Explanatory notes

In 1994 the U.S. Department of Defense Corrections Council established an annual military confinement report (DD Form 2707). The council, comprised of representatives from each branch of military service, adopted a standardized questionnaire with a common set of definitions. With the Corrections Council, the Bureau of Justice Statistics produced a series of tables that provide a unified profile of persons in the custody of U.S. military authorities.

The annual confinement report provides yearend counts of persons in U.S. military confinement facilities inside and outside the continental United States, by branch of service, sex, race, and Hispanic origin, conviction status and sentence length, and offense. It also provides counts of the number persons admitted to confinement and the number released during the calendar year, by branch of service, type of commitment, and type of release. The confinement report also includes the number of facilities and their design and rated capacities, by level.

Data for 1994 and 1995 are incomplete. Information on Air Force confinement facilities (including the number and characteristics of prisoners held at yearend as well as those admitted or released during the year) was not available. Admission and release data in 1994 for Marine Corps facilities covered only the period October 1 to December 31.

In future years, with the full participation of all military services, the annual confinement report will provide a complete enumeration of U.S. military confinement facilities, both inside and outside the continental United States. With the cooperation of the Corrections Council, BJS will include these counts in future publications.
