

to assist State Departments of Agriculture or other appropriate State agencies in conducting studies or developing innovative approaches related to the marketing of U.S. food and agricultural products. Other organizations interested in participating in this program should contact their State Department of Agriculture's Marketing Division to discuss their proposal.

Proposals are submitted by the State Agency and must be accompanied by completed Standard Forms (SF)-424 and SF-424A. Under this program, AMS will not approve the use of funds for advertising or, with limited exceptions, for the purchase of equipment or facilities. Detailed program guidelines may be obtained from your State Department of Agriculture, the above AMS contact, or the FSMIP Web site: <http://www.ams.usda.gov/tmd/fsmip.htm>.

FSMIP funds can be requested for a wide range of marketing research and marketing service activities, including projects aimed at:

(1) Developing and testing new or more efficient methods of processing, packaging, handling, storing, transporting, and distributing food and other agricultural products;

(2) Assessing customer response to new or alternative agricultural products or marketing services and evaluating potential opportunities for U.S. producers, processors and other agribusinesses, in both domestic and international markets; and,

(3) Identifying problems and impediments in existing channels of trade between producers and consumers of agricultural products and devising improved marketing practices, facilities, or systems to address such problems.

While all proposals which fall within the FSMIP guidelines will be considered, States are encouraged to submit proposals that have regional or national significance and that foster innovation in the following arenas:

(1) Global Economy—preparing U.S. producers to market profitably in a rapidly changing global environment where 96 percent of the world's consumers reside outside the United States;

(2) Consumer-Driven Agriculture—responding to consumer concerns about health and food safety; developing new products that address the needs of the mobile, time-pressed consumer; and studying the uses and value to consumers of food labeling and packaging alternatives;

(3) Agricultural Diversity—identifying niche market opportunities; exploring new markets for agricultural products,

such as for industrial and nutraceutical applications; developing value-added products that meet consumer needs while enabling producers to retain a larger share of the food dollar; and developing marketing tools and strategies that will foster long term sustainability of the environment and viable rural communities;

(4) Technical Innovation—using technology to improve food quality, develop new products or processing methods, and address food safety concerns through improved handling processing, or and packaging; and

(5) Transportation and Distribution—fostering efficiencies in the transportation and distribution of U.S. food and agricultural products both domestically and overseas; addressing challenges to exporters of identity-preserved grain and other specialty commodities; assisting small and medium scale producers overcome barriers to accessing new or expanded markets; and applying supply chain management in the marketing system.

FSMIP is listed in the "Catalog of Federal Domestic Assistance" under number 10.156 and subject agencies must adhere to Title VI of the Civil Rights Act of 1964, which bars discrimination in all Federally assisted programs.

### Rural Utilities Service

#### Georgia Transmission Corporation; Notice of Finding of No Significant Impact

**AGENCY:** Rural Utilities Service, USDA.

**ACTION:** Notice of Finding of No Significant Impact.

**SUMMARY:** Notice is hereby given that the Rural Utilities Service (RUS) has made a finding of no significant impact with respect to a request from Georgia Transmission Corporation for financing assistance from RUS to finance the construction of a 230/115 kV substation and a 230 kV transmission line in Cobb County, Georgia.

**FOR FURTHER INFORMATION CONTACT:** Bob Quigel, Environmental Protection Specialist, Engineering and Environmental Staff, RUS, Stop 1571, 1400 Independence Avenue, SW., Washington, DC 20250-1571, telephone (202) 720-0468, e-mail at [bquigel@rus.usda.gov](mailto:bquigel@rus.usda.gov).

**SUPPLEMENTARY INFORMATION:** Georgia Transmission Corporation proposes to construct a 230 kV transmission line and substation in western Cobb County, Georgia. The proposed 230/115 kV McConnell Road Substation will be located approximately 1/2 mile west of the intersection of Lost Mountain Road and Dallas Highway (State Road 120). The proposed transmission line will traverse east from the proposed substation adjacent to Dallas Highway for approximately 6.3 miles and connect to an existing 230 kV transmission line near the intersection of Dallas Highway and Mt. Calvary Road. The transmission line would be supported by steel, single-pole, self-supporting and guyed structures. The proposed transmission line will be constructed as an overbuild of the existing distribution line along Highway 120 between the 230 kV tap point and the Lost Mountain Substation. The distribution line will share the proposed 230 kV transmission line structures with intermediate poles put in place to reduce sag of the distribution conductors. The existing distribution line easement is within the Georgia Department of Transportation Dallas Highway right-of-way. Georgia Transmission Corporation proposes to place the new poles near the same locations as the existing poles wherever possible. However, Georgia Transmission Corporation will need to purchase and clear an additional 20-foot of easement on private property.

Copies of the Finding of No Significant Impact are available from RUS at the address provided herein or from Ms. Gayle Houston of Georgia Transmission Corporation, 2100 East Exchange Place, Tucker, Georgia 30085-2088 telephone (770) 270-7748.
