administration. This proposal also includes overhead for the fund.

Technical Adjustment

Central Rates - \$310,139. All central rates previously charged to the River Improvement and Inter-County River Improvement funds are transferred to the FCZD. Central rates include Flex benefits, CX overhead, Healthy Incentives, Telecommunications, Radio, PAO, OIRM CIP, Financial Services, Long Term leases, and COLA.

C O U N C I L A D O P T E D B U D G E T

Increase revenues for capital contracts – \$18,132,484.

Moves funds to Capital Project – (\$18,132,484).

PHYSICAL ENVIRONMENT PROGRAM PLAN

WLR--River Improvement Fund (RIF)

The 2008 Executive Proposed Budget for RIF is \$3,493,636 and 0.00 FTEs. Because the work previously performed in RIF is transferred to the new Flood Control Zone District (FCZD), the 2008 Executive Proposed Budget reduces all expenditures in RIF, except the transfer of all River Improvement Levy revenue to the FCZD capital fund. The remaining fund balance will be transferred to the FCZD operating fund to serve as seed money for the first year of operations.

Technical Adjustment

Technical Adjustment – (\$441,876) and (12.00) FTEs. All expenditures and FTEs are transferred to the new FCZD fund. The only expenditures remaining in the fund are a transfer of all River Improvement Levy revenues to the FCZD capital fund and the transfer of remaining fund balance to the FCZD operating fund to serve as seed money. All 12 FTEs in RIF are transferred to the new FCZD.

Central Rates Adjustments – (\$231,184). All central rate charges are transferred to the new FCZD.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Target Fund Balance ⁴	275,519	341,648	379,567	0	0	0

Financial Plan Notes:

¹ 2006 Actuals are from the 2006 CAFR.

² 2007 estimated based on updated assumptions, current expenditures, and supplemental appropriations.

³ The River Improvement Levy is discontinued effective 2008. Collections in 2008 and beyond are estimated delinquent collections from prior years.

⁴ Target fund balance is 7% of adopted fund revenues through 2007. The new countywide Flood Control Zone District is absorbing the work of the River Improvement Fund and the River Improvement Levy is discontinued effective 2008. The River Improvement Levy fund balance will be transferred to the new FCZD operating fund. Because no work is being done in the fund, there is no need for a fund balance and beginning in 2008 the target fund balance is 0.

⁵ Any undesignated fund balance remaining after 2007 end of year accounting will be transferred to the FCZD operating fund through a supplemental request or in the next year's budget.

C O U N C I L A D O P T E D B U D G E T

Council ended the River Improvement Levy, the primary source of revenue to the fund, and reduced the RIF budget commensurately. The council adopted 2008 Budget for RIF is \$566,636.

PHYSICAL ENVIRONMENT PROGRAM PLAN

WLR – Inter-County River Improvement Fund (ICRIF)

The 2008 Executive Proposed Budget for the Inter-County River Improvement Fund (ICRIF) is \$67,000 and 0 FTEs. The work plan of the ICRIF is subsumed by the new countywide Flood Control Zone District (FCZD). The 2008 Executive Proposed budget consists of a transfer of all ICRIF revenues to the FCZD capital budget. All central rate charges are also transferred to FCZD.

Technical Adjustment

Technical Adjustment - \$24,030. This proposal reduces all expenditures except the transfer of RIF revenues to the new FCZD fund.

Central Rate Adjustments – (\$11,366). Central rates for Finance Services Charge and Equipment Repair and Replacement are transferred to the new FCZD fund.

WLR – Noxious Weed Control Program

The 2008 Executive Proposed Budget for the Noxious Weed Control Program is \$1,572,316 with 12.51 FTEs. Due to sound financial management practices, WRL's Noxious Weed Control Program was able to delay a proposed fee increase until 2008. The last Noxious Weed Fee increase was in 2002. The Executive Proposed Budget assumes that the Noxious Weed Fee will increase 37 percent from \$1.50 to \$2.05 per parcel in 2008. The increase will generate \$416,000 in new revenue annually and will compensate for inflation and enable the program to undertake a survey of county-owned lands to identify a strategy to better manage those lands. The fee increase will also build a rate reserve that will ensure the program's stability and delay the need for another fee increase until 2011.

Expanded Service

Rate Increase/New Initiatives - \$129,021 and 0.67 FTE. The Noxious Weed Control Program is proposing a \$0.55 fee increase, bringing the fee up to \$2.05 per parcel. The 2008 Executive Proposed Budget dedicates \$129,021 of the fee increase to a detailed survey of county lands and the development of a strategy to better manage noxious weeds on county owned lands. This proposal also includes \$8,885 for matching funds for grants anticipated in 2008.

Technical Adjustment

Technical Adjustment - \$44,644 and 0.48 FTEs. This proposal authorizes a small increase in staffing levels to implement externally funded high priority activities, including riparian knotweed control projects, on rivers throughout the county. Revenue is anticipated from the Washington Department of Ecology, the United States Forest Service, and the US Fish and Wildlife Service to support this work.

Central Rate Adjustments – \$19,781. Central rate adjustments include CX Overhead, Finance, Equipment Repair and Replacement, PAO, OIRM, Wastewater Vehicles, Motor Pool, ITS Infrastructure, and COLA.

ISSUES AND PRIORITIES

**Mission
Transportation**

To improve the quality of life for the citizens of King County by providing mobility in a way that protects the environment, helps to manage growth, and reduces traffic congestion.

The Department of Transportation’s (DOT) 2008 Executive Proposed Budget reflects a continuing need to address the transportation priorities of King County efficiently and economically within funding constraints. This has required prudent financial management on the part of all DOT divisions in order to preserve services to the community.

The 2008 Executive Proposed Budget includes the following DOT agencies:

- **The Director’s Office** will continue to provide leadership, advocacy and support for the Department, its customers and the community.
- **King County Metro Transit Division** continues to implement strategies to manage costs and ensure revenues sufficient to meet growing demand for services and systems. In response to Council Motion 12456, the Executive Proposed Budget for the Transit Division is a Biennial Budget submission. Budgets for the biennial period of 2008-2009 have been prepared for the following appropriation units: Transit Operating, DOT Director’s Office, Public Transportation Capital Program and Transit Revenue Vehicle Maintenance.

Because revenues have not kept pace with inflation, especially costs associated with fuel and employees, the 2008 Executive Proposed Budget includes a fare increase for all categories of Transit riders. The fare increase will help preserve current service levels and help meet the need for increased scheduled maintenance hours to ensure continued high quality customer service.

- **Road Services Division (RSD)** is emphasizing strategies to improve safety and be proactive and comprehensive in its approach to climate change. The Road Services Division strives to increase mobility through arterial networks, bridge rehabilitation, and corridor system improvements, while ensuring the preservation of the existing transportation system.
- **King County International Airport (KCIA)** continues to maintain basic operations. The 2008 Executive Proposed Budget for the King County International Airport (KCIA) assumes that operations in 2008 will remain essentially the same as for 2007. The budget does not include any redevelopment proposals or major changes in operating structure.

Transit Division Biennial Budget

The development of a meaningful biennial budget for the Transit and DOT Director’s Office appropriation units required a concerted effort to make the best estimates possible for change drivers effecting the second year of the biennium. The tables below highlight the key assumptions used in preparing both the 2008 and 2009 components of the biennial budgets. The mid-biennial review will focus on how these assumptions have changed and the impact any changes have on the services to be delivered by the Transit and DOT Director’s divisions.

General Assumptions

Category	2008	2009
COLA*	2.63%	2.21%
CPI – National	2.92%	2.82%

* Due to the complexity and schedule of the biennial budget process, Transit had to finalize 2008

PHYSICAL ENVIRONMENT PROGRAM PLAN

COLA assumptions and begin preparing the 2009 budget prior to additional economic information becoming available in September. As a result, Transit's 2008 COLA assumption differs from the COLA rate in the rest of the 2008 Executive Proposed Budget.

Revenue Assumptions

Category	2008	2009
Sales Tax – annual growth rate	6.34%	6.06%
Fare Revenue – with increase in 2008	\$87.3 million	\$92.5 million
Ridership	108.3 million	110.0 million

Federal Grants are assumed to support elements of the Public Transportation Capital Program. Notably, the SR520 Urban Partnership Program the financial plan assumes revenue backed capital items totaling \$41 million and support for 3 million annual bus hours, starting in 2009.

Expenditure Assumptions

Category	2008	2009
Employee Benefits – flex rate	\$1,148 per month	\$1,246 per month
Retirement Rates (PERS)	7.24%	8.705%
Diesel Fuel	\$2.60 per gallon	\$2.70 per gallon
Gasoline	\$2.90 per gallon	\$2.90 per gallon
Cost Per hour – Bus	\$120.69 or 4.4% increase	\$125.64 or 4.1% increase
Cost Per hour – Access	\$37.87	\$40.13
Contract Expenses (Bus)	\$40.6 million	\$42.3 million
Central Rates – rates of growth:		
Workers Comp	3.39%	8.45%
Risk Administration	15.00%	15.00%
Current Expense Overhead	3.00%	3.00%
Technology Services	8.00%	8.00%

Service Expectations

The biennial budget supports the implementation of the Transit Now program approved by voters in November 2006. The table below shows the service hours that are currently planned to be added during the biennial period. Service hour increases must be sustainable in the financial plan. As a result, changes in the assumptions outlined above could have an impact on both the timing and the size of service increases.

Service Category	2008	2009
Bus Service – New annual hours	25,100	8,000
Bus Service – Developing Areas	12,750	8,300
Bus Service – Schedule Maintenance	18,750	19,000
Bus Service – Partnership Hours	33,750	18,000
Bus Service – Lake Washington Urban Partnership		28,000
Vanpools in Operation	882	954
Access Trips	1,174,900	1,210,000

Other Biennial Assumptions

By July 2009, Central Link Light Rail is expected to begin revenue service. At the time the biennial budget for 2008/2009 was being prepared, staffing and other operating assumptions were still evolving. The biennial budget includes the best estimate of these costs as of July 2007. During the mid-biennial review it is anticipated these costs will be refined. The cost of Light Rail operation is revenue-backed by Sound Transit and does not have a negative impact on the Public Transportation Finan-

PHYSICAL ENVIRONMENT PROGRAM PLAN

cial Plan.

A significant increase is anticipated in the 2008 budget of 64,237 service hours by (113,311 annual service hours) and 3,320 DART hours. The annual change in hours of service include: 1) 37,850 hours of new annual service, 2) 33,750 hours of partnership service, 3) 7,655 hours for unscheduled overtime, 4) 18,750 hours for schedule maintenance, 5) 16,816 hours of Sound Transit service and 6) other changes. Because 2008 is a leap year, the 2008 budget adds a day of service. This proposal also increases 2009 budgeted service hours by 75,540 (70,961 annual service hours), while DART hours are essentially unchanged. The annual change in hours of service include: 1) 16,300 hours of new annual service, 2) 46,000 hours of partnership service, 3) 1,213 hours for unscheduled overtime, 4) 19,000 hours for schedule maintenance, 5) 5,264 hours of Sound Transit service and 6) other changes.

Transit Fare Increase

The 2008 Executive Proposed Budget assumes fare increases across all categories of Transit ridership. Since the most recent fare increase in 2001, fare collections and sales tax revenues have not kept pace with inflation in Transit costs, especially in the areas of fuel and employee costs. A fare increase will support the preservation of current service and quality levels by improving service dependability, reliability and predictability, and bring fare revenue closer to King County Council policies for funding transit by users and non-users: recovering 75 percent of operating costs from taxpayers and 25 percent from operating revenues, such as fares and advertising. The proposed fare increase will bring Transit's fares more in line with those of its regional partners. The need for a fare increase is not related to expanded service associated with Transit Now. The effective dates for the fare increases are:

March 1, 2008

- All Retail Adult

July 1, 2008

- Youth – Timing consistent with School District budget cycle
- Senior and Disabled – Provide additional time to communicate the change
- Access – Provide additional time to communicate the change
- UW Upass – Fares to change with annual pricing update
- FlexPass – New fares with contract renewals; with all updated by July 1, 2008

A comparison of current to proposed fares is presented in the table below:

Fare Categories	Current	Proposed
Cash		
Adult Off-Peak	\$1.25	\$1.50
Adult Peak 1-Zone	\$1.50	\$1.75
Adult Peak 2-Zone	\$2.00	\$2.25
Youth	\$0.50	\$0.75
Senior/Disabled Off-Peak	\$0.25	\$0.50
Senior/Disabled Peak	\$0.50	\$0.50
Access	\$0.75	\$0.75
Monthly Retail Passes		
Adult Off-Peak	\$45.00	\$54.00
Adult Peak 1-Zone	\$54.00	\$63.00
Adult Peak 2-Zone	\$72.00	\$81.00
Youth	\$18.00	\$27.00

PHYSICAL ENVIRONMENT PROGRAM PLAN

Senior/Disabled	\$5.50	\$9.00
Access	\$13.50	\$18.00

Current fare polices with respect to peak and zone surcharges, Youth and Senior/Disabled discounts, and regional pricing consistency for adult and youth fares will continue under the new fare schedule.

ACCESS fares will approach parity with regular fares, consistent with adopted fare policy in Motion 10728.

Road Services Division

The Road Services Division (RSD) strives to increase mobility through arterial networks, bridge rehabilitation, and corridor system improvements, while ensuring the preservation of the existing transportation system.

The 2008 Executive Proposed Budget for the Road Services Division focuses on roadway safety and the safety of division employees as they maintain the county's infrastructure, while also improving the division's responsiveness during winter storms. The 2008 Executive Proposed Budget continues to invest resources to allow the Roads Services Division to comply with new federal permit requirements for increased water quality monitoring and reporting, as well as endangered species protections. The division will increase its participation in countywide initiatives and projects, as well as provide support to the new countywide Flood Control Zone District in the 2008 Executive Proposed Budget.

In addition, the Road Services Division continues to respond to the pressures of annexation by identifying expenditure savings and revenue losses associated with the annexation of Lea Hill and West Hill areas to the city of Auburn in 2008

King County International Airport

The King County Airport (KCIA) supports the economic vitality of the county, the National Air Transportation System, and provides safe and continuous general aviation airport services.

The 2008 Executive Proposed Budget for the King County International Airport (KCIA) assumes that operations in 2008 will remain essentially the same as for 2007. The budget does not include any re-development proposals or major changes in operating structure. The proposed adjustments to the budget emphasize infrastructure management, maintenance of airport systems, and improved service.

Fleet Administration

Fleet Administration will continue to provide quality and responsive vehicle services, parts, road materials, and supplies at competitive cost to customers. Fleet Administration continues to efficiently manage the costs of the county's fleet. In 2008, Fleet is challenged to minimize customer rate impacts amidst uncertain fuel costs and rising costs of supplies and support.

* FTEs do not include temporaries and overtime.

** This includes revised 2007 adopted, initial status quo, and proposed status quo increments. Under FTEs, annualization is included.

P1 PROVIDED THAT: Of this appropriation, \$500,000 shall not be expended or encumbered until the council reviews and accepts by motion, a plan to construct a pedestrian walkway from the Pacific Cascade Freshman Campus School to Klahanie SE/252nd Avenue SE. The plan shall include a description of the scope of work, an itemized engineer's estimate, and a schedule that indicates project completion in 2008 or substantive reasoning as to why the project cannot be completed in 2008. Under any scenario, the project schedule shall indicate a completion date not later than June 30, 2009. If the report is not filed by April 1, 2008, the appropriation authority for the \$500,000 restricted by this proviso shall lapse.

The plan required to be submitted by this proviso must be filed in the form of 11 copies with the clerk of the council, who will retain the original and will forward copies to each councilmember and to the transportation committee, or its successor.

PHYSICAL ENVIRONMENT PROGRAM PLAN

PROGRAM HIGHLIGHTS

Department of Transportation Director's Office

The Department of Transportation (DOT) Director's Office will continue to provide department-wide leadership, advocacy, and support for all DOT divisions. The DOT Director's Office will work to achieve alignment with the county's reorganization of technology staff and to implement strategies to reduce costs. The 2008-2009 biennial budget for the DOT Director's Office is \$12,429,010, 37.50 FTEs and 2.00 TLTs.

2009 Base Budget

Initial Status Quo Budget - \$5,902,215. The 2008-2009 biennial budget was prepared using the Initial Status Quo as the basis for both the 2008 and 2009 budgets. The ISQ Budget is included in the 2008 Status Quo Budget and again here as the starting point for the 2009 Proposed Budget. All proposals listed below reflect their total 2008 and 2009 impact.

2009 PSQ Adjustments – \$186,756. This includes various adjustments to the base budget such as salary and benefit adjustments, eliminating one-time expenditures, central rates, COLA and merit that would ordinarily be done during the PSQ process.

Technical Adjustment

DOT Administration Support Realignment – \$0 and 1.00 FTE and (1.00) TLT. This proposal eliminates 1 TLT and creates 1 FTE (both Administrative positions). This request supports an overall realignment strategy to provide leadership and address integration of social, health, economic, environmental and other initiatives into transportation issues at the Director level within the DOT.

DOT Director's Office Organizational Realignment – \$294,584. This proposal is part of an overall strategy to provide leadership and address integration of social, health, economic, environmental and other initiatives into transportation issues at the Director level within DOT and a fundamental shift in the way transportation is managed.

Redeployment of Supported Positions - \$176,352 and 1.50 FTEs. The Greenhouse Program at the Parks Division is being redeployed to other county agencies. One and a half of the former Greenhouse positions, staffed by people with developmental disabilities, are going to the DOT Director's Office.

Printing and Graphic Arts Transfer - \$86,832 and 2.00 FTEs. The King County Printing and Graphic Arts Division is being disbanded. This proposal reallocates funds within the Director's Office and recovers some of the costs by charging DNRP and various other agencies within the County for services provided by the photographer and graphic artist formerly located in the Printing and Graphic Arts Division.

Central Rates – (\$144,840). Central rate adjustments include Flexible Benefits, Current Expense Overhead, Health Workplace Funding, Technology Services O&M, Technology Services Infrastructure, Geographic Information Services, Office of Information and Resource Management, Motor Pool Usage, Prosecuting Attorney Civil Division, Long Term Leases, Facilities Management Division Copy Centers, Retirement, Industrial Insurance, Printing and Graphic Arts Loan Repayment, Property Services Lease Administration Fee, Major Maintenance Repair Fund and Countywide Strategic Technology Projects.

PHYSICAL ENVIRONMENT PROGRAM PLAN

C O U N C I L A D O P T E D B U D G E T

Reduce Greenhouse Program funding – (\$176,352) / (1.50) FTEs.

Organizational Realignment – (\$294,584).

Offset Reduction to COLA due to Reduction of Greenhouse Program Funding – \$1,302.

COLA Reduction due to Reduction of Greenhouse Program Funding – (\$1,302).

Financial Plan Notes:

¹ Per adopted budget, 2008 costs include County Agency support for:

startup	783,315
staffing	250,000
shuttle	418,464
	<u>1,451,779</u>

² Additional 2008 revenues and expenditures to be determined following approval of Interlocal Agreement between Ferry District and County. Per Resolution #FD-2007-06.2, adopted by the King County Ferry District on November 15, 2007, these costs will include:

- Operating and maintenance costs for Vashon - Seattle service
- Operating and maintenance costs for Elliot Bay Water Taxi
- Support costs

³ Estimated operating costs for 2009 and 2010 from service plan and financial plans as submitted to the Ferry District by the Executive on November 8, 2007.

* FTEs do not include temporaries and overtime.

** This includes revised 2007 adopted, initial status quo, and proposed status quo increments. Under FTEs, annualization is included.

P1 PROVIDED THAT: The transit division shall not enter into, or authorize its contractor to enter into, any new agreements, or extend any such existing agreements, for exterior bus advertising that involve covering any portion of a bus side window.

P2 PROVIDED FURTHER THAT: Of this appropriation, no funds shall be expended on any of the 28,000 annual hours of bus service included in the SR520 Urban Partnership Initiative until the executive transmits and the council adopts by motion a Public transportation fund financial plan demonstrating how that service would be funded without using King County's transit local option sales tax revenues or fare revenues from any other King County Metro service.

Eleven copies of the plan should be filed with the clerk of the council who will keep the original and forward a copy to each councilmember and the lead staff to the transportation committee, or its successor.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Transit Division

The Executive Proposed Budget for the Transit Division includes funding for 2008 and 2009.

Transit Operating

The 2008-2009 Executive Proposed Biennial Budget for Transit Operating is \$1,130,285,903 with 4,163.35 FTEs and 34.96 TLTs.

2009 Base Budget

Initial Status Quo Budget - \$501,870,685. The 2008-2009 biennial budget was prepared using the Initial Status Quo as the basis for both the 2008 and 2009 budgets. The ISQ Budget is included in the 2008 Status Quo Budget and again here as the starting point for the 2009 Proposed Budget. All proposals listed below reflect their total 2008 and 2009 impact.

2009 PSQ Adjustments - \$48,000,253 and 140.36 FTEs. This includes various adjustments to the base budget such as eliminating one-time expenditures, annualizations, technical adjustments, central rates, COLA and merit that would ordinarily be done during the PSQ process.

Ensure Customer Service

The King County Metro Transit Division, one of the ten largest transit systems in the country, provides bus, paratransit, and vanpool services throughout King County. Transit continues to implement strategies to manage costs and ensure revenues to meet growing demand for services and systems.

Bus Service - \$16,061,833 and 98.56 FTEs. This proposal increases 2008 budgeted service hours by 64,237 (113,311 annual service hours) and DART hours by 3,320. The annual change in hours of service include: 1) 37,850 hours of new annual service, 2) 33,750 hours of partnership service, 3) 7,655 hours for unscheduled overtime, 4) 18,750 hours for schedule maintenance, 4) 16,816 hours of Sound Transit service and 5) other changes. The increase in budgeted hours also reflects that 2008 is a leap year, adding a day of service. This proposal also increases 2009 budgeted service hours by 75,540 (70,961 annual service hours) while DART hours are essentially unchanged. The annual change in hours of service include: 1) 16,300 hours of new annual service, 2) 46,000 hours of partnership service, 3) 1,213 hours for unscheduled overtime, 4) 19,000 hours for schedule maintenance, 4) 5,264 hours of Sound Transit service and 5) other changes.

Paratransit Service Changes - \$5,873,353. This proposal will allow Access to maintain the paratransit program at the service level described in the Americans with Disabilities Act (ADA) plan. Access is expecting to provide over 1.16 million boardings in 2008, up 3.0 percent over adjusted 2007 boardings, and 1.19 million in 2009, 3.0 percent over 2008 boardings. A total estimated 650,531 vehicle service hours in 2008 and estimated 666,240 vehicles services hours in 2009 will be needed to support the boardings. Productivity is projected to be 1.79 and 1.80 rides per vehicle service hour in 2008 and 2009 respectively—an increase over the 1.77 projected for 2007. Access service provider and call center contracts were re-procured in 2007. Budget projections include Access service enhancements to fill five identified rural service gaps as part of the Transit Now initiative.

Vanpool Service - \$1,617,762. This proposal supports a projected increase in the direct operating expenses of commuter van service. Vanpool and vanshare projections for 2008 are 460 new annual daily riders and 96 new vanpool groups with a similar increase for 2009. By the end of 2008, a projected 1,093 vans traveling 14.4 million miles will serve an average of 9,341 daily riders, and by the end of 2009 a projected 1,189 vans traveling 15.3 million miles will serve an average of 10,057 daily riders.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Transit Now – Other Investments - \$357,254 and 0.50 FTE. As part of the Transit Now Initiative, the Community Access Transportation Program will expand by creating five to ten new partnerships in both 2008 and 2009 with agencies that serve Access (Americans with Disability Act) eligible riders, seniors, and people with special transportation needs. Operating investments will support doubling the number of commuter vanpools by 2016. Of this proposal, \$243,477 supports the Community Access Transportation Program and \$113,777 supports the Van Expansion Start-up and Simplification Strategies.

Research and Management Information – Surveys - \$90,000. This request includes funding for two activities. The 2007 Adopted Budget moved the funding for the Rider/Non-Rider survey from an annual to a triennial schedule. This request modifies the timing to conduct a complete survey on a biennial basis and conduct a smaller, focused survey in the intervening years. Information from the Rider/Non-Rider survey is used in Transit's performance measurement reporting and provides feedback about changes in Transit services as they are being made. The impact is an increase of \$30,000 in 2008. The 2009 Status Quo Budget includes \$130,000 to support the full survey at a cost of \$160,000. The request also adds \$15,000 to the consulting services budget to support the increased cost of validating the automated passenger counter (APC) data reported to the Federal Transit Administration, through the National Transit Database. Annual validation of the APC system is a requirement of the FTA, who provides more than \$60 million in annual grants.

Part-time Operator Recruitment - \$220,000. By the end of 2009, Transit will have added more than 180,000 annual hours of bus service. With the approval of the Transit Now proposal, the system is anticipated to grow up to 20 percent by 2016. Service growth coupled with the normal attrition of Operators requires a focused emphasis on the recruitment of an increasing number of potential Operators. The growing economy and relatively tight job market increase the difficulty of finding Operators. These additional funds will provide for targeted advertising on-line and in newspapers, job fairs, and creation of advertising and promotional materials. Many of these efforts have been tested in 2007 and have proven to be an effective means of attracting candidates. This is a two-year program spanning 2008 and 2009.

Bellevue Base Extended Hours - \$656,700 and 4.40 FTEs. Bellevue Base operates Monday through Friday; weekend service is operated out of East Base. This request is to operate the Bellevue Base seven days a week – adding staff on the weekends. Currently, East Base maintenance staff is working significant amounts of overtime in order to perform scheduled maintenance activities and ensure that vehicles are ready to be put into service. Transit has seen degradation in a couple of key performance measures – on-time performance and miles between trouble calls. These measures are an indication of the reliability of the system. When vehicles are not available for service, the result can be missed trips and passengers who have to wait for the next bus. In addition, service increases by King County, as well as Sound Transit, on the east side will likely be operated from Bellevue Base, further increasing the need to expand base operations and maintenance. This request will increase and reallocate staffing in Transit operations to allow operators to report to Bellevue Base on the weekends rather than reporting at East Base and then having to travel to Bellevue Base to collect their assigned coach and begin their route. It will also add and reallocate resources in Vehicle Maintenance to provide maintenance activities on the weekends, which will support the addition of Saturday and Sunday service at Bellevue Base.

Route Promotion and Marketing - \$500,000 and 1.00 FTE. Transit now funding, passed by the voters in November 2006, will expand transit service by up to 20 percent over the next decade, including creation of five Rapid Ride Bus Rapid Transit routes and new service to developing areas. In support of service implementation, targeted route promotion activities have proven to be successful in raising public awareness of the improvements and generating ridership increases. This proposal adds sufficient funds to the Marketing and Service Information group to allow for consistent, ongoing route promotion and marketing activities and funds targeted route and corridor promotions, partnership pro-

PHYSICAL ENVIRONMENT PROGRAM PLAN

grams, new resident and new employee type programs, and transportation promotion programs. In addition, the proposal includes funding a new position to manage the new and expanded promotions for Rapid Ride, increased service on high-ridership routes and new service in growing areas, especially in South and East King County.

Service Support - \$1,174,158 and 5.00 FTEs. Over the next ten years, Transit will be increasing bus service by up to 20 percent over current levels. In order to maintain and improve the quality of our service, a number of additions are proposed to complement the increase in bus service. When the Transit Now proposal was developed, an assumption of increased service support was included in the costs. While there was a provision for additional costs, the expectation was that individual budget processes would include identifying and justifying any increases. The 2008/2009 biennial budget proposes a number of additions to increase service support, including five ongoing positions.

Transit Police – South King County - \$1,428,996. The purpose of this proposal is to provide a consistent security presence in South King County during the hours that have the highest number of security calls. With the addition of five Deputies, Metro Transit Police will be able to consistently provide two patrol deputies to South King County, four to five days per week for a total of approximately 20 patrol hours per day. Additional officers are expected to be available in the fourth quarter of 2008.

Transit Police – Downtown Seattle and Transit Tunnel - \$1,209,750. During tunnel closure, security resources were shifted from the tunnel to the Seattle central business district. This proposal supports the continuation of this effort as current resources will be directed back to the tunnel. The proposal adds a Sergeant and four Deputies.

Transit Police – Additional Captain - \$401,150. This proposal adds a second Captain to provide evening coverage and backfill for existing staff. Metro police are moving toward a 24/7 operation, driving a need to provide guidance, direction and support to sergeants and deputies over this extended period.

Smartcard System Start-up - \$1,405,104. This proposal updates the existing budget to reflect the estimated new and revised costs and revenue associated with implementation of the Regional Fare Coordination “Smartcard” system. The existing system of tickets and passes will be replaced by Smartcards in early 2009. This will potentially allow riders to use one fare-payment card on King County Metro Transit, Sound Transit, Community Transit, Everett Transit, Pierce Transit, Kitsap Transit and the Washington State Ferry system. Costs projected for 2009 include some one-time elements that are anticipated to be reduced as implementation continues into its second full year in 2010.

Transit Police – Graveyard Shift - \$987,444. This proposal supports the addition of two Sergeants and six Deputies within the King County Sheriff’s Office (KCSO), to create a graveyard shift. The graveyard staff will be responsible for closing the Downtown Seattle Transit Tunnel (DSTT), handling Night Owl duties, clearing shelters and opening the DSTT. KCSO deputies will replace the off-duty Seattle police officers who currently provide Night Owl security. Deputies on the graveyard shift will also be able to provide some limited King County patrol.

Invest in Infrastructure

Pursuant to adopted financial policies, Transit is required to maintain a multi-year planning process that provides for the capital replacement and expansion needs of existing and planned service.

Special Projects and Division-wide Coordination - \$240,108 and 1.00 FTE. This is a request for a new position in the Transit General Manager’s Office. The Special Projects Manager will manage a variety of division-wide special projects that have significant policy, operating, safety, and cost implications. Responsibilities will include leading agency-wide committees that address division needs

PHYSICAL ENVIRONMENT PROGRAM PLAN

such as pandemic flu planning and reducing workers compensation costs; acting as liaison to industry professional associations, including the American Public Transportation Association; acting as division liaison on federal, state, and local legislative issues; coordinating the development and implementation of an array of policies and programs to respond to division-wide needs, including organizational development, strategic planning, program effectiveness and management issues; and working with staff at all levels throughout Metro, KCDOT, union representatives and other County departments as needed.

Implementation of Information Technology Business Plan - \$1,084,978, 4.00 FTEs and 2.00

TLTs. An Information Technology (IT) Business Plan has been developed that outlines an overriding methodology for the provision of IT services within the Transit Division. The methodology introduces a structured, holistic approach to managing Transit's information technology applications and infrastructure. As part of this plan, a new position (a Business Analyst) has been defined and will be introduced into the Transit Division. This proposal provides for the addition of four Business Analysts (Bas) over the biennial period of 2008-2009. The first year, two new Bas will begin developing technical requirements and documentation for over 50 Transit software applications. Service level agreements will be drafted between Transit IT and the different business sections of Transit based on the documented requirements developed. The second year, the number of Bas will be expanded by two and Transit will begin assigning each application to a BA to coordinate enhancements, manage and implement the service level agreement, and keep all documentation up to date. In addition to the Bas, two term-limited temporary Database Administrators are requested in order to enhance the IT section's ability to perform work and update systems. These positions are requested for two years. At the end of that period of time, systems will have been standardized onto a few select platforms and will be maintained by the current staff.

Service Communication – First Line - \$184,948 and 2.00 FTEs. This is a short-term request to provide additional staffing during the installation of the new radio system. Positions will be required for approximately one year. During installation, old and new systems will be operating simultaneously until the entire fleet is outfitted with the new system radios. The new radio system implementation is scheduled to begin in July 2009. Current plans call for a staggered installation by channel. In order to maintain 100 percent fleet communication for safety and security, it will be necessary to operate both old and new systems simultaneously. During this installation, coaches will be pulled from the fleet and outfitted with new radios. A dedicated channel will need to be established to communicate with those coaches having new radios until all coaches assigned to an existing channel are outfitted.

Manage Costs and Ensure Revenue

Pursuant to adopted financial policies, financial planning for the Transit Program will balance service goals with the appropriate mix of operating and capital revenues and expenditures, as well as provide reserves to maintain stability in the overall program. This category includes identifying opportunities to expand public transportation services through agreements with other organizations.

LINK Light Rail Start-up - \$175,390 and 1.00 FTE. This proposal provides funding and staff to support facility maintenance of the three sub-stations during the LINK startup period. Transit has identified the need to maintain the three sub-stations, including daily cleaning and removal of graffiti, beginning in October 2008. Four positions will be hired in October 2008 and annualized to 4 FTEs in 2009.

Extended Tunnel Hours - \$1,682,294 and 3.75 FTEs. When Central Link Light Rail begins passenger service in 2009, the hours of operation for the Downtown Seattle Transit Tunnel will be expanded to 20 hours per day (from the current 14 hours per day Monday through Friday). With the implementation of light rail service, buses and trains will operate jointly in the tunnel. Transit retains responsi-

PHYSICAL ENVIRONMENT PROGRAM PLAN

bility for the operation and maintenance of the tunnel. Per the terms of the interlocal agreement between King County and Sound Transit, costs of tunnel operation and maintenance will be shared based on the amount of service operating in the tunnel. Sound Transit will pay 100% of costs solely due to LINK, 17% of costs solely due to bus and 40% of joint costs. No agency currently provides joint bus and tunnel operations. Adequate staffing levels are needed to ensure that communications between the bus and rail operations are effective to avoid accidents or incidents. Extended tunnel hours will require an increase in a number of transit activities including operations service supervisors, utility costs, security guard services and transit police.

Seattle Streetcar - \$320,384 and 2.29 FTEs. This proposal increases funding and staffing for Power & Facilities to the 2008 amount that is projected in support of the Seattle Streetcar. It also funds the addition of a South Lake Union Maintenance Mechanic, starting mid-year.

Technical Adjustment

Special Needs Washington State Department of Transportation (WSDOT) - \$2,433. WSDOT grant funding varies from year to year. The budget is adjusted annually so that expenditures are equal to projected grant funding. Funding for WSDOT Special Needs grants for the 2007-2009 biennium is \$5.85M, with \$4.53M slated for operating projects. Transit anticipates the State will continue to fund the special needs grant in the 2009-2011 biennium with a similar distribution of operating funds. The grant will fund several continuing programs within Access. The Hyde bequest will expend no operating dollars in 2008 and 2009.

Capital Program Staffing – \$0, 4.00 FTEs and (27.49) TLTs. In 2008, this proposal removes staffing for a partial line crew and converts four existing TLTs to FTEs as their capital program support is viewed as ongoing in the Power and Facilities Section. A TLT is requested to support the Signage Project in the Sales and Customer Services Section. In 2009, this proposal removes 23.5 TLTs in Vehicle Maintenance that are currently supporting the Breda Conversion and Central Atlantic Base Expansion Projects.

Operating Grants – (\$3,878,933), (2.00) FTEs and (1.00) TLT. Each year, operating grants are zero-based to reflect the grants received and the staffing necessary to meet operating grant requirements. In 2008, this proposal adjusts the operating grant amounts for the division. The significant decrease is primarily the result of completing the Low Income Car Sharing program. At this time grant revenue is projected to decline slightly in 2009 as various grants are completed.

Prosecuting Attorney Office Support – \$90,416. Given the increasing number and complexity of the county's intergovernmental projects, the Department of Transportation has agreed to fund a temporary, dedicated position (.50 TLT) within the PAO. Commensurate with the work program, Transit will be paying 50% of the costs for this position. Some of these projects include increasing transit service partnerships, the replacement of the Waterfront Streetcar Maintenance Building, and operations for LINK light rail for Sound Transit.

Graphic Designer – \$0 and 1.00 FTE. This proposal reallocates funds within the Sales & Customer Services Section from Printing and Graphics to offset the transfer of a staff person from the Printing and Graphic Arts Division.

Technical Adjustments to PSQ - \$2,741,219. A number of technical adjustments are proposed for 2008 that modify the baseline budget. These adjustments were inadvertently omitted from the PSQ budget and include adjustment to loan-out labor to reflect wages and benefits in PSQ, adjustment to wages and positions to reflect actions taken in 2007, updates in the projected cost of gasoline, diesel, and updates to the projected cost of existing King County Sheriff (KCSO) services and tunnel guards.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Similar adjustments were identified in 2009, including: adjustment to loan-out labor to reflect the impact of COLA and changing benefits, updates in the projected cost of diesel, and updates in the projected cost of KCSO services.

Technical Adjustments - \$496,116 and (.22) FTE. A number of technical adjustments are proposed throughout the division including: increasing bank card fees due to increased use in 2008 and 2009; updating the B&O tax, due to higher fare revenue; updating the indirect cost allocation in Design & Construction; shifting 0.2 Capital FTE to operating for the development of a new regional fare agreement; increasing .15 FTE in Service Development to support operating grants; and various adjustments to align budget with expense.

ACCESS Technical Adjustments – \$396,512. The contractual costs of determining ADA eligibility and registration and providing transit travel training increase annually with inflation and in relation to the number of individuals involved. This proposal increases funding for those programs to the level projected for 2008.

Downtown Seattle Transit Tunnel Control – (\$461,574) and (5.00) FTEs. This proposal removes the DSTT control function that is currently budgeted in the Operations Section. The LINK Section is now funded to perform this function.

Central Rates – \$13,712,405. Central rate adjustments were made for Flexible Benefits, Current Expense Overhead, Healthy Workplace Funding, Technology Services Operations and Maintenance, Technology Services Infrastructure, Geographic Information Services, Office of Information Resource Management, Telecommunications Services, Telecommunications Overhead, Motor Pool Usage, Facilities Maintenance Space Charge, Insurance, Radio Access, Radio Maintenance, Radio Direct Charges, Radio Reserve Program, Prosecuting Attorney Civil Division, Long-term Leases, FMD Copy Center, Financial Services, Financial Management Services Rebate, Retirement, Industrial Insurance, Printing and Graphic Arts Loan Repayment, Limited Tax General Obligation Debt Insurance, Fixed Asset Management Data Management, Property Services Lease Administration Fee and Countywide Strategic Technology Projects.

Workforce Development

An aging workforce presents a significant challenge to the Transit system. Transit is emphasizing workforce development and succession planning in order to sustain its operations.

Transit Division Human Resources Support - \$240,108 and 1.00 FTE. Due to the size of the Transit Division, as well as the scope of human resource services utilized by the division, a need has been identified for additional resources. This request is for a new Human Resource (HR) Service Delivery Manager for the Transit Division. This position will be the central HR position for the Transit Division working with King County Human Resources and the King County Department of Transportation (KCDOT) Human Resource Service Delivery Manager. For the Transit General Manager, this position will become the key position for managing HR activities. This position will be responsible for managing and directing the employment, labor relations, disability services, drug and alcohol testing, succession planning and staff development activities for the Transit Division.

Succession Planning - \$133,951 and 1.00 FTE. Transit, like other parts of county government, is facing the fact that the workforce is aging. In the coming years it is anticipated that a number of key individuals will be leaving the organization. Transit has a workforce that has generally been very stable and many individuals have been with the organization for 20 plus years. This segment of the workforce possesses a level of operational and institutional knowledge that must be developed and cultivated in younger employees. In a continued effort to address these issues, Transit is proposing to

PHYSICAL ENVIRONMENT PROGRAM PLAN

create a succession planning program beginning in 2009. This Succession Planning program has three major elements: creating a Succession Planning Program Coordinator position, establishing Annual Leadership Development Cohorts, and continuing transit-specific supervisory skills training that began in 2007.

Operator Training - \$529,594 and 3.00 FTEs. This proposal adds three Transit Instructors to meet an increased need for operator training. With additional equipment, systems, routes and operators, training capacity is stretched beyond the ability to sustain current and/or future demands. More training positions will help ensure that Transit is able to field well-trained operators and 1st-line supervisors, while ensuring that follow-up and remedial training is conducted promptly.

C O U N C I L A D O P T E D B U D G E T

Council removed funding for the Special Projects Manager – (\$1,084,978) and (4.00) FTEs (see RB12 Special Projects and Division-wide Coordination), IT Business Analysts – (\$240,108) and (1.00) FTE (see RB21 Implementation of IT Business Plan), and Succession Planning Manager - \$133,951) and (1.00) FTEs (see RB16 Succession Planning Program Manager).

PHYSICAL ENVIRONMENT PROGRAM PLAN

Transit Revenue Vehicle Replacement

The 2008-2009 biennial budget for Transit Revenue Vehicle Replacement is \$39,475,479.

Technical Adjustment

Technical Adjustments - \$26,561,745. Transit will be replacing the majority of its current fleet by 2017. As a result, the Revenue Fleet Replacement Fund will hold significant funds over the next ten years with transfers made annually to the capital fund to support the purchase of replacement vehicles.

* FTEs do not include temporaries and overtime.

** This includes revised 2007 adopted, initial status quo, and proposed status quo increments. Under FTEs, annualization is included.

P1 PROVIDED THAT: Of this appropriation, \$10,000,000 may not be expended unless the road services division, in collaboration with staff of the council, the transportation director's office and the office of management and budget, shall submit to the council for its review and approval, a detailed work plan for an operational master plan for the road services division.

The work plan shall include a scope of work, tasks, schedule, milestones and the budget and selection criteria for expert consultant assistance. In addition, the work plan shall also include proposals for: (1) an oversight group to guide development of the plan that shall include executive and council representation; (2) a coordinated staff group to support plan development; and (3) methods for involving experts in the development of the operational master plan.

The operational master plan shall have two phases. Phase I of the operational master plan shall provide a policy framework for meeting the county's road responsibilities. It shall include a review of unincorporated area road mandates, needs, policies, staffing requirements, facility needs and goals, and shall include input from the transportation concurrency expert review panel and the facilities management division. Phase I shall recommend adoption of comprehensive policies to guide future budgetary and operational strategies that will be developed in phase II of the operational master plan, and shall include a review of maintenance facility needs if the division seeks to replace existing maintenance facilities. Phase I of the operational master plan shall be reviewed and approved by the council by motion. Phase II shall: (1) review the division's functions and operations; (2) evaluate alternatives for providing unincorporated area road services as effectively and efficiently as possible; and (3) develop recommended implementation and funding strategies. Phase II of the operational master plan shall be reviewed and approved by the council by motion.

The work plan for the road services division operational master plan must be filed in the form of 12 copies with the clerk of the council, who will retain the original and will forward copies to each councilmember and to the lead staff for the transportation committee, or its successor and the capital budget committee, or its successor. If the work plan is not filed by March 31, 2008, appropriation authority shall lapse for the \$10,000,000 restricted by this proviso.

Road Services Division

The total 2008 Executive Proposed Budget for the Road Services Division (RSD) is \$79,733,519 with 615.40 FTEs and 15.00 TLTs. The Proposed Budget for RDS reflects the division's commitment to safety and to reducing the amount of greenhouse gases it generates in the course of maintaining the county's roadways. The Road Services Division has responded to the pressures of annexation by identifying expenditure reductions and revenue losses associated with the annexation of Lea Hill and West by the city of Auburn.

Annexation

RSD has identified a loss of \$2,423,293 in revenue as a result of the 2008 Auburn annexations. The division has identified areas of direct expenditures savings in the Lea Hill and West Hill areas. The remaining revenue loss is offset by other operational savings and a reduction in the transfer to the Capital Improvement Program (CIP).

Auburn Annexation Reductions – (\$512,963) and (4.00) FTEs. In August 2007, residents of the Lea Hill and West Hill areas voted to annex to the city of Auburn. The annexation will transfer 53.9 road miles to Auburn and result in reductions of \$512,963 in expenditures and 4.00 FTES. This reduction is due to decreased traffic operations and road maintenance service in the annexed areas. RSD will provide traffic operations services in the annexed areas through a contract with Auburn.

Regulatory Requirements

The Road Services Division must comply with all federal and state regulations affecting road maintenance, operations, and construction. The 2008 Executive Proposed Budget reflects the new costs associated with updated Stormwater monitoring regulations in the National Pollution Discharge Elimination System (NPDES) Phase II Permit and other environmental requirements.

NPDES Phase II Maintenance Requirements - \$297,316 and 2.00 FTEs and 1.00 TLT. This proposal will enable RSD to comply with the most critical requirements of the new NPDES Phase II permit, including additional monitoring of the impact of system discharges on federal and state waters, the development and implementation of monitoring and inspection programs, increased maintenance of catch basins and enclosed drainage structures, and new annual reporting requirements regarding maintenance activities and the cost of performing those activities.

Biologist/Engineer for CIP Environmental Work - \$31,247 and 1.00 TLT. Additional biological and stormwater expertise is needed due to new regulations related to wildlife evaluations required by the Critical Areas Ordinance, increased recognition of wildlife movement corridors by the federal government, advancements in the field of road ecology, new species listings under the Endangered Species Act, increased encounters between motorists and wildlife, and increased attention from regulatory agencies for more thorough evaluation of wildlife in SEPA/NEPA environmental review. This position will provide biological expertise to support CIP plans and projects

Capital Fish Passage Program Support - \$0 and 2.00 FTEs.

This proposal adds four 0.50 FTEs (two truck drivers and two equipment operators) who will loan out to CIP for work on fish passage projects from April through September, when construction activity peaks and there is an open window for river and stream maintenance work related to the roadway. The complementary halves of these FTEs are added in Winter Storm Safety Improvements change item, where work is needed in the winter months.

Safety

PHYSICAL ENVIRONMENT PROGRAM PLAN

The Road Services Division places primary importance on the safety of the public traveling county roads and of its employees who work to preserve and maintain the roadway. Increased traffic in unincorporated areas of the county due to population growth, the need for greater responsiveness to storms in the winter months, and the aging of county roads are driving RSD's proposal to increase its budget for safety related programs.

Roads Maintenance Crew Safety Improvements - \$213,260 and 1.00 FTE. The increasing volume of traffic on county roadways limits RSD's ability to close roads while they are undergoing maintenance and increases the number of flaggers needed to safely control the flow of traffic through construction zones. Due to current limitations, staff has to be borrowed from other sections in order to maintain safe flagging practices, leaving other work undone. This proposal adds two 0.50 FTEs who will work as flaggers during the peak construction season in the summer. The complementary halves of the positions are added as part of the Winter Storm Safety Improvements change item. This proposal also includes funding for a contract with a private flagging company for 100 hours of service when RSD staff is unavailable. Additionally, the proposal incorporates the acquisition of a solar-powered robotic flagging system, or "robo-flagger," to also relieve pressure on flagger staff.

Winter Storm Safety Improvements - \$652,304 and 3.00 FTEs. This proposal adds two 3 person night crews between October and March to provide more efficient and timely response to storm-driven maintenance requirements, such as snow and ice removal and downed trees on the roadway. The proposal also includes anti-ice tanks and applicators, traffic signal reflective back plates, uninterrupted power sources for signals, replacement of safety pavement markers scraped off by snow plows, and the restoration of road shoulder maintenance not performed because work crews scheduled to perform the work were redeployed during the storm emergencies of 2006. The complementary portions of the partial FTEs in this change item are added in the Maintenance Crew Safety Improvements and Capital Fish Passage Program Support.

Vulnerable Roadway Testing for Structural Integrity - \$245,000. Preliminary pavement testing work completed in 2004 indicated a significant percentage of lane miles in the county arterial system show signs of structural deficiencies resulting primarily from age and out-dated design standards. A second preliminary test will be completed in 2007, with similar results anticipated. Testing of the remaining 489 road miles will be undertaken over a three year period using the Falling Weight Deflectometer (FWD) method. FWD testing will identify road segments that are at risk of structural failure and recommend candidates for more detailed testing and analysis. This effort is undertaken in conjunction with an update of the 2006 Vulnerable Roadway Segments Study. The results will inform the CIP planning and budgeting process.

Support for County Initiatives

The 2008 Executive Proposed Budget contains four items that further enhance RSD's participation in countywide efforts and support for programs in other departments. In addition to meeting countywide goals, these programs support RSD's objectives to provide environmental stewardship, prepare for and respond to emergency situations, and ensure excellent customer service.

Roads Climate Change Initiative - \$435,956 and 1.00 TLT. RSD is undertaking a variety of initiatives to provide a comprehensive and proactive response to King County's Climate Change Initiative. This proposal includes funding for the installation of an additional five traffic cameras annually at high priority intersections to improve traffic flow during peak hours; installation of energy efficient Light Emitting Diode (LED) yellow traffic lights and lighting heads in pedestrian signals; replacement of older gas-powered small equipment with more efficient and less polluting models; and participation in Puget Sound Energy's Green Power Generation Initiative. Most of the work associated with RSD's climate change initiative is absorbed by existing staff; however, a TLT is needed to coordinate the collection and dissemination of information, help prepare reports and

PHYSICAL ENVIRONMENT PROGRAM PLAN

presentations, track performance measures, and free up existing staff to participate in climate change efforts.

Rural Services Initiative - \$51,922. This proposal represents RSD's contribution to the King County Executive's Rural Services Initiative. The Rural Services Initiative is designed to improve service to the county's rural residents through enhanced interdepartmental cooperation. The Rural Services Initiative will include a new Rural Services Manager housed in the Department of Natural Resources and Parks Administration, a team of geographically based Community Liaisons who will be selected from among existing FTEs working in the rural areas, and the creation of a new interagency Rural Planning Team. The costs associated with the Rural Services Initiative were allocated using a methodology based on departmental expenditures in the rural areas.

Flood Control Zone District - \$0 and 10.00 FTEs. In April 2007, the King County Council created the King County Flood Control Zone District (District) and on August 31, 2007, the District's Advisory Committee submitted its recommendations for a work plan and a property tax levy of 10 cents per \$1,000 of assessed value. RSD has historically loaned out work crews to the Water and Land Resources Division (WLR) for work related to Stormwater and flood control facilities maintenance and construction. This relationship will continue as WLR implements the District's work plan. Based on the projects proposed for 2008, 10.00 FTES are proposed, along with associated benefits and overtime in lieu of additional FTEs. Positions will be filled as needed when the projects are implemented.

Permit Integration Project Participation - \$50,000. This proposal represents RSD's financial contribution to a multi-departmental effort to improve the efficiency and transparency of the county's various permit processing functions.

Technical Adjustments

Surplus Property Sales Consultant - \$48,000. RSD plans to sell the Covington Pit, located in the unincorporated area contiguous to the city of Covington, in 2008. This proposal will enable RSD, in collaboration with the Facilities Management Division, to retain the services of a consultant who is an experienced expert in the field of marketing large parcels of land to commercial and/or private residential developers. This expertise is vital to ensure that the surplussed property is marketed aggressively and sold in a timely fashion and at the highest price. Revenues from the land sale will benefit Roads CIP.

Pump Plant Operator to Wastewater - \$0 and (1.00 FTE). Operations and maintenance of the Black River Pump Plant Station has been transferred to the Wastewater Treatment Division, where there are more employees familiar with pump plant operations. There is no change in service levels associated with this proposal, only a change in staffing in the Roads Maintenance section. The pump plant operator has been loaned out in the past and there is no impact to the RSD budget beyond the reduction of one FTE.

Maintenance – Contract City Services - \$73,291. This is an annual adjustment to the level of contracted services between Roads Maintenance and contracting cities in response to service requirements of the contracting cities.

Traffic – Contract City Services – (\$13,368) and (1.00) TLT. This proposal is the annual change to the Traffic Contract City Program based on city input, actual work performed for cities in the past, annexations, and changes to cities' inventories.

Term Limited Temporary Adjustments - \$280,993 and 3.00 TLTs. This proposal is a technical adjustment that reconciles the budget and Roads TLT levels with the Human Resources Division's Temp Tracker, corrects for appropriate salaries and benefits, and eliminates positions whose terms

PHYSICAL ENVIRONMENT PROGRAM PLAN

have expired or are no longer required by the division.

Labor Distribution - \$67,995. This proposal reflects technical adjustments associated with distributed labor and administrative overhead cost recovery and includes updates for the current Cost of Living Allowance assumption.

Printing and Graphics Adjustment – (\$22,300). This proposal reduces the budget in the Printing and Graphic Arts account because the budget for this account is subsumed by the Copy Center central rate.

Prosecuting Attorney’s Office (PAO) Support – \$18,491. Given the increasing number and complexity of the county’s land-use projects, the Department of Transportation has agreed to fund 0.50 of a dedicated position within the PAO. Some of these projects include increasing transit service, the location of the Waterfront Streetcar Maintenance Building, and operations for LINK light rail for Sound Transit.

Central Rates – \$80,496. Central rate adjustments include CX Overhead, Healthy Workplace Funding Initiative, ITS O&M and Infrastructure, Telecommunications Services and Overhead, GIS, Insurance, PAO, Debt Service, Long Term Lease and Lease Administration Fee, Finance, Property Services Management, Wastewater Vehicles, Motor Pool, Radio charges, Equipment Repair and Replacement, Copy Centers, and the DOT Director’s Office allocation.

Target Fund Balance¹²	1,587,251	1,695,629	1,812,008	1,743,868	1,838,787	1,795,118

Financial Plan Notes:

¹ 2006 Actuals are from the 2006 CAFR and 14th month ARMS report.

² 2007 Estimated is based on updated revenue and expenditure data.

³ The financial plan assumes a 1% Unincorporated King County levy growth rate, plus new construction.

⁴ Gas Tax estimates are based on the Washington Department of Transportation's September 2007 estimate of statewide revenues available to counties and the July 2007 King County

⁵ Reimbursable fees for service include city contracts, expense/revenue identified in the division wide reimbursables org (1688) covering discretionary services, MPS administration fees, right-of-way inspection fees, and regional stormwater decant fees.

⁶ Sale of Assets include surplus property sales and Covington gravel and sand mining receipts. It does not include the sale of a portion of the Renton Maintenance Facility, which will benefit the CIP fund.

⁷ Grants are from the Federal Highway Administration and Federal Emergency Management Administration in 2006 and 2007 to partially cover 2006 winter storm damage repairs.

⁸ Other Revenues include all Road Fund revenues other than those identified in the financial plan.

⁹ Includes the decrease associated with the Auburn annexations effective in 2008. Assumes a 1% inflation in the outyears.

¹⁰ The 2008 transfer to the Sheriff's Office includes \$1,390,706 for the STEP Unit, which changes according to the Sheriff's Office Cost Book and is estimated to grow at 5% annually for planning purposes.

¹¹ Underexpenditures assumption is 1% of total expenditures.

¹² Beginning in 2001, the ending fund balance target is established at 1.5% of programmed revenues. Previously, the target fund balance was 5% of programmed revenues, but the managing cash requirements through strategic timing of the Construction Fund transfer allows for a lower minimum fund balance.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Stormwater Decant Program

Technical Adjustments

Central Rate Adjustments - (\$98,977). The central rate adjustments include changes to CX Overhead, Telecommunications, the Financial Services charge, and Equipment Repair and Replacement. The large reduction in central rates is due to an adjustment in the ER&R rate to bring it into line with actual expenditures.

Road Improvement Guaranty Fund

Program Change

Transfer from Road Improvement Guaranty Fund to Current Expense Fund -- \$1,300,000. This proposal reflects the amount available in the Road Improvement Guaranty Fund to be transferred to the Current Expense Fund.

C O U N C I L A D O P T E D B U D G E T

Council made no changes to the 2008 Executive Proposed Budget.

Fleet Administration

Fleet Administration Division manages the county's vehicles in the Motor Pool Fund, the Wastewater Equipment Rental and Revolving Fund, and the Public Works Equipment Rental and Revolving Fund. The Sheriff's Office and other Current Expense Fund agencies represent about two-thirds of the Motor Pool Fund vehicles and services. The Road Service Division is the primary user of the Public Works Equipment Rental and Revolving Fund. The Wastewater Division is the primary user of the Wastewater Equipment Rental and Revolving Fund.

In the 2008 Executive Proposed Budget, Fleet is challenged to minimize the rate impact to customers amidst uncertain fuel costs and rising costs of supplies and support. The rates charged to agencies are based primarily on three factors: vehicle use, vehicle maintenance, and vehicle replacement. The 2008 rates are based on 2006 actual use. Fleet uses an industry standard model to determine the economically efficient time to replace a vehicle. This vehicle replacement model considers variables such as annual costs, resale or salvage value, and purchase price.

* FTEs do not include temporaries and overtime.

** This includes revised 2007 adopted, initial status quo, and proposed status quo increments. Under FTEs, annualization is included.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Motor Pool ER&R Fund

The total 2008 Executive Proposed Budget for the Motor Pool ER&R is \$12,055,950 and 20.00 FTEs.

Increased Efficiencies/Reduced Costs

Efficiency Measures – (\$71,671) / (1.00 FTE). This recommendation reduces staffing by one position as a result of increased operational efficiencies.

Technical Adjustments

Operations and Maintenance Adjustment - \$355,707. This recommendation adjusts various supply and service accounts to reflect actual expenses.

Equipment Replacement Adjustment – (\$169,887). This recommendation provides the authority necessary to replace vehicles in 2008. While agency contributions to Motor Pool are relatively consistent from year-to-year, the amount of budget authority necessary to purchase vehicles may vary considerably on an annual basis. This cyclical variability is based on the number of vehicles that reach the end of their life cycle in any particular year.

Central Rates – \$532. A minor net increase in central rates is reflected in the proposed budget.

Fund Balance to PFRC Ratio	15%	3%	10%	7%	8%	10%

Financial Plan Notes:

¹ 2006 Actuals are from the 2006 CAFR.

² 2009 and 2010 estimates assume:

- a) 5.3% annual percentage rate on investment earnings.
- b) Sale of equipment is 10% of annual capital expenditures.
- c) 3% annual increase in miscellaneous revenues and in operating and maintenance costs; 8% increase in vehicle rental revenues.
- d) Capital expenditures are based on a schedule of established replacement standards for each type of vehicle.
- e) Contingency for capital improvement is estimated at 3% of annual revenues.

³ Target Fund Balance, as recommended by the County Auditor, is to be within a range of 10% to 20% of the Projected Fleet

Replacement Cost (PFRC). PFRC equals:	26,486,552	27,715,360	27,715,360	28,288,675	29,137,335	30,011,455

Financial Plan Notes:

¹ 2006 Actuals are from the 2006 CAFR.

² 2009 and 2010 estimates assume:

- a) 5.3% annual percentage rate on investment earnings.
- b) Sale of equipment is 12% of annual capital expenditures.
- c) 5% annual increase in miscellaneous revenues, 2% in operating and maintenance costs, and 13.5% increase in vehicle rental revenues.
- d) Capital expenditures are based on a schedule of established replacement standards for each type of vehicle.
- e) Contingency for capital improvement is estimated at 3% of annual revenues.

³ Target Fund Balance, as recommended by the County Auditor, is to be within a range of 10% to 20% of the Projected Fleet

Replacement Cost (PFRC). PFRC equals: 29,519,257 29,725,856 29,725,856 30,023,115 30,323,346 30,929,813

PHYSICAL ENVIRONMENT PROGRAM PLAN

Wastewater ER&R Fund

The total 2008 Executive Proposed budget for the Wastewater ER&R is \$2,220,956.

Technical Adjustments

Equipment Replacement Adjustment - (\$192,152). This recommendation provides the authority necessary to replace vehicles in 2008. While agency contributions are relatively consistent from year-to-year, the amount of budget authority necessary to purchase vehicles may vary considerably on an annual basis. This cyclical variability is based on the number of vehicles that reach the end of their life cycle in any particular year.

Operation and Maintenance Adjustment - \$106,661. This recommendation adjusts various supply and service accounts to reflect actual expenses.

Central Rates – (\$5,965). A minor net decrease in central rates is reflected in the proposed budget.

C O U N C I L A D O P T E D B U D G E T

Council made no changes to the 2008 Executive Proposed Budget.

PHYSICAL ENVIRONMENT PROGRAM PLAN

Airport

The 2008 Executive Proposed Budget for the King County International Airport's (KCIA) assumes that operations in 2008 will remain essentially the same as in 2007. The budget does not include any redevelopment proposals or major changes in operating structure. The proposed adjustments to the budget emphasize infrastructure management, maintenance of airport systems, and improved service.

Technical Adjustments:

Airport Rescue and Fire Fighting (ARFF) Services Contract Changes - \$149,857. This proposed budget adjustment reflects the increased cost of the Sheriff's ARFF services.

Essential Budget Appropriation Increases - \$1,055,303 and 1.00 TLT. This proposed budget adjustment includes a variety of budget appropriation increases including additional overtime and labor expenditures, increases in supplies, increased rates such as the City of Seattle's Surface Water Management rate, and increased cost of gasoline and diesel fuel.

Prosecuting Attorney's Office Support - \$4,813. Given the increasing number and complexity of the county's land-use projects, the Department of Transportation has agreed to fund this dedicated position within the PAO. Some of these projects include increasing transit service, the location of the Waterfront Streetcar Maintenance Building, and operations for LINK light rail for Sound Transit. This proposed budget adjustment reflects the Airport contribution to this position.

Central Rate Adjustments – (\$247,139). Central rate adjustments include: Flexible Benefits, Current Expense Overhead Adjustment, Healthy Workplace Funding Initiative, Technology Services Infrastructure and O&M, GIS Systems, OIRM, Telecom Services and O&M, Insurance Charges, Radio Equipment and Service, Prosecuting Attorney Civil Division, Debt Service Adjustment, Facilities Services, Financial Services, Retirement Rate, P&GA Interfund Loan Repayment, Limited Tax General Obligation Debt Service, COLA, Merit, and OIRM CIP.

Financial Plan Notes:

¹ 2.5% of operating expenditures excluding ARFF contract and bond debt

² 10% of total revenue

³ 2006 Beginning fund balance has been corrected from 2007 Financial Plan

⁴ Expenditure Growth Projected at 5% from 2009-2013

⁵ Revenues projected based on the following rate information:

Proposed 2008 Rate: Landing Fees \$1.25 per 1,000 lbs & Fuel Flowage Fee \$.075 per gal Jet A & \$.05 per gal AV Gas

Proposed 2009 Rates: Landing Fees \$1.50 per 1,000 lbs & Fuel Flowage Fee \$.075 per gal Jet A & \$.05 per gal AV Gas

Proposed 2010 Rate: Landing Fees \$1.60 per 1,000 lbs & Fuel Flowage Fee \$.075 per gal Jet A & \$.05 per gal AV Gas

Proposed 2011 Rate: Landing Fees \$1.65 per 1,000 lbs & Fuel Flowage Fee \$.075 per gal Jet A & \$.05 per gal AV Gas

Proposed 2012 Rate: Landing Fees \$1.70 per 1,000 lbs & Fuel Flowage Fee \$.075 per gal Jet A & \$.05 per gal AV Gas

Proposed 2013 Rate: Landing Fees \$1.75 per 1,000 lbs & Fuel Flowage Fee \$.075 per gal Jet A & \$.05 per gal AV Gas

Proposed 2008 Landed Weight Projection is based on 1,176,074M lbs. Follow-on years assume 1% annual growth.

Proposed 2008 Fuel Flowage Fees assume 1% annual growth.

The budget includes 100% of the 2007 appraisal rates for Boeing Budgeted in 2009 (07 & 08 not budgeted until 09) for the five year appraisal cycle.

Discounts:

2007 - 2008 Restricted Value Discount 25%; Lease Condition Discount 10%; Aviation Use Discount 20%

2009 - All Discounts Eliminated

Monthly Tie-down rates increase \$5.00: 2008 \$90; 2009 \$95; 2010 \$100; 2011 \$105; 2012 \$110; 2013 \$115
