Washington, DC 20001-4542

Dear Mrs. Bumpers:

Informed Parents Against VAPP is pleased to endorse Every Child By Two's plan to promote a nationwide system of immunization registries that will provide accurate, up-to-date information about children's immunizations. As the parents of children who contracted polio from OPV, we are especially pleased that the new immunization schedule will rely on the safer IPV for protection against polio.

As a member of the NVAC working group on vaccine safety and former vice chairman of the Federal Advisory Commission on Childhood Vaccines, I am well aware of the need to provide ready access to school and doctors for information on immunizations in order to ensure safety and the broadest possible program for childhood vaccinations.

We wish you much success in this significant health care initiative and look forward to continuing to work together.

Sincerely,

John Salamone  
President
