Table C. Species contained in federal fishery management plans under development.

| Stock <br> (Species in Bold are Major Stocks) | Jurisdiction | Overfishing? <br> (Is Fishing Mortality above <br> Threshold?) | Overfished? <br> (Is Biomass below <br> Threshold?) | Approaching Overfished <br> Condition? |
| :---: | :---: | :---: | :---: | :---: |
| HAGFISH | NEFMC | Unknown ${ }^{1}$ | Unknown $^{1}$ | Unknown |
| CALICO SCALLOPS | SAFMC | Unknown $^{2}$ | Unknown $^{2}$ | Unknown |

1. There is no definition for determining the status in Our Living Oceans (1999).
2. The definition for determining the status is based on the definition in Our Living Oceans (1999).

Table D. Species managed under international agreement.

| Stock <br> (Species in Bold are Major Stocks) | Jurisdiction | Overfishing? <br> (Is Fishing Mortality <br> above Threshold?) | Overfished? <br> (Is Biomass below <br> Threshold?) | Approaching Overfished <br> Condition? |
| :---: | :---: | :---: | :---: | :---: |
| PACIFIC HALIBUT | PFMC and NPFMC ${ }^{1}$ | No | Undefined | Unknown |

1. The resource is managed by treaty between the United States and Canada through recommendations of the International Pacific Halibut Commission.

Pacific halibut is managed under the jurisdiction of the PFMC for WA, OR, and CA and under the jurisdiction of the NPFMC for Alaska.

Table E. Summary of stock status for species not contained in federal fishery management plans. NOTE: These stocks are not counted toward the total of overfished stocks.

| Stock <br> (Species in Bold are Major Stocks) | Jurisdiction | Overfishing? <br> (Is Fishing Mortality above Threshold?) | Overfished? <br> (Is Biomass below Threshold?) | Approaching Overfished Condition? |
| :---: | :---: | :---: | :---: | :---: |
| AMERICAN EEL | ASMFC | Unknown ${ }^{1}$ | Unknown ${ }^{1}$ | Unknown |
| AMERICAN LOBSTER | ASMFC | Yes | Undefined $^{2}$ | Unknown |
| ATLANTIC CROAKER | ASMFC | Unknown | Unknown | Unknown |
| ATLANTIC MENHADEN | ASMFC | No | No | Unknown ${ }^{3}$ |
| HORSESHOE CRAB | ASMFC | Unknown ${ }^{1}$ | Unknown ${ }^{1}$ | Unknown |
| NORTHERN SHRIMP | ASMFC | No | No | Unknown |
| SPOT | ASMFC | Unknown ${ }^{4}$ | Unknown ${ }^{4}$ | Unknown |
| SPOTTED SEATROUT | ASMFC | Unknown ${ }^{4}$ | Unknown ${ }^{4}$ | Unknown |
| STRIPED BASS ${ }^{5}$ | ASMFC | No | No | Unknown ${ }^{3}$ |
| TAUTOG | ASMFC | Yes | Undefined | Unknown |
| WEAKFISH | ASMFC | No | No | No |
| AMERICAN SHAD | ASMFC | Yes ${ }^{6}$ | Yes ${ }^{6}$ | N/A |
| Hickory Shad | ASMFC | Unknown ${ }^{1}$ | Unknown ${ }^{1}$ | Unknown |
| RIVER HERRING | ASMFC | Yes ${ }^{6}$ | Yes ${ }^{6}$ | N/A |
| Atlantic Sturgeon | ASMFC | No ${ }^{7}$ | Yes ${ }^{6}$ | N/A |
| GULF MENHADEN | GSMFC | No ${ }^{6}$ | No ${ }^{6}$ | Unknown ${ }^{3}$ |

| Stock <br> (Species in Bold are Major Stocks) | Jurisdiction | Overfishing? <br> (Is Fishing Mortality above <br> Threshold?) | Overfished? <br> (Is Biomass below <br> Threshold?) <br> BLACK DRUM GSMFC | Unknown ${ }^{4}$ |
| :---: | :---: | :---: | :---: | :---: | Approaching Overfished Condition?

1. There is no definition for determining the status in Our Living Oceans (1999).
2. Although there is no clear biomass target in the ASMFC FMP, the 2000 ASMFC Assessment for American Lobster found that lobster stocks are growth overfished.
3. Although the biomass level is known, determining whether the stock is approaching an overfished condition requires an additional level of analysis which has not been done.
4. The definition for determining the status is based on the definition in Our Living Oceans (1999).
5. This status determination is based on the stock assessment completed in 2003. An updated assessment was prepared in 2004; however, this assessment had considerable uncertainty and inconsistencies between the different assessment approaches. The ASMFC Striped Bass Technical Committee will be addressing these issues in 2005.
6. Used assessment from Our Living Oceans (1999).
7. Fishing for Atlantic Sturgeon is prohibited, therefore, there is no fishing mortality.
8. This salmon stock is not contained in the Salmon FMP because impacts within the Council jurisdiction are very limited and considered inconsequential. However, it is managed in State, Tribal, and/or international treaty forums. In addition, there are no criteria specified with which to make a determination of overfished or overfishing. Determinations of those salmon stocks listed in OLO do not account for all components of the stock, some of which are listed under ESA. Therefore, it would be inaccurate to list this stock according to those determinations. In the event that actions outside of the current management regime impact this species, management objectives could be developed and incorporated by plan amendment.
