NE-INF-67-R2000

Guide to Experts in Forestry and Natural Resources

The Forest Service's mandate and main concern is reflected in our motto, "Caring for the Land and Serving People". Gifford Pinchot, first Chief of the USDA Forest Service, established our responsibility to manage the forests "for the greatest good of the greatest number of people in the long run." Forest Service employees work toward this goal on national forests, at research stations and in cooperative forestry offices.

With concern about environmental issues on the rise, people need knowledgeable and experienced sources of information on natural resource topics. Forest Service employees have the training and the experience to answer a wide range of important questions about the natural environment.

To help you gain access to what the Forest Service knows, we've compiled a list of experts who work for the Northeastern Research Station. They represent a diversity of scientific disciplines and knowledge—from forestry to sociology, from plant pathology to meteorology, from genetic engineering to economics. Together with other scientists, technicians and administrative personnel, they conduct research aimed at solving forestry problems in the complex Northeast, where extensive forests and vast metropolitan areas exist side-by-side.

To get the answers you need, please call, e-mail or write the experts listed here under each topic. If you need assistance, contact us at Communications, Northeastern Research Station, 11 Campus Blvd., Suite 200, Newtown Square, PA 19073; phone 610-557-4229; email jgamaleldin@fs.fed.us.

We're looking forward to hearing from you.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.

Forest Service research in the Northeast provides scientific information and technology to help:

- Sustain the values of forest land
- Reduce the impact of stressors on forest ecosystems
- Strengthen the contribution of forests to a quality urban life
- Enhance the value of forests to people and the economy
- Inventory and monitor the condition of the forest
