#### **Top Visitors - Help Card**

#### **Column Definitions**

#### Visitor

The IP address, domain name, or cookie of the visitor.

#### Visits

Number of times the specified visitor visited your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Hits

Number of hits attributed to the specified visitor. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

#### **Report Descriptions**

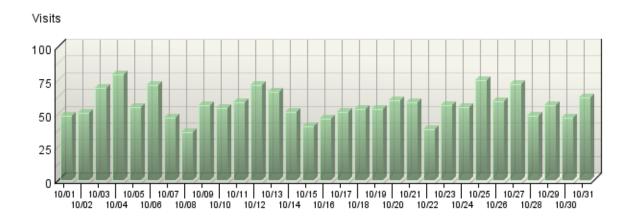

Consider the visitors who use the site most, and tailor your site to their interests and needs. If your site is an intranet, notice which employees use the site most, and find out what they like about it. You might also get feedback from those who use it the least and find out what they are looking for

**Note:** If a visitor has a dynamic IP address, or if a group of visitors are behind a proxy server or firewall, this data might be misleading. In the case of a dynamic IP address, multiple IP addresses could be shown for a single visitor, and in the case of a firewall or proxy server, one IP address could be used by more than one visitor.

#### **New vs. Return Visits**

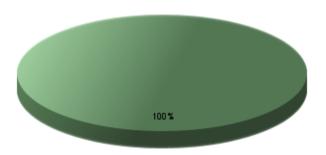

This report compares the number of visits by new and returning visitors to your site.

New vs. Return Visits Trend

**New vs. Return Visits** 

Returning Visitors

New vs. Return Visits

Visitor Type	Visits	% Visits
Returning Visitors	1,740	100.00%
Total	1,740	100.00%

items 1-1 of 1

New vs. Return Visits 25

#### New vs. Return Visits - Help Card

#### **Column Definitions**

#### **New Visitors**

Visitors whose visit starts without any cookie information but acquires a cookie (or multiple cookies) during the visit. For single-page visits there is no way (without the use of SmartSource Data Collection) to distinguish a new visitor from a visitor that does not accept cookies. As a result these visits are categorized as Visitors Not Accepting Cookies.

#### **Returning Visitors**

Visitors who already had a cookie from your site when they visited.

#### **Visitors Not Accepting Cookies**

Visitors not accepting cookies from your site. There is no way to determine if these visitors are new or returning. Note that Express Analysis does not report on this information.

#### Visits

Number of visits by visitors who fit into the specified visitor category. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

Percentage of visitors who fit into the specified visitor category.

#### **Report Descriptions**

By tracking the ratio between new and return visits over a period of time, you can determine if your site is attracting enough returning visitors.

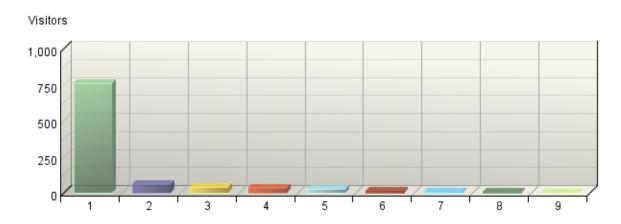

Note: This report uses only cookies to determine whether a visitor is new or returning. This information cannot therefore be correlated to visitor counts obtained using IP tracking. For example, when a visitor goes to a site that has session-based cookies but no permanent cookies, they will receive a cookie on their second hit and be labeled a new visitor. If they close their browser, wait an hour, and go back to the same site, they will have no cookies on their first hit (since the cookie they got previously was session-based) and will once again be issued a cookie on their second hit. If the site's logs are analyzed using the IP tracking method, the result is 1 unique visitor (determined using IP tracking), but 2 visits and 2 new or first-time visitors (determined using cookies).

26 New vs. Return Visits

# **Visitors by Number of Visits**

This report shows the distribution of visitors based on how many times each visitor visited your site.

#### Visitors by Number of Visits

#### Visitors by Number of Visits

Number of Visits	Visitors	% Visitors
■ 1 visit	762	79.46%
2 visits	58	6.05%
3 visits	40	4.17%
4 visits	34	3.55%
5 visits	25	2.61%

9 visits	3	0.31%
Other	16	1.67%
Total	959	100.00%

items 1-9 of 9

#### Visitors by Number of Visits - Help Card

#### **Column Definitions**

#### **Number of Visits**

The number of visits by each visitor during the period of the report.

#### Visitors

Number of individuals who came to your site the amount of times specified in the Number of Visits column.

**%** 

Percentage of visitors who came to your site the amount of times specified in the Number of Visits column.

#### **Report Descriptions**

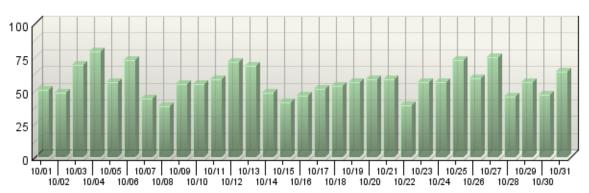

This information can indicate whether or not your site compels visitors to return. Updating web site content is one way to draw return visitors.

#### **Visitors Trend**

This report shows how many times visitors visited your web site and how long they stayed. The information is divided into time slices based on the duration of the log file. Some visits may span more than one time interval, and will be counted in each interval where they appear. The sum of visits for all intervals may therefore exceed the total visits shown in the Overview Dashboard page.

items 1-31 of 31

# Visitors Trend - Help Card

#### **Column Definitions**

# Time Interval (hour, day, etc.)

A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.

#### **Active Visits**

Number of active visits to your web site. If a visit spans multiple time intervals, it is counted in each interval. Every visit from a visitor is counted, even if the same visitor came to your web site multiple times. Also included are zero-length visits. A zero-length visit occurs when all hits for that visit are logged with the exact same time stamp.

#### Visitors

Number of individuals who visited your site during the report interval. For a daily report, if someone visits more than once, that person is counted only the first time he or she visits. Values of "-" indicate that the detailed data required is not available. This situation occurs when the Top Visitors report has reached its configured limit or when reports for the corresponding period are turned off. For non-daily reports, the visitor measure total is "-" since the same visitor can be counted in multiple intervals.

#### **New Visitors**

Number of visitors who had never visited your web site before.

# **Average Visit Duration**

The average amount of time visitors spent at your site within the given time interval. The data is formatted as hh:mm:ss (hours:minutes:seconds). The average visit duration is calculated by dividing the value from the Visitor Minutes column by the value from the Active Visits column.

# **Visitor Minutes**

Number of minutes your web site was viewed, regardless of who was viewing it.

Visitors Trend 33

# **Report Descriptions**

Use this page to determine which times your web site is busiest.

Daily averages cut off visits that continue into the next day, whereas weekly averages do not. Therefore, weekly averages may appear a bit longer than daily averages.

**Total** - The total for the column. Visits may span more than one time interval and are counted for each hour in this report. We therefore do not provide a total, which would be misleading.

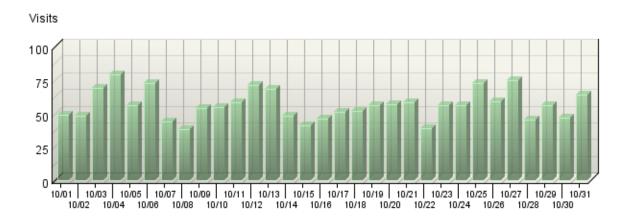

Average - This row gives the average for each column.

34 Visitors Trend

# **Visits Trend**

This report shows how the number of visits to your site changes over the course of the report period.

# Visits Trend - Help Card

# **Column Definitions**

# Time Interval (hour, day, etc.)

A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.

# Visits

Number of visits to your site during the specified time interval. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

%

Percentage of visits to your site during the specified time interval compared with all visits to your site during the report period.

# **Report Descriptions**

Periods of less activity can be considered good times for maintenance and content improvement.

36 Visits Trend

# **Organizations**

If you have enabled the WebTrends GeoTrends Database for this profile, this page will list the most active companies and other organizations visiting your web site.

# **Organizations**

No data is available for this graph.

# **Organizations**

No data is available for this table.

Organizations 37

# **Organizations - Help Card**

# **Column Definitions**

#### **Organization**

The name of the organization, which could be a company, a government agency, a school, or any other type of organization. This name was determined by either of the following methods:

- The visitor's IP address matched an Intranet Domain configuration within the Admin Console.
- Looking up the visitor's IP address in the WebTrends GeoTrends Database.

#### Unknown

The organization could not be determined.

#### **Domain Name**

The text name (for example, webtrends.com) corresponding to the visitor's IP address. The domain name can be determined from any of the following methods:

- The domain was logged by the web server.
- The IP address matched an Intranet Domain configuration within the Admin Console.
- · DNS resolution.

IP addresses that do not resolve to a domain by these methods are categorized as follows:

- Reserved IP Address The IP address falls within a block of reserved addresses. For example, 192.168.x.x and 10.x.x.x addresses are reserved for private networks.
- Unresolved IP Address Category for IP addresses that did not resolve to a domain (perhaps because DNS resolution was disabled).

The domain name shown is the second-level domain name, such as webtrends.com. For example, all visitors from sales.webtrends.com, us.sales.webtrends.com, and service.webtrends.com are combined in the statistics for webtrends.com. If the top-level domain name is a country code, then the third-level domain name is shown also (for example, anycompany.com.au).

#### Visits

Number of visits to your site from this organization. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

# Hits

Number of hits to your site from this organization. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

38 Organizations

# **Report Descriptions**

Use this information when you are interested in an organization as a whole, such as Webtrends Inc. You can identify the major domain names from each company, such as webtrends.com from WebTrends Inc.

Organizations 39

# **Authenticated Usernames**

This report identifies the true name and activity level of the visitors logging onto a server that requires a user name and password.

# Authenticated Usernames Trend No data is available for this graph. Authenticated Usernames No data is available for this graph. Authenticated Usernames No data is available for this table.

40 Authenticated Usernames

#### **Authenticated Usernames - Help Card**

# **Column Definitions**

#### **Authenticated Username**

A visitor tracked by user name and password rather than by IP address. You may find more authenticated user names than total visitors because several persons may be using the same IP address. Since many ISPs dynamically assign IP addresses, and since multiple visitors may use a single IP address, authentication is a much more accurate way to identify visitors.

#### Visits

Number of times the specified visitor visited your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

# Hits

Number of hits generated by the specified visitor. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

%

Percentage of visits or hits to your site by the specified visitor out of those by all authenticated user names.

# **Report Descriptions**

You may use this information for your marketing efforts, such as special promotions or newsletters.

Authenticated Usernames 41

# **Domain Names**

This report lists the domain name that generates the most activity to your web site.

# **Domain Names**

# **Domain Names**

The domain name shown is the second-level domain name, such as webtrends.com. For example, all visitors from sales.webtrends.com, us.sales.webtrends.com, and service.webtrends.com are combined in the statistics for webtrends.com. If the top-level domain name is a country code, then the third-level domain name is shown also (for example, anycompany.com.au).

# Visits

Number of visits to your site from this domain name. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

# Hits

Number of hits to your site from this domain name. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

# **Report Descriptions**

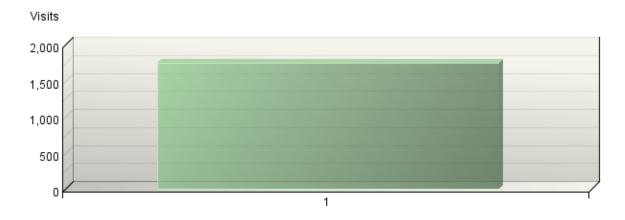

Use this information when you are interested in high-level domain names of visitors generating the most activity to your web site.

Domain Names 43

# **Top-Level Domain Types**

This report provides a breakdown of top-level domain types.

# **Top-Level Domain Types**

# **Top-Level Domain Types**

Top-Level Domain Types	Visits	% Visits	Hits
Unresolved IP Address	1,741	100.00%	4,983
Total	1,741	100.00%	4,983

items 1-1 of 1

#### **Top-Level Domain Types - Help Card**

# **Column Definitions**

#### **Reserved IP Address**

The IP address falls within a block of reserved addresses. For example, 192.168.x.x and 10.x.x.x addresses are reserved for private networks.

#### Unresolved IP Address

Category for IP addresses that did not resolve to a domain (perhaps because DNS resolution was disabled).

#### Unknown

The domain suffix did not match any of the top-level domain categories.

#### **Top-Level Domain**

The suffix of a domain name. A top-level domain can be based on the type of organization (.com, .edu, .museum, .name, etc) or it can be a country code (.uk, .de, .jp, .us, etc.). The top-level domain can be used to identify the type of web site. The following is a partial list of how this report categorizes top-level domains:

- ARPANET: .arpa
- Commercial: .com .co .com.[country code] .co.[country code] .firm.co .firm.ve .ltd.uk .info .biz
- Education: .edu .edu.[country-code] .ed.[country code] .ac.[country code] .school.[country code] .k12.[country code] .re.kr .sch.uk .edunet.tn
- International: .int .int.co .int.ve .intl.tn
- Government: .gov .gov.[country code] .gove.[country code] .go.[country code]
- Military: .mil .mil.[country code]
- Network: .net .ad.jp .ne.kr .net.[country code]
- Organization: .org .or .org.[country code] .or.[country code]
- · Personal: .name

#### Visits

Number of visits to your site from the specified top-level domain. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Hits

Number of hits to your site from the specified top-level domain. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

# **Report Descriptions**

Consider which types of organizations are interested in your site, and consider how you can interest other types of organizations.

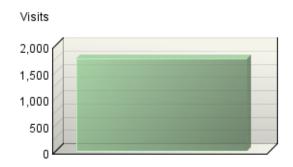

**Note:** This information can be displayed only if reverse DNS lookups have been performed. Even when DNS lookups are performed, some IP addresses cannot be resolved to a domain name.

**Total** - This represents the total visits or hits where there was sufficient information to identify the top-level domain. This number may be less than the total activity overall.

# **Geography Dashboard**

Geography Dashboard 47

# Regions

This report identifies the top geographic regions of the visitors to your site.

# Regions

# Regions

Regions	Visits	% Visits
1. Unspecified Region	1,741	100.00%
Total	1,741	100.00%

items 1-1 of 1

48 Regions

#### **Regions - Help Card**

# **Column Definitions**

# **Regions**

The geographic part of the world where visitors to your web site are located. "Unspecified Region" represents visitors whose geographic region could not be determined. "Unknown Region" represents visitors whose country has been determined but not identified with a specific region. If the WebTrends GeoTrends Database is turned on for this profile, the region is determined by looking up the visitor's IP address in this database. If GeoTrends is not enabled, the region will be determined from the domain name.

# Visits

Number of visits from this geographic region. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

%

Percentage of total visits that were from this geographic region.

#### **Report Descriptions**

This information can help you meet the needs of your target audience as well as discover new audiences. Consider how you can make the content comprehensive and relevant to an international audience.

Values for "Unspecified Region" represent visitors whose geographic region cannot be determined. Values for "Unknown Region" represent visitors whose country can be determined but whose country is not associated with a specific region. Values for "Unknown States" or "Unknown Cities" represent hits for which the IP address does not match an entry in GeoTrends database. This is the case for countries that do not have states or simply entries for which this information was not provided in the GeoTrends database.

**Note:** Use this information carefully because it is based on Internet registration, and may not always be an accurate identifier of the visitor's actual location.

Regions 49

# **Countries**

This report identifies the top countries of the visitors to your site.

# **Countries**

# **Countries**

Countries	Visits	% Visits
1. Unknown Country	1,741	100.00%

# Pages - Help Card

#### **Column Definitions**

# **Pages**

Any displayed page. You can specify for each profile the types of files that qualify as a page. These settings can be changed by the WebTrends administrator.

#### Visits

Number of visits to this page. A visit is a series of actions that begins when a visitor views the first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

# Views

Number of times this page was viewed by visitors.

# **Average Time Viewed**

Average length of time the specified page was viewed. (The format is hh:mm:ss -hours:minutes:seconds.)

# **Average Time to Serve**

Average amount of time (in milliseconds) it took to serve each document during the specified time interval. The time to serve spans from the time the server got a page request until it transmitted all the data.

**Note**: Zero values in this column probably indicates that your web server is not logging Time to Serve information.

# **Report Descriptions**

Pages with good content and design are more likely to attract visitors and be revisited. Less popular pages on a site can be made more appealing by improving the content or incorporating design elements similar to that on the more important pages. Always remember that people are far more interested in content than in design, and average view times can help determine which content is most important to your visitors.

# **Content Groups**

This report identifies the most popular groups of web site pages and how often they were visited.

# **Content Groups Trend**

# No data is available for this graph.

# **Content Groups**

No data is available for this table.

# **Content Groups - Help Card**

# **Column Definitions**

#### **Content Group**

A defined group of web pages with specific things in common, such as the same types of products, services, or information.

#### Visits

Number of visits where the visitor viewed at least one page in the specified content group. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Hits

Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

Content Groups 61

# **Report Descriptions**

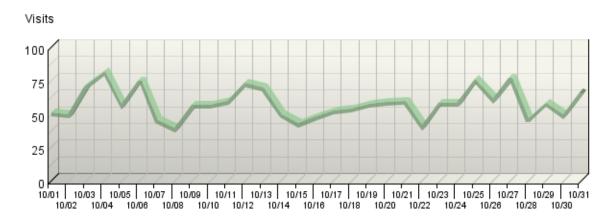

The information on this page can show you which content groups were most popular. This will reveal the reasons people visit your web site, and what is most interesting and least interesting to them.

62 Content Groups

# **Directories**

This report lists the most commonly accessed directories on your web site. This information can help determine the types of data most often requested.

# **Directories Trend**

# **Directories**

# **Directories**

Path To Directory	Visits	Hits	Kbytes Transferred
■ 1. http://es.epa.gov/ncer/science	1,741	4,983	340,676
Total	-	4,983	340,676

items 1-1 of 1

#### **Directories - Help Card**

# **Column Definitions**

# Path to Directory

The full URL path to the directory being analyzed.

#### Visits

Number of visits to pages within the specified directory. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Hits

Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

# **Kbytes Transferred**

Number of kilobytes of data transferred by the server from the specified directory to your visitors.

# **Report Descriptions**

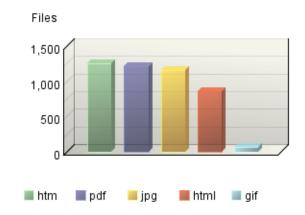

This report indicates the content visitors are most interested in. Use this information to determine which content areas to develop further, which areas to focus on less, and how you can arrange your content most effectively. If the table is sorted by kilobytes of data transferred, this page reveals what kind of data the server spends the most time transferring, and may suggest different ways to organize your data, or different ways to distribute the server load if you have more than one server.

64 Directories

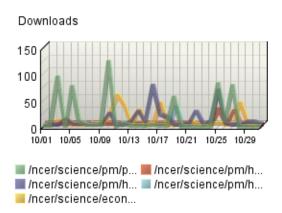

# **Files Dashboard**

This displays key graphs and tables that provide an overview of the Files chapter. When viewing through the on-demand interface, you can click on the title of a graph or table to navigate to the corresponding page.

# **Downloaded Files - Help Card**

# **Column Definitions**

# **Files**

The path and filename of the file being analyzed.

# Downloads

Number of times the specified file was downloaded by a visitor. If an error occurred during a transfer, the transfer is not counted. Note that downloaded PDF files may cause an inflated count.

#### **Visits**

Number of visits that accessed the specified files. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

# **Report Descriptions**

If you are using an SDC data source, then this report is not applicable.

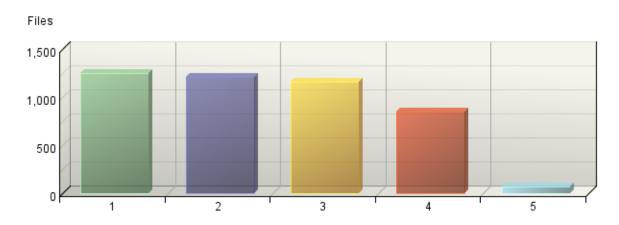

This information shows you the most popular downloadable files on your web site. Files that don't appear on the list, or appear low on the list, may require maintenance such as decreasing the file size, improving link placement, or elimination to make room for more popular content.

Downloaded Files 67

# **Accessed File Types**

This report identifies the types of files accessed on your site and the total number of kilobytes of data transferred for each file type. Cached requests and erred hits are excluded from the totals.

# **Accessed File Types by Files**

# **Accessed File Types**

File Type	Files	% Files	Kbytes Transferred
■ 1. htm	1,249	27.55%	25,897
■ 2. pdf	1,208	26.65%	279,630

4. html	853	18.82%	27,032
■ 5. gif	66	1.46%	330
Total	4,533	100.00%	340,676

items 1-5 of 5

68 Accessed File Types

# **Accessed File Types - Help Card**

# **Column Definitions**

# File Type

Identifies types of files by their file extension. For example, a file named graphic.gif is identified as type "gif."

# **Files**

Number of files of the specified type accessed by visitors to your site.

# **Kbytes Transferred**

Number of kilobytes of data transferred for all files of the specified type.

# **Report Descriptions**

This report provides general statistics for the type of data that visitors access on your site.

Accessed File Types 69

# **Uploaded Files**

This report identifies the most popular files uploaded from a client to your servers using FTP PUT, HTTP PUT, or HTTP POST.

# **Uploaded Files**

# No data is available for this graph.

# **Uploaded Files**

# No data is available for this table.

# **Uploaded Files - Help Card**

#### **Column Definitions**

# Files

The path and filename of the uploaded file being analyzed. Uploaded files correspond to a POST entry in the web server log file. If the field names are provided, then you will find the uploaded files listed in the METHOD field.

# Visits

Number of visits to your site where the specified file was uploaded to your servers. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### **Uploads**

Number of times the specified file was uploaded to your site. If an error occurred during a transfer, the transfer is not counted.

# **Report Descriptions**

If you are using an SDC data source, then this report is not applicable.

This report presents information on files that were uploaded to your servers during the period of the report. You may want to run virus scans on uploaded files.

70 Uploaded Files
