

Damage

The focus of this page is to describe local conditions at various stages or flows. This gives the forecaster a quick idea of the problems that have and can occur at different stages or flows.

Stage List the stage height at which various significant areas are impacted by higher stages.

Areas Affected List the areas impacted by the stage(s) mentioned above. What type of area is it (i.e. farmland, highway, railroad, residence, businesses, etc.)? List any other significant facts about damages that may be important to know.
