V. Application Review Information

1. *Criteria.* FAS will use the following criteria in evaluating proposals:

- The ability of the organization to provide an experienced staff with the requisite technical and trade experience to execute the proposal;

- The extent to which the proposal is targeted to a market in which the United States is generally competitive;

- The potential for expanding commercial sales in the proposed market;

- The nature of the specific market constraint or opportunity involved and how well it is addressed by the proposal;

- The extent to which the importer's contribution in terms of handling and processing enhances the potential outcome of the project;

- The amount of reimbursement requested and the organization's willingness to contribute resources, including cash and goods and services of the U.S. industry and foreign third parties; and

- How well the proposed technical assistance component assures that performance trials will effectively demonstrate the intended end-use benefit.

Highest priority for funding under this announcement will be given to meritorious proposals that target countries that meet either of the following criteria:

- Per capita income less than \$10,065 (the ceiling on upper middle income economies as determined by the World Bank [World Development Indicators 2005/2006]); and population greater than 1 million. Proposals may address suitable regional groupings, for example, the islands of the Caribbean Basin; or

- U.S. market share of imports of the commodity identified in the proposal of 10 percent or less.

2. *Review and Selection Process.* Proposals will be evaluated by the applicable FAS commodity division. The divisions will review each proposal against the factors described above. The purpose of this review is to identify meritorious proposals, recommend an appropriate funding level for each proposal based upon these factors, and submit the proposals and funding recommendations to the Deputy Administrator, Commodity and Marketing Programs.

3. *Anticipated Announcement Date.* Announcements of funding decisions for the QSP are anticipated during June 2006.

VI. Award Administration Information

1. *Award Notices.* The FAS will notify each applicant in writing of the final disposition of its application. The FAS will send an approval letter and agreement to each approved applicant. The approval letter and agreement will specify the terms and conditions applicable to the project, including the levels of QSP funding and any cost-share contribution requirements.

2. *Administrative and National Policy Requirements.* The agreements will incorporate the details of each project as approved by FAS. Each agreement will

identify terms and conditions pursuant to which CCC will reimburse certain costs of each project. Agreements will also outline the responsibilities of the participant, including, but not limited to, procurement (or arranging for procurement) of the commodity sample at a fair market price, arranging for transportation of the commodity sample within the time limit specified in the agreement (organizations should endeavor to ship commodities within 6 months of effective date of agreement), compliance with cargo preference requirements (shipment on United States flag vessels, as required), compliance with the Fly America Act requirements (shipment on United States air carriers, as required), timely and effective implementation of technical assistance, and submission of a written evaluation report within 90 days of expiration of the agreement.

QSP agreements are subject to review and verification by the FAS Compliance Review Staff. Upon request, a QSP participant shall provide to CCC the original documents which support the participant's reimbursement claims. CCC may deny a claim for reimbursement if the claim is not supported by adequate documentation.

3. *Reporting.* A written evaluation report must be submitted within 90 days of the expiration of each participant's QSP agreement. Evaluation reports should address all performance measures that were presented in the proposal.

Background

Several statutes authorize the Forest Service to issue and administer authorizations for use and occupancy of National Forest System (NFS) lands and require the collection of information from the public for those purposes, including the Organic Administration Act of 1897 (16 U.S.C. 551); Title V of the Federal Land Policy and Management Act of 1976 (FLPMA, 43 U.S.C. 1761-1771); the Act of March 4, 1915 (16 U.S.C. 497); the National

Forest Ski Area Permit Act (16 U.S.C. 497b); section 28 of the Mineral Leasing Act (30 U.S.C. 185); the National Forest Roads and Trails Act (FRTA, 16 U.S.C. 532-538); section 7 of the Granger-Thye Act (16 U.S.C. 480d); the Act of May 26, 2000 (16 U.S.C. 460l-6d); and the Federal Lands Recreation Enhancement Act (16 U.S.C. 6801-6814).

Forest Service regulations implementing these authorities, found at 36 CFR part 251, subpart B, contain information collection requirements, including submission of applications, execution of forms, and imposition of terms and conditions that entail information collection requirements, such as the requirement to submit annual financial information; to prepare and update an operating plan; to prepare and update a maintenance plan; and to submit compliance reports and information updates. The information collection requirements described in this request for an extension with revision of a currently approved information collection are necessary for the Forest Service to issue and administer special use authorizations to use and occupy NFS lands under these authorities.

The information collected is evaluated by the Forest Service to ensure that authorized uses of NFS lands are in the public interest and are compatible with the agency mission. The information helps the agency identify environmental and social impacts of special uses for purposes of compliance with the National Environmental Policy Act and program administration. In addition, the agency uses the information to ascertain whether the land use fee being charged for special use authorizations is based on market value. The information is collected through application forms and terms and conditions in special use authorizations and operating plans.

There are six categories of information collected: (1) Information required from proponents and applicants to evaluate proposals and applications to use or occupy NFS lands; (2) information required from applicants to complete special use authorizations; (3) annual financial information required from holders to determine land use fees; (4) information required from holders to prepare and update operating plans; (5) information required from holders to prepare and update maintenance plans; and (6) information required from holders to complete compliance reports and information updates. The six categories cover all information collection requirements involved in administration of the special uses program, including application and
